MAGNITUDE OF STORM'S FURY ON THE GULF COAST BECOMING MORE SERIOUS

Town After Town in Mississippi Tells of Severe Damage.

Almost Unbroken Line of Wrecked Vessels Along the Gulf.

Cabins of the Negroes Were Blown Down by Scores.

New Orleans, Sept. 29.—Hourly the accounts of the magnitude of Thursday's storm in Mississippi became more serious today as the interrupted telegraphic communication with that state was resumed in every direction. Town after town in the interior wired here that buildings had been blown down, lives endangered and crops blown flat in the fields.

Simultaneously there arrived an enumeration of an almost broken line of wreckage of shipping on the gulf coast in the direction of Mobile. However, all reports of this situation ended abruptedly at a point about fifty miles west of Mobile. In addition to the shipping washed ashore on the mainland, first reports came in today of vessels wrecked or stranded on the chain of islands out in the gulf which form the Mississippi sound.

The little news which arrived from the Mississippi river delta added to the property damage reported there, but although the lower end of the delta had been submerged as far as the eye could reach and although steamers coming up the river reported that they had passed floating household goods, no loss of life was reported. It may be several days before the details are learned about the fishing and oyster country in the low delta lands, which are isolated even from quarantine and Pilot Town, the only places on the lower river having telegraphic communication with this city.

Damages of $10,000 at Fort St. Philip, located about sixty miles below here on the Mississippi river, were reported today by incoming steamers. A portion of the levees erected to protect the fort against just such tides is reported to have broken and allowed the magazines to flood. New quarters under process of erection were also reported swept away.

Reports from the 100 miles of gulf coast through which the Louisville & Nashville opened communication last night says several men were drowned during the hurricane while attempting to save their boats.

Despite the large loss of shipping on the coast, the towns and health resorts on the water's edge suffered almost no damage up to the fifty miles radius out of Mobile.

Both the Cumberland Telephone company and officials of the Louisville & Nashville announced today that they hope to have wires working into Mobile some time tonight.

Reports from Hattiesburg, Miss., are that the town had suffered about $300,000 damage from wind and water. During the latter part of the blow there was such a quantity of wreckage in the streets that few persons attempted to walk about. The fire deparement was called out in the vicinity of Gordon Sreek to rescue women and children imprisoned in their homes by an overflow of the creek. Five buildings were blown down, one of them being a large warehouse. The First National bank was unroofed.

Brookhaven reported that engine

(Continued on page 4, fourth column.)

REVENUE CUTTER ALERT IS SUNK

At Her Berth in Mobile by River Steamer Nellie.

Washington, Sept. 29.—Assistant Secretary Edwards has received a telegram from F. M. Rock, engineer in charge of the revenue cutter Alert, dated at Mobile, Sept. 28, as follows:

"Alert was sunk at her berth at 7 o'clock this morning by the river steamer Nellie running into her during a violent easterly gale. Impossible to estimate damages at present."

Nothing has been heard of the revenue cutter Winona or the launch Penrose, which was in Mobile harbor at the time of the hurricane.

The military secretary has received the following telegram from Capt. Dwyer, commanding at Fort Morgan, at the entrance of Mobile harbor, dated yesterday:

"The post has been swept by a terrific storm, the entire post having been under water. Every building in the post is seriously damaged, and some have been destroyed completely, including the pumping station which furnished water supply, ordnance store house, quartermaster's store house, two primary stations, with instruments, the quartermaster's dock and the main water tank. It is thought possible to have water transported from Mobile temporarily after storm subsides. Request authority for necessary emergency repairs. Request inspectors be sent to ascertain and report upon damage. No casualties so far as known."

MANY HAVE PERISHED

In the Fearful Storm Which Swept Over Mobile Wednesday.

Damage in the City and Outside Points Reaches Millions.

Mobile, Ala., Sept. 29.—Between seventy-five and 100 lives lost, fully two score vessels driven ashore or wrecked in various parts of the gulf of Mexico, damages amounting to $4,500,000 in the city of Mobile and to the extent of millions more at outside points is the record of the storm which swept over Mobile on Wednesday and Wednesday night. No accurate estimate of the number of casualties can be made now and it is doubtful if it will be known for a week or more.

Grave apprehensions exists regarding the situation at Gulfport, and Biloxi, where it is believed that many lives have been lost. Reports from those places are however, meagre and unsatisfactory. It is declared by the local municipal officials that no lives have been lost in the city of Mobile, but that all of the deaths have occurred in places within a radius of fifty miles of here.

The dead as far as known at present are as follows:

At Navy Cove—Mrs. D. Ladimer and two daughters; Alexander Johnson; Henry Johnson.

At Coden—Mrs. Simon Klosky; little grandson of Mrs. Klosky; Susan Crevillon, servant of Mrs. Klosky; O. W. Nerth; Mrs. O. W. Nerth; Mrs. S. McRat; Miss McRae; Mrs. Henry Turner; Captain J. Stevens; three Misses Alexander; Edward Hueland; Mrs. Hueland; three Hueland children; three unidentified bodies found on beach.

At Bayon La Batru—Two brothers named Carraway.

At Alabama Port—Mrs. Elijah Nelson.

At Del Champs—Mrs. A. L. Hazen, of New Castle, Pa., and two children;

(Continued on page 7, fifth column.)

AGREEMENT SAID TO BE REACHED

For Transfer of Hill Ore Lands to Steel Corporation.

New York, Sept. 29.—Interests representing the United States Steel corporation and the Hill iron ore property in Minnesota, held an important conference here yesterday and from trustworthy sources it was learned that an agreement concening this much-discussed deal has finally been reached.

Formal announcement giving the terms of the transfer of the ore lands to the Steel corporation will soon be made. Only a few minor details remain to be worked out, according to a statement made by a leading member of the Hill interests and these, it is understood, are in process of satisfactory adjustment. The terms of the deal are still withheld, but it is expected they will be to the very material advantage of holders of the Hill railroad stocks, particularly Great Northern.

The Hill issues were strong and active in the late session of yesterday's stock market, Great Northern preferred making a net gain of ten points and Northern Pacific five and a half. The steel stocks, which had been unde pressure for some days, with especial weakness in the common shares, recovered sharply. Negotiations for the lease of the Hill properties have been under way for the past three years. The Great Northern road has held out for a lease based upon the payment of royalty for every ton of ore mined, with an agreement as to the minimum output. The royalty, beginning at a certain figure, is to be increased until it reaches the price of $1 a ton.

SENSATIONAL RUNAWAY

Of Carryall With Fifteen Girls and One Fatally Hurt.

Ypsilanti, Mich., Sept. 29.—Miss Edith Burke, a high school student, was probably fatally injured last night and half a dozen girl companions were seriously hurt in a sensational runaway, when fifteen high school girls were thrown from a carryall onto a bridge. The excited team dashed away with the excited and terrified girls, when the wagon box was thrown from the gear, striking the railing of the bridge with terrific force. Miss Burke, with her hip and collar bone fractured and internally injured, fell limp and helpless across the bridge railing, being caught by one of the other girls just as she was slipping across the railing, where there was a fall of fifty feet to the river below.

REPORT THAT BOB DUNN WILL RUN FOR HOUSE AS INDEPENDENT CANDIDATE

BURGLARS BLOW SAFE

Of the Hinckley Cash Store and Secure About $64.

Saloon Also Entered But Not Much Booty Secured.

Hinckley, Minn., Sept. 29.—(Special to The Herald.)—Last night the Hinckley cash store was broken into, the safe was blown up and $64 taken. Nothing else is missed. Entrance was made through the front door, which was pried open with a bar. It had been hit with a railroad spike maul and the lock broken out. The maul was found outside the door in the morning. It belongs to the Great Northern. The safe door was blown to pieces and the corners of the safe are cracked. The job was done by experts evidently.

The saloon of the Hinckley Implement company was also entered, entrance being made by breaking a window in the side of the building. A revolver of thirty-eight caliber, cartridges, and whisky were taken here. The burglars missed the cash that was kept in the till in a compartment under the back bar. They went through the desk and cash register. The revolver was taken from the drawer in the back bar.

The losses were not discovered until morning, when the places were opened for business. Patrick Lawless, who lives next door to the Hinckley cash store, says something woke him between 1 and 2 o'clock in the morning and he heard steps on the cement sidewalk. He thinks it must have been the burglars. J. J. Mullen saw suspicious characters near the Northern Pacific depot when the night train came in. There is no clew.

BURIED IN SAND.

Michigan Man Was Dead Before He Could be Taken Out.

Gladstone, Mich., Sept. 29.—John and William Kak, while washing sand down on a bluff, making a country road, were caught in a landslide, both being entirely covered. John was dead before the sand could be removed. He leaves a wife and one child.

Knute Nelson's Friends Are Getting Anxious About Jacobson.

Said That Jake Would Go to United States Senate.

Capitol Commission Pulling Wires to Make Body Permanent.

St. Paul, Sept. 29.—(Special to The Herald.)—Will R. C. Dunn run for the legislature on an independent ticket? There is a strong rumor about the capitol that he would seek a place on the ticket by petition. Prominent Republicans also stated that they have heard a rumor to that effect and one of the country papers has commented in a covert way upon the possible entry into politics by Dunn.

• • •

The friends of Knute Nelson are very much disturbed over the report that Jacobson may be a candidate for the senate next winter. Jacobson has been too active in the campaign to please some of the federal gang and it would not be surprising if Jacobson is sidetracked again, as he was at Duluth. Those who are at work in the interests of Knute Nelson do not view with any degree of pleasure the ascendancy of Jacobson. His famous speech in the Sixth district, which contributed largely to the defeat of Buckman, has shown that in some places at least Jacobson is still popular. If Jacobson decides to get into the race the two will make a pretty run.

• • •

Things have come to light which show that the capitol commission is pulling wires to secure a legislature which will be friendly to the proposition of creating a permanent board to manage the capitol. One of the employes of the commission which prides itself on being out of politics was released from duty by Channing Seabury recently, to work in the interests of Ambrose Tighe, who is known to be very friendly to the capitol commission. Senator Hiler Horton's mantle it is supposed will fall upon the shoulders of Ambrose Tighe. Those who favor the board management of the building are working hard in the interests of the commission.

• • •

The Minnesota Shippers and Accelvers' association of which George S. Loftus is commissioner is now circulating among the various candidates a card upon which several very straight questions are put in relation to railroad matters. The candidate is asked to sign his name if he holds these views

(Continued on page 4, third column.)

REFORMERS.

INTERVENTION IN CUBA AN ACCOMPLISHED FACT

GOVERNOR TAFT'S PROCLAMATION.

Havana, Sept. 29.—Governor Taft's proclamation was as follows:

"To the People of Cuba: The failure of congress to act on the irrevocable resignation of the president of the republic of Cuba or to elect a successor leaves the country without a government at a time when great disorder prevails and requires that, pursuant to the request of Mr Palma, the necessary steps be taken in the name and by the authority of the president of the United States to restore order and protect life and property in the Island of Cuba and the islands and keys adjacent thereto, and for this purpose to establish therein a provisional government. The provisional government hereby established will be maintained only long enough to restore order, peace and public confidence by direction of and in the name of the president of the United States, and then to hold such elections as may be necessary to determine on those persons upon whom the permanent government of the republic should be devolved. In so far as is consistent with the nature of a provisional government established under the authority of the United States, this will be a Cuban government, conforming with the constitution of Cuba. The Cuban flag will be hoisted as usual over the government buildings of the island; all the executive departments and provincial and municipal govrnments, including that of the city of Havana, will continue to be administered as under the Cuban republic; the courts will continue to administer justice, and all the laws not in their nature inapplicable by reason of the temporary and emergent character of the government will be in force.

"President Roosevelt has been most anxious to bring about peace under the constitutional government of Cuba, and he made every endeavor to avoid the present step. Longer delay, however, would be dangerous in view of the resignation of the cabinet.

"Until further notice the heads of all the departments of the central government will report to me for instructions including Gen. Alexandro Rodriguez, in command of the Rural Guards and other regular government forces, and Gen. Carlos Roloff, treasurer of Cuba.

"Until further notice the civil governors and alcaldes will also report to me for instructions.

"I ask all citizens and residents of Cuba to assist me in the work of restoring order, tranquility and public confidence.

"WILLIAM H. TAFT,

"Secretary of War, United States, Provisional Governor of Cuba.'

"Havana, Sept. 29, 1906."

FRISCO LABOR COUNCIL

Asks Hearst to Have Langdon Withdraw as a Candidate.

San Francisco, Sept. 29.—The San Francisco labor council, last night, after formally endorsing the Democratic candidate, Theodore A. Bell, for governor, adopted the following resolutions:

First, that the executive committee should telegraph Samuel Gompers to use his best endeavors with William R. Hearst to have William H. Langdon, the candidate of the Independence league for governor, withdraw; second, that the executive committee of the council call upon the Democratic campaign committee and have the latter wire the Democratic committee of New York to use its influence with Hearst to have Langdon withdraw; third, that the executive committee wire Hearst direct to have Langdon withdraw.

The resolution endorsing Bell was adopted after two hours' debate, in which some of the members stood for Langdon and others for Austin Lewis, the Socialist candidate for governor. The motion to make Bell's endorsement unanimous was lost through the opposition of the Socialists.

TWO WOMEN LOSE LIVES

Twenty Persons Injured in Wreck on the Pennsylvania.

Train From New York Crashed Into Long Branch Express.

Philadelphia, Sept. 29.—Two persons were killed and twenty were injured in a rear end collision of passenger trains of the Pennsylvania railroad at Eddington, Pa., this morning. The dead are Mrs. W. H. Connell, wife of an employe of the railroad, and Mrs. Mary O'Malley of Philadelphia. It is stated by passengers that the Long formation as to the cause of the wreck or the number of killed or injured was refused by the railroad. It is stated by passengers, however, that the Long Branch express bound for Philadelphia had stopped to cool a hot journal. While the train crew were at work on the journal, the express train which left New York at 7:30 a. m. thundered around a curve and crashed into the Long Branch train. It is declared that the express from New York disregarded signals and thus caused the accident. Most of those killed and injured were in a Pullman car on the rear of the Long Branch train. It was cut in two as with a knife and the impact smashed the two coaches ahead of it.

Because of lack of facilities it was some time before the work of rescue began. A train was quickly made up and most of the injured were brought to this city, though some were sent to Bristol and Trenton, others were cared for in neighboring farm houses. The dead were extracted from the masses of wreckage and stretched out alongside of the track. Two hours later a northbound passenger train was stopped at the scene of the wreck and the bodies of the seven dead were sent to a morgue at Bristol, Pa., seven miles from Eddington.

CUT HIS THROAT FROM EAR TO EAR

Eric Erickson, Finlander, Attempts to Commit Suicide at Ely.

Ely, Minn., Sept. 29.—(Special to The Herald.)—Eric Erickson, a Finlander, about 30 years of age, attempted to commit suicide this morning, about 4 o'clock, cutting his throat from ear to ear. He nearly severed the windpipe making it impossible to talk after sewing it up. There is a slight chance for his recovery. The doctor claims he is insane. He is a single man.

MINE ENGINEER KILLED.

Norwar, Mich., Sept. 29.—William Wilcox, an engineer in a mine in this city, was instantly killed yesterday, the lever of his engine striking him on the head and breaking his neck. He was single and the only support for his mother.

TROOPS NOW ARE MOVING

First Expedition to Sail From Newport News at Once.

Taft Issues Proclamation Declaring Himself Provisional Governor.

Brig. Gen. Funston Will Command All Troops in Cuba.

Havana, Sept. 29.—An American provisional government assumed possession of Cuba today when War Secretary Taft's proclamation declaring himself provisional governor of the island was published in the Official Gazette and thousands of printed copies of the document were distributed in Havana and elsewhere.

The terms of the proclamation caused general satisfaction, especially on account of the moderate terms in which it is phrased, its statement that the provisional government of Cuba is undertaken only on account of the necessities of the situation, and it is promised that the provisional government will be maintained purely for the purpose of restoring peace, order and confidence until a permanent government is established. No one appears inclined to doubt the good intention of President Roosevelt and his representatives, and there is no apprehension of any serious trouble or resistance to the provisional government in any part of Cuba.

While Governor Taft has not yet taken possession of the palace, this is only because ex-President Palma will not be ready to vacate the official residence until Monday, and Mr. Taft desires to do whatever he can to suit the ex-president's convenience.

No disturbance of any kind occurred last night. A striking feature of the provisional government is the fact that the Cuban flag has not been lowered. This establishes a precedent in provisional governments and protectorates.

Intervention by the government of the United States followed the failure of the Cuban congress yesterday to take any action on President Palma's resignation. There was an exciting debate in the afternoon, followed by a recess until 9 p. m. At that hour, only a few members of the congress met. The session simply dissolved, and at 10:30 the lights were extinguished.

Governor Taft proceeded to the palace at noon today to take over the government of Cuba. The act was not accompanied by any formal ceremony.

During the morning Brig. Gen. Funston conferred with Mr. Taft regarding the location of the camps for the first division of the American troops to be landed here. The sites have not yet been selected. Funston will command all the troops in Cuba.

Washington, Sept. 29.—Secretary Taft has cabled from Havana to Acting Secretary Oliver, at the war department, to send the American troops to Cuba, in accordance with the program already arranged. Secretary Oliver is trying to communicate this dispatch by wireless telegraphy to the president, off Barnstable, Mass., on the Mayflower or the Missouri of the Atlantic fleet, in order to secure the necessary presidential authorization of the movement.

While waiting to hear from the president at Barnstable, Acting Secretary of War Oliver has issued orders for the first expedition of 5,500 soldiers to prepare to sail from Newport News as soon as possible. This is subject to approval by the president, but it is believed at the war department that, as the president and Secretary Taft probably had a thorough understanding of what should be done in the present emergency before Secretary Taft sent his message this morning calling for the troops, there will be no delay in securing the necessary formality of the president's approval. Therefore, the entire program is being put in execution. Quartermaster Gen. Humphrey has been ordered to immediately contract for the necessary transports to convey the troops to Cuba, and the traffic managers of the railroads centraling at Newport News have been instructed to prepare to entrain immediately the troops at the various army posts, which have been selected by the general staff for Cuban service.

The city is quiet and the only American forces now ashore consist of the detail of marines guarding the treasury.

PRESIDENT ROOSEVELT

Now Witnessing Target Practice by North Atlantic Squadron.

Barnstable, Mass., Sept. 29.—The government yacht Mayflower, with President Roosevelt on board, joining the battleships of the North Atlantic squadron shortly before 8 o'clock this morning, and preparations were at once begun for the target practice, to witness which the president made the trip from Oyster Bay today.

HOW TO FIND OUT

Fill a bottle or common glass with your water and let it stand twenty-four hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains the linen it is evidence of kidney trouble; too frequent desire to pass it, or pain in the back is also convincing proof that the kidneys and bladder are out of order.

WHAT TO DO.

There is comfort in the knowledge so often expressed that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the night. The mild and the extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists in fifty-cent and one-dollar sizes.

You may have a sample bottle of Swamp-Root, the great kidney remedy, and a book that tells all about it, both sent absolutely free by mail. Address, Dr. Kilmer & Co., Binghamton, N. Y. When writing be sure to mention that you read this generous offer in the Duluth Daily Herald. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

CITY BRIEFS

Appraisers Still Working.

The board of appraisers who are to fix the values of property taken under condemnation proceedings for the right of way of the Wisconsin Central road, held a short session this morning and adjourned until Monday morning. The matter of the Oulette & Baxter factory property at Garfield avenue and Railroad street is still under consideration. It is understood that there is much testimony to be introduced yet relative to the value of the property.

Conference at Minneapolis.

The annual Northern Minnesota conference of the Methodist Episcopal church will be held next week at Minneapolis. As is customary, the pastors of the conference will be assigned to their posts and it is expected that there will be some changes in local Methodist churches. Rev. Charles Fox Davis, who has been pastor of Lester Park M. E. church for the past four years, will probably preach his last sermon there Sunday, as he expects to be assigned to another church.

Sharp Frost Expected.

Weather Forecaster Richardson expects a frost in Duluth and vicinity tonight and warns people to get their plants and flowers under shelter.

Jury Returns Sealed Verdict.

The jury in the Nick Anderson damage suit, which has been on trial this week, returned a sealed verdict at about 2 o'clock this morning, after having been out over twelve hours. The verdict will be read at the opening of court Monday morning. Anderson sued the Pit Mining company for $30,800 for an injury which he claimed he sustained while working in its mine, and which he maintained was caused by the negligence of the company.

Is Back From Abroad.

Rev. Hjalmar Henricksen, pastor of the Bethel Baptist church of this city, is back from his tour in Sweden, where he went the early part of the summer. He says he is delighted at being back in in Duluth again. The church held a reception of welcome to him Wednesday evening. Rev. Henricksen will give an address Oct. 11, at the church, on events observed by him during his trip in the old fatherland.

Y. M. C. A. Meeting.

A devotional meeting will be held in the Assembly room at the Y. M. C. A. at 3:30 p. m. This meting will be preparatory to the larger meetings that are to follow. The general secretary, Mr. Bevis, will speak and the plans of the year will be presented and outlined.

Bundle Shower.

Miss Jacobson entertained Thursday evening at a surprise party and bundle shower in honor of Miss Susie Gund.

Is Probably Insane.

In probate court Monday, Judge Middleoff will examine a man who was recently picked up on the streets of this city by the police and who sometimes gives his name as John Allen and at other times does not seem to know his name. The man has all the appearances of being insane and will probably be sent to the Fergus Falls hospital.

Letters of Administration.

Mrs. Marie Skramstad of Virginia entered a petition in probate court this morning asking for letters of administration in the estate of her deceased husband, Hogan J. Skramstad, who died last January.

PERSONALS

T. D. Sharp left for St. Paul today.
V. M. Webster left for Sioux City, Iowa, today.
N. L. McDermott left for Butte, Mont., today.
F. E. Everett left for St. Paul today.
Mrs. R. R. Trezona of Eveleth is a guest at the St. Louis.
J. Trezona of Eveleth is at the St. Louis.
R. E. Jones of Two Harbors is a guest at the St. Louis.
Rev. S. L. Mitchell pastor of the First Baptist church, returned yesterday from a few weeks' vacation trip in the East.
X. Derouche of Ontario, who has been visiting relatives in Duluth for several weeks, has returned to his home in order to move his household goods to this city. Mr. Derouche was a resident of Duluth eight years ago and has decided to once more make it his home.
Miss Sophie Holt of 609 West Third street, left during the week for New Orleans, where he will assume a position at Straight University.

VOTE MUST BE COUNTED,

Bemidji, Minn., Sept. 29.—Judge McClenahan has handed down an order in which he declares that the Red Lake agency vote must be canvassed.

The canvassing board a few days ago voted four to one not to canvass the vote from the agency, contending that it was not a legal precinct, and that there were irregularities in the casting of the vote, in that bull-blood Indians were allowed to vote.

"What a difference in the morning!" after 10 days of **POSTUM** "There's a reason"

RAILROADS

RAILROADS TO OBJECT

Dislike Proposed Rule Concerning Publication of Schedules.

Printing Them as Separate Documents Will be Expensive.

The proposed ruling that the schedules of each initial line shall be printed as an independent document and not together with the schedule of any other line, will be strongly protested against by the Western and Southern railroads before the interstate commerce commission at Washington on Oct. 8. The main ground for objection will be that it would enormuosly increase the cost of publishing their tariffs and would complicate instead of simplifying them.

If the ruling is made, it will strike a hard blow at the various traffic associations which are considered to exist in violation of the Sherman anti-trust law. The practice of all the roads but those in the Central Freight association has been to fix rates throughout their respective territories and that of their connecting lines at meetings of their associations. The association bureaus then get the rates printed and issued them, those of all the roads in an association being published in a single tariff pamphlet.

According to a passenger official of a Southern line the tariffs whose publication now cost the thirty-one Southeastern Passenger association roads $10,000 would cost them $100,000 under the proposed system. An official of a Chicago and Ohio river committee line said that freight tariffs which now cost $15,000 to $20,000 would cost $200,000 under the proposed new order of things. The increased expense to all the roads, it is declared, would exceed $2,000,000 annually.

Owing to the dubious legal standing of the association, however, there is doubt as to how much effect these arguments will have upon the commission. The issuance of tariffs is one of the principal functions of the bureaus. To deprive them of this function would be to remove of the chief excuses for their existence, and it is said there is good ground for believing that this is exactly what the commission aims to do.

That the prposed ruling would not necessearily tend to put the association out of business is indicated by the existence of the Central Freight association, which does not have its bureau issue tariffs, but merely fixes rates and leaves them to be publisned by the carriers in a way in some respects similar to that proposed by the commission.

Miss Fitzpatrick

Announces her fall opening for Monday, Tuesday and Wednesday, Oct. 1, 2 and 3. Miss Fitzpatrick has engaged Miss Huse for her trimmer.

Miss Huse has held some very fine positions in Chicago and is considered an artist in the millinery world.

HARRIMAN NOT MENTIONED.

No Evidence of Control of Milwaukee Develops at Annual Meeting.

Milwaukee, Sept. 29.—The annual meeting of the Chicago, Milwaukee & St. Paul Railway company is being held in Milwaukee today. Among the questions which it is said will come before the meeting are the proposed increase of the capital stock of the company from $132,000,000 to $215,000,000, a loan of $50,000,000, to be negotiated in France, and extensions and improvements in process of construction, involving an expenditure of $75,000,000.

Among the prominent officials attending the meeting are Roswell Miller, chairman of the board of directors; President A. J. Earling, Henry H. Rogers, William Rockefeller, Peter Geddes, Frank S. Bond and Herman Miller.

Before the meeting was called none of the officials would talk concerning the business which was scheduled to come up. Notwithstanding rumors that there would be important changes in the policy of the road, nothing of the kind has materialized. Rumors that E. H. Harriman, president of the Union Pacific road, would today become not only a director, but chairman of the board of the 'Milwaukee' system, were not verified. His name was not even mentioned in that connection.

Roswell Miller, Peter Geddes, William Rockefeller and John A. Stewart, all of New York, were re-elected directors. Other directors held over. At the meeting full reports of progress on the Pacific extension improvements were received.

DULUTH GYMNASIUM CLUB.

28 West Superior street. Ruth A. Roberts, director. Classes begin Oct. 2. Pupils received during the month for class and private work. Office hours, 1 to 2 p. m. daily and by appointment.

LARGE ATTENDANCE.

The Northern Railway Club Holds Very Successful Meeting.

The meeting of the Northern Railway club, held at the Commercial club rooms last evening, was largely attended. An interesting paper on "Radiation and Convection of Steam Surfaces" was read by Arthur H. Kreiger and J. O. Olson of Two Harbors read an instructive paper on "Front End Construction."

In the absence of President McGonagle, Vice President E. C. Blanchard presided. C. L. Kennedy, secretary, is away on his vacation, and his place at the meeting was filled by S. F. McLeod. Among those contributing to the entertainment during the evening were Prof. Tyler with a vocal selection; J. C. Myron, song and recitation; G. W. Sharp, recitation, and John Perry and Frank Ross of the Metropolitan theater.

Duluth, Minn.

COPPER STOCKS ARE UNCHANGED

Butte Coalition is Again a Feature of Listed Market.

The copper stock market was practically unchanged at the close of a rather quiet session today. Butte Coalition was again a feature. It opened at $39.75, declined to $39.37½ and rallied to $40, closing at $39.87½ bid and $40 asked.

North Butte opened at $99.50, declined to $99 and closed at $99 bid and $99.50 asked. Amalgamated opened at $110.40, sold as low as $110, rallied to $111.87½ and closed unchanged from yesterday $111.50 bid and $111.62½ asked.

Anaconda opened at $282, declined to $280, rallied to $282 again and closed at $282 bid. Calumet & Arizona opened at $119, sold at that price and closed at $119 bid.

The unlisted shares had a quiet tone. Cananea Central was steady, selling at $19.25 and closing at $19.25 bid and $19.50 asked. Superior & Pittsburg sold at $19.75 and $19.62½ and closed at $19.62½ bid and $19.87½ asked. Globe Consolidated sold at $6.75 and $6.87½ and closed at $6.62½ bid and $6.75 asked.

Denn-Arizona was inactive and closed at $19.24 bid and $19.75 asked. Kewecnaw at $11 bid and $11.25 asked. Hancock Consolidate at $7.75 bid. Warren at $14 bid, Copper Range at $71.75 bid and $2 asked, Calumet & Montana $1.50 bid and $1.75 asked and Cliff $5 bid and $5.50 asked.

Black Mountain sold at $9.12½ and $9.25 and closed at $9 bid.

HAYES WAS CAUGHT.

Boston Herald: John Hayes of Saxonville, who keeps a grocery store, is a practical joker, but eight or ten years ago he met a man of his own caliber.

"He walked into the store," says Hayes, "and ordered a yard of milk. I thought a moment, and then got an old yard-stick. Bringing it to the counter, I stuck my finger into a bottle that contained a small quantity of milk. I drew the finger out covered with the milk, and traced a line along the counter the length of the yard-stick. Removing the measure I confronted the customer triumphantly, asking, "Is there anything else?"

"Yes, wrap the milk up," he said.

The World's Railways.

Although the European countries started building railroads earlier than the United States, statistics show we are now far ahead of them all, in fact we have over 10 per cent more miles of main tract than the whole of Europe combined. This remarkable showing is probably only equalled by one other and that is, the wonderful record of cures made by the celebrated Hostetter's Stomach Bitters. It was first introduced 53 years ago and today is far ahead of any other stomach remedy, both in prestige and cures. If the stomach is weak, tongue coated, appetite poor, or bowels constipated we know of nothing that will do you so much good as a few doses of the Bitters. Try it and see. It always cures indigestion, dyspepsia, heartburn, flatulency, female ills or malaria.

A FAMILY CAMPAIGN.

In Colusa county, Cal., recently, Miss Florence Berker ran against her father, P. F. Berker, the incumbent, for the office of school trustee and beat him after a hot campaign, says the Kansas City Journal. She did it because she had heard her father intended to oust a female teacher who was a friend of hers.

Moderate Price **Calumet Baking Powder**

$1,000.00 will be given for any substance injurious to health found in Calumet.

MARINE

Can Carry Passengers.

Detroit, Sept. 29.—The recent decision of Solicitor Nesbit of the department of commerce and labor that a towing vessel at Louisville, Ky., which carried friends of the owners free without having a passenger license was not in conflict with the statutes, is upheld by the department. This information comes to Supervising Inspector Westcott in a letter from Washington. He says it means that freighters and boats other than regular passenger steamers may carry persons without a passenger permit, as has been the rule on the lakes.

Will Be Named Wilpen.

Detroit, Sept. 29.—Wilpin is the name selected for the second steamer to be built at the Ecors shipyard for the Shenango Steamship company. This is the name of M. P. Snyder's property near Pittsburg.

The Hopkins Released.

Sault Ste. Marie, Sept. 29.—The steamer Hopkins was released from Round island yesterday apparently uninjured.

Wages to be Raised.

Cleveland, Sept. 29.—A general advance in sailors' wages will be made Oct. 1 and all men employed on vessels of the Lake Carriers' association excepting masters, mates, engineers and first cooks will get more money after next Monday.

Must Load Lighter.

Detroit, Sept. 29.—Vessel owners are advised by President Livingstone of the Lake Carriers to load only to 18 feet 10 inches hereafter owing to the erratic tendency of the water at Lime Kilns crossing.

Passed Detroit.

Detroit, Sept. 29—Up: Bacon, Pridgeon and consort, 9 Friday night; Masaba, Farwell, 9:30; Major, 11; Whitaker, Oliver, 10:49; Midland Queen, 11; Wilkinson, Langdon, 12:20 Saturday morning; Gogebic, Biwabik, 1:30; C. M. Warner, Huson, 1:50; City of Rome, 2:20; America, 3; Owego, 3:20; Pendennis White, 4; Columbia, 4:30; Kongo, Squire, 6:30; McDougall, Thomas Stephenson, and winchback, 8. Down: Sellwood, 9 Friday night; Bransford, Robert Wallace, 10; Imperial, 10:40; D. C. Whitney, George Nicholas, 12; Saturn, Pontiac, 12:30 Saturday morning; Princeton, Juno and barge, 2; Ralph and barge, Stackhouse, 3:20; Mariska, Edenborn, Jones, Plummer, 3:40; Tempest No. 1 and barges, 5; Colborn, 7:20.

Up yesterday: Senator, Nyanza, 11:20; Ames, 12; John Owen, Pabst, 1 p. m.; Walter Scranten, J. C. Gilchrist, 3; Miller, 3:30; Paine, Pueblo, 4:30; Faustin, 5:50; Gratwick, 6; Hurlbut, 6:30. Down: Ellwood, 11:30; Hiawatha, 12; Cuddy, 1 p. m.; Britannic, 1:20; Plankinton, Schuette, 1:40; Harvard, Wissahickon, 2:15; Maletoa, Marsala, 3:30; Bull, 3:40; Angeline, 4; Tempest and barge, 5:20; Commodore, 6:30; Lucy Neff, 6:40; Holmes, 7:30; Winnebago, 7:30; Syracuse, 8.

The Sault Passages.

Sault Ste. Marie, Mich., Sept. 29.—(Special to The Herald.)—Up: Prentice, Halstead, 9:30 Friday night; Steel King, 10; Augustus Wolvin, Presque Isle, 11:30; Superior, Lake Shore, 2 Saturday morning; Fairbairn, Holley, 3; W. L. Brown, Heffelfinger, 3:40; Choctaw, 4:40; Watt, Malta, 6; Monroe Smith, 7; Matthews, B. Lyman Smith, &. Saskatchewan Valley and Alberta Lands!

OUR CHEAP FALL EXCURSIONS TO WESTERN CANADA.

Commence on Tuesday, Oct. 2nd, and will be run twice every week until Nov. 30. These cheap excursion rates are given only to those who will agree to buy land or settle along our line of railway in Western Canada. The prices of lands in general will likely be advanced about Oct. 15th or Nov. 1st. Therefore, the sooner you make your selection of a good piece of our choice farming lands, for either a home or a very profitable investment, the better we can please you. Don't wait, as so many have done, for some one else will have forethought enough to **Grasp Your Opportunity.**

Prices Now—$10.00 to $14.00 per acre for the pick of the best selections from four to eight miles from railway.

Ternms Now—$3.00 and $3.50 per acre down, and balance on 5 years' time, 6 per cent.

We have some lands sold on crop payment plan, and have a few Free Homesteads still left.

Come Now—First Excursion Leaves Duluth Tuesday Evening, October 2nd.

BOY WOUNDED IN THE SIDE

Careless Handling of a Rifle Results In Shooting Accident.

As a result of an accidental shooting affray in Goosetown, in the hill district above Tenth street, this morning, a 12 or 13-year-old boy, named Lasinski, son of Anthony Lasinski, of 405 East Fourteenth street, has a flesh wound in his right side.

The affray was reported to Sergeant R. J. Gillon of the police department shortly before noon by Anton Kuchirski, who resides in the hill district, and who complained that there was too much carrying of weapons by young boys in that neighborhood.

Sergeant Gillon made an investigation, but was unable to gain much information, as the boys who were mixed up in the accident fled right after the shooting, and the Lasinski boy's father was out hunting for a physician. It was stated, however, that the wound was a very slight one.

As near as he could find out, the Lasinski boy and two or three others of his age were fooling with a rifle, when it was discharged. The other boys fled and hid themselves, and the people in the neighborhood seemed little disposed to render any assistance in finding them, although ready enough to complain that the police department should take a hand and prevent boys from carrying dangerous weapons.

Anthony Lasinski, father of the injured boy, is a janitor at the city hall.

Good for the cough, removes the cold, the cause of the cough. That's the work of Kennedy's Laxative Honey and Tar—the original laxative cough syrup. Contains no opiates. Sold by all druggists.

Peterman's Roachfood.

A BOON TO HOUSEKEEPERS.

As the roaches go to the food, enticed by it at night from their breeding places, it eliminates them, large or small.

It has been sent for 20 years to large institutions throughout the U. S. and abroad, with bills not payable unless it did the work to their entire satisfaction.

PETERMAN'S RATMOUSE FOOD. Ready for Use.

Rats and mice made wild by this noxious food alarm others; they will leave the building and not return.

Peterman's Ant Food, a strong food to kill and drive away ants. Large black beetles may also be destroyed by it in one night.

BED BUGS—"Peterman's Discovery" (quicksilver cream) will kill bedbugs that go over where it is painted on lightly; is also a preventative. It will not rust or harm furniture or bedding.

"Peterman's Liquid Discovery," in flexible can, with spout; pressing sides of can will force it in cracks and kill bedbugs and eggs instantly.

Take no other, as time may be even more important than money.

Originated in 1873. Perfected in 1906 by Wm. Peterman, Mfg. Chemist, 54, 56, 58 West 13th St., New York City.

Sold by the drug trade generally, and at wholesale by the Leithhead Drug Co., general distributors for the Northwest.

We Are to Make The Great—

LANPHER FUR COATS

IT will pay you to learn to judge fur coat values; nearly every man needs a fur coat for health—let alone comfort and the distinction a nice fur coat gives its wearer.

We are giving away a little book, written from your own (the purchaser's) view-point. It tells some things most people don't know about furs—and tells them honestly. You will be interested from the first page to the last—very easy reading. We call it "JUDGING FURS" (see below).

Here is a standard, economical, good-looking fur coat intended for ordinary hard winter wear—
BLACK CHINA DOGSKIN with Nutria collars and cuffs.. **$23**

These coats, for service and appearance, are in many respects the best for the money that can be made. They are warm and durable and easily repaired.

Or, you can indulge yourself in a very rich 'coonskin, selecting the darker furs; with Nutria Beaver and Otter collar and facings, all the way up to **$125.** Here is an idea: Nutria, say **$47**; Fine Beaver, say **$63** to **$70**; unplucked Otter **$68** to **$90.**

These are but a few of over 200 varieties of men's fur coats. We have in stock Men's Fur Coats at **$16** up to **$600** each. Every one a good coat; every coat appropriate for some uses; well made without a single exception. If it's a LANPHER FUR it is made as well as if we made it for our own use; none are made better.

LANPHER FURS are sold by the leading dealer in every community. Write to us for the book "Judging Furs" and we will also send you the address of our nearest dealer.

LANPHER, SKINNER & CO., St. Paul.

BISHOP IS OFFICIATING

Lays Cornerstone of New Pro-Cathedral For Trinity Parish.

Appropriate Exercises Are Held, Participated In By Children.

The cornerstone of the pro-Cathedral which is to be erected at Superior street and Twentieth avenue east for Trinity parish of the Episcopal church, was laid this afternoon by Bishop Morrison.

Communion was celebrated at the chapel this morning, but the actual ceremonies incident to the laying the stone did not begin until 2 o'clock this afternoon.

A large throng, comprising laity and clergy from all parts of the diocese of Duluth, was present at the exercises. Rectors of all the local churches were on hand and with those who are here from outside in attendance upon the Sunday school convention, took part in the ceremonies.

The procession formed at the chapel shortly after 2 o'clock, a crucifix at the head. The order brought Flaaten's band next, followed by another cross.

Immediately behind the second cross was the vested choir, followed by the children of the Sunday school. As the children passed the cornerstone, they deposited cards bearing their names, that they might feel that they were an important part of the church and that their assistance was appreciated.

Following the Sunday school was the contractor, the architect, the vestry and building committee of the parish. This division was followed by a third crucifix, behind which came the bishop, the vicar of Trinity chapel and the clergy.

Besides the cards of the Sunday school children, there were placed in the stone coins minted this year, the canons of the Episcopal church, a copy of the records of the diocese, the names of the communicants of Trinity parish, the names of the vestry, the building committee, copies of the local newspapers and a descriptive booklet of Duluth.

The ceremonies at the laying of the stone were beautiful and impressive.

STATE OF OHIO, CITY OF TOLEDO, LUCAS COUNTY—ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure. DEAF MAN WAS KILLED ON RAIL

Charles Fullerton, Well Known in Bemidji, Meets Instant Death.

Bemidji, Minn., Sept. 29.—(Special to The Herald.)—Charles Fullerton, well known in Bemidji, was instantly killed, Thursday afternoon, at 1 o'clock, about a mile and a half from the village of Puposky, by being run over by a train on the Minneapolis, Red Lake & Manitoba railway.

Fullerton had been to Puposky, and walked from that place to collect some money that was due him at the home of a friend, a mile and a half north of Puposky. He was returning to Puposky, walking in the middle of the railroad track, when he was hit by a train. The train crew saw Fullerton walking on the track, but as the latter was deaf, he did not hear the train, and did not attempt to move from between the rails. Every effort was made to stop the train before hitting Fullerton, but without avail.

Charles Fullerton came to Bemidji three years ago from Iowa, and lived for a time with his son, D. H. Fullerton, but more recently has resided with his daughter, Mrs. W. M. Bavaird, on Irving avenue. He was a painter and worked at his trade about the city. Besides his daughter, Mrs. Bavaird, and his son, D. H. Fullerton, who is at present at Solway, the deceased leaves two other sons, C. H. Fullerton of Lakota, N. D., and Joe Fullerton of Doyon, N. D.

SUSSMAN ARRAIGNED.

Minneapolis, Sept. 29.—Henry Sussman, the self-confessed slayer of his young wife, Fannie Sussman, was arraigned in Judge Waite's court today. He pleaded not guilty and at the request of his attorney the examination was put over until next Wednesday at 10 o'clock. He looked pale and haggard, but otherwise there was nothing in his demeanor to indicate the awful charge that is hanging over him.

Come into our store any time and hear Melba, Caruso, Sousa's Band and Kubelik, free of any charge.

ZENITH MUSIC COMPANY,
NO. 6 EAST SUPERIOR STREET.

FINDS BODY IN CANADA

Thomas Waters Perishes In Jackfish Lake On North Shore.

Decedent Was Explorer Who Formerly Resided Here.

The body of Thomas Waters, an explorer of mineral lands, formerly a resident of Duluth and said to be quite well known among the mining fraternity in this part of the country, was found yesterday in Jackfish lake, on the Canadian shore of Lake Superior.

News of the finding of the body was received this morning in a telegram directed to Leroy Coons, care of the mayor of Duluth. Mr. Coons has left the city to make his home in Canada and as Mayor Cullum is out of the city, Alfred McCallum, the mayor's secretary, attended to the message.

The details were meagre, the telegram merely stating that the badly decayed body of Tom Waters had been taken from Jackfish lake. It was signed by W. Fraser, who asked what instructions were to be given in regard to the disposal of the remains and that the relatives be notified.

The telegram was evidently sent by some person who knew that Waters formerly made his home with Mr. Coons, at Duluth Heights. He was a boarder with Mr. Coons when the latter used to run a boarding house where the St. James hotel now is and made his home with Mr. Coons when the latter moved to the heights.

William McEwen, operator at the police department, who resides on the heights, remembers Waters quite well. He says he was a man about 45 years of age, a bachelor, honorable and upright in his dealings and with excellent habits. Waters visited Duluth about two years ago when he was a guest of Mr. McEwen for a day. At that time he told his host that he was employed by some company interested in a mining venture in the vicinity of the lake where his body was found.

So far as can be learned nobody in Duluth knows much about the decedent's family history or where his relatives can be found.

It is not known yet what action will be taken in regard to the telegram. Publicity is given the matter in the hope that if Waters had any relatives or intimate friends in this part of the country, they may have such disposition made of the body as they may desire.

OCTOBER AN IDEAL MONTH

Record For Thirty-Five Years Shows That Climate Is Perfect.

Data given the month of October for a period of thirty-five years has been compiled from the records at the weather bureau and furnished by Forecaster Richardson. The normal temperature for October has been 49 degrees. The warmest month was that of 1880, when there was an average of 54 degrees, while the coldest was in 1887 with an average of 41 degrees. The highest temperature was reached on Oct. 7, 1886, and Oct. 21, 1901, when the record was 80 degrees; the lowest was that of 8 degrees on Oct. 31, 1878, and Oct. 25, 1887. Sept. 15, 1874, was the earliest date on which a "killing" frost occurred, while the average date for the first "killing" frost is Oct. 4.

The greatest monthly precipitation for October occurred in 1894, when 4.99 inches fell, while the least precipitation occurred in 1895, at which time there was only .09 inches. There have been nine clear days in October on the average, ten partly cloudy and twelve cloudy days.

The prevailing winds in October have been from the northeast, having an average hourly velocity of 8.5 miles per hour. The highest velocity of the wind was forty-eight miles per hour from the northeast on Oct. 28, 1874.

PATENTS TO LYDICKS

Washington, Sept. 29.—The secretary of the interior has issued patents to Nellie Lydick and her two children for their allotments of land adjoining the town of Cass Lake. Mrs. Lydick sued for allotment patents for this land several years ago, after a hard fight with other claimants, but was unable to sell the land to the occupants or to execute leases for the lots.

Under a new law passed at the last session of congress the secretary was authorized to issue the patents to such Indians as are competent to manage their own affairs, and Mrs. Lydick was judged in that class. With the issuance of these patents Mrs. Lydick gains absolute control of the land and can dispose of it as she pleases withuot interference.

WEST DULUTH

GOVERNOR JOHNSON

Great Meeting Monday Evening at Great Eastern Hall.

Fifty-Seventh Avenue Street Railway Extension Being Rushed.

The Democratic rally in West Duluth Monday evening is assuming imposing proportions. Governor Johnson will arrive in Duluth at 7:00 p. m., and will speak at the skating rink in Lincoln Park at 7:30 and expects to be occupied there until 8:15. He will then proceed to the Great Eastern hall in West Duluth where he will speak at 8:30.

The meeting in West Duluth will, however, be opened at 8:00 sharp, L. G. Pendergast, Democratic candidate for lieutenant governor being the speaker who will be heard before the governor's arrival. With these two speakers on the program, a record-breaking political meeting is expected, and from present indications, in the way of interest shown by West Duluthians generally in the event, it will be necessary to be on hand at an early hour in order to gain admittance to the hall.

STREET RAILWAY EXTENSION

Work on Up Hill Line is Now Being Rushed.

Work was recommenced Thursday on the Fifty-seventh avenue extension of the street railway. The crew of men which has been employed laying conduits on Third avenue west was transferred to West Duluth upon the completion of the work uptown, and the welding machine is also at work on the new line.

With good weather the line will be all complete and ready for service in about three weeks, according to one of the officials of the company, and the cars now running to Thirty-ninth avenue west on the Third street line will be run to Fifty-seventh, and up the hill. Welding the rails, and installing the loop at the end of the line is all that remains to be done on the extension.

By running the Thirty-ninth avenue cars to Fifty-seventh, the main portion of West Duluth will be given a ten minute service on both West Duluth and East end, and West Third street lines, which practically amounts to a five minute service to the western end of the city. It is thought that this will be more than sufficient to handle the traffic even during the rush hours of the day.

Seven Years as Pastor.

Tomorrow will conclude the seventh year of the pastorate of Rev. Arthur J. Hoag of the West Duluth Baptist church. His work here has been successful in a high degree. When he came to West Duluth seven years ago the congregation was lodged in a store building on Central avenue, and Mr. Hoag divided his time between it and a small number of Baptists in New Duluth. Soon after the beginnig of his work here the congregation moved into the church building on the corner of Sixtieth avenue west and Bristol street which is now occupied, while this fall will probably see the new handsome church now in construction on the corner of Fifty-ninth and Grace, occupied.

Since Mr. Hoag's arrival, the congregation of the church has more than doubled in size.

Charcoal Kills Bad Breath.

Bad Odor of Indigestion, Smoking, Drinking or Eating Can Be Instantly Stopped.

Sample Package Mailed Free.

Other people notice your bad breath where you would not notice it at all. It is nauseating to other people to stand before them and while you are talking, give them a whiff or two of your bad breath. It usually comes from food fermenting on your stomach. Sometimes you have it in the morning, —that awful sour, bilious, bad breath. You can stop that at once by swallowing one or two Stuart Charcoal Lozenges, the most powerful gas and odor absorbers ever prepared.

Sometimes your meals will reveal themselves in your breath to those who talk with you. "You've had onions," or "You've been eating cabbage," and all of a sudden you belch in the face of your friend. Charcoal is a wonderful absorber of odors, as every one knows. That is why Stuart's Charcoal Lozenges are so quick to stop all gases and odors of odorous foods, or gas from indigestion.

Don't use breath perfumes. They never conceal the odor, and never absorb the gas that causes the odor. Besides, the very fact of using them reveals the reason for their use. Stuart's Charcoal Lozenges in the first place stop for good all sour brash and belching of gas, and make your breath pure, fresh and sweet, just after you've eaten. Then no one will turn his face away from you when you breathe or talk; your breath will be pure and fresh, and besides your food will taste so much better to you at your next meal. Just try it.

Charcoal does other wonderful things, too. It carries away from your stomach and intestines, all the impurities there massed together and which causes the bad breath. Charcoal is a purifier as well as an absorber.

Charcoal is now by far the best, most easy and mild laxative known. A whole boxful will do no harm; in fact, the more you take the better. Stuart's Charcoal Lozenges are made of pure willow charcoal and mixed with just a faint flavor of honey to make them palatable for you, but not too sweet. You just chew them like candy. They are absolutely harmless.

Get a new, pure, sweet breath, freshen your stomach for your next meal, and keep the intestines in good working order. These two things are the secret of good health and long life. You can get all the charcoal necessary to do these wonderful but simple things by getting Stuart's Charcoal Lozenges. We want you to test these little wonder workers yourself before you buy them. So send us your full name and address for a free sample of Stuart's Charcoal Lozenges. Then after you have tried the sample, and been convinced, go to your druggist and get a 25c box of them. You'll feel better all over, more comfortable, and "cleaner" inside.

Send us your name and address today and we will at once send you by mail a sample package, free. Address F. A. Stuart Co., 50 Stuart Bldg., Marshall, Mich.

ALUMNI ELECTS.

Officers Are Chosen by Association of Irving School.

The annual election of officers of the Irving alumni was held last evening in the school building. Those chosen were: President, Ray W. Abbott; vice president, O. S. Olson; secertary, Blanche Mallory; treasurer, Edward Holland.

The matter of admitting high school students as members of the alumni was also considered. Last year the association decided that the highest class in school should be admitted as members, and it was decided last evening that the matter had better be left in this way. This will only permit the present sophomres the privilege of membership until after their graduation as Seniors.

By admitting to membership those who attend the Irving high school the association offers to some fortunate ones the opportunity belonging to both the Fairmount and Irving associations, as those that graduate from the Fairmount school are entitled to membership in that Alumni and by attending the Irving high school they will be entitled to the privileges of a member of the Irving Alumni.

West Duluth Churches.

At the Merritt Memorial M. E. church, Rev. S. G. Briggs will speak in the morning at 11 o'clock on "The Overflowing Jordan," and in the evening at 7:45 on "Enthusiasm." Epworth league will meet at 7 and Sunday school at 10.

* * *

At West Duluth Baptist church, Rev. Arthur J. Hoag will speak at 10:30 a. m., on "Fellowship with God," and at 8 p. m., on "The God of the Valley." B. Y. P. U. will meet at 7 p. m., and Sunday school will convene at noon.

* * *

Rally Day services will be observed in the Westminster Presbyterian church Sabbath morning. There will be recitations and special music by the choir, assisted by Mrs. David Adams. S. A. Blair, Presbyterian Sunday school missionary, will give an address, the service commencing at 10:30.

* * *

At the Plymouth Congregational church, corner of Fifty-fourth avenue west and Bristol, Rev. H. W. Johnson, the pastor, will speak at 10:30 a. m., on "The Church As An Opportunity," and his evening subject will be, "Meeting the Test." There will be special rally day exercises for the Sunday school at noon, to which all members of the congregation and their friends are invited.

* * *

At the Holy Apostles' Episcopal church, corner of Fifty-seventh avenue west and Ellinor street, Sunday school will meet at noon. There will be evening prayer and sermon by the pastor, Rev. R. J. Mooney, at 7:30, the subject of the sermon being the fourth commandment, "Remember That Thou Keep Holy the Sabbath Day."

* * *

At the Asbury M. E. church, Rev. E. C. Clemans, D.D., presiding elder of Duluth district will speak at 10:30, the fourth quarterly conference being held at the close of the service. In the evening, at 8, Rev. Thomas Grice, the pastor, will preach the final sermon of the conference year, on the topic, "How Christ Came Into His Own." Sunday school will convene at noon, and Epworth league at 7 p. m.

* * *

At the Norwegian Lutheran Synod church, corner of Fifty-seventh avenue west and Gosnold street, there will be evening services, commencing at 7:30. Rev., H. O. Sauer, the pastor, will preach. Sunday school meets at 9:30 a. m.

West Duluth Briefs.

This evening's session will bring to a close the St. James' bazar, which has been, in the opinion of its directors, one of the most successful in the history of the church. This evening the $300 oil portrait of Father Lynch will be awarded, and all the other contests will be decided. It is thought certain that the bazar will net more than the $2,000 expected of it.

Rev. and Mrs. S. G. Briggs of the Merritt Memorial M. E. church returned today from a week's outing at the camp of Lon Merritt, at Pike Lake. Mr. Merritt will break up camp for the winter the first part of next week.

G. A. Terry is laid up with a bad attack of rheumatism.

W. F. Hurst, Jack Shannon and Atle Swanson expect to go up the river to Swanson's camp tonight and remain over Sunday on a duck hunting expedition.

Mrs. George Lloyd left Thursday evening for Houghton for a two weeks' visit with relatives.

An indication of the prosperity of West Duluth is the increasing sales in real estate which are recorded for the western part of the city. J. A. Scott says that his agency transferred $17,200 worth of real estate during the month of September, and he has deals on, which may mature today which will bring the total up to over $25,000. This is the largest sale for any one month since the boom days.

Mrs. Ernest Kuchenbecker of 107 North Sixty-third avenue west entertained a number of her friends at a luncheon on Thursday afternoon.

E. D. Nickerson returned yesterday from Eveleth where he went on business for the A. O. U. W., of which Mr. Nickerson is a deputy grand master.

Carl Weaver of St. Paul was visiting friends in the city yesterday.

W. F. Burrows, of Valley City, N. D., was in the city yesterday on business.

PAINS IN THE BACK

Like Thousands of Others, Mr. T. M. Slattery, of Belle Fourche, S. D., Was Dying of Kidney Disease and Did Not Know It.

After Realizing His Condition, He Sent for a Free Trial Bottle of Warner's Safe Cure, and Became Convinced of Its Merit.

DISEASED KIDNEYS.

Mr. Slattery, in writing to a friend, said: "Warner's Safe Cure goes right to the spot, restores the kidneys to a healthful condition and drives the diseased germs from the system. It is a great blessing to sufferers from kidney trouble."

"A trial bottle of this grand kidney medicine, Warner's Safe Cure, will convince any one of its wonderful merits. I tried so many remedies without being benefited that I was about discouraged; but in a few days after taking Warner's Safe Cure I began to feel better. I was out of health and run down generally, had no appetite, was dizzy and suffered with headache most of the time, which, together with terrible pains in my back, made life miserable, and I felt I could not live. I did not know that my kidneys were the cause of the trouble, but somehow felt they might be, so began taking Warner's Safe Cure and was soon restored to health. There is such a pleasant taste to Warner's Safe Cure that it goes right to the spot, restoring the kidneys and liver, and drives the dreadful disease from the system. It has cured me, making me stronger and better in every way, and I cheerfully recommend it to all sufferers, as it proved a godsend to me."—T. M. SLATTERY, Belle Fourche, So. Dak., March 12, 1906.

IT'S YOUR KIDNEYS.

Does your back and side ache? Are you languid, listless, sleepy and without ambition or interest in life? Have you grinding, scalding pains and loss of appetite? Are you troubled with vital weakness and scant and incontinence of urine? Does your heart palpitate, and have you lapses in memory and spasmodic twinges of pain? If the answer is "Yes," your kidneys are diseased and your life is in danger. Warner's Safe Cure is the medicine that will help you. Thousands of wonderful cures attest its merit, and thousands of people involuntary commend its use as the best cure and sure preventive of all forms of kidney and bladder trouble, female weakness, Bright's disease and all diseased conditions of the liver and blood.

In Bright's disase the bowels are often constipated and the liver torpid. Warner's Safe Pills quickly relieve this condition, and no ill after effect is experienced.

WARNER'S SAFE CURE is put up in two sizes and is sold by all druggists, or direct, at 50 CENTS AND $1.00 A BOTTLE. Refuse substitutes containing harmful drugs which injure the system.

TRIAL BOTTLE FREE. To convince every sufferer from diseases of the kidneys, liver, bladder and blood that WARNER'S SAFE CURE will cure them, a trial bottle will be sent ABSOLUTELY FREE, postpaid, to any one who will write **WARNER'S SAFE CURE CO., Rochester, N. Y.,** and mention having seen this liberal offer in The Herald. The genuineness of this offer is fully guaranteed. Our doctors will also send medical booklet containing descriptions of symptoms and treatment of each disease, and many convincing testimonials, free, to every one.

BANKERS LEAVE FOR THEIR HOMES

The four members of the North Dakota Bankers' association who came to the Head of the Lakes on invitation of the Duluth board of trade to look into grain matters left for home last evening without having accomplished a great deal.

After the association took action inimical to the Duluth board of trade and Duluth grain men, following the appearance before the association of Senator Hudnall of Superior, the Duluth board invited the bankers to come here and make an investigation of the manner in which the grain business is conducted. They arrived Thursday and went to Superior where they met Senator Hudnall and he was with them throughout their stay.

Thursday they looked over the elevators at Superior and got the Superior side of the story. Yesterday they came to Duluth bringing Senator Hudnall with them. They spent the morning in the grain inspection offices examining the system used and later visited the Duluth yards and elevators.

A conference with a committee of members of the Duluth board was asked for and it was arranged for the afternoon. When the time came Senator Hudnall was still with the bankers and some of the Duluth men objected. They said they were willing to give the bankers all the information possible and to have a free and open talk with them but did not think it right that the attorney of the Superior commission and grain men, who is their legal representative in pending suits, should be at what was to be a friendly hearing. Senator Hudnall then withdrew and the bankers did not seem very anxious to continue the hearing without him.

They stated before leaving for home that they had found the matter of investigating the grain business a much larger one than they had supposed before leaving and that they would take steps to make a more thorough study of it and come here later.

An item sent out from Superior today says that President Cashel said before leaving that the bankers would recommend asking the Great Northern company to reopen its elevators to the public, and if he did not they would make plans for the obtaining of an elevator at Superior.

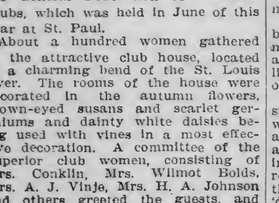
WOMEN DISCUSS BIENNIAL

Duluth and Superior Federation Members Meet at Gitchinadji Club in Superior and Hear Reports From Delegates to Minneapolis Gathering.

Yesterday afternoon a most delightful club function was enjoyed by the club women of Duluth and Superior, at the Gitchinadji club house, where they met to listen to reports of the delegates from both cities to the biennial convention of the General Federation of Women's Clubs, which was held in June of this year at St. Paul.

About a hundred women gathered at the attractive club house, located at a charming bend of the St. Louis river. The rooms of the house were decorated in the autumn flowers, brown-eyed susans and scarlet geraniums and dainty white daisies being used with vines in a most effective decoration. A committee of the Superior club women, consisting of Mrs. Conklin, Mrs. Wilmot Bolds, Mrs. A. J. Vinje, Mrs. H. A. Johnson and others greeted the guests, and



MRS. WILMOT BOLDS,
Who Presided at the Meeting.

the program was greatly enjoyed by nearly a hundred guests.

Mrs. Bolds, vice president of the eleventh district of the Wisconsin federation, presided at the meeting, and pronounced the words of greeting to the Duluth women. Mrs. H. S. Ely, president of the Saturday club of this city, responded with a few gracious words of thanks for the entertainment. The first report of the great meeting was given by Mrs. J. L. Washburn, president of the Minnesota Federation of Women's Clubs, and she told of the first evening of the biennial. She said in part:

"If I am able to picture for you the vision of the convention hall upon that first evening, it will take you part way into the spirit of romance if I do it at all adequately. The vast barn-like Armory was converted into a veritable fairy land, with flowers, palms and vines and lights innumerable, with beautiful women and stately men, all with a general air of interest and expectation. And the audience was there to appreciate the program which had been prepared for them. Six thousand people sat there, quietly and patiently, for three mortal hours. The stage, with its array of splendid women, made me prouder than ever before that I might be numbered among the club women.

"The meeting was called to order by Mrs. Decker, and throughout the meetings her broad-spirited, tactful and sympathetic grasp of affairs lightened all with a delicious sense of humor, was a wonder to all.

"The welcome for the state was spoken by Governor Johnson, who was most felicitous in his remarks, and the best thing that one feels about what he says is his sincerity in the matter. 'It is because you represent the progressive, industrious, thinking women of America,' he said, 'doing your full share to solve every problem, social or otherwise, which engrosses the attention of the time, that we in Minnesota welcome you to this beautiful state.'"

Mrs. Washburn gave briefly the spirit of the remarks of the other speakers of the evening.

Mrs. Julia M. Barnes delegate of the Saturday club of this city related the events of the first three days of the convention and Mrs. A. J. Vinje of Superior, a delegate from that city, spoke of the last three days. The reports were given in detail and were much enjoyed by the interested women present.

Mrs. H. A. Johnson of Superior had as her subject for report "The Fraternal Spirit of the Biennial' and she

MRS. J. L. WASHBURN of Duluth.

presented an interesting report of the frank friendship and sincere help which one might secure there. The value of the impersonal way in which much of the convention was presented was emphasized by Mrs. Johnson and her report was of interest as that of a club woman who attended her first large federation meeting.

The last speaker of the afternoon was Mrs. Robert Morris Seymour who was claimed in a way by both cities, as before her residence in Duluth she made her home in Superior. Mrs. Seymour had not been identified with federation work before her attendance at the biennial meeting but has become a most enthusiastic supporter of the value of federation work. The subject of her talk was "Side Lights on the Biennial' and she said in part:

"Before I attended the meeting of the federation at St. Paul I was not exactly indifferent to its workings but was not especially interested and as I have come back so enthusiastic for it and pledged in part to federation work, my talk to you will be simply of my impressions of those many meetings with this great body of women. The questions that come to every one are 'What is the use of federation, what material benefit does it bring and what growth will it allow that other things do not give? In the material way there are many things. First there is the consumer's league which the federation endorses, explains and asks its members to support. The consumer's league does away with sweat shop methods which as some of you may know will do away with many evils. The possibility of getting garments which are made under sanitary conditions with no child labor or overcrowding of hours is a very material thing for mothers and busy women to consider.

"Another material thing at the meeting was the exhibit of impure foods which could not but interest every women. The possibility of getting pure Women, foremost in their field of work, Another exhibit of arts and crafts was the finest one could see anywhere. Women, foremost in their field of work gave talks on etchings, the making of pottery, home decoration, and fine craftsmanship, that were most instructive and enlightening.

"But for the thing that federation brings most, beyond what the single club work will give, is a scope and breadth of view that mark the women who are prominent in it. The biennial was a personality, the individual was sunk before the big, altruistic, universal movement which was apparent in the convention as a whole. This was lost when the division into conferences occurred, where the individual was the moving force. To the women who have identified themselves with federation there is a poise and dignity and simple directness which the federation has given them which was quite apparent to me when contrasting them with women who have been developed with other lines of thought. The women of the professions with one exception had not that touch of life itself which make all the other things worth while. They displayed a little of that professional bias, the world touch was gone. This thing of federation makes it possible for the women educated by it to put through with wisdom, and balance and sanity and reason, any movement with which they identify themselves."

Mrs. Seymour's talk was listened to with earnest attention and greatly appreciated by the women who were almost unanimously federation believers.

After the program luncheon was served and an informal reception enjoyed. The affair was greatly enjoyed by the local women who were for the first time the guests of the Superior club women, and a part of the enthusiasm of the great meeting was happily lived over again for a few hours. About forty Duluth women were in attendance.

DEVORE FOUND TO BE INSANE

Late Candidate for State Senate Committed to Asylum.

The examination of David M. De Vore, the attorney of Duluth, took place yesterday afternoon in probate court and Judge Middlecoff declared him to be insane. He was committed to the state hospital at Fergus Falls for treatment, and as he is only 53 years old, a cure may be effected.

REPORT THAT BOB DUNN WILL RUN FOR HOUSE

(Continued from page 1.)

and the association, regardless of the candidate's politics endeavors to assist in his election. The "code of railroad morals" drawn up by the association follows: Do you favor "Jail Sentence" for Railroad Rebators? Are you in favor of Reciprocal Demurrage? Do you believe in the La Follette principle of basing railroad rates on the actual cost of construction of the road, plus legitimate operating expenses and a fair rate of interest on this valuation of the property? Are you in favor of a two cent passenger rate? Do you favor the abolishment of free passes? Do you favor the revision of the state tax laws? Do you favor the extension of the primary system of selection to state officials?

* * *

The break in the Republican committee which has been expected for some time occurred on Tuesday of last week. Secretary Warner went down and out, and the committee is nothing but Cole now. Mr. Warner couldn't stand for the Cole brand of politics, and decided to get out before he was saddled with the odium of defeat in the campaign. He was largely instrumental in securing Mr. Cole's nomination at the Duluth convention, his generalship proving a decisive factor in the fight, but after nomination the candidate's brother cut in and Warner was relegated to the position of a chore boy. It was an intolerable situation, and he quit in disgust. The reason given by Cole for the resignation is that Warner is compelled to attend to private business, but it is well kuown that the retiring secretary will accept a clerkship in Auditor Iverson's office. The next resignation will probably be that of Senator Thompson, chairman of the executive committee. He is also thoroughly disgusted and has not made his appearance at headquarters for the past two weeks. The organization has practically gone to pieces and party leaders admit Johnson's election.

* * *

The Crookston Times (Rep.) says: Governor Johnson has one advantage over Candidate Cole. He can make long speeches telling what I have done, while Governor Cole can only make long speeches telling what I will do. Governor Johnson's opening speech of the campaign is confined almost exclusively to an accounting of his stewardship to the people of Minnesota, and a very clean looking balance sheet he makes it. According to the governor, I have forced the Republican party to declare for a two-cent passenger rate. I have taught the lumber barons that 'tis cheaper to buy than to steal. I have healed the box car merchant with many stripes, I have raised the valuation of all public service corporations, I have put back in schools children illegally employed, I and John Lind have forced the only great reductions Minnesota has ever secured from the railroads, I have put ginger, lots of it, into the dairy and food commisison, I have increased the capacity of the state's prison twine plant 2,000,000 pounds per annum, I have been patted upon the back by Theodore Roosevelt for activity in insurance reform, I have shouted for abolition of free passes and I have made pretty speeches for drainage, forestry and good roads. It is a pretty good argument and it will make votes. Whether it can make votes enough to offset the votes which the hungry office longing Republicans can gather is the question that will be determined in November."

ANNOUNCEMENT

We have secured the services of E. ZIMMERMAN, for a number of years with French of St. Paul. In Mr. Zimmerman, we can recommend an artistic decorator who will find favor with Duluth's most critical residents.

Engels' Art Store,
9 East Superior St.

TO CURE A COUGH OR COLD.

This is a never failing home remedy for coughs and colds: Two ounces of glycerine, one half ounce of concentrated Oil of Pine, one half pint good whisky, mix and shake thoroughly; use in tablespoon doses every four hours. This, if followed up, will cure any cough that is curable, or break up an acute cold in twenty-four hours. The ingredients all can be gotten at any drug store. Concentrated Oil of Pine comes put up for medicinal uses only in half ounce vials in small round wooden cases designed to protect it from heat and light. The bulk oils of pine will produce nausea and cannot give the desired results.

MAGNITUDE OF STORM'S FURY ON THE GULF COAST

(Continued from page 1.)

and caboose, the latter carrying a theatrical party, ran into a washout on the Mississippi Central railroad near this town. The report said five trainmen were injured.

Many of the Mississippi reports express apprehensions about the rural negro population, saying that their little cabins have been blown down by scores. All reports thus far received agree that damage to the cotton crop will be the most serious result of the storm in Mississippi.

On the Mississipi gulf coast, in addition to the twenty-five small schooners reported wrecked last night, Ship and Cat islands in Mississippi sound have five wrecked barks on their shores.

During the storm at Bay St. Louis a small schooner is reported to have cut her way through several light piers and then to have knocked a bath house off the piling on which it stood.

Reports which the Louisville & Nashville railroad received from within this radius said that several miles of track have probably been washed away between Scranton, Miss., and Mobile. Between West Pascagoula and Scranton where the railroad bed was built over a marsh about two miles of filling was swept almost completely away. Rails attached to ties were found about half mile away from the former road bed.

In the Mississippi river delta country the damage to Fort St. Philip was reported by two pilots who made the trip up the river immediately after the storm. They said that back water from the gulf covered the land in the vicinity of the fort for five miles along the river. At a point 73 miles down the river they said the hurricane tide opened a hole in the Mississippi river levee and it was not until late Thursday afternoon that the gulf water stopped flowing through this break. The pilots also saw fishermen lugger boats lying on the land high out of water. The pilots also brought complaints from orange growers that about 50 per cent of the oranges were blown from the trees.

The captain of the steamer El Cid, from New York, said that when his ship passed up the river yesterday afternoon he saw the inhabitants of cabins which had been unroofed and in some cases flooded, pursuing usual household duties. He saw no evidence of loss of life. The El Cid reported that on Sept. 24, when twelve miles south of Diamond Shoal a three masted schooner was sighted lying on her starboard side, and th attnewy-trduhrdlu rdl side, and that twenty-four miles south of the shoal a dismasted waterlogged schooner of about 700 tons displacement was sighted.

PENSACOLA HARD HIT.

Every House on Water Front Destroyed ---Many Sailors Drowned.

Pensacola, Fla., via Flomaton, Ala., Sept. 29.—Pensacola has been visited by the worst storm in its history, and the damage is estimated at $5,000,000. The loss of life will be heavy among the mariners, but thus far only one body has been recovered, a man named George Morgan, a fisherman. Other bodies are reported along the shore, but have not been recovered.

Commencing at 7 o'clock Thursday night, the wind blew at fifty miles an hour for three hours, then increased to sixty-five miles. From that time until 5 o'clock yesterday morning it remained at about eighty and ninety miles an hour.

The tides from the bay backed into the city for blocks, destroying homes and making rivers out of streets. When the gale was at its height, yesterday morning, and women and children were running frantically about the streets in darkness, the alarm of fire was sounded, adding to the confusion. The fire started in the Pitt mill, near the business district, and horses of the fire department refused to go out in the weather. With the tin roofs flying about them, and wires and trees flying over them, the firemen took their hose wagon by hand and rushed down the streets to the fire, and after hours of work extinguished the flames.

Yesterday afternoon the water rose until the business district presented on almost indescribable scene. Of the fifty or sixty steamers and sailing vessels lying in the harbor only five or six are there now. They have been driven ashore and along the water front is a mass of wreckage of steamers, towboats, launches and sailing craft of all descriptions. Thirty fishing vessels in port have been destroyed or damaged and the three big fish houses with their wharves are gone. Muscogee wharf and the Commandancia and Arragona wharves of the Louisville & Nashville railroad are badly damaged. Great iron ships of 2,000 and 3,000 tons have been driven not only ashore, but have gone through houses a block from the water front.

Every house along the water front for a distance of 10 miles has been destroyed and the wonder is that the loss of life is not greater. The tracks of the Terminal railway to the navy yard and Barrancas have all been destroyed, as have also the trestles and bridges.

Following is a list of vessels in the harbor, all of which were damaged to a more or less extent:

Steamer Berwind (British); Nonsuch (British); Ithington, (British); Ibex (British); Pilar, De Larrinaga, (British); Angelo, (British); barks-Andrew, (Norwegian); Alfhilda, (Swede); Cognati, (Italian); Canada, (British); Olivari, (Italian); Spero, (Norwegian); Strungoe, (Swede); Thomas, (Italian); Maria, (German); Chacama, (Nor.); Hereford, (Nor.); Hernibol, (Nor.); Litta, (Nor.); Huburt, (Spanish); Louis, (Urg.).

Ships—Moremus, (Russian); Ingrid, (Nor.).

Besides there there were a large number of schooners not listed.

Clay Clement, an actor once very popular wita Duluth audiences, returned to the Lyceum last evening after an absence of several years and presented "Sam Houston," a drama eulogistic of the very rough and picturesque character who brought into the United States an empire, the republic of Texas, a man of whom not enough is known. The idea of bringing him forward as the central figure of a play which should picture events in his life and give a conception of his character, originated with Mr. Clement, and he worked out the drama in collaboration with John McGovern and Jesse Edson. It has been before the public only about two weeks and it is yet too early to determine its fate, but the prediction that it will live, seems to be justified. Certainly last evening's audience was well satisfied anu gave the company and star every evidence of appreciation.

One danger that Mr. Clement faces is that his play contains so many characters, which with all well interpreted, as they are, means a large, expensive company, and is so finely staged, having four complete changes, that the expense of the production will probably necessitate top notch houses, and what would spell fairly good audiences for an ordinary undertaking, might mean failure for this.

In attempting to present so much of Houston's career and to give an idea of the man in so many phases of his life, it has been impossible to create a play in which unity is preserved. There are long breaks in time resulting in great changes in characters and environment. The opening scene is in the governor's mansion in Tennessee and pictures the break between the plain and rugged Houston, friend and companion of the Indians, and the aristocratic woman he has married and whose every instinct is offended by her spouse's intimacy with the red men. Houston resigns and goes to the West and then one plunges forward eight years and hears no more of the fate of the wife. The second act presents the signing of the constitution of the republic of Texas, the news of the fall of the Alama and the butchery of the Texans by the Mexicans. Houston takes to the warpath and then a few months later is again found as president of the republic, striving against terrible odds to make it live and to defeat the hotheads and dangerous elements that would wreck the infant structure. Then there is another jump of twenty-five years and the governor, now old and gray but loving the Union with all of his youthly fervor, battles unavailingly against the secessionists who would turn the state against the stars and stripes. Forced from the office of governor because he will not secede, foreseeing all that he has given his blood and labor to build up shattered, he bows to the inevitable, wraps his old Indian blanket about him and, staff in hand, goes out the door, a broken and pathetic figure. The scenes and incidents throughout are stirring and melodramatic, the appeals to patriotism and heroism are strong, and the emotions are constantly stirred.

Mr. Clement gives a fine picture of Houston and plays the part faithfully and with every evidence that he has carefully and intelligently studied the characteristics of the man he portrays. Mr. Clement is best known to all of his admirers for his fine impersonation of Baron Hohenstauffen in "The New Dominion," a German nobleman, genteel, aristocratic and refined, qualities which the actor did not fail to fully accentuate. Houston, however, is a rough and ready man, amply equipped with diplomatic ability, but blunt, direct and with little of the polish that comes from social life in aristocratic circles. He was the giant figure of the plains and the wilderness, building a new empire on the frontier to add to the glory of the flag he loved and cherished. This is the man that Clement pictures in the play, and he presents him with just as much fidelity and ability as he did the Baron.

The company throughout is excellent. Miss Kathleen Kerrigan, who appears as the first Mrs. Houston in the first act, is a fine actress and a handsome woman, and plays the powerful scene there with great effectiveness. One regrets throughout the play that she has no further part. Albert C. Henderson is a fine Felix Hutton, the dangerous and unscrupulous man who tries to upset Clement's plans. He is an actor of force and intelligence. Ernest Warde gives a good impersonation of Santa Anna, the cowardly Mexican general. The characters throughout, and they comprise all types of the border class, are well taken. Miss Marie Taylor, who plays Roaring Kate, particularly deserves mention for a unique and strenuous characterization.

The stage equipment and all details are thorough and complete.

This evening the final performance will be given.

Pleases the Palate.

LUMBER TRUST

Alleged to be Operating on the Pacific Coast.

San Francisco, Sept. 29.—United States District Attorney Devlin announced today that he had subpoenaed J. H. Baxter, president of the Pine Manufacturing association, to bring his books before the United States grand jury, on next Tuesday, and testify to what he knows concerning the existence of a lumber trust on this coast.

Several other witnesses have been subpoenaed, also, but Mr. Devlin declined to make public their names. He stated, however, that as yet he had no legal evidence showing that such an unlawful trust was operating here.

ANOTHER WOMAN IS CONCERNED

Deserted Wife States Her Suspicions of Husband's Conduct.

The non-support case of the state against Jerry N. Williams, which was called for trial before Judge Cutting yesterday afternoon, was continued for 60 days after a portion of the evidence had been received.

Mrs. Williams, the complaining witness claimed that they had been married eight years and resided in Minneapolis. She says that her husband, who was janitor in a Baptist church about six months ago, left Minneapolis ostensibly for a visit with relatives in Canada. Mrs. Williams heard nothing more from him and found on inquiry that her husband did not visit his people in Canada. The aid of the police was sought and Williams was finally located in this city.

The only reason that Williams gave for leaving his wife was that he simply could not live with her. He admits that she has always been a true and loving wife. Mrs. Williams thinks there is some other woman in the case and suspects a Minneapolis girl for whom she says her husband showed considerable affection.

The non-support charge is not very strong, it is claimed, for the reason Williams left his wife $350 when he quit her and she admits that she has not been in need.

During the six weeks' continuance of the case Williams, on the court's order, is to pay his wife $6 per week.

THE SEMI-ANNUAL

DRUG SALE

...AT...

PANTON & WHITE CO.'S

Takes Place Monday, Tuesday and Wednesday.

It's going to be a hummer. Prices will be announced in the morning paper tomorrow.

DO YOU KNOW That nearly all heating and cooking stoves have dampers in the pipes, but you do not find ranges so equipped, for the reason that underneath the closet the pipe is very flat and there is no regular damper that will fit; where the pipe rounds out above the closet it is too high for a damper to be reached.

The MOORES RANGES

have a patented check and pipe damper combined. By opening the checks, cold air is admitted into the flue and the inside cast iron damper is automatically closed. It can be opened or closed as much or as little as is desired.

Come in and let us show you what it will do.

DULUTH HDW. CO.

113 WEST SUPERIOR STREET.

BE SURE YOU'RE RIGHT — THEN GO AHEAD!
ARTHUR A. TAYLOR, SECY AND TREAS.
EDWIN HALL, PRESIDENT
E. S. AVERILL, VICE PRES.
Is Copper Belt A Good Stock To Buy?

ANOTHER CHAPTER IN THE STORY OF THE COPPER BELT MINES.

Our appeal to the public met with an instantaneous response. We have been fairly swamped with orders for stock in the Copper Belt Mines, and we wish to thank our friends for their marked expression of confidence in us and in our property. Our organization is now complete and we are prepared to enter upon the second lap of our campaign with a well equipped office force, and will take care of orders with promptness.

THE COPPER BELT MINES COMPANY, Arthur A. Taylor, Sec'y and Treas.

THE STORY OF THE COPPER BELT MINES RETOLD.

We told the story of the Copper Belt property a week or two ago in the columns of the press, and it was evidently read by a great number of people, if we may judge by the amount of stock sold.

Still there must be many who either did not read the story, or if they did, dismissed it with a glance or classed it with the many get-rich-quick propositions that seem to be flourishing again.

Let us tell the story again.

It is not long.

WHO ARE BACK OF THE COPPER BELT MINES CO.?

First of all, let us take up the management—the men behind the mine. We are not stock jobbers.

Two of our officers are well known business men of Chicago.

E. S. Averill is General Superintendent of the United States Express Co., a man perhaps more widely known in this country than any other man on the directory.

Arthur A. Taylor was formerly owner and manager of the Modern Cycle Co., and has been frequently appointed as Trustee of the U. S. and State courts in settlement of large estates.

He is giving the Company the benefit of his entire time and executive ability in the home office in Chicago.

Edwin Hall, the president of the Company, makes his home in Lincoln, Neb., although for the past twenty years he has not been there much, having been actively engaged as a mining engineer in the West and in Mexico during those years. His record is a fine one—and the Company is to be congratulated in securing his services for its head.

Dr. B. L. Paine, a director, is of the firm of Miller & Paine, one of the large well-known stores of Lincoln, Neb., and a large stockholder in this Company.

Peter McNicol is also connected with the firm of Miller & Paine, and is a careful and shrewd business man, who stands well in Lincoln.

H. C. Snyder is a prominent merchant of Lusk, Wyo., a town near our mines, besides being mayor of the town. He is very enthusiastic about the mines, and, being on the ground, is well qualified to express an opinion about them.

WE ARE NOT STOCK JOBBERS.

These are the men who are asking you to co-operate with them in the work of making a great producing porperty of the Copper Belt Mines Co. We believe their standing in the business world is sufficiently strong to allay any misgivings which might creep into the minds of timid people as to the management of the Company's holdings. Once again—

We are not stock jobbers, nor are we engaged in a stock jobbing enterprise.

THE STORY OF A MAN NAMED HALL.

The story of the Copper Belt Mine is closely woven around its President, Mr. Edwin Hall, a Mining Engineer.

Edwin Hall is a man who has made a life study of mining. He is a geologist as well as a practical mining engineer, and has been employed in the West and in Mexico for upwards of twenty years, in looking up new mines and developing them when he found them, for his employers.

He has been everything, from the mine boss to superintendent of a group of mines where every detail of the work came up to him for settlement.

He has drawn as high a salary as it was possible for a capable man to draw—but he was not satisfied.

He began to note the occasional glint of gray, that was coming in his hair, and the what-shall-I-do-when-I-am-old question began to bother him, too.

He had made good fortunes for others and only a good living for himself in all those twenty years.

HALL BEGINS TO LOOK OUT FOR HIMSELF.

Finally, he began to do a little quiet prospecting on his own account. Every time he went on a journey to report on a property for some rich syndicate he kept his weather eye open for something for Hall. And he did not take the first good thing he saw. He was like a good merchant who was looking for a likely spot to plant a business upon.

From Mexico to Montana this man fairly scoured the prospects and examined ores, made exhaustive tests and assays, talked with other men equally well posted on conditions in Wyoming, and finally found a group of claims in Laramie Co., Wyoming, a copper property that looked very good to him—plenty of ore, plenty of timber, plenty of water—seemingly an ideal proposition.

HALL FINDS A GREAT MINE.

To the north, and on the same ledge, apparently, was the great Homestake Mines, whose mineral wealth is beyond compute; twenty miles to the south are the Sunrise Mines, where the Standard Oil has a magnificent property of untold richness; farther south is the Grand Encampment, where the great Penn-Wyoming and Ferris-Haggerty Mines are the star producers, a group comprising nearly 700 mines, from which the camp derives its name, the Grand Encampment.

Mr. Hall was largely instrumental in the early development of that property, having in 1898 visited the Grand Encampment district to make a report on the Ferris-Haggerty Mine, which was then merely a prospect, with a very shallow shaft.

In his report he told his people that work should be pressed on the mine to the secondary enrichment zone (a depth of about 150 feet), and in his opinion ore would then be encountered of larger extent and greater richness.

Work was commenced, and within eighteen months the mine was sold for **$1,125,000**, has since been sold for **$5,000,000**, and today is conservatively worth **$15,000,000.**

Mr. Hall had once more proved his worth as an engineer and thereafter was in greater demand than ever by mining syndicates.

WYOMING LOOKED GOOD.

As may be imagined, he became interested in that particular section of Wyoming, and when this resolve to do some prospecting on his own account became firmly fixed in his mind he selected that particular district for a base and organized a company, soon afterward known as the Copper Belt Mines Co.

THE COPPER BELT MINES COMPANY OF WYOMING.

Capital stock, **$2,000,000.** Treasury stock, **$800,000.** Shares, par value **$1** each, fully paid and non-assessable.

OFFICERS.

President, EDWIN HALL, Lincoln, Neb.

Vice-President, E. S. AVERILL, Chicago.

Secretary and Treasurer, ARTHUR A. TAYLOR, Chicago.

Assistant Treasurer, H. C. SNYDER, Lusk, Wyo.

BOARD OF TRUSTEES.

ARTHUR A. TAYLOR, Chicago.
E. S. AVERILL, Chicago.
B. L. PAINE, Lincoln, Neb.
EDWIN HALL, Lincoln, Neb.
PETER MCNICOL, Lincoln, Neb.

CONSULTING GEOLOGIST.

DR. G. E. CONDRA,
Professor of Economic Geology, State University of Nebraska.

The mines are located on Rawhide Buttes in Laramie County, Wyoming, twelve miles south of Lusk, town on the C. & N. W. Ry., north of Colorado Fuel & Iron Co.'s mines at Sunrise, south of Homestake Mines.

The property controlled comprises thirty-five claims, about 600 acres; about 160 acres of pine timber; steam railroad crosses property.

The formation is strata of schists, quartzite and lime, tilted at an angle of forty degrees to the east.

TWO YEARS' HARD WORK.

For two years thereafter, Mr. Hall carried on active development work on the property; shafts were sunk, crosscuts were run and surface diggings made. On the Omaha, a town **250** feet long cuts two well defined ore chutes, which increase in richness with depth. **The Omaha is a proven mine.**

Another mine is the group which has been proven to a depth of 500 feet is the Lucky Heavy, the entire shaft being in ore, and the company covers thea vein for over a mile.

Other development was done on other claims—each making a fine showing of rich ore—with rich values in gold, and after making careful assays of the ores from the "Omana" and "Lucky Henry," as well as others in the group, Mr. Hall went before his board of directors and said:

HALL REPORTS TO DIRECTORS.

"Gentlemen, I am willing to stake not only all my savings of years, but my reputation as a Mining Engineer that these mines are equal, if not far superior to those of the famous "Ferris-Haggerty" and "Doane-Rambler" of the Gand Encampment District and the equal of the great "Greene Consolidated."

"With careful and conservative management and proper machinery and equipment your shares in this stock should be worth in three years **$5.00** a share.

"The ore bodies are continuous and show copper values ranging from $20.00 to $150.00 per ton."

COPPER MINES ALWAYS PAY.

No man has ever invested his money and lost it in a property having such development and showings as yours unless it has been through incompetency or dishonesty of the management. Nor does history record a single instance of a copper mine pinching out as is the case with other ores.

"We have ore enough in these mines to keep us going for years and years."

Pretty strong talk from a conservative mining engineer!

So much for the man at the head of the mines, the right man in the right place.

COPPER MINES PAY ENORMOUSLY.

Look at the enormous increase in values on an investment of **$1,000** in copper stock in a few years, and compare it with the average 6 per cent investment.

$1000 invested in Greene Consolidated in 1901 is now worth....$ 87,000
$1,000 invested in United Verde in 1897 is now worth..... 300,000
$1,000 invested in Boston & Montana in 1896 is now worth 18,660
$1,000 invested in Wolverine in 1898 is now worth..... 50,000
$1,000 invested in Calumet & Arizona in 1902 is now worth. 100,000
$1,000 invested in Calumet & Pittsburg in 1903 is now worth 50,000

Let us compare these earnings with the so styled conservative investments.

$1,000 in the bank earns.....$30 Yearly
$1,000 First Mortgage earns $55 Yearly
$1,000 in good bond.....$45 Yearly
Which investment will you choose?

When the Copper Belt Mills are grinding out 500 tons of ore daily, which they should do within a short time after they are completed, an investment of $1,000 should earn $6,250 yearly! ($1,000 will buy 5,000 shares of our stock at 20c per share.]

If they only earn one-half the estimated earnings it would still be a great return on $1,000, wouldn't it?

FABULOUS FIGURES.

Such figures look fabulous to the man or woman who are not posted on what copper mines have been doing of late years, but they can easily be verified.

CAR OF RICH ORE FROM OMAHA TUNNEL.

Our estimates are based on a 7 per cent average value of our ore, although some of the showings would justify our figuring on 8 to 10 per cent values, and in all probability as high as 16 per cent—for remember these are GREAT MINES, the greatest since Greene Consolidated were opened up. In Mr. Hall's opinion, and there is no man in America better able to express an opinion on a copper mine.

LET US UNDERSTAND ONE AN OTHER.

Let us have a perfectly clear understanding. We are not doing any long range guessing on these figures. Mr. Hall has been actively engaged in actual mining for 20 years, a good part of that time in or near our mines.

His conclusions as to formations and character of ore are backed up by no less an authority than Prof. Geo. E. Condra, who is professor of Economic Geology in the Nebraska State University—one of the most prominent geologists in the world, who made the following report on the properties:

A FAMOUS GEOLOGIST MAKES REPORT.

Statement from Dr. Geo. E. Condra, Professor of Economic Geology, Nebraska State University, Lincoln, Neb., regarding the topography and geological structure in the vicinity of the Copper Belt Mines in Wyoming.

STRUCTURE.—The district is composed in the main of alternating beds of mica schist, quartzite and thin beds of limestone, which trend north and south and have a steep eastward dip. Flexures and shearing are developed locally. On claims farthest north, granite, intrusions and faults disturb the regular structure. Gneiss, thornblende, schist and other similar rocks are found in the highest elevations to the east of your claims.

Tertiary beds nearly horizontal in position, surround the buttes or mountains as they should be called. Lying on the tertiary rocks are pebbles and boulders of later age. They form quite distinct benches in valleys.

REGION VERY OLD.

Geologically speaking, the region is very old. In most respects it is much like the Black Hills and Laramie uplifts. In fact, the three were united at one time as an elongated uplift, which later was eroded into mountains. The regions, though somewhat separated now, have had about the same history. They were distinctly elevated, eroded and depressed at least three times during the geologic periods. Their mountains were highest during early tertiary times. Later, during that period, the mountain range was nearly buried beneath the thick layers of sand and gravel which now encircles the Black Hills and Raw Hide Buttes and extend eastward on the High Plains. The lowest mountains were then completely covered up, only the tops of a few of them now rise above the plains. Such peaks may be seen near Lusk. The higher points in Raw Hide Buttes and Black Hills stood out more prominently than the rest, but they do not have a more typical mountain structure than the lower subdued places, which are in fact the bases of mountains.

RESEMBLES BLACK HILLS.

POSSIBILITIES.—The district resembles the Black Hills in topography, history and structure. It is a much deformed, subdued mountain region, with conditions which seem to indicate the presence of copper and gold ore bodies of considerable economic importance. The copper ore follows mica schist leads, and sheerage zones which intersect the latter. Carbonate ores show at the surface at a number of places and it would seem that deeper mining should establish the presence of rich sulphides; apparently the structure is favorable for the development of a group of mines, the value of which may be proved by deeper shafting.

(Signed) GEO. E. CONDRA.

WE SAFEGUARD YOUR INTERESTS.

You can easily see that we are trying to safeguard your interests at every point.

None of us have any money to lose, and these reports, while they may be dry reading for some, are of uncalculable value to the investor. WE COULD NOT FURNISH SUCH REPORTS unless the ore was there—not from such men as we have named.

We are particularly fortunate in having induced Dr. Condra to act as our Consulting Geologist. His advice and counsel will be of the greatest assistance to us.

The addition of Dr. Condra completes a board of officers and trustees that is as strong as any company ever began business with, and is a sure indication of success.

THE MERITS OF THE PROPOSITION.

If you come in on this proposition you must do so on its merits, not on our statements, although we have understated the proposition at all points. We have purposely underestimated the actual conditions so as to keep within conservative limits.

We have given you the facts about the mine and men behind the mine and you can verify them very easily.

We have nothing to conceal.

It takes money to make the mine go, no matter how rich it is, and we could get all we need without effort, if we would let go the control, but we won't do so.

The necessary money is coming with a rush, and if you lose your chance to come in at the low price the fault will be yours.

You have the matter now in your own hands—don't let it go by DEFAULT.

It's too good to pass up without first giving it careful consideration—and talking to Hall, Averill, or Taylor, personally or by correspondence.

NO LEAKS ANYWHERE.

No salaries will be paid out of the money received, except for legitimate needs of the enterprise. There is nothing about the proposition that is not fair and square and above board, and we feel that in offering the stock to you we are doing you a kindness and showing you a way where you can solve the how-are-you-going-to-live-when-you-are-old problem to your entire satisfaction.

WHAT YOUR STOCK SHOULD EARN.

If you invest	At 20 cents per share will buy	When our output is 500 tons daily your dividend snould be:
$200.00	**1,000 shares.**	**$1,250.00**
$300.00	**1,500 shares.**	**$1,875.00**
$400.00	**2,000 shares.**	**$2,500.00**
$1,000.00	**5,000 shares.**	**$6,250.00**

These figures are based on 7 per cent ore, although our assays show as high as 15 per cent in copper and from $8.00 to $12.00 values in gold to the ton. Ore that assays 6 per cent in copper gives a ton value of $22.80. The present price of copper is 18.60 per pound.

Of course, these figures are approximate, but they are based on what other copper mines have done and are doing, and they should come pretty close to our estimate.

You can see how copper mine stock makes a stockholder rich provided the mine is fairly capitalized, has plenty of rich ore and is economically managed. The figures given above are very conservative. When we get down into greater depths below the secondary enrichment zone, which in our district is about 350 feet down, we shall undoubtedly make a showing that will make the above figures seem tame.

And we are going down where the great ore bodies are. How soon, all depends on how fast the stock is subscribed for.

WE DEAL DIRECT WITH YOU.

On thing we want to impress on your mind is that none of your money goes to some fiscal agent, or broker. You are dealing direct with the company and your money is going where you want it to go, viz.: into machinery and the development of the property. You can come to our office, No. 901 in the Merchants Loan and Trust Building, 135 Adams St., corner Clark, and talk to one of the officials of the company at any time, and get your information direct from him, and see samples of our ore.

If you can't come in person, you can do the next best thing, write direct to the company at that address and receive prospectus and full particulars.

This stock will go quickly. People are not going to lose out on a second Greene Consolidated proposition. Not at 20 cents per share—and our advice to you is not to delay, as we reserve the right to advance the price without notice.

The allotment of shares at 20 cents is limited to 50,000 shares.

You may buy shes on time payments at 25 cents per share, 10 per cent of total amount to be paid down and balance within 10 months, on equal monthly payments.

We should sell all these shares within the next week—but in any event see that you get YOUR shares. Don't you delay, no matter what the others may do.

The safest way is to fill in the coupon below and thus be sure. Address all communications and make all drafts, money orders, etc., payable to the company.

HOW YOU MAY BUY STOCK NOW.

Number of shares.	Amount cash.	Time.	Time Payments 1st paym't Per mo. down.	9 mos.
100	**$20.00**	**$25.00**	**$2.50**	**$2.50**
200	**40.00**	**50.00**	**5.00**	**5.00**
300	**60.00**	**75.00**	**7.50**	**7.50**
500	**100.00**	**125.00**	**12.50**	**12.50**
1,000	**200.00**	**250.00**	**25.00**	**25.00**

We began the sale of this stock about two weeks ago, the first allotment being offered at 10c cash, 12½c on time payments. Evidently we told our story well, and the personnel of the men connected with the company impressed the public favorably, for the entire allotment was sold out within ten days, and we have had to return the subscriptions of those who were too late to buy at the opening price of 10c. The next allotment is hereby offered at 20c cash, 25c time per share. Sufficient money has been subscribed to enable us to place orders for machinery. Mr. Hall is now in the West looking at a number of plants, but will return to Chicago tomorrow to meet prospective investors. He has been equipping mines for years with machinery and knows where to go for bargains. We propose to save money—your money and ours—in the equipment. Used machinery that is in good shape is just as good as new for our needs, if it can be found. You may safely leave the buying to Mr. Hall. He will make no mistakes. When this machinery is installed, which it will be within a short time, we shall jump the price of the stock again, perhaps another 100 per cent, perhaps more. The mines are being worked every day. They are not prospects. The stock should sell for 50c a share now and should go to $2.00 per share before very long. If you want to make an investment that will last practically forever buy Copper Belt at 20c. Buy all you can pay for.

Buy the stock and settle it on those dependent on you. It's the best opportunity for insurance offered today. Look at the record of the Coppers. One copper mine that cost $1,200,000 paid in one year ten million dollars in dividends, while four of the largest Western trunk line railroads, with 17,000 miles of track, paid only $9.750,000 dividends. Thirty-two of the leading copper mines in this country on a paid-in capital of $92,000,000, have paid over $230,000,000 in dividends, while no railroad in the United States has ever paid back its original cost. The Steel Trust, with a capitalization of $1,400,000,000, earned only $74,000,000 profit last year.

Of the seven largest dividend-paying mines in the United States today, six are Copper mines.

No wonder the shrewd investors are hunting for good Copper stocks!

Buy Copper Belt—put it away. It will keep you in comfort when the evening of your life comes and you are no longer able to fight the battle for a living.

Copper stocks offer the safety of a government bond, with the speculative element of a gold mine. Copper is king of all investments today.

FILL IN THIS COUPON AND MAIL TO US.

CAPTURED IN HAYTI.

Murderers of Americans Delivered to the Dominican Authorities.

Fort au Prince, Hayti, Sept. 29.—The two Dominicans, Santiago and El Marcin, accused of the murder of Charles P. Thurston and John Kilbourne, the two Americans employed as collecters in the Dominican custom house service, who were killed by smugglers last August, were yesterday delivered ocer the Dominican authori- been confiscated by the customs house officer on board a dominican steamer, which left this port immediately for San Domingo. The prisoners say the Americans opened fire on them first, when the Dominicans demanded the return of some merchandise which had been confiscated by the custom house officers. There are a number of versions of the affair, but the most logical is that the Americans seized merchandise, valued at about $6,000, purchased here by Italian and Dominican smugglers, and that the next morning the Americans were murdered while at breakfast without being able to defend themselves.

THE GYMNASIUM CLUB

The classes of the Duluth Gymnasium club with Miss Ruth Roberts, director, will not open until Oct. 3, owing to the fact that the equipment of the rooms is not quite complete. The classes are as follows:

Monday—10 a. m. matrons; 3 p. m. matrons; 6:45 p. m. business girls; 7:45 p. m. business girls.

Tuesday—2:30 p. m. high school; 4:30 p. m. intermediate; 7:30 p. m. advanced business girls.

Wednesday—10 a. m. matrons; 3:00 p. m. matrons; 6:45 p. m. business girls; 7:45 business girls.

Friday—2:30 p. m. high school; 4:30 p. m. intermediate; 7:30 p. m. b advanced business girls.

Saturday—9:30 a. m. children; 11:00 a. m. boys.

MANY HUNTERS AFTER PERMITS

During the first month of the fall hunting season, since the hunting licenses were received from the game and fish commission in St. Paul, there have been 260 of these permits taken out at the county auditor's office and considering that the best of the hunting season is just beginning this is a very good record.

Although the exact number of licenses taken out during September of last year is not known it was somewhat less than the record for this year. There is not a great abundance of chickens in the country about Duluth and no great enthusiasm has been evinced for chicken shooting although a few parties have returned with fairly good bags of game.

The best part of the duck season is now on and the reports coming in state that the flight of the birds southward is very good and many parties are being planned to go after them. This good news from the woods will it is expected inject another lease of life into the hunting license business at the court house which will probably last until the latter part of November.

THE CAT CAME BACK.

The "fair Isle of Cuba," over which we have shed so much blood and maudlin sentiment, is back under the shelter of stars and stripes again.

Before, we took it under our wing because it was unable to free itself from the grinding cruelties of an effete yellow nation that did not know enough to handle it decently.

This time, we take it in hand because it cannot get away from its own internal dissensions, and because, apparently, it does not know how to carry itself decently.

But the jingoes who have been bumping the blue vaults of the empyrean in excited flights of fevered oratory have wasted a lot of breath in loudly declaiming that if the flag goes up over Cuba it shall never come down again.

Practically, it is not going up at all. We cannot afford to forcibly acquire this island, under any pretext whatever. Even if we did it in the name of civilization, the taint of hypocrisy would sully us, because if we are going into the business of taking over feverish and hysterical Latin-American republic because they cannot behave themselves, we shall presently own the entire American continent south of the Canadian line, and the Spaniards might well hiss between their clenched yellow teeth execrations upon the "Yankee pigs!"

Secretary Taft, who has reluctantly established himself as provisional governor over the island after all attempts to bring about a peaceable settlement had failed, has very carefully explained, in his proclamation to the people of Cuba, that this is to be a Cuban government under the direction of the president of the United States, and not a Yankee government of the Cubans. He said in his proclamation: "The provisional government hereby established will be maintained only long enough to restore order, peace and public confidence by direction of and in the name of the president of the United States, and then to hold such elections as may be necessary to determine on those persons upon whom the permanent government of the republic should be resolved."

So the Cuban flag still flies, and it is not to be displaced by the American banner. There should not be a drop of blood shed over it. The fighting between the Palma government and the insurrectionists has ceased, and there is no longer a Palma government. Taft will restore order, call an election, oversee it to make sure that it is a fair one, and then the fortunate victors in that election will take over the government, Taft and his marines will return to Washington, and the white wings of the dove of peace should twinkle in the smiling skies above the puzzled little island.

A great sense of relief will be felt all over the nation when it is learned that there is no intention, outside of the sugar trust and the tobacco trust, of making Cuba over into an American territory.

THE PARTNERSHIP OF SOCIETY.

William Allen White, in the first issue of the New American Magazine under the new partnership, contributes a paper in his usual charming style on "The Partnership of Society," in which there is thought worth the consideration of every patriot.

In brief, it is the duty that each man owes to society that is the theme of his discussion, and it is a subject that is too much neglected. The average man is too likely to think more of what society owes him than of what he owes society. He expects much, and gives little.

In projects for local improvement this is well exemplified. Everybody is willing to have a fine, clean, beautiful city, but few are willing to do their share to make it so. Nearly everybody sits back and waits for the others to do what is obviously needed, and the result is, of course, that but little is done.

Selfishness is the root of this evil. If every citizen of a country or a community realized to the full his duty to his fellows, and sought to perform it, that county or that city would be an ideal place of residence. But unfortunately it never is that way, and probably it never will be. Still, there are many that do not think of their duties to society unless they are reminded of them, and who are quite willing to do their share if they are poked up. So there is room for improvement, and there is work to be done toward instilling in the minds of the people a livelier sense of individual responsibility for the common welfare.

The least any good citizen can do by way of compensating society for the advantages it offers him is to keep himself and his surroundings as they should be. He can refrain from violating laws and customs to the annoyance of his neighbors; he can keep his home and his grounds sightly and clean; he can pay his taxes and exhibit an intelligent interest in the affairs of his community. If everybody did this much conditions would be vastly better. But only a small proportion of the people goes any farther than this, and a considerable proportion fails to go so far.

The spirit that makes a live, progressive community is full of this sense of the individual's obligation to society. The public-spirited citizen who is always ready to take part in measures for the improvement of local conditions, even to the extent of paying a share of the expenses from his own purse—the final test of good citizenship—exemplifies admirably the idea of the partnership of society.

A business partnership in which one partner expected the other to do all the work would not last long. A municipal partnership is usually of just that nature; the majority of the partners leave a few partners to do all the work. Not only that, but they make more work for the active partners to perform by neglecting their own individual duties.

ADVERTISE DULUTH.

Some members of the Duluth Commercial club appear to have fancied, from what The Herald has been saying about advertising Duluth, that it intended to reflect upon the industry and enterprise of the club.

Not so. The Herald has had no such intent. It realizes that the Commercial club has been doing good and effective work in spreading abroad the advantages Duluth offers to all classes of business and manufacturing enterprises.

But it realizes, too, that the Commercial club cannot do it all alone. It must be backed by an aggressive public sentiment. It must be aided by individual efforts among the citizens to push along the work of advertising Duluth. Everybody must pitch in and do his part, and not leave it all to the Commercial club.

Furthermore, the funds available for this purpose in the treasury of the club are limited. The Herald believes that it has been making the most of the money it could spare for this purpose, but it should have more money, and more outside help.

What is needed is a general awakening among the people to the need of greater efforts to push Duluth ahead. The materials are all here for the making of a Greater Duluth. But they will no more assemble themselves automatically than a heap of bricks and timber and mortar and nails will spontaneously leap together and form a house. Workmen are needed to construct a building, and workmen are needed to contruct the Greater Duluth that we all realize to be within our reach. But we must reach for it. It will hardly come without invitation.

That is why The Herald has been urging a concerted effort to advertise Duluth. Other cities are making such efforts. The citizens of these communities have become educated in the value of advertising to a city, and they are taking off their coats to help advertise their home towns.

Few of these cities have anything like the amount of things to advertise that Duluth has. Few of them have more citizens able to take part in such work and to labor effectively for the upbuilding of their community. But they have become aroused to the need of putting their shoulders to the wheel, and they are doing it.

That is what Duluth needs. This city is prosperous, and it is growing rapidly. But the growth that comes without effort is much slower, necessarily, than that which is stimulated by active work.

Duluth can be made a town of 150,000 people in a few years if the labor needed to make it so is done. But a concerted effort is required, and with the Commercial club as a rallying point the people of this city can accomplish wonders if they will only set about it.

Advertise Duluth.

CANDLE LIGHT.

How many readers of The Herald use candles for illuminating their homes? Very few, no doubt, and yet this country produced candles to the value of $3,889,362 in the fiscal year ending in 1906, of which candles worth $609,000 were exported, and the balance were used at home, according to the census reports.

In these days of electric light and gas light, even kerosene as a source of household lighting has gone pretty well out of use in the cities, though of course, it is still used to a large extent in the country districts. But candles are almost never seen furnishing light even for the most humble homes, and it is a trifle astonishing to discover that we are using so many.

Very likely, however, a large proportion of these candles are used for devotional purposes in the churches of the land. Another large share of them are used by mechanics for various purposes, and while there is no way of getting at the exact proportions, only a small portion of the output is used for lighting homes.

HAVE CONTRIBUTED ENOUGH.

The standpatters must be blind indeed if they do not see that there is a widespread revolt within the ranks of the Republican party against the robberies committed under the shelter of certain schedules of the Dingley tariff law.

Thousands who have swallowed all the stump orators have said about the prosperity that has grown out of the protective tariff, and accepted it as gospel because it was evident that the country was prosperous and because it was good partisanship to stand up for the tariff, are beginning to see that much of this prosperity is at their expense and for the benefit of the trusts that are permitted to charge what prices they please because a prohibitive tariff completely shuts out foreign competition. They are beginning to analyze this country's great prosperity, and to see that they are not getting their share of it. They are beginning to see that even if they get $3 a day now where they only got $2 ten years ago, their $3 now will not purchase as much as their $2 did then, and that therefore they are worse off than they were when they were not getting so much wages.

A Kansas Republican editor, being asked to contribute a dollar to the Republican congressional campaign fund, made this reply:

> We recently have completed building a house at a cost of something over $4,000, and for every foot of lumber, every pane of glass, every sack of cement, every pound of nails, and, in fact, for nearly every bit of material that went into it, we made a good, liberal contribution through the trusts that control them, and we guess we have done our share. We'll just let the several trusts to which we have had to pay unwilling tribute in the past year, pay our dollar for us. We need it and they don't.

The Republican party in this campaign is aggressively upon a standpat basis, by official order. That mean that it promises no revision of the tariff. It is asking for contributions from the rank and file of the party, and thousands to whom the appeal comes will feel just like this Kansas editor feels. They may not have built themselves houses, but they have worn clothes and they have eaten and they have warmed their rented homes, and with every purchase they have made they have contributed to the swollen fortunes of the direct beneficiaries of the prohibitive tariff. Upon every mouthful they ate, upon every article of wearing apparel they purchased, and upon every household necessary they bought, the trusts imposed a tax. They have had to worry and figure over the problem of making both ends meet, that the millionaire beneficiaries of the tariff might roll in luxury.

Small wonder, then, if they think they have paid their share, and demand that the trusts pay their campaign dollars for them. Still, if the trusts pay the dollars, it means that they will get in return for their investment the preservation of the Dingley tariff schedules.

What is the poor consumer to do? Obviously, he is to vote down every candidate who will not declare himself openly and unequivocally for a protective tariff that will be a real protection to the American people, and not a vicious form of special privilege for the profit of a few at the expense of the many.

A SHATTERED ROMANCE.

There is nothing more beautiful in life than romance, and real life furnishes romances as beautiful as any the masters of fiction have imagined.

But the trouble with many of the real life romances is that they do not round out so charmingly as the imaginary ones do. A novelist can bring the happy couples together in the last chapter and cause them to live happily ever after, but in real life this does not always happen, sad to say.

It is the function of the story-writer who would get his book among the "best sellers" to shatter the opposition of circumstances and bring his hero and heroine out whole and happy at the end of his novel, because the book-reading public does not approve of sad endings, no matter how artistic they may be. The reason people want the endings to be happy in the books is that they see enough unhappy endings in real life, and they want no addition to their store of experiences like that in their novels.

It is too bad that some novelist could not write a last chapter for a romance from real life that the New York newspapers have been telling about. Its sad ending is not even redeemed by art from its pathos.

Frederick V. Kiely, a poor young man, wooed and won a fair stenographer, and they became engaged.

Then entered the villain, the grim disturber of happiness, in the shape of a wealthy broker, who admired the fair pounder of the keys and wanted her for his own. He offered the hero $25,000 if he would give up his attentions to the young woman.

It showed that love of gold has not entirely driven out faithfulness and romance when the young man indignantly refused the offer. Then, pulsing with righteous wrath, he marched to the young person's abode to tell her about it and to reap the reward of her warm approval of his faithfulness.

Here a great shock was in store for him. The charming stenographer for whose sake he had refused a fortune listened to his story with growing coldness. When she had heard the finish she sent him forth into a cold, unsympathetic world, and she has refused to have anything to do with him since.

Why?

Oh, she said that a man who had no more business sense than that would always remain poor, and that she wouldn't take any such chances.

So she has decided to marry the broker, and the young man loses the $25,000 and the girl, too.

But on the whole, it ought to be worth at least $25,000 to him to have escaped being yoked in the remorseless bonds of matrimony with a woman like that.

THE PASSING SHOW.

Has Hearst swallowed the tiger, or has the tiger swallowed Hearst?

* * *

Hurricanes lash the South, while Duluth basks luxuriantly in the lap of late summer.

* * *

Minneapolis has again made a bid for fame with another exceedingly unpleasant murder story.

* * *

A Russian does not become of legal age until he is 26 years old, and he doesn't become much of a citizen then.

* * *

The Commercial club is doing good work "advertising Duluth," but it needs the help of every citizen to make its efforts count to the fullest extent.

* * *

The Democratic donkey, the Tammany tiger and the Hearst mongrel are going to try driving tandem. Interesting spectacle, fraught with vast possibilities of diversion for the public.

* * *

The czar has made the uncomfortable discovery of a plot against his life within the walls of his palace. When the household is not to be trusted, pity the sorrows of the wearer of a crumbling crown.

* * *

There will be no question this time in connection with Cuban intervention about whether the constitution follows the flag. The flag is there as a visitor only, and the Cuban constitution still stands.

* * *

These political "moral victories" that are so common now are more satisfaction to the general public than they are to the men that won them but did not get the jobs.

* * *

Bryan will look in vain for any endorsement of his candidacy for president in the Hearst platform. Good reason for it, too, since Hearst hopes to make that platform a step toward the presidential nomination.

* * *

The United States is governing Cuba again, but the tobacco and sugar trust jingoes who wanted this country to take the island back are grievously disappointed to find that we intend to play fair with the Cubans.

* * *

The Houston Post wants to know why the men that never married Lillian Russell don't get together and nominate a ticket, and the Washington Post thinks that perhaps they have not yet given up hope of joining Lillian's hapy band of ex-husbands.

That iron ore deal between the Great Northern and the United States Steel corporation has been completed again, This makes about thirty-seven times, and each time it is good for a little movement in the market.

HOTEL GOSSIP.

"I do not know how it is in Minnesota, but in Wisconsin it is against the law to hunt ducks with the assistance of a gasoline, naptha or steam launch," said R. A. Reed of Chippewa Falls, Wis., at the McKay. "The legislators evidently figured more birds could be killed from a launch than in any other way, and I guess they were right, too. There is something about a launch, with all its noise, that doesn't appear to frighten the ducks as much as a row boat or canoe.

"Perhaps this is because, during the closed season, the birds have become used to the self-running boats without being disturbed. Often they will allow one of them to approach within gunshot before they get out of the water, and more frequently still fly within close range of the speedy craft. The speed also has something to do with it, probably, for it doesn't give the birds so much time to get frightened as the old system.

"It is a lot of fun hunting ducks from a launch, and the law against the use of tals class of boat will have its disagreeable features for Wisconsin sportsmen. Where the birds are so few as they are in some sections of the state I should favor rather a loose observance of it, for otherwise a person would hardly be able to get enough ducks for a meal in a day's shooting."

* * *

"A company of Indiana men claim that they have something better than a gold mine in a bed of kaolin clay in Kentucky," said F. L. Miller of Indianapolis, Ind., at the Spalding. "The bed produces the white clay for the manufacture of porcelain in this country, and also makes alum, aluminum and numerous other necessities.

"The time has come when clay is a more desirable deposit than gold in the central states. It is being used in about everything manufactured—sizing for paper, for filling clothes, for cleansing vegetable oils, lard and greases, for making porcelain, artistic pottery, stonewares, tiles and hundreds of other things. The great alum trust got its start in a 105-acre clay bed in Lawrence county, Indiana. This trust now practically controls the output of the world.

"The new company has control of 2,300 acres of the clay lands in Kentucky, and these lands are expected to produce in the neighborhood of 50,000,000 tons of the highest grades of clay."

* * *

"The Portland exposition was such a big success that Seattle has decided to have a fair of her own," said C. T. Adams of Seattle at the St. Louis. "It will have the fancy name of Alaska-Yukon-Pacific exposition. The city authorities already have appropriated nearly half a million dollars for the project and the state legislature is to be asked to contribute a million more. A site has been agreed upon, and it will be Seattle's aim to eclipse the record of Portland.

"There is a general tendency to decry frequent national fairs, but there seems to be ample justification for ours. Not only do we intend to exploit the Northwestern states, but also the land still farther to the north and west. In spite of the length of time Alaska has belonged to the Union it is practically unknown to the rank and file of the American people. The exposition will bring it nearer home to those who can spare neither the time nor the money to visit the country itself."

"I'm Earnin' What I Git."

Nearly every day the papers knock some other idol down;
Yesterday they spoiled the halo that was worn by Abner Brown—
Rich old, plous-lookin' Abner! Seems as though it can't be true—
Why, the things they charge agin him common thieves would hardly do—
Took the money of poor orphans left in trust to him, they say,
And got rich by cheatin' people in a slick and soleman way!
Yes, he used to look down on me, and perhaps he does so yit,
For I haven't got much money, but I'm earnin' what I git!

Money, money, money, money! Nothin's low or mean or vile,
'Cordin' to some people's doctrine, if you only get your pile.
And the way to grab the profits; put aside the golden rule;
If you turn from tainted money they'll regard you as a fool.
"Let your house become a brothel if it pays to do the same,"
So they'll tell you who've gone crazy in the money grabbin' game—
Well, I s'pose that I'm old-fashioned; I ain't got no fortune yit;
I'm a poor man, I acknowledge—but I'm earnin' all I git!

They're a-huntin' Henry Waddums—lived in that fine house up there—
Got his fingers soiled while tryin' to become a millionaire.
Eben Hotchkiss has been stealin'; papers they've exposed the case.
So the church has gone and bounced him and the fam'ly is in disgrace.
'Course there must be wealthy people who have made their money right,
But the tainted rogue and rascals loom up everywhere in sight.
Money, money, money, money! What won't some folks do fer it?
Well, I ain't got no big income—but I'm earnin' what I git!

HAS NO SUBSTITUTE

THE WEATHER.

"Heavy frost tonight," says the weather man, and if you have delicate plants out of doors you will do well to look out for them before you go to bed. Also, a little grate fire, or a temporary blaze in the furnace, will make the evening more pleasant. This morning was delightful, fresh and cool and bracing, yet with a warm sun that moderated the coolness of the breeze that came over the hill. Yesterday's highest temperature was 68 degs. and last night's lowest was 44 degs.

A year ago today it was warm, the temperature getting up to 80 degs.

Says Mr. Richardson of conditions: "The Manitoba and southern storms have apparently united forces, the center being over Illinois this morning, and causing light to heavy rains over the Mississippi and Ohio valleys, Eastern gulf states and west of the lake region except Lake Superior. Higher temperatures prevail in the northeast front of the storm, but much cooler weather attends a high pressure area that has advanced to the Dakotas. Heavy to killing frosts occurred in the latter section this morning. The easterly movement of the Dakota high pressure favors mostly clear and chilly weather in this section tonight and Sunday."

Following were last night's lowest temperatures, as recorded by the weather bureau:

Abilene	60	Memphis	66
Asheville	64	Miles City	44
Atlanta	70	Milwaukee	60
Battleford	30	Minnedosa	30
Bismarck	34	Modena	42
Boston	52	Montgomery	72
Buffalo	54	Moorhead	40
Cairo	64	New Orleans	72
Calgary	28	New York	62
Charleston	68	Norfolk	70
Chicago	62	Northfield	36
Cincinnati	70	North Platte	46
Concordia	54	Oklahoma	64
Davenport	60	Omaha	56
Denver	44	Phoenix	70
Detroit	66	Pierre	44
Devils Lake	30	Pittsburg	66
Dodge	50	Port Arthur	50
Duluth	44	Portland, Or.	52
Edmonton	36	Prince Albert	28
El Paso	60	Qu'Appelle	26
Escanaba	52	Rapid City	40
Galveston	76	St. Louis	66
Grand Haven	60	St. Paul	54
Green Bay	52	San Antonio	62
Havre	40	Sar. Francisco	60
Helena	42	Santa Fe	44
Houghton	46	Ste. Marie	52
Huron	40	Shreveport	64
Jacksonville	74	Sioux City	54
Kamloops	40	Spokane	52
Kansas City	62	Swift Current	28
La Crosse	56	Washington	64
Lander	38	Wichita	66
Little Rock	66	Williston	28
Los Angeles	54	Winnemucca	40
Madison	56	Yellowstone	32

Department of Agriculture, Weather Bureau, Duluth, Sept. 29.—Local forecast for twenty-four hours ending at 7 p. m. Sunday: Duluth, Superior and vicinity: Fair tonight and Sunday. Cooler tonight with probably heavy frost. Fresh northwest to north winds.

H. W. RICHARDSON, Local Forecaster.

Chicago, Sept. 29.—Forecasts until 7 p. m. Sunday: Wisconsin: Fair tonight except rain in southeast portion. Cooler with frost in north and west portions. Sunday fair.

Minnesota: Fair and cooler tonight with frost. Sunday fair with warmer in west portion.

North Dakota: Fair and warmer tonight and Sunday.

South Dakota: Fair tonight. Sunday fair and warmer.

Upper Lakes: Fresh to brisk northeast to north winds. Rain tonight. Sunday fair.

FLOATING FUN.

Baltimore American: "How did you manage to get away from that country constable who wanted to arrest you for speeding your auto?"

"Oh, easily; we managed to throw dust in his eyes."

Philadelphia Press: "That's the worst paying family I ever attended," said the first doctor.

"Yes, I used to attend them, but I never succeeded in getting a penny out of them."

"Well, I've had better luck. I got a nickel out of one of the children after it had nearly choked the kid to death."

Baltimore American: "What is that queer smell in the church trustees' meeting room?"

"That's only the disinfectants they are using on the contributions of tainted money."

Chicago Tribune: Johnny Smith—Paw, the boys have made a big bonfire out in the alley.

Mr. Smith—Well, thanks to a gracious Providence, Johnnie, the wind is blowing in the direction of Thompson's barn and away from ours.

Puck: Browne—You asked your wife to go with you to the matinee and then got tickets for the evening?

Towne—Yes: You see, I really want to see the show and she will probably be ready to go to the matinee in time for the evening performance.

Philadelphia Catholic Standard: "Of ccurse, John," said his wife, "I'm obliged to you for this money, but it isn't enough to buy a real fur coat that—"

"Well," interrupted the brutal husband, "you'll have to make it go as fur as you can."

Chicago News: "What are you doing, Pat?" asked the inquisitive person, observing the son of Erin ascending a ladder with a hod filled with bricks.

"Oi'm carryin' knock-out drops," replied Pat, as one of the bricks fell and struck the l. p. on the head.

Washington Star: "What do you think of this idea of spelling reform?"

"It's all right," answered Farmer Corntossel. "I'm glad to see it. I allus did want something to happen to take the conceit out of the school teacher that used to lick me fur not doin' things his way."

Saturday Night Talk

The Pendulum Mind.

"The secret of efficiency is to be able to dispose of every question as it arises so that it will not come up for decision again." What a deal of sense there is in this observation which is constantly urged upon the employes of one of the largest business houses in this country! To be able to decide a question promptly and finally is a gift that anyone may covet and cultivate, while the possessor of a pendulum mind is to be pitied; and yet the world is full of such persons. One of the most prominent men in public life today, who has held high office, suffers in the esteem of those who know him best from this very inability to make up his mind and to keep it made up. Some declare that his vacillation renders him unfit for holding any kind of an important office. And in all ranks we find men and women who waste time and energy, who irritate their friends and lose their own self-respect because they wabble so from one position to another.

The fact is, life in this world of action calls for the power to decide things almost every waking hour and the boy and girl brought up to weigh and settle matters according to the best light they have bid fair to become potent forces in after years, while the irresolute youth, who reflects the opinions of the person with whom he has last talked, who makes a choice and then in ten minutes reverses it, and then ten minutes later returns to his first decision can never be a resolute and efficient man.

But there are ways of overcoming this perpetual swing of the mind and will, back and forth. One needs, first of all, to discriminate between issues trivial and issues important. It is a shame to spend much time deciding which necktie one will wear on a certain day, or which of several good books he will read. There are questions such as the choice of a career or of a life partner, which call for mature and even prolonged deliberation, but we must learn to dispose of little questions quickly, and on the larger ones, we ought not to deliberate too long. To be sure, concerning them we need to proceed at a reasonable speed and to avail ourselves of all good counsel we can get. He who looks under such circumstances, to Him who represents the wisdom and loving purpose that guides this universe is sure to receive enlightenment. But our point now is that when one has attained all the facts bearing on a given situation and expects no more new ones, and has studied, pondered and prayed, the time has come for action, and one only loses time and power if he postpones till Tuesday what might just as well be settled on Monday.

Another cure for indecisiveness is to adopt the plan of resting content with a decision after it is made and not allowing the mind again to retraverse the earlier ground. In extremely rare cases, it may be right to reconsider and reverse a decision, but ninty-nine times of 100, when after due thought, a man has decided an issue, it is best to stick irrevocably to it, even though one might be tempted to indulge in regrets. Put these away and say to yourself. "I'll face the music, and I won't think that I have made a mistake until the fact is absolutely forced upon me." But usually, the light will grow clearer as you go on, and in a short time, you will be thankful that you put your foot down and kept it down.

All this has a bearing on the settlement of the greatest questions which can engage man's thought, namely those of his relation to a higher power and of his attitude toward ideals of conduct. It is surprising how many people shrink from taking positive ground on matters of religion. They are content with a non-partisan, undecided state of mind. But here the call is more peremptory than in any other region of life, to make up one's mind touching the existence of God, claims of the Christian life, and the obligations to serve one's fellowmen. Shall we ever have any clearer data than we have now; do we need any tremendous new illumination? No, we ought not to let our minds swing back and forth, but choose that course which reason and conscience approve, and having chosen stick to it and let others know where we stand.

THE PARSON.

Reflections of a Bachelor.

New York Press: Warm weather raises the price of ice, but it doesn't lower the price of coal.

When a girl makes up her mind to marry a man his only chance to escape it is to die.

A good way for a man to settle down is to have his family come home from the summer vacation.

There would be some fun in building a home if you had any idea what it was going to cost you.

Bad Financiering.

Topeka Capital: A Topeka man is spending $1,500 in having a book containing his family history printed. It is his money, of course, but he could have achieved the same end at much less expense by running for office.

TWENTY YEARS AGO.

Taken From the Columns of The Herald of This Date, 1886.

***A letter from Gilbert Munger, brother of R. S. Munger of this city, who is a well-known artist, now in Paris, states that Gilbert witnessed the recent duel between Gen. Boulanger and Baron Lacrientz, after an exciting chase, and has made it the subject of a painting.

***Miss Millie Davey has accepted a position as saleslady in Kahn's dry goods store.

***Mr. Blackburn has severed his connection with S. M. Miller's grocery store, and will leave soon with his family for Virginia, where he intends to take charge of a fruit farm.

***E. R. Barber and wife have gone on a visit to the Minneapolis exposition.

***C. H. Jackson, manager of the Canton, Ohio, bridge works, who has spent the summer in Duluth, took his departure yesterday.

***F. W. Nettleton left last evening to take up his residence in St. Paul. He will be missed by his many friends in Duluth.

***Early last evening August Glendrevn, a Frenchman, was held up on St. Croix avenue and robbed of a gold watch and some money. Officer McLauhlin arrested two men, named Devine and O'Neill, and the victim fully identified them as the sandbaggers.

***As C. H. Messer arose from the supper table at the Norris house last evening, he felt a sudden shock in his left trouser's pocket, and in a moment this entire portion of his garments was in shreds. Examination showed that a small cartridge, supposed to have been charged with dynamite, had exploded in his pocket, where it was evidently placed by some practical joker.

***B. B. Herbert was yesterday nominated for congress by the Republicans of the Third Minnesota district, after a hard fight, twenty-two ballots being taken.

***There are probabilities that there will be four candidates in the field for sheriff of St. Louis county this fall, and the Prohibition party yet to hear from.

***There are nineteen men on the surveyor's pay roll who receive all the way from $60 to $100 per month. The village surveyor's salary is $125 per month.

***General Manager George F. Shaw of the Cloquet Lumber company was in Duluth yesterday to purchase material for erecting a slab burner at the mill.

A certain young man who lives in the East end is strongly addicted to the writing habit. He writes for all the leading magazines, and they never fail to remember him with little slips, which inform him of the regret which they feel in returning the manuscript herewith.

His father sometimes wishes the boy would turn aside from the journalistic path long enough to earn a little money, but his mother thinks it is just too nice to have Georgie so literary. Father is willing that George shall take up the profession of writing, but is of the opinion that he ought to get a steady job somewhere, and push the pen on the side. More than once he has pointed out that some of the world's best writers have started out by employing themselves assiduously at meaner tasks, while preparing their works, which were to startle and delight the world.

But George never did take kindly to the idea of working. The nearest he ever got to it was returning the library books of all the members of the family, and getting new ones in return. He was willing to make the library trips, because they had a distinct literary aspect.

Moreover, and despite the grumblings that father gave vent to now and then, George did not have to do anything more, for ma thought he was all right in every way, and ma controlled a good deal of stock in the household, if father was the president.

So blind was mother to George's faults that she allowed him to sleep late in the morning, and always furnished him with a warm breakfast when he did choose to arise from his downy couch. More than that, she never spoke a word against it when he sat up in his room and smoked cigarettes until the cows came home, thinking out articles and stories which were calculated to make Robert W. Chambers and Ex. E. Beach hide their heads and turn green with envy.

And in many ways it seemed that George had the right hunch. All the first aids to young writers told him not to be discouraged when his stories were returned with thanks by publishers, and to stick to it, and in the end he would win. The same aids pointed out the truths that the big league writers had many a manuscript returned before they finally got into the swim.

But just the same, many of the neighbors referred to the polished George as a shine, and wondered why his father did not put him to work.

George worked merrily on, however, encouraged by the praise given him by his mother and by the good folk who called at the house. They always told him that he was awfully clever, and that those unreasonable publishers would soon take a tumble to themselves and ask him to write some of their six best sellers.

However, after a time George got tired of collecting regrets from publishers and writing for the mere exercise. The fatigue gave him pessimistic ideas, which came to a head one evening when several friends of the family were guests at dinner.

One of the guests asked George how he was coming on with his writing.

George replied that he was being turned down regularly, and that it was necessary to have a name and a big pull with the editors to get a story accepted nowadays.

"I've got an idea now, though, that will solve the question, and show some of these fellows where they get off," said George, who was not adverse to slang despite his aesthetic tastes.

"What do you propose to do?" asked one of the guests.

"I am going to start a magazine of my own," said George. "I have noticed that lately the magazines have been getting worse and worse. Honestly, if I couldn't write any better stories than those which have been appearing in the Saturday Evening Post and some other of the big ones lately, I'd jump in the lake. I am going to start a magazine that will print nothing but the very best stuff."

"But," said one of the guests, "that will tke lots of capital. Editors have to pay big prices for the good matter which they use."

"Oh, well," said George, easily, "I will write most of the stuff myself."

* * *

According to the dramatic critics of the country, William Shakespeare has turned over in his grave many times, and if that is true, the probabilities are that he gave another twist quite recently.

The provocation occurred right here in Duluth, and while Wallace Munro was here in the interests of the Louis James company, which appeared at the Lyceum this week in Shakespeare's "The Merry Wives of Windsor."

Munro has many friends in Duluth, and one of them introduced him to a sweet young thing, who was perfectly delighted to meet him. She said so. The theatrical manager was quite prepared for that, however. Anyone connected with an attraction, who is able to issue passes therefore, is apt to be very popular with both sexes.

In presenting Mr. Munro to the young woman, the friend mentioned his connection with "The Merry Wives of Windsor" company.

Evidently the young lady misunderstood, and it was obvious that she did not know everything in this world, for she said:

"Oh, Mr. Munro, how did you ever happen to give your play that name?"

Munro was astonished, but he only smiled and said:

"'What's in a name?' have you ever seen my 'As You Like It?'"

OPHIR!

All stockholders who wish to have their stock exchanged for Cliff Mining Company stock should turn same in at once to office of St. Louis hotel, where parties authorized to receive it can be found all day.

MUSICIAN ASKS AID OF COUNTY

Tortured by Rheumatism, Oliver Herman Must Have Treatment.

Crippled by rheumatism so that he is unable to walk, and scarcely able to move a muscle without enduring the most excruciating agonies, Oliver Herman of Hibbing, formerly a prosperous and popular musician, made his appearance yesterday at the office of the poor department and asked for relief as he needed medical help.

Herman was formerly blessed with good health and a host of friends, and plenty of money, but now he is all but penniless and forced to depend upon the public for aid. He stumbled along yesterday with a cane and every step he made seemed to be a torture in itself. He stated that he was subject to prolonged attacks of rheumatism and that three years ago he was laid up for a long time but the attack did not find him stranded financially and he was cured after seeking medical aid.

Superintendent Cook will attend to his case today and it is likely that Herman will have to go to a hospital for some time. He had only enough money to pay his expenses for a few days.

BRIEF TELEGRAMS.

Following the discovery of a shortage of $2,700 in the cashier's department of the Kansas City postoffice last night, Harry Harris, the cashier, a son of Postmaster J. H. Harris, resigned. Before resigning the cashier deposited the amount of the shortage to the credit of the postal funds.

Thomas Taggart, chairman of the Democratic national committee in answer to a question in regard to William R. Hearst's nomination by the Democratic party of New York said: "As a Democrat who has always been consistent, I see nothing for the Democrats of New York to do but accept the nominee selected at Buffalo and support his candidacy."

Word has been received from Marseilles, France, to the effect that Senator W. A. Clark of Montana was in an automobile accident and sustained a broken rib. At last accounts the patient was slowly recovering.

Minister Russell at Caracas advised the state department yesterday by cablegram that President Castro of Venezuela is a very sick man. He is at one of the small suburbs of Caracas and is so weak that he has to be assisted into or out of a carriage or train.

Fire which originated in a barber shop has swept the business section of Barstow, Cal., destroying also the Santa Fe reading room.

"Out of 12,000 graduates of Southern schools for negroes not one had ever been convicted of a heinous crime against white women. Education is the only solution of the Southern negro problem," said Bishop Charles C. McCabe before the Wisconsin Methodist Episcopal conference at Janesville yesterday.

At Warsaw two more revolutionists were shot yesterday after trial by drumhead court-martial. During the last three days nineteen terrorists have been executed in Poland after such trials.

At Charlton, Iowa, Speaker Cannon yesterday spoke against a general tariff revision, and ridiculed partial revision. He pleaded for the re-election of Congressman Hepburn, who also spoke briefly.

Columbus, Ohio, was unanimously selected as the place for the next biennial convention of the Brotherhood of Locomotive Firemen and Engineers, the date being the second Monday in September, 1908.

A cablegram from Honolulu says that the steamer Mongolia, which recently went ashore on Midway island, reached that port yesterday.

Packers at the Union Stock yards at Chicago were yesterday given a 45-days' extension from Oct. 1, the date set for the enforcement of the new federal meat label law. Word to this effect was received from Secretary of Agriculture Wilson at Washington.

Justice Bischoff yesterday denied the application of counsel for Harry K. Thaw for the removal of his indictment from the court of special sessions to the criminal branch of the supreme court of New York.

Stanford Newel of St. Paul, formerly United States minister to The Hague, is in a hospital at Rochester, Minn., where he was taken Thursday suffering from an obstruction of the bowels. His condition, while serious, is not yet considered critical. An operation will be necessary to relieve the cause of the trouble.

Experimenting with new and untried Dentifrices is dangerous. Keep to SOZODONT, a standard for sixty years. Called "The Honest Dentifrice" because, in all that time no effort has been spared to produce a Dentifrice the teeth require. It purifies while it cleanses.

RETAIL TRADE IS EXPANDING

With Advancing Season and Conditions Most Satisfactory.

New York, Sept. 2.—R. G. Dun's Weekly Review of Trade says: Retail trade expands with the advancing season, and other department are forwarding goods as rapidly as the shortage of cars and scarcity of labor will permit. Mercantile collections are not as prompt as they would be if more normal rates prevailed in the money market, but there is little embarrassment or complaint. Autumn conditions are most satisfactory.

Manufacturing reports continue favorable, and there is a conspicuous increase in orders for cotton goods. Woolens are still the least active of the leading industries, and unless clothiers order liberally there will soon be much idle machinery. Foreign commerce at this port for the last week shows a gain of $1,591,544 in imports and a loss of $2,207,125 in exports, compared with the same week in 1905.

Textile conditions show improvement. Buyers are more willing to pay full quotations for cotton goods, and it is now rather a matter of delivery than price. New England footwear manufacturers are receiving liberal case orders.

Liabilities of commercial failures thus far reported for September amounted to $4,042,507, of which $1,889,707 were in manufacturing; $1,968,206 in trading and $184,594 in other commercial lines.

Failures this week numbered 188 in the United States against 240 last year and 22 in Canada compared with 21 a year ago.

WELL LAID PLOT AGAINST CZAR

Uncovered and Two Terrorists Arrested in Summer Palace.

St. Petersburg, Sept. 29.—A well laid plot against the life of the emperor and one with all the chances of success on its side was uncovered yesterday by the arrest of two armed terrorists, a man and a woman, in the quarters of the palace servants shrdlurdiu ters of one of the palace servants within the enclosure of the Alexandria palace, Peterhof, his majestey's secluded and closely guardded summer residence on Cronstad bay. The servant's son and another lackey named Kelpnikoff who were concerned in smuggling the terrorists through the guards and arranging their hiding place, were arrested for being implicated in the plot.

The emperor had been expected to return to Peterhof this week, and it is presumed that the terrorists intended to lay in wait and seize a favorable opportunity to shoot him while he was promenading or playing with his children in the palace grounds. Part of the great park at Peterhof is enclosed by a high wall surmounted with iron spikes. This wall is constantly patrolled by trusted Cossacks. Inside the palace grounds the only buildings are the unpretentious palace and two or three smaller houses where the servants are quartered.

Brandt's Millinery.

We are ready to show the latest styles in Ladies' and Misses' fall and winter hats, and receive orders for same. 114 West Fourth street.

TALK ABOUT CHILDREN

Episcopalians Hold Sunday School Convention at St. Paul's Church.

Many Interesting Addresses on Betterment of Work Given.

Episcopal clergy and laity gathered at St. Paul's church last evening to attend the first session of a Sunday school convention, the scope of which takes in the entire diocese.

Many clergymen from outside the city were present at the services, and among those who spoke were Rev. H. F. Parshall, rector of the church at St. Cloud, and Archdeacon A. H. Lord of Sault Ste. Marie. Rev. A. H. Wurtele, Bishop Morrison and R. E. Denfeld, superintendent of Duluth public schools, were the other speakers. The service was in charge of Rev. R. S. Reed of St. Paul's church.

The talks had mostly to do with what was necessary in the way of improvement to make the Sunday school more efficient than it is at present, and there were discussions of "The Sunday School Ideal" and "The Ideal Sunday School."

It was Rev. Mr. Parshall who spoke of "The Sunday School Ideal." He declared that every child should have at least six years' instruction in the Sunday school before he or she was ready for confirmation. He was strongly in favor, according to his statements, of the positive method of teaching. He would have Sunday school books wherein the answers were not given, and said he was opposed to cheap leaflets, which did the youngsters no good.

Rev. Mr. Parshall felt that perhaps too much of the short time allowed for the Sunday school sessions were devoted by the teachers to the telling of stories. He urged them to be thorough and positive in their instruction, to impress upon the children the importance of the knowledge they were gaining, and the purpose of the church.

R. E. Denfeld spoke on "The Relationship Between the Day School and the Sunday School." He said that the Sunday school should be conducted along just the lines as were the public schools. When the toddlers were sent to Sunday school, they should be interested with pretty things and stories, just as are the toddlers in the kindergartens of the day schools. Then, as the child grows, the method of instruction should take a more serious tone.

Archdeacon Lord spoke on the topic, "The Ideal Sunday School."

"In the Ideal Sunday school," said the archdeacon, "the teachers would be paid for their work."

He pointed out that this was feasible, inasmuch as it was customary to pay organists, choir masters, soloists, and parochial secretaries.

"Surely," said the archdeacon, "the Sunday school is of as much importance as the music, for what the Sunday school is today, the church will be tomorrow."

He said that the officers of a parish did not pay enough attention to the Sunday school. Few of them ever inquired after its welfare at vestry meetings, said he, unless reminded of it by the rector. He urged not only the salaries for the teachers but the best books and other equipment that the parish could afford. Another great advantage in the system of paying the teachers, that he pointed out, was the fact that good work could be demanded of them. He would have them take regular instruction in their work, pass examinations and hold regular teachers' meetings, at which attendance would be compulsory.

All of those things he urged for the ideal Sunday school, that the churchman or churchwoman of tomorrow might be prepared for the battle of life and be the right sort of men and women.

Bishop Morrison, in a short talk, gave a word of encouragement to the Sunday school convention, remarking upon the importance of its purpose. He also spoke of the breadth of the diocese, which presented difficulties to the plans of holding these meetings, and complimented those present upon their enthusiasm.

Rev. Arthur H. Wurtele, vicar of Trinity chapel, spoke briefly at the beginning of the services, explaining the purpose of the convention.

This morning, service was held for the visiting clergymen and later a business session.

DON'T EXPERIMENT.

You Will Make No Mistake If You Follow This Duluth Citizen's Advice.

Never neglect your kidneys.

If you have pain in the back, urinary disorders, dizziness and nervousness, it's time to act and no time to experiment. These are all symptoms of kidney trouble, and you should seek a remedy which is known to cure the kidneys.

Doan's Kidney Pills is the remedy to use. No need to experiment. It has cured many stubborn cases in Duluth. Follow the advice of a Duluth citizen and be cured yourself.

J. E. Watts, bricklayer, living at 918 Tenth avenue west, Duluth, Minn., says: "I have no reason to change the opinion of Doan's Kidney Pills which I expressed in a testimonial given in 1898. At that time it cured me of a bad attack of backache and lameness which made me stop work. I was unable to stoop, and the pain was severe just over the kidneys and through the loins. Plasters and other remedies I used brought no radical benefit. Doan's Kidney Pills were recommended to me so strongly that I decided to try them. I soon found that they were just the remedy for my case. In a few days the pain left me, and the cure has been permanent.

For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

CONSUMPTION CURED

MRS. ANNA HENKE.

Mrs. Henke, known as the handsomest woman in Milwaukee, states that after physicians had failed to give her any permanent relief from that dread disease consumption, she tried Duffy's Pure Malt Whiskey and has been entirely cured.

Mrs. Henke thankfully writes: "For six years I have been ailing with lung trouble, which kept growing worse until my case became serious. I employed four different local physicians, giving each a fair trial, but with very little success. During this period I was troubled with dizziness, cold sweats, cold hands and cold feet, coughing, chills and hemorrhages, which clearly indicated consumption. My physicians suggested that I move to a different climate. I tried several widely advertised medicines, but with no good results, then I tried Duffy's Pure Malt Whiskey. After using one bottle my condition began to improve. I continued to use this remedy for two years and am now in excellent condition. I used to be so weak that I could hardly stand up. I am now able to do all my household work, including washing. This letter is given of my own free will and that it may, if desirable, be used publicly that other sufferers may learn of my wonderful cure. I am a lifelong resident of Milwaukee, and the mother of five children.—Mrs. Anna Henke, Milwaukee, Wis., April 12, '06.

Duffy's Pure Malt Whiskey

If you wish to keep strong and vigorous and have on your cheeks the glow of perfect health, take Duffy's Pure Malt Whiskey regularly, according to directions, and take no other medicine. It is dangerous to fill your system with drugs; they poison the body and depress the heart while Duffy's Pure Malt Whiskey tones and strengthens the heart action and purifies the estire system. It is the only whiskey recognized as a medicine, and contains no fusel oil. This is a guarantee. Duffy's Pure Malt Whiskey has stood severe tests for fifty years and has always been found absolutely pure and to contain great medicinal properties.

CAUTION.—When you ask your druggist or grocer for Duffy's Pure Malt Whiskey be sure you get the genuine. It's the only absolutely pure medicinal whiskey and is sold only in sealed bottles; never in bulk. Look for the trade-mark, the "Old Chemist," on the label, and make sure the seal over the cork is unbroken. Price $1.00. Medical booklet and doctor's advice free. Duffy Malt Whiskey Co., Rochester, N. Y.

MANY HAVE PERISHED

(Continued from page 1.)

one unidentified woman; two unidentified negro children; three negro men killed by falling house; Mrs. Henry Warmick.

The following boats have been wrecked or driven ashore in the vicinity of Mobile: Tug Le Baron, barkentine Hornet, a pile driver belonging to Hollinger and company, a sloop and dredging boat of National Dredging company, schooner Pendleton of Pendleton Brothers, of New York; barkentine Trojan, of Genoa, Italy; barkentine Corrierore; steamer Josephine; sloop Mincola; sloop Olive; Overton; tug Hattie B. Moore; steamer Daishoota; schooner King of Avon; ship Pheruglaud; revenue launch Alert, sunk at her moorings.

The steamers damaged: The Nettie Quill and Mary have been damaged.

In addition to these boats, fishing smacks and small craft in great numbers have been driven to shore and smashed. Three boats belonging to the United States Fruit company, the Helen, Imperiator and Columbia, have not been heard from, but it is believed that they have ridden out of the storm in safety.

The storm, which was firest noticed by the weather bureau when between Jamaica and Cuba, made its appearance in the neighborhood of Mobile on Tuesday afternoon, when fitful winds began to blow and the barometer commenced to fall. The wind rose steadily all through Wednesday, and between 2 o'clock and 6 in the afternoon of that day blew with a velocity of forty-eight miles an hour. All through Wednesday night it rose steadily, and at 7:20 on Thursday morning was blowing from the easterly quarter at the rate of fifty-five miles, the barometer falling to 28.86. A few minutes after 8 o'clock on Thursday morning the wind died and the thermometer commenced to rise. The total rainfall in Mobile during the storm was 6.58 inches. While the storm was at its height the water from the bay was driven in with great force upon the city, the waves coming over the ends of the wharves, six feet deep. Three blocks up into the heart of the city the flood was driven, filling every basement and store.

At Commerce street, the first thoroughfare away from the docks, the water rose in the stores five and a half feet. The flood did not quite reach Royal street, one square beyond Water street. During the time the storm was at its worst, it was utterly out of the question for the men along the docks to do anything to save the boats, which they could see were being slowly driven ashore. Tugs were sent out in a number of instances, but they were not able to accomplish much until the storm abated.

The damage in the city of Mobile proper has been enormous. It has been contended by some that there is not a building in the city which has not been damaged. In some instances the amounts are a trifling matter, such as shingles ripped off or chimneys blown down, some of the largest buildings in the city having suffered severely. Prominent among those which were badly damaged were Christ Episcopal church. A large part of the roof was torn away, the steeple was blown down, carrying more of the roof with it, and all the windows were blown out. It is estimated that the damage to this building alone will amount to $40,000. The spire of St. Francis street Baptist church was blown down. About $10,000 will cover this loss to this church. Every other church building in the city was damaged in a less degree. The hotels also suffered severely, the Bienville losing the kitchen, which was blown away, and the Cawthorne losing many windows, through which the rain poured, damaging carpets and draperies to the extent of $4,000. The heaviest loss will fall on the merchants along the water front. None of them made any effort to remove their goods, and consequently all of them sustained heavy losses by the washing in of the tide.

The damage to the docks along the river front will amount to about $300,000. Reports of damage to boats down the bay and in the open gulf are numerous. The British steamer Doris Brook is said to be ashore on the end of Dauphin island and up so high on the shore that she can be walked around. The three masted schooner King of Avon is dismantled and ashore in the lower mouth of Dog river. The ship Pher Ugland has been driven ashore in the lower part of the bay with all of her masts gone.

The pilot boat Louise Harper had a trying experience. She attempted to weather the storm but was unable to keep off the shore and was finally carried by the waves far inland where she now rests with her nose in a pine thicket. From where she now lies to the nearest water that will float her is more than four miles. Scranton, Miss. is said to have suffered severely from the storm. Many houses are said to be levelled. No lives are reported lost. At Biloxi, wharves have been badly damaged.

The storm is known to have raged with great severity all along the north coast of the gulf, but as yet reports from the places which it is feared have suffered heavily have been few. All wires leading out of Mobile are down and it is not expected they will be in use before tomorrow.

Trains are running on the Mobile and Ohio and on the Southern but the Louisville and Nashville, whose tracks skirt the north shore of the bay from a point eight miles east of Mobile to New Orleans is in bad condition.

From a small place called Hurricane, down almost to Mobile, the tracks of the Louisville and Nashville are washed out in places and where the roadbed was exposed to the full fury of the storm, logs and debris carried in by the waves are piled high. The road bad tonight 2,000 men at work on this line, but it will hardly be possible for any number of men to open up the line inside of three or foun days. Five miles of track are gone between Mobile and the west.

MAYOR DUNNE OF CHICAGO

Elected President of the League of American Municipalities.

Chicago, Sept. 29.—Mayor E. F. Dunne, was elected president of the League of American Municipalities at the closing session of its tenth annual convention here yesterday. Municipal ownership was the dominant note in the last hours of the meeting, during which the members in attendance declined to go on record as favoring or opposing the principles. Mayor E. C. Timanus of Baltimore, was Mayor Dunne's nearest rival for first honors. He made the election unanimous by withdrawing his name after the first ballot. The convention adjourned to meet next year in Norfolk, Va.

Other officers elected were as follows: Secretary treasurer, John MacVicar, Des Moines, Iowa; vice presidents, George Hines, Poughkeepsie, N. Y.; J. E. McCafferty, Wilmington, Del.; L. A. Pointe, Montreal, Canada, and Silas Cook, East St. Louis, Ill.

NOTICE!

Owing to the number of requests we have arranged to again keep our office open evenings after Oct. 1 till May 1st. We do this to accommodate the number of people who cannot leave their work during the day.

We have the best furnished dental offices in the state. Every piece of work done by us is strictly guaranteed. We meet any and all competition and prove our prices the lowest in the Northwest for high grade work.

Beware of imitators. We use the new system to supply lost teeth.

SPECIAL PRICES—NO DELAY.

Full set teeth, $4.50 and up.
Gold Crowns, $4.50 and up.
Silver fillings, 75c to $1.00.
Bridge work, $4 and $5.00.

Remember our prices are low, but not too low, so we can afford to give you the best, the only difference being in the amount of profit we make. Ask our patients everywhere.

Grape-Nuts

IN POLITICS

Nothing of particular local interest in politics has occurred since the primaries, except for the organization of the Republican and Democratic county committees, and this work, being the regular routine, could hardly be classed among interesting events in a field where real exciting situations so often develop.

The membership of the committees and the selection of their chairmen appear to be meeting with general satisfaction. Otto Gafvert is expected to easily fill all the requirements of the place with the Republicans, and W. E. McEwen, with his capacity for hustling and doing things, can hardly fail to give satisfaction to the Democrats. The efforts of both committees will center on the state ticket, and an attempt will be made to thoroughly organize the city and county. Neither side will leave anything undone that can be legitimately done to further the interests of their candidates.

* * *

The coming visit of Governor Johnson is arousing considerable interest in St. Louis county. He will deliver two addresses in Duluth Monday evening, at 7:30 o'clock in Lincoln park, and at 8:30 o'clock at West Duluth. Every indication points to a large attendance at both meetings. Tuesday morning he will start at 7 o'clock for a tour of the ranges, making his first speech at Proctor. Tuesday and Wednesday he will also speak at Biwabik, Eveleth, Virginia, Chisholm, Hibbing, Tower, Ely and Two Harbors. Thursday night, he will speak at Grand Rapids. Another address will be made in Duluth later in the campaign, at the armory, by Governor Johnson.

Four or five local Democrats will probably accompany the governor over the range. He will have a single car attached to an engine provided especially for the occasion. All members of the county committee from the Mesaba range will be expected to meet the train at Iron Junction in order to escort him over the Mesaba range, and the Vermilion range members will perform the same courtesy after his arrival at Tower Junction.

* * *

In the primary election returns as published the name of Frank Fulton of Two Harbors, nominated from the Fifty-first district as representative on the Prohibition ticket was omitted, Mr. Fulton says he is in the field to win, if he can, and asserts that he stands a good show of being elected. He is prepared to put up a vigorous campaign, and looks to the Socialists of his home county for much support.

The indications are that there will be more of local interest in the fall campaign in Lake county than in St. Louis, for in the latter there are very few candidates who have opposition, while in Lake county just the contrary will be the case, if the report that the Socialists are to put a full county ticket in the field is true, and there is no reason to believe that it is not true.

The Socialists have a large following in Lake county, and the few weeks prior to the November election are likely to be lively ones there.

In this county the main contest of purely local interest will be between Sheriff Bates on the Republican ticket and Brady on the Democratic, trying for the position of sheriff. Mr. Brady is feeling quite confident over the outlook, and says election day will show him the victor.

* * *

It is understood that Duluth Democrats have the privilege of naming a candidate for attorney general, to take the place of the regular party nominee, who resigned this week. Whether local Democrats will avail themselves of the opportunity hasn't been announced as yet. It is believed that it would materially strengthen the ticket to have a candidate for attorney general from this part of the state.

There would not be much doubt of such candidate being able to win out in his home county, for Attorney General Young, candidate for re-election on the Republican ticket, did not add to his popularity in this part of the state by reason of the part he played in the case brought against the board of trade, or the Virginia sliver case, where he declared mining lease law to be unconstitutional, being proven wrong in both instances.

In the past, Duluth has had three candidates for attorney general, once on the Democratic ticket, when Charles d'Autremont was a candidate; John A. Keyes on the People's party ticket, and C. E. Shannon on the Prohibition ticket.

* * *

The Garfield Republican club will hold a meeting some time next week and map out a plan of action for the fall campaign. No meetingh of the organization have been held for some time past, the members having been waiting for the primaries to pass by before taking any action as a body in things political.

* * *

N. F. Hugo is receiving congratulatory letters every day from all over the state upon his renomination to the house for the third time and his entry into the race for the speakership. Among others, A. L. Cole, nominee for governor, says: "I congratulate the district that names you as its candidate. My relation with you as a member of the legislature during the past session was such as to cause me to place a very high esteem upon your ability and devotion." A. O. Eberhart, nominee for lieutenant governor, says: "Your election is assured and worthily bestowed."

* * *

State Senator George R. Laybourn is another winning candidate at the primaries who is receiving numerous congratulatory letters from all parts of the state, among them one from A. L. Cole. His long service in the legislature has won him many friends outside his district.

* * *

The local members of the Republican State Central committee showed a good deal more interest in the selection of the county comittee than did the candidates for county offices. Generally the candidates are anxious to have a hand in saying who shall serve and who shall not serve on the committee, but this year they have so little opposition that they cared little one way or the other.

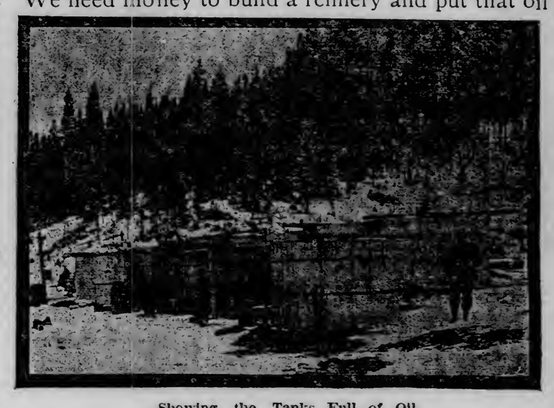
Members of the central committee, however, realize that the governorship fight in St. Louis county will be a hard one, and concluded that it was up to them to do what they could to get as many votes as possible for the party nominee. The committee as appointed is probably larger than it has ever been before. Every part of the county where any one is to be found residing is represented.

THE ALBERTA OIL FIELDS IN WESTERN CANADA

Drilling Rig Working.

Offer the best investment for capital in the field today. Why? Because there is more money in oil than any other commercial commodity and more in Western Canada than any other country. 1st, the Canadian government give a bounty of 1½c per gallon on all oil produced; 2nd, they charge a duty of $1.75 per barrel on American oil (less 2½ per cent); 3rd, the freight on oil from the nearest oil field (2,000 miles) to Calgary, Alberta is $7.40 a barrel; 4th, the Standard or any other oil company must pay out $9.35 a barrel to land oil in our country before we come into competition with them; 5th, the price of oil in British Columbia, Alberta, Saskatchewan and Assinaboia (four large provinces) has averaged 50c a gallon for the last twenty years; 6th, the government protects us against the competition of the Standard Oil Company to such an extent that we will have the trade of that country; 7th, our oil is the best discovered, being clear of sulphur and over 60 per cent illuminating, has a parafine base and is all made into valuable by-products without any waste.

Western Canada is fast settling up, and the demand for our product is practically unlimited. **We have the oil—we have the market.** We need money to build a refinery and put that oil on the market. We are offering stock for sale for that purpose. This stock will be worth ten times the present price in a few years.



Showing the Tanks Full of Oil.

What has been done in the United States will be done in Canada. There were people who would not buy Standard oil stock twenty-five years ago at $1 a share, but there are no careful investors today, with the history of the oil industry before them, who will hesitate to buy into these new Canadian oil fields at the present low price.

It is not a question of **"will it pay," but "how much."**

Now is the time to get in while the industry is in its infancy. **Investigate this—it will pay you.** For particulars call on or address

L. D. KEAN, 326 West Superior St. Duluth.

NOTE: For those who are busy during the day I will be in my office every evening.

SERVICES FOR SUNDAY IN DULUTH CHURCHES

Rev. Charles Fox Davis, Pastor of Lester Park Methodist Episcopal Church, Will Preach His Farewell Sermon There.

SECULAR SHOTS AT PULPIT.

Washington Post: The clergman who recently surprised his congregation by defending Mr. Rockefeler has been requested to resign. He might have known that the lawyers would resent interference with their business.

Chicago Inter Ocean: When a minister reaches the age at which he can no longer raise money for his church, the argument in his defense that he might still be useful in the matter of saving souls seems to have little weight.

New York Post: Jersey City, which produced a clergyman who introduced boxing as one of the regular activities of his church, has another freak minister who objects to a fair with gambling devices for the financial benefit of his church.

Chicago Post. Probably if the clergyman's charge against government officials at Panama is true, they refuse to encourage sound Calvinism on the isthmus because they believe the temperature would give a disturbing reality to the warnings of the preacher. But what a chalce for conversions!

Baltimore American: There are complaints in some churches of a falling away from religion. It is better not to accept this dogmatically. When things go wrong the investigation should be free and impartial. With the return of the clergy from their vacations, invigorated and tuned up to their duty, it might be well for them to inquire whether the people or the churches are at fault in this matter. At any rate, the coming season promises in one way or another to be a phenomenal one in religion.

REPUBLICAN HEADQUARTERS

Will be in Mesaba Block---Senator Clapp Here Oct. 18.

Otto Gafvert, chairman of the St. Louis county Republican committee, after consultation with committee members, has decided to open up Republican headquarters in the Mesaba block, in the same rooms as were occupied by E. L. Millar before the primaries. It is expected the rooms will be opened for the campaign Monday. Chairman Gafvert will spend considerable time at headquarters, and the secretary of the committee, who will be named by the executive committee this afternoon or Monday, will be there all the time.

The issues of the state campaign will be discussed in Duluth by United States Senator Moses E. Clapp on Oct. 18, and J. F. Jacobson, defeated candidate for Republican nomination for governor, will be here about Nov. 1. A. L. Cole, Republican nominee for governor, will be here either at the same time as Senator Clapp or Mr. Jacobson.

RUMORED PLOT.

London, Sept. 29.—The Standard publishes a story announcing the discovery of a plot to blow up Lord Rothschild and other prominent Jews, but characterizes it as a wild rumor, for which there is no foundation. The paper says there is much ferment among the Jews here on account of affairs in Russia, and that this has given rise to exaggerated rumors. The police will send plain clothes men to the great synagogue today to be prepared for any disturbance.

The Approved TARRANT'S SELTZER APERIENT Effervescent Cure for **Headaches**

Contains no heart depressing, dangerous drugs.

Removes the cause of headaches. Acts quickly, pleasantly, with such general good effects that it has retained the favor of Physicians and the Public *for more than 60 years.*

MINNESOTA GRADES.

In compliance with the provisions of Section 2066, Chapter 28, Revised Laws of 1905, the joint Minneapolis and Duluth Grain Inspection Boards, (Board of Appeal) have established the following GRADES OF GRAIN, which shall be known as MINNESOTA GRADES, the same to take effect and be in force on and after the 1st day of September, 1906.

W. F. KELSO, General Sec'y. A. F. EVENSON, General Chairman.

MINNEAPOLIS GRAIN INSPECTION BOARD:

A. F. Evenson, Ch., S. P. Thorson, W. F. Kelso, Sec'y.

DULUTH GRAIN INSPECTION BOARD.

P. McCargar, Ch., Theo. Thorson, T. B. McMannus, Sec'y.

CHIEF INSPECTOR: F. W. Eva, St. Paul.

CHIEF DEPUTIES: J. N. Barncard, Minneapolis. H. E. Emerson, Duluth.

MINNESOTA GRADES.

No. 1 Hard Spring Wheat—No. 1 hard spring wheat must be sound, bright and well cleaned, and must be composed mostly of hard Scotch Fife, and weigh not less than fifty-eight pounds to the measured bushel.

No. 1 Northern Spring Wheat—No. 1 northern spring wheat must be sound and well cleaned; it may be composed of the hard and soft varieties of spring wheat, but must contain a larger proportion of the hard varieties, and weigh not less than fifty-seven pounds to the measured bushel.

No. 2 Northern Spring Wheat—No. 2 northern spring wheat must be reasonably sound and clean and of good milling quality, this grade to include all wheat not suitable for the higher grades, and must weigh not less than fifty-six pounds to the measured bushel.

No. 3 Spring Wheat—No. 3 spring wheat shall comprise all inferior, shrunken spring wheat, weighing not less than fifty-four pounds to the measured bushel.

No. 4 Spring Wheat—No. 4 spring wheat shall include all inferior spring wheat that is badly shrunken or damaged, and must weigh not less than forty-nine pounds to the measured bushel.

Rejected Spring Wheat—Rejected spring wheat shall include all spring wheat grown, badly bleached, or for any other cause unfit for No. 4 wheat.

NOTE—Hard, flinty wheat, of good color, containing na appreciable admixture of soft wheat, may be admitted into the grades of No. 2 northern spring and No. 3 northern spring wheat, provided weight of the same is not more than one pound less than the minimum test weight required by the existing rules for said grades, and provided further that such wheat is in all other respects qualified for admission into such grades.

WESTERN WHITE AND RED WHEAT.

No. 1 Western White—No. 1 Western white shall be sound, well cleaned, plump and composed of the Western varieties of white wheat.

No. 2 Western White—No. 2 Western white shall be sound, reasonably clean and composed of Western varieties of white wheat.

No. 3 Western White—No. 3 Western white shall be composed of all Western white wheat fit for warehousing, weighing not less than fifty-four pounds to the measured bushel and not sound enough or otherwise unfit for the higher grades.

Rejected Western White—Rejected Western white shall comprise all Western white wheat fit for warehousing but unfit for higher grades.

NOTE—Western red wheat and Western wheat shall correspond in all respects with the grades of Nos. 1, 2, 3 and rejected.

No. 1 White Winter—No. 1 white winter shall be sound, well cleaned, reasonably plump, and composed of the white varieties.

No. 2 White Winter—No. 2 white winter to be sound, reasonably clean and composed of the white varieties.

No. 1 Red Winter—No. 1 red winter to be sound, well cleaned, reasonably plump and composed of the red varieties.

No. 2 Red Winter—No. 2 red winter to be sound, reasonably clean and composed of the red varieties.

No. 1 Winter—No. 1 winter to be sound, well cleaned, reasonably plump, and composed of the mixed white and red winter.

No. 2 Winter—No. 2 winter to be sound, clean, and composed of the mixed red and winter.

No. 3 Winter—No. 3 winter shall comprise all winter wheat fit for warehousing, weighing not less than fifty-four pounds to the measured bushel, nor sound enough or otherwise unfit for No. 2 of the other grades.

Rejected Winter—Rejected winter fit for warehousing but otherwise unfit for No. 3.

DURUM (Macaroni) WHEAT.

No. 1 Durum—No. 1 durum shall be bright, practically sound and well cleaned, and be composed of durum—commonly known as Macaroni wheat.

No. 2 Durum—No. 2 durum must be reasonably sound and clean, and of good milling quality. It shall include all durum wheat that for any reason is not suitable for No. 1 durum.

No. 3 Durum—No. 3 durum shall include all wheat that is for any cause unfit for No. 2.

No. 4 Durum—No. 4 durum wheat shall include all wheat that is badly bleached and grown, or for any cause unfit for No. 3.

MIXED WHEAT.

In case of any appreciable admixture of white and red wheat, with Minnesota grades of northern spring wheat, or with each other, it shall be graded according to the quality thereof, and classed as Nos. 1, 2, 3, etc. MIXED WHEAT, with inspector's notation describing its character.

CORN.

No. 1 Yellow Corn—No. 1 yellow corn shall be sound, yellow, dry, plump and well cleaned.

No. 2 Yellow Corn—No. 2 yellow corn shall be three-fourths yellow, dry, reasonably clean, but not plump enough for No. 1.

No. 3 Yellow Corn—No. 3 yellow corn shall be three-fourths yellow, reasonably dry, reasonably clean, but not sufficiently sound for No. 2.

No. 1 White Corn—No. 1 white corn shall be sound, dry, plump and well cleaned.

No. 2 White Corn—No. 2 white corn shall be seven-eighths white, dry and reasonably clean, but not plump enough for No. 1.

No. 3 White Corn—No. 3 white corn shall be seven-eighths white, reaonably dry and reasonably clean, but not sufficiently sound for No. 2.

No. 1 Corn—No. 1 corn shall be mixed corn, of choice quality, sound, dry and well cleaned.

No. 2 Corn—No. 2 corn shall be mixed corn, dry, reasonably clean, but not good enough for No. 1.

No. 3 Corn—No. 3 corn shall be mixed corn, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

No. 4 Corn—No. 4 corn shall include all corn not wet and not in heating condition that is unfit for No. 3.

OATS.

No. 1 White Oats—No. 1 white oats shall be white, dry, sweet, sound, clean and free from other grain and shall weigh not less than thirty-two pounds to the measured bushel.

No. 2 White Oats—No. 2 white oats shall be seven-eighths white, dry, sweet, sound, reasonably clean and practically free from other grain, and shall weigh not less than thirty-one pounds to the measured bushel.

No. 3 White Oats—No. 3 white oats shall be seven-eighths white, dry, sweet, sound, reasonably clean and practically free from other grain, and shall weigh not less than thirty-one pounds to the measured bushel.

Rejected White Oats—Rejected white oats shall include all white oats that are badly shrunken or damaged, and not fit for the higher grades.

No. 1 Clipped White Oats—No. 1 clipped white oats shall be white, dry, sweet, sound, clean and free from other grain, and shall weigh not less than forty pounds to the measured bushel.

No. 2 Clipped White Oats—No. 2 clipped white oats shall be seven-eighths white, dry, sweet, sound, reasonably clean and practically free from other grain, and shall weigh not less than thirty-eight pounds to the measured bushel.

No. 3 Clipped White Oats—No. 3 clipped white oats shall be seven-eighths white, dry, sweet, sound, reasonably clean and practically free from other grain, and shall weigh not less than thirty-six pounds to the measured bushel.

RYE.

No. 1 Rye—No. 1 rye shall be sound, plump and well cleaned, and shall weigh not less than fifty-four pounds to the measured bushel.

No. 2 Rye—No. 2 rye shall be sound, reasonably clean and reasonably free from other grain and shall weigh not less than fifty-four pounds to the measured bushel.

No. 3 Rye—All rye slightly damaged, slightly musty, or from any other cause unfit for No. 2 shall be graded as No. 3.

BARLEY.

No. 1 Barley—No. 1 barley shall be plump, bright, clean and free from other grain, and shall weigh not less than forty-eight pounds to the measured bushel.

No. 2 Barley—No. 2 barley shall be sound and of healthy color, not plump enough for No. 1, reasonably clean and reasonably free from other grain, and shall weigh not less than forty-six pounds to the measured bushel.

No. 3 Barley—No. 3 barley shall include all slightly shrunken and otherwise slightly damaged barley, not good enough for No. 2, and shall weigh not less than forty-four pounds to the measured bushel.

No. 4 Barley—No. 4 barley shall include all barley fit for malting purposes, not good enough for No. 3.

No. 1 Feed Barley—No. 1 feed barley must test not less than forty pounds to the measured bushel and be reasonably sound and reasonably clean.

No. 2 Feed Barley—No. 2 feed barley shall include all barley which is for any cause unfit for the grade of No. 1 feed barley.

Chevalier Barley—Nos. 1, 2 and 3 Chevalier barley shall conform in all respects to the grades of Nos. 1, 2 and 3 barley, except that they shall be of a chevalier variety, grown in Montana, Oregon and on the Pacific coast.

No Grade—All Wheat, Barley, Oats, Rye and Corn that are in a heating condition, too musty or too damp to be safe for warehousing, or that is badly binburnt, badly damaged, exceedingly dirty, or otherwise unfit for store, shall be classed as No Grade with inspector's notation as to quality and condition.

FLAXSEED.

All flaxseed inspected shall be classed according to quality and conditions as follows:

No. 1 Northwestern Flaxseed—Flaxseed to grade No. 1 Northwestern shall be mature, sound, dry, and sweet. It shall be Northern grown. The maximum quantity of field, stack, storage or other damaged seed intermixed shall not exceed twelve and one-half (12½) per cent. The minimum weight shall be fifty-one (51) pounds to the measured bushel of commercially pure seed.

No. 1 Flaxseed—No. 1 flaxseed shall be Northern grown, sound, dry and free from mustiness, and carrying not more than twenty-five (25) per cent of immature or field, stack, storage or other damaged flaxced, and weighing not less than fifty (50) pounds to the measured busnel of commercially pure seed, shall be No Grade.

The following are abbreviations to be used by inspectors in designating the grades:

R. Wt. for.....	Mx. for ..... Mixed
.....Red Winter	Y. Corn, for.....
O for ....Northern	.....Yellow Corn
H for .....Hard	W. Corn, for.....
Wn. W. for.....	.....White Corn
....Western White	N. G., for..No Grade
Wn. R. for.....	Bly. for.....Barley
.....Western Red	Fd. for .....Feed
W. for ....Winter	Du. for .....Durum
W. Wt., for.....	
.....White Winter	

MANNER OF TESTING.

Wheat, flax and rye, shall be tested after it has been cleaned. The test kettle shall be placed where it can be jarred or shaken. From scoop, bag or pan, held two inches from top of kettle, pour into middle of same at a moderate speed until running over, striking off in a zig-zag manner with the edge of beam held horizontal.

NOTE—No grain shall in any case be graded above that of the poorest quality found in that lot when it bears evidence of being plugged or doctored.

NOTE—Wheat scoured or otherwise manipulated, the test weight will not be considered in grading same.

DR. BEST,

508-510 BURROWS BLDG.

DOES YOUR HEAD FEEL HEAVY OR DULL?

If your head troubles you, it is time to take Beecham's Pills. Sick headache, nervous headache, depression of spirits usually indicate some stomach disorder, and Beecham's Pills will bring prompt relief. All who value the power to think clearly should keep the head free from aches.

All the human machinery runs smoothly without pain, irritation or anxiety when Beecham's Pills are used regularly. They are a noble cure for headache and brain fag.

The business man, the society woman, the girl who works for her living, will all find a reliable medicine in Beecham's Pills.

MARKET IS STRONGER

Light Receipts Have Bullish Effect on American Markets.

Flax Declines and Closes Weaker in the Duluth Market.

Duluth Board of Trade, Sept. 29.—Wheat had a stronger tone and closed higher in the American markets today. Light receipts had a bullish influence. Already there is a talk of car shortages. Duluth was stronger at the close than the other markets, except Kansas City. Reports were heard through the day that wheat in stacks had been damaged by rains, in Kansas. Liverpool closed unchanged.

Broomhall estimates the world's shipments of wheat this week at 11,200,000 bus.

The December option closed ¼c higher in Duluth and Kansas City, ⅛-¼c in Chicago and ⅛c in Minneapolis, New York and St. Louis and ½c higher in Winnipeg. The October option closed ½c higher in Winnipeg. The May option closed ¼c higher in Duluth, ⅜c in Chicago and Kansas City, ⅛-¼c higher in Minneapolis and St. Louis and unchanged in New York.

Corn was stronger in Chicago, the December option closing ⅛c higher. It was unchanged in Liverpool. December oats ¼c higher in Chicago.

Car receipts at Duluth were 200 against 347 last year, and at Minneapolis 384 against 788 last year, making a total for the Northwest of 584 against 1115 last year. Chicago received 45 against 13 last year.

Primary receipts of wheat were 1,079,000 bus, last year 1,700,000 bus. Shipments, 426,000 bus, last year, 693,600 bus.

Trading in wheat was not large in volume, but was steady during the session of the Duluth market. September wheat, of which option this was the last day, was inactive and closed ⅛c higher than yesterday, at 76⅛c. December wheat opened unchanged at 74⅜c, advanced to 74¾c by 9:40, declined to 74⅛-⅜c by 10:30, rallied to 74½c by 11:35 and closed at that price, a gain of ¼c over yesterday. May wheat opened ⅜c higher at 78⅜c, advanced to 78¾c, declined to 78⅜c and rallied by the close to 78⅝c, a gain of ⅜c over yesterday. Durum wheat was unchanged and cash spring wheat was selling on a basis of 2c over the December price for No. 1 northern.

Flax was active throughout the session and closed slightly off. Prices declined with heavy selling at the close. September flax opened unchanged at $1.11½, advanced to $1.12⅜ and declined by the close to $1.11¼, a loss of ¼c from yesterday. October flax opened unchanged at $1.10⅜, declined to $1.10¼, rallied to $1.10⅝, declined to $1.10½, rallied to $1.10¾, fell off to $1.10¼ and rallied at the close to $1.10½, a loss of ⅛c from yesterday. November flax opened unchanged at $1.10, asked, fell off to $1.09⅞, rallied to $1.10⅜, and declined by the close to $1.10, a loss of ½c from yesterday. December flax opened ½c lower at $1.08 bid, advanced to $1.09¾ and declined by the close to $1.08¾, a loss of ¼c from yesterday. May flax opened ¾c lower at $1.12, advanced to $1.12¾, declined to $1.12¼ and closed at that price, a loss of ½c from yesterday.

September oats and oats to arrive closed ⅛c higher and the other coarse grains unchanged.

Following were the closing prices:

Wheat—No. 1 hard on track, 77¾c; to arrive: No. 1 northern, 76¾c; No. 2 northern, 75¾c. On track: No. 1 northern, 76¾c; No. 2 northern, 75¾c; September, 75⅝c; October, 70½c; December, 74⅞c; May, 78¾c; September durum No. 1, 67½c; No. 2, 65c; October durum No. 1, 67c; No. 2, 64½c; November durum No. 1, 66¾c; No. 2, 64c; durum on track, No. 1, 67c; No. 2, 64½c. Flax to arrive, $1.10½; flax on track, $1.11; September, $1.11¼; October, $1.10½; November, $1.10; December, $1.08¼; January, $1.08; May, $1.12¼. Oats to arrive, 36c; September, 33c; rye, 56c; barley, 37-47c.

Cars inspected: Wheat, 200; last year, 347; oats, 11; rye, 2; barley, 45; flax, 33; last year, 43.

Receipts: Wheat, 426,342; corn, 865; oats, 51,321; rye, 6,528; barley, 92,463; flax, 50,533.

Shipments: Wheat, 286,000; oats, 115,600; barley, 3,433; flax, 67,456.

Oats, 11; rye, 2; barley, 45. Total of all cars, 291. Cars on track today 400.

THE CHICAGO MARKET.

Wheat Stronger Owing to Small Receipts in the Northwest.

Chicago, Sept. 29.—Continued small receipts in the Northwest had a strengthening effect today on the local wheat market. There was a fair demand from leading bulls but offerings were rather light. December opened a shade to ⅛@¼c higher at 75⅜c to 75½c sold at 75⅛@⅜c and then advanced to 75½@⅝c. Minneapolis, Duluth and Chicago reported receipts of 627 cars against 780 cars last week and 1,135 cars last year.

The market closed strong with December up ⅛@⅜c at 75⅝c.

Notwithstanding larger receipts than expected the corn market showed moderate firmness. Trading, however, was light. December opened unchanged to a shade higher at 43⅜c to 43⅝@½c and sold at 43½@⅝c. Local receipts were 450 cars with 298 of contract grade.

The close was steady with December up ⅛c at 43½c.

Oats were firm on buying by pit traders who were influenced by wet weather. December opened to ⅛c higher at 34½c to 34¼c and for a tie held within the opening range. Local receipts were 282 cars.

Provisions were quiet and steady. January pork was up 2½@5c at $13.35. Lard was unchange at $7.82½. Ribs were 2½c higher at $7.12½.

Close: Wheat—Sept. 73@½c; December, 75⅝c. Corn—September, 46½c; December, 43¼c. Oats—September, 34; December, 34⅜c. Pork—September $17.00; January, $13.40. Lard—September, $8.85; October, $8.82½. Ribs—September, 8.60; October $8.37½. Rye—cash, 53@55. Barley—cash, 37½@55c. Timothy—September $4.05. Clover and flax—Nothing doing. Cash wheat, No. 2, red 74¼c; No. 3, red, 72@73½c; No. 2 hard, 73½@77c; No. 3, hard, 72@74c; No. 1 northern, 82@84c; No. 2 northern 76@83c; No. 3 spring, 72@83. Corn—No. 2, 47c; No. 3, 47c; Oats—No. 2, 33c; No. 3, 32½c.

Grain Gossip.

Logan & Bryan, Chicago: Wheat—The market looks more encouraging for holders at the close than at any time during the week. For 2 or 3 days the news has been bullish but the dullness seemed to be too much for the trade to overcome. Heavy rains did not cover the spring wheat country but are doing additional damage southwest. Winnipeg, Minneapolis and Duluth all fell far short of last year's movement. Experienced people are beginning to talk further reduction of estimates for North Dakota and Canadian wheat. Believe the trade and the public will be impressed by the facts concerning wheat i nthe near future and that we will have a bigger and stronger market.

Corn: Prices did not show much of a change. Additional deliveries of 208,000 bushels were made this morning. The corn goes to the La Salle street leader who is shipping it out. Receipts were over the estimates. Believe the leaders and the public are willing to see a little setback in corn prices so they can take hold. Present stubbornness suggests purchases on any break.

Oats: Watch these oats. Not only watch them, but buy them. We see many of the former bull leaders replacing their lines for both December and May today quietly. The local trade will turn bullish the moment the market starts up.

Midway Horse Market.

Minnesota Transfer, St. Paul—Barrett & Zimmerman's report: The market for horses is very quiet, with very few sales being consummated during the week. Wholesale buyers are not buying so many horses so early this fall as last, and the month's sales are way below the same period of last fall. Last week was better in both sales and receipts than this week. Prices are steady.

St. Paul Live Stock.

St. Paul, Sept. 29.—Cattle—Receipts, 1,500; steady, unchanged. Hogs—Receipts, 1,600; 5c higher. Range, $5.80@6.55; bulk, $6.25@6.30. Sheep—Receipts, 2,500; killing sheep and lambs steady; feeding sheep and lambs strong; prices unchanged; medium to good killing sheep and lambs, 25c lower.

The Cotton Market.

New York, Sept. 29.—The cotton market opened firm at an advance of 5@13 points and quickly advanced to a net gain of 19@20 points on an active demand for both accounts which was promoted by reports that the damage from the storm had been greater than credited yesterday. There was some heavy realizing at the advance and a slight reaction toward the middle of the morning, but the undertone continued steady to firm within 2 or 3 points of the top. Cotton futures closed firm. October $9.26; November, 9.29; December, $9.51; January, $9.56; February, $9.64; March, $9.74; April, $9.75; May, $9.80; June, $9.83; July, $9.86. Spot closed quiet; middling uplands $9.90; middling gulf, $10.10; sales none.

Copper Gossip.

Foster to Paine, Webber & Co.: The market closed strong but we still think stocks are a sale, especially Amalgamated and the New York railroads. The buying of Shannon and Butte Coalition is excellent and we expect higher prices for them next week. Centennial is being bought on the expectation of an increased output on October 1. New York houses are charging 7 and 8 per cent for September and this will probably cause some selling next week.

• • •

Paine, Webber & Co.: Sales of Lake copper were made Tuesday as high as 20 cents per pound for delivery in the last quarter of the year. Transactions were small. The upward tendency of copper prices does not seem to keep consumers out of the market.

EARLY LOSS RECOVERED

By Stock Market and the Closing Was Quite Steady.

Bank Statement Rather Colorless and Had No Effect.

New York, Sept. 29.—Yesterday's late bulge in the stock market attracted heavy realizing sales this morning, under which prices fell sharply throughout the list. There were running sales of 7,000 shares of United States Steel at 45⅝ and 45⅞ compared with 46 last night. Great Northern preferred was carried down 4 points, Union Pacific 1¾, Northern Pacific and Smelting 1⅛, St. Paul 1⅜, Canadian Pacific, Amalgamated Copper and United States Steel preferred ¾.

The vigorous selling at the opening was soon overcome by the contribution of supporting orders, and the covering of short contracts. All of the losses with the exception of a small fraction here and there were made up. Northern Pacific moved up ¼ over last night, Wisconsin Central preferred and Reading common and first preferred 1.

The market closed steady at a decline from an upward movement. Trading stagnated until after the appearance of the bank statement, when the advance was renewed. Reading with a gain of over 4 led the movement. Chicago, St. Paul & Omaha received 3 points over declines recently. The ore deal stocks receded again in the late dealings.

Stock Gossip.

Logan & Bryan to Paine, Webber & Co: The market closed with a fairly good tone but in most cases prices will show a slight easing off from yesterday's final figures. The bank statement was about as expected but should cut no figure marketwise, as relief will be forthcoming in the shape of government deposits. It still seems likely, barring political disturbances, to look for further bull demonstration in the favorites.

• • •

Walker's Letter to Paine, Webber & Co: The market showed a good deal of strength and pools were active in their specialties. The bank statement was rather colorless. The money market is going to be the real factor in this market for some time to come. We look for a nervous market next week and one easily influenced by news. The Southern storms were rather a damper and they did more damage than was thought.

New York Money.

New York, Sept. 29.—Money on call, nominal, no loans. Time loans, dull and firm; sixty days, ninety days and six months, 6¼ per cent. Prime mercantile paper, 6½@7 per cent. Sterling exchange, steady with actual business in bankers' bills at $4.83.35@4.83.30 for demand and at $4.75.40@4.79.50 for sixty-day bills. Posted rates, $4.80½@4.83 and $4.84½; commercial bills, $4.79¼@4½; bar silver, 68½c; Mexican dollars, 52½c; government bonds, steady; railroad bonds, steady.

Bank Statement.

New York, Sept. 29.—The statement of the clearing house banks for the week shows that the banks hold $12,540,350 more than the legal reserve requirements. This is an increase of $1,224,425 as compared with last week. The statement follows: Loans, $1,051,172,800; increase, $7,290,200; deposits, $1,034,059,000; increase, $10,807,500; circulation, $43,595,800; increase, $486,300; legal tenders, $77,727,800; increase, $1,133,500; specie, $193,327,300; increase, $2,270,860; reserve, $271,052,100; increase, $3,926,300; reserve required $253,514,750; increase, $2,701,875; surplus, $12,546,350; increase, $1,224,425; ex-United States deposits, $19,315,300; increase, $1,612,525.

Chicago Live Stock.

Chicago, Sept. 29.—Cattle—Estimated receipts, 500; steady. Beeves, $3.80@6.90; cows and heifers, $1.25@5.25; stockers and feeders, $2.40@4.55; calves, $5.50@8.25. Hogs—Estimated receipts, 7,000; market 5c higher; estimated for Monday 32,000. Mixed and butchers, $6.25@6.75; good heavy, 6.40@6.72½; rough heavy, $5.90@6.20; light, $6.30@6.72½; pigs, $5.70@6.40; bulk of sales, $6.25@6.65. Sheep—Estimated receipts 4,000; steady. Sheep $3.10@6.50; yearlings, $5.40@6.00; lambs, $4.25@7.00.

HAPPENINGS IN THE DAKOTAS

Minot Elopers Caught by Officer After Exciting Chase.

Minot—Mrs. A. R. Young and George Green, who eloped by means of a horse and buggy Thursday afternoon, were caught near Bowbells by a deputy sheriff, after an exciting chase of several miles. Mr. Young, husband of the woman, and the sheriff were in pursuit of the couple as soon as they discovered her disappearance. The couple lost their way on the prairie near Bowbells and were arrested just as they were about to enter the city. Mrs. Young had $180 which her husband accuses her of taking from the house.

Fargo—As a result of the loss of the scenery and other effects in a fire out west, the company producing "The World" is stranded here. The attendance at the local performance was scarcely visible to the naked eye, and Manager Hutchinson decided to abandan the struggle. Some members of the company have joined other aggregations, while the rest remain here awaiting replies to applications for positions.

Oakes — Congressmen Marshall and Cromna of North Dakota have made the following postoffice recommendations:

E. J. Horsman, Dunseith, Rolette county, to succeed C. M. Wagner, resigned; Hiddenwood, McLean county, Wilhelmina Huntzinger, Coleharbor, Oliver county, C. Skubinna Cordes; Easby, Cavalier county, W. G. Newton; Spanglor, Rolette county, J. G. Hathaway. The office at Weller, McLean county, has been recommended discontinued.

New Rockford—A man giving the name of Dave Burke was captured in this city by Sheriff Fahrer Thursday and was turned over to the authorities of McLean county on suspicion of being implicated in the Underwood bank robbery. The description of the man tallies with the description given by a druggist of that city as one of the men who guarded the buildings and kept the druggist from giving the alarm. The deputy sheriff of McLean county feels confident he has one of the robbers.

Jamestown—The Congregational church assembly of North Dakota has entered politics by taking strong ground by resolution against the re-election of Governor Sarles. The resolution, which acted much as a bomb might upon the convention, reads as follows:

Whereas, we deplore the questionable morals of our present governor and consider him unqualified for that high position in this great state; and

Whereas, he has been nominated by his party to succeed himself; be it, therefore,

Resolved, that this state association of Congregational churches recommend to the pastors and members of the churches throughout the state that they exert their influence to secure his defeat and also the defeatof any other candidate for office who falls below the moral law of the decalogue.

ONE HUNDRED HAVE PERISHED

Birmingham, Ala., Sept. 29.—Advices sent from Mobile last night and received here today indicate that earlier accounts of the great storm and the havoc wrought were not exaggerated. The complete death list has not been made up, because many small towns along the coast have not been heard from, but from what is known it is believed that it will range close to 100. Only four houses are left standing at Alabamaport, while Coden, another coast resort, has been almost wiped out. Trainmaster Bowen of the Bay Shore railroad, who has reached Mobile from a trip along that line, said that if the persons did not turn up, the number of deaths along the Bay Shore road alone would reach fifty. He said that fifteen dead bodies had been recovered.

Pensacola, Fla., Sept. 29.—The vastness of the destruction wrought by the hurricane of Thursday morning is now being realized. Twenty-five persons are known to have been drowned.

SWEPT INTO THE SEA.

Death of Horn Island Lighthouse Keeper, Wife and Daughter.

New Orleans, Sept. 29.—Reports of the death of Capt. Johnson, keeper of Horn Island lighthouse in Mississippi sound and the death of his wife and daughter, were brought here today by the first train into New Orleans from the east, over the Louisville & Nashville railroad. This train brought passengers from New York and other Eastern cities who had been held at Scranton, Miss., by the hurricane. They said that Horn island lighthouse was swept in the sea by the wind and waves and that the keeper and his family went with the structure.

News of another Horn island disaster was brought to Scranton by Capt. Barker of the schooner Daisy, which was wrecked on that island with the loss of one of her crew. Capt. Barker said that after he and the four men constituting his crew had swam ashore from the schooner, the rising water drove them into the trees. Sam Ward, a negro who climbed a small and weak tree, was apparently shaken by wind and waves from his hold and drowned.

The Scranton passengers were taken by a tug around the break in the tracks at that place and boarded the train at Ocean Springs. Capt. Barker and party were rescued by a tug.

BIG VALUES IN DULUTH BUSINESS PROPERTIES

Owner of Windsor Hotel Property, Corner Fifth Avenue West and Superior Street, Refuses Cash Offer of $145,000, Which Was on the Basis of $1,733.33 Per Front Foot—Many Residence Sales Are Made, and Contracts for New Ones Let.

The truth of the statements of real estate dealers that the prices of local realty, particularly centrally located business property, have undergone a strong advance in price during the last few years was shown this week when C. E. Henderson, of Philadelphia, who owns the Henderson property on the southwest corner of Superior street and Fifth avenue west, or what is commonly known as the Windsor hotel property, promptly refused an offer of $145,000 cash. The property has a frontage of seventy-five feet on Superior street and runs down to Michigan street. This offer was on the basis of $1,733.33 a front foot. As far as can be learned this is about the top price that has been offered in recent years for Superior street property centrally located, but there have been many others and some sales which have shown a corresponding increase in other properties along the same street and other business streets. A number of prospective deals have fallen throug of late through the refusal of the owners to entertain the offers made, although in every instance, it is claimed, the amount tendered was more than the property would have sold for a few years ago.

• • •

While there have been no large sales during the week just closed, there has been quite a steady selling of homes, the buying being pretty well scattered, no particular part of the city showing the heaviest movement. Real estate men remark on the larger demand this fall for homes, many of the buyers being people who have for several years been renters and who claim to be forced by high rents to buy homes of their own. The inquiry for building sites is just about as heavy, many of the buyers preferring to purchase a lot and erect a home to suit their circumstances and notions.

• • •

N. J. Upham & Co., report a good week's business with several deals closed up and a number almost to the point of closing. Among the sales reported by the company are the following: 1208 East Third street, from the Dodge Estate to W. L. Loughren, for $1,150; 816 East Third street from John Waldron of New Brunswick to Simon Johnson of Duluth, for $1,310; lots 13, 14, 15, and 16, block 8, Merchant's Park addition, located at the corner of Twenty-sixth avenue west and Thirteenth street, to William Webb; a property at the corner of Twenty-second avenue west and Ninth street, 55 by 100 feet, to Miss Mina Aamold, for $400; 1425 West Superior street, from J. W. Ross to Dr. Burnett, for $1,600; 1424 East Fifth street, from D. C. Barr to William F. Wright, for $3,750.

• • •

Among the important transfers of West Duluth property, recorded this week were the following: The southeast corner of Fifty-seventh avenue west and Raleigh street, comprising a property 125 by 75 feet and several buildings, from James E. Steele to the Pabst Brewing company, for $7,000; the northwest corner of Main street and Fifty-seventh avenue west, comprising a property 125 by 50 feet from J. S. Snively to A. A. Scott for $5,000; a residence property on the east side of Fiftieth avenue west, between Wadena and Ramsey streets, from O. A. Ritan to James Fitzgerald, for $1,000.

• • •

Ralph Maralta has purchased from W. J. Holmes the north 75 feet of lots 1, 2, 3 and 4, block 94 Portland, for $10,000. The property comprises those portions of the four lots at the northeast corner of Fourth street and Seventh avenue east, facing the alley at the rear of the store buildings on Fourth street, 100 feet in all.

• • •

Sivert A. Ramstad has purchased a residence property on the upper side of Third street, between Eighth and Ninth avenues East, from Chris Strom, for $1,500.

• • •

Judge J. D. Ensign has sold M. J. Forbes two first street lots between Fourth and Sixth avenues east, for $2,100. The lots are in the rear of Mr. Forbes' residence property on east Second street.

• • •

Chris Evans has sold the Duluth Home company a residence property on the lower side of Mesaba avenue between Third and Fourth avenues west for $3,350.

• • •

M. E. Manley has sold to Sofia Anderson a residence property on the lower side of First street, between Swenty-fourth and Twenty-fifth avenues west, for $2,300.

• • •

Bray & Nystrom, the architects, report the folowing contracts awarded: The residence of A. W. Frick and Mrs. Julia A. Duncan, on Second street between Twenty-second and Twenty-third avenues east, to Hugh Fawcett; the Walter Poehler residence at Twenty-fourth avenue east and Fifth street to W. A. Fawcett and George D. Swift's residence on First street, between Twenty-third and Twenty-fourth avenues east to Anderson & Gow.

• • •

Architect A. Terryberry is conferring with outside parties with a view of preparing designs for a row of twelve brick houses to be erected on the southeast corner of Twenty-second avenue east and First avenue at an estimated cost of $45,000. Mr. Terryberry will prepare the plans this winter and the construction work will begin next spring. The houses will be finished in hardwood and will have all the modern improvements. Mr. Terryberry is taking bids for a brick flat building to be erected for S. Van Wagner, of 1819 Piedmont avenue. The structure will be of pressed brick on a brownstone foundation. It will be finished in hardwood and thoroughly modern. The estimated cost is $6,000. The contract for C. C. Salter's residence in West Duluth has been awarded to G. W. Smith. The house was designed by Mr. Terryberry and will cost about $3,000. The same architect has plans out for extensive improvements to be made on the residence of H. H. Phelps, at West Duluth.

• • •

John A. Watterworth, who recently sold his new house on First street to Alfred Merritt and bought a double corner at Twenty-fifth avenue east and Second street, began this week to break ground on the northeast corner for another new home. The building, it is understood, will resemble Mr. Watterworth's former residence in architectural style, but will not be so large.

• • •

The Fifth street residents, near the normal school, have a petition out for the paving of the street next season, between Twenty-fifth and Twenty-seventh avenues east. Since the normal school building was erected there has been a tremendous home building movement in that district, and the improvement work in that locality, when considered as a whole, speaks volumes for the desirability of that part of the city for a home location. It is predicted that inside the next five years the normal school district will be as thickly populated as any of the other fine home localities in the East end.

• • •

The West end has had a fine building movement this season. Contractor Richard Hanson has finished eight houses, and is still working on several more. Nord & Jacobson have completed eight buildings, and have the same number in process of construction. The new buildings range in value from $2,500 to $5,000. Other West end contractors report much activity along building lines, and claim that the building permits will show a greater number of building improvements for the West end than for any other portion of the city.

• • •

There is a lively interest displayed in the prospect of an improvement of East Fourth street, next year, by a pavement from Seventh to Twenty-third avenue east. The deplorable condition of the street has been a serious set-back for some time to the property values along that street, and the property owners, realizing this, are waking up to the possibilities of the street for home sites if the improvement is made. Several of the largest property owners on Fourth street have expressed their willingness and desire to have the street paved, and it is believed that a petition for the improvement will be out before long.

• • •

M. M. Clark of West Duluth has the foundations completed for a modern residence at Fifty-sixth avenue west and Norton street, to cost about $5,000.

• • •

M. Durkan has plans out for a large flat building, to be erected on Jefferson street, near Eighteenth avenue east, to cost $9,000.

• • •

D. G. CUTLER'S HANDSOME HOME BEING ERECTED AT TWENTY-THIRD AVENUE EAST AND SUPERIOR STREET.

Among the most imposing of new residences now in process of erection is the home of D. G. Cutler, at the northwest corner of Twenty-taird avenue east and Superior street. Mr. Cutler's residence, which is to be ready for occupancy next spring, will be unusual in many ways. The material used in the construction is Kelley Island limestone, a rock in which Mr. Cutler deals in his business and one that is used to some extent for building in the east, though entirely new in Duluth. The trimings are of buff Bedford limestone.

Limestone, it is said, gets gray with age. Mr. Cutler, it is understood, will follow the eastern custom of growing ivy to cover much of the stone work, a custom that produces a very pretty effect.

The Cutler residence was built according to designs by Bray & Nystrom, the architects, and is a combination of Tudor and Elizabethian style of architecture.

Mr. Cutler owns a property with 100 feet frontage on Superior street and 140 feet deep and is three stories in height, containing fourteen rooms, not counting the basement, the pantry, bath and storerooms. Every improvement known to the modern builder is being incorporated in the interior arrangement and finish. Different hardwoods are being used to finish off the various rooms.

Another feature about the house is the method of heating. What is known as a vacuum steam plant will be used. In these plants steam is radiated throughout the pipes in the building without raising the water to a temperature of 212 degrees. The principle of the system is said to be the withdrawal of air from the pipes, the steam thus filling the pipes from water at a lower temperature than is possible in ordinary steam heating plants. The general contract for the Cutler residence is held by Hugh Fawcett. The D. R. Black company has the contract for the heating and plumbing and the Mutual Electric company for the electrical work.

STRYKER, MANLEY & BUCK

Round Up the Vags.

The police department is using strict measures to rid the city of quite a number of vagrants that have been making their headquarters here of late. This morning three men claimed to belong to that class of undesirable citizens were lined up in front of Judge Berger pleaded guilty and Joseph Arsenault decided to stand trial. Lundberg was given his choice of paying a $22 fine or spending 20 days in the county jail. Berger was fined $17 with the alternative of a 15-day jail term. The court suspended sentence in his case providing he is out of the city by this evening. Arsenault will be tried Monday.

BOUGHT BY FORGAN.

Chicago, Sept. 29.—James B. Forgan, president of the First National bank and representing the newly organized Security bank, purchased the building and fixtures of the defunct Milwaukee Avenue State bank for $70,000 in Judge Brentano's court today.

NOTICE TO CONTRACTORS.

Sealed proposals will be received by the City Clerk of the City of Eveleth, St. Louis County, Minnesota, up to Tuesday, October 16, 1906, at 8 o'clock P. M., for the erection and completion of two frame residences, to be built at the pumping plant at St. Mary's lake, according to plans and specifications on file at the office of the City Clerk, Eveleth, Minn., Duluth Builders' Exchange or at the office of the architects, Bray & Nystrom, Duluth, Minnesota.

All bids must be accompanied by a certified check for $250.00, payable to W. J. Davey, City Treasurer, said check to be forfeited by the successful bidder in case he fails to enter into the contract and furnish a satisfactory surety bond in an amount equal to the contract price agreed upon, within five days after the award.

The city council of the said City of Eveleth reserves the right to reject any or all bids.

The sealed proposals must be marked "Bid for erection of residences at pumping plant," and addressed to the undersigned at Eveleth, Minn.

By order of the City Council of the City of Eveleth Minn.

ED. SKEEL, City Clerk.

EASTERN MEN TO VISIT CITY

Will Inspect Great Northern Power Company's Big Plant.

A. H. Albertson of New York, the engineer who designed both the power station and the distributing station of the Great Northern Power company, is in the city for a month's visit. Mr. Albertson is a nephew of C. C. Cokefair and a classmate of F. A. Cokefair at Columbia university.

J. W. Johnson, general Western manager for the General Electric company of Schenectady, is also in the city. Yesterday, in company with F. A. Cokefair, chief engineer, A. H. Albertson and others, Mr. Johnson inspected the power plant. The generators and all the electrical equipment of the plant was furnished by the General Electric company.

Next week a number of the New York and Boston bankers who financed the Great Northern Power company, are expected here on a visit of inspection.

APPLICATIONS FEW.

Despite the inducements held out by the government to secure young men for positions of clerks and carriers in the postoffice department, there is a dearth of applicants and the prospects are that there will be a very small class for the civil service examination to be held here Nov. 15, under the direction of A. Grabarkiewicz, local secretary of the civil service commission. The applications must be in by Oct. 15, but to the present time the secretary has had very few requests for application papers. Men with sound body and in good health, between the ages of 18 and 45 years are eligible and the examination covers spelling, reading, penmanship, arithmetic and geography. The salaries of carriers in the Duluth office is $850 per year and the salaries of the clerks range from $600 to $1,000.

HEALTH AND GOOD CHEER.

Cheerfulness results from a healthy state of mind and body.

Did you ever know a person who occasionally takes a glass of good beer, who could not "crack" a joke, or indulge in a hearty laugh himself? Beer is for good health.

Healthy persons are naturally cheerful.

A glass of "Moose" beer is brimful of health and good cheer.

Duluth Brewing & Malting Co.
Either Phone 241.

LABOR

WANT HALF THE PROFIT

Building Alliance Would Share Equally in Celebration Proceeds.

Labor Day Profits Big —Resolution Sent to Gompers.

Union meetings

Tonight—Licensed Tugmen's Protective Association at Labor World hall.

Monday—Building Structural Alliance at Labor hall; Barbers at Labor World hall; Stonemasons at Axa hall; Tug Firemen at Axa hall.

Tuesday—Carpenters at Rowley hall; Musicians at Kalamazoo hall; Painters Decorators and Paperhangers at Labor World hall.

Wednesday—Tailors at Axa hall; Marine Engineers at Lyceum theater; Cigarmakers at Labor World hall; Steamfitters Helpers at Labor World hall.

Thursday—Steam Engineers at Labor World hall; Electrical Workers at Labor World hall; Stationary Engineers at Axa hall.

Friday—Leatherworkers at Labor World hall; Iron Moulders at Sloan hall Bricklayers at Labor World hall; Ship Carpenters at Sloan hall.

Maintaining that the members of the Builders' Structural Alliance had done as much work and had gone to as much expense as the members of the trades assembly in preparing for the labor day celebration the committee members from that association created something of a stir at the meeting of the trades and labor assembly at Labor hall in the Manhattan building last evening when they proposed that the profits from the successful celebration should be divided equally between the two organizations.

After the report of the joint labor day committee had been read, it was found that the celebration had been a very profitable one and that the committee had cleared several hundreds of dollars. The total receipts for the day amounted to $1025.44. The members of the alliance proposed that this profit should be divided equally, as they thought that they were entitled to as much as the members of the trades assembly.

The custom and rule heretofore in the matter of the labor day celebration has been that the trades and labor assembly should bear two-thirds of the expense if the celebration proved a losing venture and the alliance the other third. And to make it fair, if the celebration turned out profitable, the trades assembly received two-thirds of the profit and the alliance the other third.

The alliance members, however claimed that this rule had not always worked out that way and that they had sometimes paid a full half of the expenses and were entitled to half the profits this year. The rule had been adopted several years ago when the alliance was a small organization, but its members now declare they are entitled to equal recognition with the assembly.

Secretary Perault of the trades assembly stated that it seemed that the matter of the division of the profits was a little out of order at this time as both organizations had entered into the preparations for the celebration with the understanding that the old rule would still be in effect. This was not the time for the members of the alliance to change the rule, after they found the celebration to have been profitable. President Shartell ruled that the matter was out of order and continued the regular business of the meeting.

• • •

Martin Olmen of the Typographical union brought up the matter of the city directory and stated that the R. L. Polk company, who have the printing of the directory in charge, promised to have the work done wholly in this city and obtained much of the advertising on the strength of this promise. They declared that the work would be done in Duluth whether in non-union printeries or union. Delegate Olmen stated that the printing of the directory had been taken to a non-union shop in St. Paul, and the delegates were warned to use all influence in preventing its sale when completed.

• • •

That union labor of Duluth is not discouraged at the defeat of their representative in Maine politics, Samuel Gompers, was shown last evening when a resolution was framed by the members of the trades assembly showing their great confidence in their leader and congratulating him upon the splendid fight he made against Congressman Littlefield of Maine.

• • •

A communication was read from the Building Trades' alliance requesting that hereafter the trades' assembly leave the placing on the unfair list of contractors and others employing members of the unions affiliated with the alliance with that body, which would appoint a committee to look into the matter. The case in point, which caused the request of the alliance, was that of L. Ramstad, a prominent contractor of this city, who has been on the unfair list for over a year for having sublet a contract for painting a house to E. Detheridge, who at that time was unfair and not employing union labor. It was brought out at the meeting that Ramstad was unaware of the status of Detheridge, and that he had intended to act fairly toward union labor. It was declared that he was an avowed friend of labor, and that his name should be removed from the unfair list. A committee of five was appointed to investigate the matter and strike the name off the list, if the consent of the union which blacklisted him could be obtained.

• • •

A new union was ushered into the ranks of the labor organizations yesterday, when the cement workers of the city organized as the local branch of the American Brotherhood of Cement Workers. The new organization consists of twenty members, who decided to work together, as a result of the recent trouble on a house being built in the East end, where two non-union cement workers nearly caused a strike. The new union will meet twice a month at Labor World hall. Leigh J. Stewart is temporary president of the union, and Ole Hedlund secretary. The regular meeting days will be the second and fourth Mondays of the month.

• • •

A prominent member of the State Federation of Labor, in the person of C. E. James of St. Paul, arrived in the city Wednesday, and will remain several days, working in the interests of the union label of the Boot and Shoe Workers' union. Mr. James spoke to the members of the trades assembly last evening, and was enthusiastically received. He stated that he had been in Duluth several times before, and is meeting with much success in his advocacy of union made shoes.

• • •

H. Hawksworth, president of the local Boilermakers' union, reported to the assembly, last evening, that eight of the railroads in the Northwest had acceded to the demands of the Boilermakers' union for an increase of 3½ cents an hour, which makes a total increase of $355,000 per year for the 8,000 members.

• • •

John Blackwell, a member of the Typographical union of St. Paul and Duluth, has purchased the printing plant of the old Duluth Volksfreund, and will remove it to Grand Marais, where he will start a new weekly paper.

• • •

W. K. Fowler, 2115 East Fifth street, has been elected a delegate to the assembly from the Carpenters' union, and O. N. Clause, 225 West Superior street, from the Clerks' union. Both were obligated at last night's meeting of the assembly.

BAD LITERATURE TURNED SCALE

John Riley, Who Carried Obscene Verses, Sent to Jail.

The discovery of a quantity of obscene literature in his pocket sealed John Riley's fate in municipal court yesterday afternoon, when he stood trial on the charge of vagrancy. Riley stood a chance of clearing himself of the charge until a number of saloonkeepers' cards containing vulgar verses were found in his possession and Judge Cutting found him guilty and sentenced him to a ten days' term in the county jail.

Riley claims to be a railroad man with his home in Minneapolis. He was arrested Thursday evening while remonstrating with a restaurant keeper over the price of a supper bill. Riley claimed that his brother paid for two suppers and the brother corroborated the statement. P. Carlson, the restaurant man, claimed Riley's brother shortchanged him in paying for his own meal and did not offer to pay for the other meal.

Madam, if you are not satisfied with your baking powder, you are politely invited to try Hunt's Perfect.

DEATH CLAIMS MICHAEL J. LYONS

Well Known Real Estate Man Succumbs After a Short Illness.

Michael J. Lyons, of 2733 West Second street, a pioneer resident of the West end, died yesterday morning from a complication of throat diseases from which he has been suffering for about three weeks. His death occurred at St. Mary's hospital.

The decedent has been an active figure for some time past in local real estate circles having been employed by T. W. Wahl & Co. and W. M. Prindle & Co. He was 58 years of age and came to Duluth from Saginaw, Mich., in 1891. Mr. Lyons is survived by a widow, three daughters and three sons.

The funeral services were held this afternoon from the St. Clement's church of which the decedent was a member. Rev. Father Brockmeyer, the pastor, officiated.

BISHOP CONSECRATED.

Chicago, Sept. 29.—In the presence of many high dignitaries of the Protestant Episcopal church, Rev. Charles Scadding was today consecrated the bishop of the diocese of Oregon. The ceremony was held in the Emannuel church at La Grange, a suburb of this city.

Itch cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. Sold by all druggists.

COFFIN'S SCHOOL OF DANCING—Class meets every Monday evening from 8 to 9 o'clock; social from 9 to 12. Private lessons by appointment. Room 2, 18 Lake avenue north. New 'phone, 1248.

WANTED — SALESMAN TO PLACE jewelry departments with general trade in Minnesota; high commissions, with $100 monthly advance; permanent position for capable salesman; jewelry experience unnecessary. Jess H. Smith Co., Detroit, Mich.

WANTED — TRUSTWORTHY MAN TO manage branch office and distributing depot for large manufacturer. Salary to start with, $1,500 for first year, payable monthly, and extra commissions and expenses. Applicant must have good references and $1,000 cash, capital secured. Experience unnecessary. Address Manufacturer, P. O. Box 711, Chicago, Ill.

WANTED — ENERGETIC, TRUSTworthy man or woman to work in Minnesota representing large manufacturing company; salary $50 to $90 per month, paid weekly, expenses advanced. J. H. Moore, Duluth, Minn.

BELL BOYS WANTED—AT COMMERcial club.

BUSINESS MEN
BUSINESS MEN
BUSINESS MEN

Supplied with competent stenographers and accountants, FREE OF CHARGE.

Apply to
W. C. McCARTER, Business University.

WANTED—EXPERIENCED MAN TO work in stove department. Apply at once. French & Bassett.

WANTED—A COMPETENT COOK, APply Mrs. Ward Ames, 205 Eighteenth avenue east.

WANTED — STENOGRAPHER AND office assistant, with experience and references. H 17, Herald.

WANTED—ELEVATOR BOY AT THE Spalding.

WANTED — GENTLEMAN STENOGrapher; one capable of playing piano and who can make himself generally useful around store. Apply Howard, Farewell & Co., 17 West Superior St.

WANTED AT ONCE — YOUNG MAN for check room. Spalding hotel.

MEN TO DISTRIBUTE SAMPLES, tack signs, $3 daily; steady; no canvassing. Oliver, Monroe building, Chicago.

MORPHINE, OPIUM, LAUDANUM, COcaine habit myself cured; will inform you of harmless permanent home cure. Mary Baldwin, box 1212, Chicago.

WANTED — BOY WITH PRINTING office experience; also errand boy. Good wages. Christie Lithograph & Printing Co.

WANTED — SALESMEN, CAPABLE and trustworthy; earn $200 to $300 per month; sell on liberal commission to merchants and business men; high-class proposition. S. E. Smith, Mgr., 197 West Seventh street, St. Paul, Minn.

WANTED—TWO FIRST-CLASS PAINTers and paperhangers. Union wages. Union men preferred. Wages on demand. E. F. Phillips & Co., Cloquet, Minn.

PAPER HANGERS AND PAINTERS wanted. Engels & Co., 9 E. Superior St.

$100 PER MONTH SURE, SELLING our universal hospital tickets in mining and lumber camps; references required. International Hospital company, 172 Griswold street, Detroit, Mich.

MACHINISTS—I SELL WARRANTED tools at 20 per cent discount. Joseph E. Fox, 628 West Superior street.

Learn the barber trade and make money easy; only short time required to learn; illustrated catalogue free. Moler Barber college, Minneapolis.

WANTED—COMMON LABORERS FOR yard, sawmill and box factory; wages 20c per hour; one lath pusher and one lath puller, 22½c per hour. We run our entire plant day and night, winter and summer. Red River Lumber company, Akeley, Minn.

WANTED—TIE AND POLE MAKERS, new camps and good timber. Curry & White, Knife River, Minn.

WANTED — GOOD RELIABLE MAN for delivering milk; good wages and steady work to right party. Bridgeman & Russell Co., 16 West First St.

BOY WANTED—TO FEED PRESS AT North-Land Printery.

WANTED—BOY. CALL AT LABORAtory. Bring school permits if under 18 years of age. Lelthead Drug company.

WANTED—GOOD STRONG BOY AT once. Apply at No. 304 West Michigan street.

WANTED—BRIGHT BOY OVER 16, willing to work. Apply to the saddle factory. Marshall-Wells Hardware company, Duluth, Minn.

WANTED—JOB PRINTER. GOOD POsition to sober, capable man. One with country experience preferred. The Keystone Press, 21 First avenue west.

GRADINF FOREMAN; $75 AND BOARD E. Downie, Western Labor Supply Co.

WANTED—TEN CRANESMEN. $100.00 per month. Western Labor Supp. Co.

WANTED—TEN MEN TO JOIN CLASS in card writing; small cost. Address J 29, Herald.

WANTED — CONTRACTORS TO GET out ties, poles, posts, pulpwood, mining timber and cordwood; good timber. Duluth Free Employment office.

WANTED AT ONCE — TAILOR TO make pants and vests. G. Wederstrom, Carlton, Minn.

WOODMEN OF THE WORLD.
ZENITH CITY CAMP NO. 5 meets every second and fourth Monday at old Masonic Temple, fifth floor. H. H. Saxton, C. C.; J. H. Larkin, banker. Gately's store; James Blackwood, clerk. 412 Lave avenue south. All visiting sovereigns welcome.

One Cent a Word Each Insertion—No Advertisement Less Than 15 Cents.

SECRET SOCIETIES.

MASONIC.

PALESTINE LODGE, NO. 70, A. F. & A. M.—Regular meetings first and third Monday evenings of each month, at 7:30 o'clock. Next meeting, Oct. 1, 1906. Work—Second degree. Chas. A. Bronson, W. M.; H. Nesbit, secretary.

IONIC LODGE, NO. 186, A. F. & A. M.—Regular meetings second and fourth Monday evenings of each month, at 7:30 o'clock. Next meeting, Oct. 8th, 1906. Work, first degree. John Cox, W. M.; H. S. Newell, secretary.

KEYSTONE CHAPTER, NO. 20, R. A. M. —Stated convocations second and fourth Wednesday evenings of each month, at 7:30 Next convocation, Oct. 3d, 1906. Work — Royal Arch degree. Charles A. Payne, H. P.; Alfred Le Richeaux, secretary.

DULUTH COMMANDERY, NO. 18, K. T. —Stated conclave, first Tuesday of each month at 7:30 p. m. Next regular conclave Tuesday, Oct. 2, 1906. James L. Owen, eminent commander; Alfred LeRicheux, recorder.

SCOTTISH RITE.
Regular meetings every Thursday evening of each month at 7:30 o'clock. Next meeting, Oct. 4. Work—General business. J. E. Cooley, secretary.

EUCLID LODGE, NO. 198, A. F. & A. M. —Regular meetings first and third Wednesday evenings of each month at 7:30 o'clock. Next meeting, Oct. 3. Work—First degree. W. J. Darby, W. M.; A. Dunleavy, secretary.

DULUTH LODGE, NO. 28, I. O. O. F. Meets every Friday evening at Odd Fellows' hall, 16 Lake avenue north. Next meeting Oct. 5. Initiatory degree. C. H. Troyer, noble grand; D. J. Dorsey, recording secretary.

K. O. T. M.
DULUTH TENT, NO. 1, MEETS FIRST and third Wednesday evenings at 8 o'clock during August and September. Next meeting Oct. 3. Office in hall; hours, 10 a. m. to 1:30 p. m. daily; also Saturday evenings. J. P. Peterson, commander, 2617 West Third street; J. B. Gelineau, record keeper, 224 West First street.

MODERN SAMARITANS.
ALPHA COUNCIL, NO. 1, meets at Elks' hall every Thursday evening at 8 o'clock. Next meeting, Sept. 27, Samaritan Degree, dancing and refreshments. T. J. McKeon, G. S.; Lucy Purdy, L. G. S.; Wallace P. Welbanks, scribe; T. A. Gall, financial scribe.

A. O. U. W.
FIDELITY LODGE, NO. 105, meets at new Maccabee hall every Thursday evening at 8 o'clock. J. Patshowski, M. W.; W. Fenstermacher, recorder; O. J. Murvold, financier, 217 East Fifth street.

A. O. U. W.
DULUTH LODGE, NO. 10, meets in Odd Fellows' hall every Tuesday evening at 8 o'clock. William J. Stevens, M. W.; H. V. Ivens, recorder; T. J. St. Germain, 110 First avenue west, financier.

KNIGHTS OF PYTHIAS.
NORTH STAR LODGE, NO. 35 meets every Tuesday at 118 West Superior street. J. A. Wharton, C. C.; T. L. Foss, K. R. S.

I. O. F.
COURT COMMERCE, NO. 3283, Independent Order of Foresters, meets first and third Friday evenings at 8 o'clock at Rowley's hall, No. 112 West First street. Next regular meeting Oct. 5, 1906. Initiation. C. S. Palmer, C. R.; W. W. Hoopes, R. S.

M. W. A.
IMPERIAL CAMP, NO. 2206, meets at Maccabee hall, 224 West First street, second and fourth Tuesdays. Visiting members always welcome. S. F. Staples, V. C.; N. P. Turnbladh, banker; C. P. Earl, clerk, Box 411.

CLAN STEWART, NO. 50, O. S. C., meets first and third Wednesdays of each month at 8 p. m., in Folz hall, West Superior street. John G. Ross, chief; Malcolm MacDonald, secretary; John Burnett, financial secretary, 618 Cascade street. Next meeting Wednesday, Oct. 3. Initiation and debate.

ROYAL LEAGUE.
ZENITH COUNCIL, NO. 161, Royal League, meets in Elks' hall first and third Monday evenings at 8 o'clock. J. C. MacDougall, archon, 18 Third avenue west. Val H. Hawkins, scribe, 100 Torrey Bldg.

KNIGHTS OF THE ROYAL GUARD—Subordinate Division, No. 132, Hall A, Kalamazoo block. E. F. Heller, captain general; H. V. Holmes, paymaster, 415 Fifteenth avenue east; Mrs. Mary P. Foster, recorder, 17 East Third street.

MODERN MACCABEES.
ZENITH CITY TENT, NO. 1044, meets every first and third Thursday of the month, at Rowley's hall, 112 West First street. Commander, Charles E. Norman; record keeper and finance keeper, A. G. Case, residence, 412 West Fourth street.

SATURDAY, SEPTEMBER 29, 1906.

MINNESOTA HISTORICAL SOCIETY.

THE DALY-JUDGE DIVIDENDS

Will Begin Payment of Quarterly Dividends of 30 Cents in January---Cause of the Advance in Daly-West.

Salt Lake City, Sept. 29..—The Daly-Judge company has announced its policy for dividends. There was a meeting of the board of directors last week, at which time the policy was agreed upon. The company will pay quarterly dividends of not less than 30 cents a share, beginning January. Inasmuch as the mine is now earning at least 15 cents a share per month, the company will probably have a surplus of $300,000 or more when it is ready to begin the payment of dividends. It would not be surprising if the dividend would be made 40 cents per quarter instead of 30 cents. If the last figure is settled upon, the interest rate would be 10 per cent on $12 a share, with the interest payable quarterly. During the present year the mine has been on a dividend basis, as shown by the fact that it has paid off over $231,000 of debt in the first six months of this year.

There has been some inquiry concerning Daly-West to account for the advance in the price last week. There is no special news given out on the property, but the work of running the up-raise to catch the Little Bell vein is progressing with encouraging showing. The principal reason for the advance probably is found in the fact that the time for opening the Ontadio drain tunnel is near at hand. It is expected that within thirty days the tunnel will be open and the mine will be free from water.

M. A. Daugherty has returned from a three weeks' pilgrimage through the Deep Creek mining region, west of the desert beyond the Great Salt lake. He reports that the Western Pacific Railroad company is now laying rails out into the desert fifty miles west of this city and that before Christmas the line will be completed to the Utah-Nevada boundary. Mr. Daugherty states that the country is swarming with prospectors, now that railroad transportation across the desert is assured, while property owners everywhere are working with renewed energy to develop their mines. The combination headed by Duncan MacVichie, consulting engineer of the Bingham Consolidated and Balakkala companies, has opened a splendid mine at Clifton, and camp talk is to the effect that reduction works will be erected within the coming year.

D. P. Rohifing, president of the Frisco Contact and vice president of the Lulu, returned from the mines last week, bringing most encouraging reports from both properties. The ore body in the Lulu is growing larger steadily. A bid of $1.50 a share was made for several thousand shares, which could not be had. In the Frisco Contact he reports that the drift is drawing near the point where the first ore chute was expected. With a compressor plant and power drills it will not take long to extend the drift to this point.

Ohio Copper of Bingham has been growing strong. Crosscut No. 8 shows 20 feet of high-grade ore and about 100 feet of good low-grade ore. Crosscut No. 10 has been started about 100 feet further on. The vein has been determined to be at least 40 feet wide. The total length of this vein on the 500-foot level is now something over 500 feet.. This gives a large body of good, concentrating ore.

A month's test run at the Estella company's gold mill in Beaver county has been finished and has demonstrated that the company's $8 gold ore can be worked at a comfortable profit. The mill will be continued in commission.

Shipments of copper ore from the Imperial company's Beaver county properties has commenced and the management expects to produce regularly from now on. Three carloads of fine ore were on the market during the week.

Sulphide ores containing silver, copper and lead are now being encountered in quantities in the mines of the Lower Mammoth company of Tintie. This class of ore is coming from the 1,700-foot level, and the belief is that the company's career from now on will be a prosperous one.

A. R. Oberlander, metallurgist at the American Smelting & Refining company's works, and his brothers, have opened a fine property in the camp of Alta. A trial shipment of the ore was sold on controls showing $6.40 in gold, 42.4 ounces silver and 6.6 per cent copper. A tunnel designed to open the vein from which this ore was taken at a vertical depth of 700 feet, is just reaching the ledge and by next spring the owners hope to have the property in shape for heavy production.

MINING IN THE BLACK HILLS

Consolidation of Hidden Fortune and Columbus Mining Companies Practically Assured--- Galena One of Liveliest Camps in Hills.

Deadwood, S. D., Sept. 29.—The consolidation of the Hidden Fortune and the Columbus Mining companies is now practically assured. At a meeting held a few weeks ago the stockholders of the Hidden Fortune ratified the proposition for consolidation, and at a meeting held in Denver within the past week the stockholders in the Columbus took similar action. At the latter meeting over 3,000,000 out of the 5,000,000 shares of stock were represented, and there was no dissenting voice on the question of merging the two properities. These properties have been idle for some time. It is the intention to renovate the old mill, belonging to the Hidden Fortune, to move the company's grounds and to commence treating ore from both properties at an early date.

The New York Mica mine, which is being operated by the Westinghouse Electrical company in connection with the mica factory at Custer, has just received a consignment of new machinery, which will be put in place at once.

Galena is at present one of the liveliest camps in the Hills, and a small army of men is employed at the Branch Mint. The company owns 2,000 acres southwest of the town of Galena, and a large amount of development work has been done. Drifts running from the main shaft, known as the Hindoo, which has reached a depth of 350 feet, expose three distinct ore bodies measuring from twelve to fifty feet in width. These are all low grade porphyritic ore bodies. The Union Hill shaft lying to the north also discloses a good grade of porphyry ore and a diamond drill which has been put down 600 feet shows that the ore bodies and the values are both continuous. The mill, which is almost completed, contains 120 stamps, with room for sixty more.

HIGH-GRADE SHIPPING ORE

Opened in Large Body on North Star Company's Property at Wonder---Good Strike Made at the Silver Pick.

Goldfield, Nev., Sept. 29.—News was received from Wonder this week of the opening up of what promises to be a tremendous body of high grade shipping ore on the property of the North Star Mining company of Wonder.

This company owns what was originally known as the John T. Hodsen group, ground located by one of the original owners of the great Nevada Hills Mine at Fairview. The property was recently purchased by Patrick Elliott & Camp of Goldfield, and the development operations have consisted of a number of surface trenches run for the purpose of catching the rich ledge from which sensational values have been secured on the adjoining property of the Nevada Wonder Mining company.

Miners on the North Star property yesterday broke into ore in place which gave uniform assay values of better than $100 per ton. The ledge is absolutely established by engineers now in the camp as the same one opened up on the original discovery on the Nevada Wonder property. Arrangements are being made by Patrick, Elliott & Camp, the promoters of this enterprise to commence sinking operations.

"The values secured," said Mr. Camp, discussing the matter today, "are almost identical with those encountered on the original discovery on the surface and also proven up at a depth of fifty feet through the tunnel which is now the main working on the Nevada Wonder property. We have every reason to believe that the North Star Mining company's property will develop into one of the great mines of Southern Nevada. The formation is of such a character as to assure absolute permanency of the mineral desposits, and as the values represent fine grade of shipping ore we feel more than enthusiastic over this discovery. In fact we find so well of Wonder that we have just incorporated a bank and will open up for business within a very few days. The camp is a permanent one, and while it would be inviting criticisms to say that it would be a rival to Tonopah, at the same time Wonder has equally as good a showing as the older camp had at a corresponding period of development.

An understanding has been reached between the mine owners and the miners' union officials and work has been resumed at the properties closed down a little more than a week ago. The terms of the settlement are being carefully guarded.

Leasers on the Silver Pick company's property have broken into $400 ore at a depth of only 100 feet; and miners are now besieging the management for leasing privileges on unoccupied parts of the property.

For a little over thirty-six tons of ore the owners of the Frances-Mohawk lease on Friday received a check for $20,943.80. The ore had a gross value of $22,861.13 and was purchased by the Nevada-Goldfield Milling company. This is the banner shipment of ore in bulk ever made fro mthe district.

Another valuable shipment made during the week was the thirty tons of better than $200 rock sent out by the Higginson lease on the Jumbo Extension.

The new camp of Ramsey is growing rapidly. A census taken during the last few days gives the population at a little over 500, while more than a dozen properties are raising ore that runs all the way from $18 to $75 a ton, with rich streaks assaying well up in the hundreds of dollars.

The camp of Fairview is also attracting unusual attention now, and a number of Goldfield operators are preparing to do extensive work there. The Nevada Hills, Fairview-Eagle, Nevada-Fairview and a number of other properties are

(Continued on page 12, 2nd sec., 2nd col.)

NO COPPER RESERVE STOCK

Demand Exceeds Production, Say Amalgamated Officers—Little Increase in the Mines' Output This Year Over Last— Ore Bodies of North Butte Are Wonderful.

Butte, Mont., Sept. 29.—John D. Ryan, managing director for the Amalgamated Copper Company; John Gillie, general superintendent of the company, and E. P. Mathewson, general manager of the Amalgamated smelter at Anaconda, make statements indicating that the Amalgamated has not a pound of copper on hand, and that the product is sold far in advance through the United Metals Selling Company of New York. Mr. Ryan says the demand more than keeps pace with production, and that the world's output of copper last year did not exceed that of the preceding year by more than 5 per cent. This year will show very little more of an increase over last, while the demand for the metal has been steadily increasing.

"Copper mining the world over," says Mr. Ryan, "is a solid, stable industry now, and very great increases or decreases in production are not likely to be experienced. Few copper districts are being developed, but the very nature of the ore deposits and the necessity for large and expensive plants for treatment make the new districts come along rather slowly. It is not possible, and never will be, for any flood of copper to be poured into the markets of the world suddenly from any source whatsoever."

"The copper industry is in a satisfactory condition. Prices of the metal remain very good and the demand is larger than at any time in the history of the business. This is due to general prosperity all over the country. Nearly all the manufacturing countries of Europe are using more copper than ever before, and the increase in the demand in the United States more than keeps pace and warrant an advance in the price of the metal, and that without any indication of diminishing consumption."

Mr. Gillie says the Amalgamated selling agent recently received an order for 1,000,000 pounds of copper at 19 cents a pound, and he urged the customers to take half that amount so that others could be supplied. Mr. Mathewson says there is no copper stored anywhere and that the product has been sold in advance for the year.

* * *

The mines of the North Butte Mining company are in good shape for production and there is no doubt that the company will make things hum when the skip pockets in all of the levels are finished. The company has an immense quantity of ore in sight and considerable of it is first class, which means that it runs 6 per cent or more in copper. There are three veins opened, one of which is in Speculator ground, another in Jessie ground and the other in the Edith May and Miners' Union. The Speculator vein is of good width. At a point a short distance south of the main shaft a winze has been sunk from the 1,000-foot level 200 feet, and the drifts from the bottom connect with raises and other openings from the Diamond, which gives that part of the workings plenty of good air. It is estimated that in the openings off the winze and in the winze 100,000 tons of good grade ore is blocked out. The company is preparing to mine this ore and ship it. Even the old stopes in the Speculator are full of ore that will run from 4 to 6 per cent copper, and eventually the company will replace it with barren material and send it to the Washoe plant.

The Jessie vein is about sixteen feet wide, although it varies the same as other veins, and some of it is first class ore and some second class. Up to date it has been a great producer and is good for an unlimited yield in the future.

The veins traversing the Edith May and Miners' Union are the wonder of the district in the way of copper ore. It is from fifteen to thirty feet wide and its entire filling is first-class ore, which accounts for the high value of North Butte ores. The Edith May and Speculator are separated by the Ticon and Adirondack, fractional claims, both of which formerly belonged to James A. Murray. North Butte now owns the latter, however, having bought it several months ago. The Ticon is still the property of Mr. Murray.

North Butte has not developed that part of its possessions lying north of the Jessie, but it intends to cut into the Berlin group. The Berlin claim lies east of the Badger State, and through the latter extends one of the colossal veins of that section. The Badger State is owned by the Boston & Montana company, and if indications count for anything, it will develop into one of the large copper ore producers of the Butte district.

The fact that copper ore in commercial quantity has been discovered in the Elm Orlu, Poser and Valdemere claims, which are continuous in an east and west course, extends the line of the copper zone from the Jessie to those three claims, a distance of about two-thirds of a mile north and making the known copper belt fully two miles wide and two miles long.

It now remains for the Butte & Pacorn company to strike this class of ore in its property and the line will move another mile north.

* * *

The Davis-Daly company has begun tearing down the old head frame over the shaft on the Smokehouse, preparatory to the erection of a new one. It is the intention of the company to equip this shaft with an electric hoisting engine and pumps, unwater it without delay and tap the vein, the apex of which was cut in the excavation for the foundation of the Phoenix electric light warehouse. Manager Palmer stated this week that he expected to be raising ore from this shaft within a short time.

Work is progressing on the Silver King, the shaft on which is 250 feet deep; the Mt. Moriah, which has a shaft 125 feet deep, and on the Colorado. Sinking is under way at the latter, and with a 400-foot shaft as a starter, the company will not be long in reaching the 500-foot mark.

The Original company is making good headway in driving the crosscut south of the 1,800-foot station of the Original mine for the Davis-Daly company, although the rock is hard. The

AT THE LAKE COPPER MINES

Winona Will Soon Begin Shipping Copper Rock—Reconstruction of Calumet & Hecla's Stamp Mills Nearly Finished--- Electric Tram for Adventure--Oneco Enters Copper Ground.

Houghton, Mich., Sept. 29.—The Winona, after a vigorous half year of preparation directed specifically to that end, is nearing its production period. It is thought that rock will be going forward early in October. Only the best of comment is heard regarding the outlook for a favorable showing. The Winona discontinued its mill shipments just two years ago, after having maintained production with a very creditable showing for awo years. The object of stopping the output of the mine was to permit more aggressive exploration and development, and this was carried forward for over a year under the Stanton management. Upon the death of John Stanton steps were taken to place it under new management, and by an amicable arrangement and the sale of a large interest in the property to the heavier holders of St. Mary's Mineral Land company stock, it passed under the control of the latter interests. Its local management then became identical with that of the King Philip, adjoining the Winona on the southwest, which is also held in the majority by the St. Mary's Mineral Land company.

With the new management in charge, steps toward a resumption of shipments were taken immediately, and have progressed steadily since that time. All the machinery in the Winona rockhouse is in position and there remains but little more work to put the shaft in shape for forwarding rock to the mill. At the Adventure mill, where the Winona rock is to be treated, preparations are also fast nearing completion, preparatory to handling the shipments.

* * *

The Calumet & Hecla's reconstruction of its stamp mills at Lake Linden is now taking final shape. This work has been in progress for three and one-half years and it is but months more will make an end of the four-year job. The structural steel for the last section of the remodeled mills is almost in place. It will be rapidly enclosed and with this housing against the winter weather the interior work can progress steadily, bring the machinery installation to its completion probably by next March or April.

The remodeling of the 22 heads in the old Calumet and old Hecla mills has been along the lines laid down in the new Hecla mill of six heads. Five or six heads have been put out of commission each year for four years, including the present period, and the reconstruction upon the respective section old or service has gone forward, one year being required for each. When the work is completed next spring the Calumet & Hecla will have 28 heads and their auxiliary wash machinery of the most modern type.

* * *

The Adventure, in common with other copper mines of Lake Superior, has suffered great inconvenience by reason of a scarcity of labor willing to classify itself as trammers, and the management is going to solve the problem, partially at least, along mechanical lines. Electric tramming is to be introduced in the tenth level drift east from No. 3 shaft, and this tram line will also haul the rock from the ninth level drift east, which will be chuted down through winzes and mills.

The Adventure has the necessary equipment to carry out this plan, and will therefore incur no expense in the undertaking. The cost will very soon be compensated for by the saving effected through mechanical haulage. When the Adventure was seeking to develop values in the ground beneath Adventure bluff a drift was driven near No. 1 shaft for hauling all rock mined upon and above that level. Electric tramming was introduced, the equipment was most complete, but the hoped-for values did not materialize, and the adit was discontinued about four years ago.

The electric locomotive and other equipment is still on hand, however, and in good condition. This is to be introduced now in the tenth level. The generator, which was formerly installed at the No. 1 shaft power were discontinued, and has been in operation there for lighting purposes since that time. The tenth level east will admit of a tram line over 1,000 feet long at present, and it is being extended regularly.

* * *

The Oneco, which started an inclined shaft a few days ago to open an unnamed lode about 100 feet south of the county road at its location, has penetrated the overburden and disclosed the formation. It contains a fair showing of copper and promises well for the prospect.

This lode was disclosed six years ago at a depth of thirty feet vertically by means of a small shaft driven down through the hanging wall, and a fair showing of copper was then obtained. A short drift was also driven at that time.

Although the management is reticent in regard to the events which led up to the discovery of this lode, it is understood from other sources that it was first known to Edwin Hulbert, the discoverer of the conglomerate lode during his residence here and that the opening of the lode six years ago was the outcome of following maps and plans furnished by Mr. Hulbert from his Italian home in Rome. The same lode is opened by pits on adjoining properties. It is the plan of the Oneco to put down its shaft to a depth of 100 feet or more, according to the conditions which are discovered and then explore the lode by drifts.

* * *

Allouez's rock yielded less than twenty pounds of fine copper to the ton during the month of August, making by far the poorest showing sincea stamping began. The falling off in the yield resulted from the development of poor ground in both the north and south openings in the lower levels of the mine, where drift stopes are being run. These levels were especially rich in the vicinity of the shaft, but for some reason poor rock came in as they advanced. Since the beginning of the

(Continued on page 12, 2nd sec., 4th col.)

THE LAKE SUPERIOR IRON RANGES

Iron River-Stambaugh Field of Menominee Range Developing Into Most Important of All Michigan Districts—Biggest Ore Body Discovered Is at Caspian Mine.

Iron Mountain, Mich., Sept. 29—(Special to The Herald.)—Largely because of the work of the diamond drill, which has located ore deposits underneath heavy overburden of sand and similar treacherous material through which it is not possible or feasible to sink exploratory shafts, the Iron River-Stambaugh field of the Menominee range is developing into one of the most important of all Michigan districts. Already there are six mines on the shipping list—the Caspian, Baltic, Dober, Beta, Hiawatha and Youngs—and active exploratory or development work is under way at the James, Barras, Ross, Minkler, Buchholtz, Waldron, St. Clair, Selden, Sheridan, Tully, Baker, McDonald, Brown, Carlson, Oleson, Hamilton, Hammer, Swanson, Morgan, Fogarty, Blair and other properties, the operations having attained a scope hardly dreamed o half a decade ago. A panoramic view from the top of Stambaugh hill presents a scene of thirty or more smokestacks belching out smoke from fuel burning under the many boilers which are generating the steam for the operation of the various classes of machinery in commission. yet the district is as yet in its infancy and it doubtless will be many years before its limits are definitely defined. Ore is not being found in every drill hole or test pit put down, nor is all the mineral tapped of a first-class grade, but the discoveries already made give assurance that the field has a great future before it. The activity would be still greater were sufficient labor available. In the neghborhood of 1,309 men are at work now, and it is estimated that there are places open for half a thousand more.

The biggest ore body yet discovered in the district is that which Pickands, Mather & Co., are developing at the Caspian mine, in Section 3, 42-35. Enough is known concerning this deposit to say that it runs well into the millions of tons, and there are prospects that it may prove quite as large as that at the great Chapin mine, itself. The deposit is also very large at the same company's Baltic property, in Section 7, 42-43, which already has produced 600,000 tons, although it has only one small shaft as yet, and this down not much more than 400 feet. Both the Caspian and Baltic ore runs about 57 per cent metallic iron. The Dober mine of the Steel corporation is showing up more ore as it is opened, and is now considered one of the best mines in the district. The ore runs from 56 to 58 per cent, and is unusually hard. A large 21-foot upright boiler, received some months ago, has been installed, giving the mine a battery of three, aggregating 400 horsepower. The Beta mine of the Mineral Mining company produces a red hematite ore assaying in metallic iron from 50 to 58 per cent. The deposit is substantial and continuous, and apparently is good for many years to come. The deepest points penetrated, about 400 feet down, look as well as any of the workings, and there is an abundance of ore in sight available for production. A shaft is sinking. The Hiawatha is in the hands of the Buffalo & Susquehanna Steel interests, having been unwatered some months ago, and is being explored and developed with a view to ultimate purchase should the new ground opened prove as expected. The Section 12, or Youngs mine, which some months ago was sold to Eastern furnace interests, also presents a fine appearance, giving evidence of developing into a considerably larger proposition than was anticipated. It is planned to put down a new and larger shaft at a point about forty rods northwest of the present opening. This work will be done during the winter, in readiness for the coming season, and in the meantime a new level will be opened from the present shaft. The work of erecting a new engine house, 40x55 feet in dimensions, is under way, and it is probable that a dozen more dwelling houses will be built this fall. The Youngs adjoins the Baltic and Fogarty, and was opened by the G. W. Youngs Mining company, which still retains a small interest.

Pickands, Mather & Co., which recently took options on the Hammer tract and a portion of the Minckler property, is sinking an exploratory shaft at the old Hamilton, across the line from where ore was shown up on the De Grasse property, which latter is also in the hands of this big Cleveland concerns. It will be necessary at the Hamilton to sink to a depth of upwards of 200 feet, most of this distance through a sand overburden, before the ledge is encountered, and before drifting to the ore is started, an

(Continued on page 12, 2nd sec., 3rd col.)

THE CAUSE OF WARREN'S RISE

Ore Struck in Large Quantities and Rumor That the Calumet & Arizona Will Take Control of the Property.

Bisbee, Ariz., Sept. 29.—The advance in the price of Warren stock is due to two causes—the report of ore being struck in large quantities on the line between the Warren and the American properties, on the former's ground, and a rumor that the contract of Warren is to go into the hands of the Calumet & Arizona. What truth there is in the latter story cannot be stated definitely, but it is undoubtedly true that there is some deal pending, which means much to the Warren stockholders, as a consequence of which those on the inside have been buying up the stock rapidly at the advance.

* * *

Everything is progressing smoothly at the properties of the Calumet & Arizona and the Superior & Pittsburg. Ore is being steadily shipped to the smelter, and the output for the month will be about the same as in August.

* * *

The Shattuck is now a regular shipper to the Copper Queen smelter, at Douglas, and as the ore is running very high grade, the company is reaping handsome returns. The work of development still proceeds at the mine, and it is expected that there will soon be an appreciable increase in the shipments. Everything indicates that the Shattuck is one of the big mines of the district, and will soon be in the dividend paying class. It is generally believed here that in the near future the company will build a smelter of its own, where its owners and those of its sister company, the Denn-Arizona, can be handled.

* * *

Reports from the Globe district tell of continued rich strikes in the Old Dominion mine, which is becoming a large producer. The development work on the Globe Consolidated is being finished rapidly, and some handsome blocks of ore have been shown up, which leads those in charge to believe that a large body of high grade copper will be developed. Everyone in the district has confidence that the Globe will become one of the best paying mines in Arizona.

* * *

Drifting in the ore at the 300 level in the Cochise is rapidly progressing and it is believed now by the management that the contact will be reached upon the completion of from 75 to 100 feet more work..

Managing Director Jones was down in the mine a few days ago and stated later that while conditions were about the same as last week, there had been no change for the worse and the sheet of ore being followed was holding its own. It is about seven inches in width and of very high grade.

Between five and six feet a day is being made in the drift and Mr. Jones says the contact should be reached within the next fifteen or twenty days.

The management is figuring that the streak of ore being followed will lead to a body of the same when the contact is reached and have great hopes that such is the case.

The water in the drift, while not increasing, is keeping up a steady flow, which is considered a good indication that the work is being done on a true fissure. Mr. Jones regards the outlook as being excellent.

* * *

The strike in the shaft on the Pittsburg-Jerome is one of the best, the most substantial and looks more like a big commercial proposition than any strike that has been made in the district outside of the U. V. and Copper Chief, says the Jerome News. At a depth of 250 feet the ore body was five feet in width and dipped southwest into the hill. The shaft has been sunk sixteen feet deeper with the ore body in evidence for that distance, and wider and of higher grade at the bottom. As depth is attained the strike increases in interest, and developments are being watched with utmost eagerness by the whole district. The Pittsburg-Jerome property is located about three miles southwest of the United Verde, and is on what is supposed to be the west side of the Jerome-Verde copper belt.

* * *

If the present indications are any criterion, the Huachuca Mountain mining district will soon be in the class of great producers. Heretofore, that district has not been looked upon very favorably on account of the unreliability of some companies which have operated there. At the present time there are a number of responsible companies operating in that district, and good results have been obtained already. The Butte & Arizona company opened up a rich sulphide ore body last week. A sample of this ore has been brought to the city and assays very nearly 27 per cent copper. Eight feet of this quality of ground have been gone through, and the end of the ore body has not been reached as yet. It looks very much as if an ore body of extensive dimensions had been encountered. As soon as the ore body is cut through, a crosscut will be driven, to prospect the site of the sulphide body. As soon as the main ore body is located, a shaft will be slunk at the most convenient point. This ore body compares very favorably with the richest ore found in the Warren district. About two months and a half ago the Butte & Arizona company, composed of men who were prominent in the Amalgamated Copper company of Butte, purchased the property which they are now operating in the Huachucas.

CANADA'S BIG SILVER CAMP

Mines Put in Shape for Steady Winter Production ---New and Larger Machinery Being Installed in Many Cases.

Cobalt, Ont., Sept. 29.—The going camps are rapidly getting into shape for the winter campaign. In many cases new and larger machinery is being installed and additional camp houses are being completed. The camp as a whole was never in such excellent conditions as it is today. The development and discoveries of the last two months, which are by far the most important ever made in the district, have placed Cobalt fairly in line as an important silver camp. There is today sacked for shipment at the leading properties fully twenty carloads of high grade ore which will run from 1,500 to 3,000 ounces a ton.

The latest discovery on the Nipissing property was made last Monday, about 250 feet south of the new bonanza vein at ledge 49. This find is ten inches in width on the surface, has been uncovered for a distance of fifty feet and shows an assay value of fully 50 per cent silver. It is highly probable that this vein will prove to be a continuation of ledge 49, and if so the ore body bids fair to be a most valuable discovery. It is estimated that if ledge 49 continues in width and value to a depth of only fifty feet from the surface, this single ledge contains silver ore to the value of fully $4,000,000.

The McKinley - Darragh - Savage Mines company has just struck a new vein in the 75-foot crosscut at No. 1 shaft. The vein is from six to eight inches in width and shows excellent values in plate and leaf silver. No. 3 vein on this property is showing better values than it did at the surface. Stripping of No. 2 vein has now progressed for over 400 feet. Assays from this vein running up to 3,000 ounces a ton have been made.

Last month the Kerr Lake Mining company's shipments totalled over sixty tons of ore, valued approximtely at $90,000. This company is now working seven veins on its property and the ore shows an average value of from $1,200 to $1,600 a ton.

Heavy frosts have been frequent during the last week and another month will probably see the snow here for the winter. At the leading mines the coming of cold weather has been anticipated and there will be no interference whatever with the work of taking ore from the various ledges.

THE PINE TREE PROPERTY

Adjoining the Famous Baxter Lead and Zinc Mine in the Cuba District Acquired by Marquette County, Mich., Men.

Marquette, Mich., Sept. 29.—(Special to The Herald.)—Marquette county men have taken over the Pine Tree property, which adjoins the famous Baxter lead and zinc mine in the Cuba City, Wis., district, and immediate steps will be taken to properly equip it for conducting mining operations on a much larger scale than have been carried on their since the interests formerly in control started exploratory and development work a few months ago. The Pine Tree Mining company has been organized, and will be incorporated under the laws of Wisconsin. The capital stock will be $50,000, all of which has been subscribed for. The officers are: president, F. E. Keese, Ishpeming; vice president, George J. Maas, Negaunee; secretary, G. F. Ruez, Ishpeming; treasurer, A. B. Miner, Ishpeming; directors, Mayor J. H. Winter of Negaunee; O. D. McClure and James Clancey of Ishpeming; J. C. Kirkpatrick of Escanaba, Frederick Volland of Marquette, and the four above named officers.

The tract contains eighty acres, a portion of which has already been proved up. Three drill holes have been bored, each to a depth of seventy-five feet, and an ore body from eight to fourteen feet in thickness has been located. A shaft is down fifty-three feet, water having been encountered at this depth. At the bottom a drift was driven fifty feet, passing through a ten foot vein of ore. The breast of this drift is twenty feet from a drill hole which shows an ore vein fourteen feet thick. From the work already done, and according to the opinion of mining men who have become interested in the company and who have examined mines in the immediate vicinity, the Pine Tree people are satisfied that they have a continuation of the deposit at the Baxter, which is valued at upwards of a million dollars. The drilling results at the Pine Tree show that the vein is practically fifty feet in width, with an average depth of nearly fourteen, and it is not expected to take long to put the property on the producing list.

A pumping plant is to be installed at once, and with this in commission the shaft will be sunk to the seventy-five foot point, whence a second level will be started toward the ore body. The erection of a mill is also to be undertaken immediately, and it is believed it will be available for operation within six months. A competent mining man will be sent from the Marquette iron range to direct the work. The company is a close corporation, the men interested having ample means to put the property on a producing basis.

Section 2 **DULUTH EVENING HERALD.** Section 2

SATURDAY, SEPTEMBER 29, 1906.

THE DALY-JUDGE DIVIDENDS

Will Begin Payment of Quarterly Dividends of 30 Cents in January---Cause of the Advance in Daly-West.

Salt Lake City Sept 29.—The Daly-Judge company has announced its policy for dividends. There was a meeting of the board of directors last week at which time the policy was agreed upon. The company will pay quarterly dividends of not less than 30 cents a share, beginning January. Inasmuch as the mine is now earning at least 15 cents a share per month, the company will probably have a surplus of $300,000 or more when it is ready to begin the payment of dividends. It would not be surprising if the dividend would be made 40 cents per quarter instead of 30 cents. If the last figure is settled upon, the interest rate would be 10 per cent on $12 a share with the interest payable quarterly. During the present year the mines has been on a dividend basis, as shown by the fact that it has paid off over $250,000 of debt in the first six months of this year.

There has been some inquiry concerning Daly-West to account for the advance in the price last week. There is no special news given out on the property and the work of running the tunnel to catch the Little Bell vein is progressing with encouraging results. The principal reason for the advance probably is found in the fact that the time for opening the Ontario drain tunnel is near at hand. It is expected that within thirty days the tunnel will be open and the mine will be free from water.

M. A. Daugherty has returned from a three weeks' pilgrimage through the Deep Creek mining region, west of the desert beyond the Great Salt Lake. He reports that the Western Pacific Railroad company is now laying rails out into the desert fifty miles west of this city and that before Christmas the line will be completed to the Nevada boundary. Mr. Daugherty states that the country is filling up with prospectors, now that railroad transportation across the desert is assured, while property owners there are working with renewed energy to develop their mines. The party was headed by Duncan MacMillan, consulting engineer of the Bullion Consolidated and Baldwin Copper Hill, who had a splendid outfit at Clifton, and camp talk is to the effect that reduction works will be erected within the coming year.

D. P. Rohlfing, president of the Frisco Contact and vice president of the Lulu, returned from the mines last week, bringing most encouraging reports from both properties. The ore body in the Lulu is growing larger steadily. A bid of $1.50 a share was made for several thousand shares, which could not be had. In the Frisco Contact he reports that the drift is drawing near the point where the first ore chute was expected. With a compresser plant and power drills it will not take long to extend the drift to this point.

Ohio Copper of Bingham has been growing strong. Crosscut No. 8 shows 20 feet of high-grade ore and about 100 feet of good low-grade ore. Crosscut No. 10 was been started about 100 feet further on. The vein has been determined to be at least 40 feet wide. The total length of this vein on the 500-foot level is now something over 500 feet. This gives a large body of good, concentrating ore.

A month's test run at the Estella company's gold mill in Beaver county has been finished and has demonstrated that the company's $8 gold ore can be worked at a comfortable profit. The mill will be continued in commission.

Shipments of copper ore from the Imperial company's Beaver county properties has commenced and the management expects to produce regularly from now on. Three carloads of fine ore were on the market during the week.

Sulphide ores containing silver, copper and lead are now being encountered in quantities in the mines of the Lower Mammoth company of Tintic. This class of ore is coming from the 1,700-foot level, and the belief is that the company's career from now on will be a prosperous one.

A. R. Oberlander, metallurgist at the American Smelting & Refining company's works and his brothers, have opened a fine property in the camp of Alta. A trial shipment of the ore was sold on controls showing $6.40 in gold, 42.4 ounces silver and 6.6 per cent copper. A tunnel designed to open the vein from which this ore was taken at a vertical depth of 700 feet, is just reaching the ledge and by next spring the owners hope to have the property in shape for heavy production.

MINING IN THE BLACK HILLS

Consolidation of Hidden Fortune and Columbus Mining Companies Practically Assured--- Galena One of Liveliest Camps in Hills.

Lead wood, S. D., Sept. 29.—The consolidation of the Hidden Fortune and the Columbus Mining companies is now practically assured. At a meeting held a few weeks ago the stockholders of the Hidden Fortune ratified the proposition for consolidation, and at a meeting held in Denver within the past week the stockholders in the Columbus took similar action. At the latter meeting over 3,000,000 out of the 5,000 shares of stock were represented and there was no dissenting voice to the question of merging the two properties. These properties have been closed down for some time. It is the intention to resume the old mill, belonging to the Hidden Fortune, to move it to the company's grounds and to commence treating ore from both properties at an early date.

The New York Plaza mine, which is being operated by the Westinghouse Electrical company in connection with the mica factory at Custer, has just received a consignment of new machinery, which will be put in place at once.

Galena is at present one of the liveliest camps in the Hills, and a small army of men is employed at the Branch Mint. The company owns 2,000 acres southwest of the town of Galena, and a large amount of development work has been done. Drifts running from the main shaft, known as the Hindoo, which has reached a depth of 350 feet, expose three distinct ore bodies measuring from twelve to fifty feet in width. These are all low grade porphyritic ore bodies. The Union Hill shaft lying to the north is down 400 feet, and the ore bodies and the values are both continuous. The mill, which is almost completed, contains 120 stamps, with room for sixty more.

HIGH-GRADE SHIPPING ORE

Opened in Large Body on North Star Company's Property at Wonder---Good Strike Made at the Silver Pick.

Goldfield, Nev., Sept. 29.—News was just incorporated a bank and will open its doors for business within a very few days. The camp is a permanent one, and while it would be inviting criticisms to say that it would be a rival to Tonopah, at the same time Wonder has certainly as good a showing as the older camp had at a corresponding period of development.

An understanding has been reached between the mine owners and the miners' union officials and work has been resumed at the properties closed down a little more than a week ago. The terms of the settlement are being carefully guarded.

Leasers on the Silver Pick company's property have broken into $40 ore at a depth of only 100 feet, and miners are now bonfiring the management for leasing privileges on unoccupied parts of the property.

For a little over thirty-six tons of ore the owners of the Frances-Mohawk lease on Friday received a check for $20,343.80. The ore had a gross value of $22,861.12 and was purchased by the Nevada-Goldfield Milling company. This is the banner shipment of ore in bulk over Bade-Rio mine district.

Another valuable shipment made during the week was the thirty tons of better than $600 rock sent out by the Higginson lease on the Jumbo Extension.

The new camp of Ramsey is growing rapidly. A census taken during the last few days gives the population at a little over 500, while more than a dozen properties are raising ore that runs all the way from $18 to $75 a ton, with rich streaks assaying well up in the hundreds of dollars.

The camp of Fairview is also attracting unusual attention now, and a number of Goldfield operators are preparing to do extensive work there. The Nevada Hills, Fairview Eagle, Nevada-Fairview and a number of other properties are

(Continued on page 12, 2nd sec., 2nd col.)

NO COPPER RESERVE STOCK

Demand Exceeds Production, Say Amalgamated Officers—Little Increase in the Mines' Output This Year Over Last— Ore Bodies of North Butte Are Wonderful.

Butte, Mont., Sept. 29.—John D. Ryan, managing director for the Amalgamated Copper Company; John Gillie, general superintendent of the company, and E. P. Mathewson, general manager of the Amalgamated smelter at Anaconda, make statements indicating that the Amalgamated has not a pound of copper on hand, and that the product is sold far in advance through the United Metals Selling Company of New York. Mr. Ryan says the demand more than keeps pace with production, and that the world's output of copper last year did not exceed that of the preceding year by more than 5 per cent. This year will show very little more of an increase over last, while the demand for the metal has been steadily increasing.

"Copper mining the world over," says Mr. Ryan, "is a solid, stable industry now, and very great increases or decreases in production are not likely to be experienced. Few copper districts are being developed, but the very nature of the ore deposits and the necessity for large and expensive plants for treatment make the new districts come along rather slowly. It is not possible, and never will be, for any flood of copper to be poured into the markets of the world suddenly from any source whatsoever."

The copper industry is in a satisfactory condition. Prices of the metal remain very good and the demand is larger than at any time in the history of the business. This is due to general prosperity all over the country. Nearly all the manufacturing countries of Europe are using more copper than ever before, and the increase in the demand in the United States has been so great as to warrant an advance in the price of the metal, and that without any indication of diminishing consumption."

Mr. Gillie says the Amalgamated selling agency, however, has an order for 1,000,000 pounds of copper at 19 cents a pound, and he urged the customers to take half that amount so that others could be supplied. Mr. Mathewson says there is no copper stored anywhere and that the product has been sold in advance for the year.

* * *

The mines of the North Butte Mining company are in good shape for production and there is no doubt that the company will make things hum when the skip pockets in all of the levels are finished. The company has an immense quantity of ore in sight and considerable of it is first class, which means that it runs 6 per cent. or more in copper. There are three veins opened, one of which is in Speculator ground, another in Jessie ground and the other in the Edith May and Miners' Union. The Speculator vein is of good width. At a point a short distance south of the main shaft a winze has been sunk from the 1,600-foot level 200 feet, and the drifts from the bottom connect with raises and other openings from the Diamond, which gives that part of the workings plenty of good air. It is estimated that in the openings off the winze and in the winze 100,000 tons of good grade ore is blocked out. The company is preparing to mine this ore and ship it. Even the old stopes in the Speculator are full of ore that will run from 4 to 6 per cent copper, and eventually the company will replace it with barren material and send it to the Washoe plant.

The Jessie vein is about sixteen feet wide, although it varies the same as other veins, and some of it is first class ore and some second class. Up to date it has been a great producer and is good for an unlimited yield in the future.

The veins traversing the Edith May and Miners' Union are the wonder of the district in the way of copper ore. It is from fifteen to thirty feet wide and its entire filling is first-class ore, which accounts for the high value of North Butte ores. The Edith May and Speculator are separated by the Ticon and Adirondack, fractional claims, both of which formerly belonged to James A. Murray. North Butte now owns the latter, however, having bought it several months ago. The Ticon is still the property of Mr. Murray.

North Butte has not developed that part of its possessions lying north of the Jessie, but it intends to cut into the Berlin group. The Berlin claim lies east of the Badger State, and through the latter extends one of the colossal veins of that section. The Badger State is owned by the Boston & Montana company, and if indications count for anything, it will develop into one of the large copper ore producers of the Butte district.

The fact that copper ore in commercial quantity has been discovered in the Elm Orlu, Poser and Valdemere claims, which are continuous in an east and west course, extends the line of the copper zone from the Jessie to those three claims, a distance of about two-thirds of a mile north and making the known copper belt fully two miles wide and two miles long.

It now remains for the Butte & Pacorn company to strike this class of ore in its property and the line will move another mile north.

* * *

The Davis-Daly company has begun tearing down the old head frame over the shaft on the Smokehouse, preparatory to the erection of a new one. It is the intention of the company to equip this shaft with an electric hoisting engine and pumps, unwater without delay and tap the vein, the apex of which was cut in the excavation for the foundation of the Phoenix electric light warehouse. Manager Palmer stated this week that he expected to be raising ore from this shaft within a short time.

Work is progressing on the Silver King, the shaft on which is 250 feet deep; the Mt. Moriah, which has a shaft 125 feet deep, and on the Colorado. Sinking is under way at the latter, and with a 400-foot shaft as a starter, the company will not be long in reaching the 500-foot mark.

The Original company is making good headway in driving the crosscut south of the 1,800-foot station of the Original mine for the Davis-Daly company, although the rock is hard. The

AT THE LAKE COPPER MINES

Winona Will Soon Begin Shipping Copper Rock—Reconstruction of Calumet & Hecla's Stamp Mills Nearly Finished--- Electric Tram for Adventure--Oneco Enters Copper Ground.

Houghton, Mich., Sept. 29.—The Winona, after a vigorous half year of preparation directed specifically to that end, is nearing its production period. It is thought that rock will be going forward early in October. Only the best of comment is heard regarding the outlook for a favorable showing. The Winona discontinued its mill shipments just two years ago, after having maintained production with a very creditable showing for two years. The object of stopping the output of the mine was to permit more progressive exploration and development, and this was carried forward for over a year under the Stanton management. Upon the death of John Stanton steps were taken to place it under new management, and by an amicable arrangement and the sale of a large interest in the property to the heaver holders of St. Mary's Mineral Land company stock, it passed under the control of the latter interests. Its local management then became identical with that of the King Philip, adjoining the Winona on the southwest, which is also held in the majority by the St. Mary's Mineral Land company.

With the new management in charge, steps toward a resumption of shipments were taken immediately, and have progressed to the point that time. All the machinery in the Winona rockhouse is in position and there remains but little more work to put the shaft in shape for hoisting rock to the mill, at the Adventure mill, where the Winona rock is to be treated, preparations are also fast nearing completion, preparatory to handling the shipments.

* * *

The Calumet & Hecla's reconstruction at its stamp mills at Lake Linden is now taking final shape. This work has been in progress for three years, and in another few months more will make an end of the four-year job. The structural steel for the last section of the remodeled mills is almost in place. It will be rapidly enclosed and with this housing against the winter weather the interior work can progress steadily. Bring the machinery installation to its completion probably by next March or April.

The remodeling of the 22 heads in the old Calumet and old Hecla mills has been along the lines laid down in the new Hecla mill of six heads. Five or six heads have been put out of commission each year for four years, including the present period, and the reconstruction upon the respective section cut of service has gone forward, one year being required for each. When the work is completed next spring the Calumet & Hecla will have 28 heads and their auxiliary wash machinery of the most modern type.

* * *

The Adventure, in common with other copper mines of Lake Superior, has suffered great inconvenience by reason of a scarcity of labor willing to classify itself as trammers, and the management is going to solve the problem, partially at least, along mechanical lines. Electric tramming is to be introduced in the tenth level drift east from No. 3 shaft, and this tram line will also haul the rock from the ninth level drift east, which will be chuted down through winzes and mills.

The Adventure has the necessary equipment to carry out this plan, and will therefore incur no expense in the undertaking. The cost will very soon be compensated for by the saving effected through mechanical haulage. When the Adventure was seeking to develop values in the ground beneath Adventure shaft an adit was driven near No. 1 shaft for heading all rock mined upon and above that level. Electric tramming was introduced, the equipment was most complete, but the hoped-for values did not materialize, and the adit was discontinued about four years ago.

The electric locomotive and other equipment is still on hand, somewhat worse for wear and tear, but in good condition. This is to be introduced now in the tenth level. The generator, which was formerly installed at the No. 1 shaft power were discontinued, and has been in operation there for lighting purposes since that time. The tenth level east will admit of a tram line over 1,000 feet long at present, and it is being extended regularly.

* * *

The Oneco, which started an inclined shaft a few days ago to open an unnamed lode about 100 feet south of the county road at its location, has penetrated the overburden and disclosed the formation. It contains a fair showing of copper and promises well for the prospect.

This lode was disclosed six years ago at a depth of thirty feet vertically by means of a small shaft driven down through the hanging wall, and a fair showing of copper was then obtained. A short drift was also driven at that time.

Although the management is reticent in regard to the events which led up to the discovery of this lode, it is understood from other sources that it was first known to Edwin Hullen, the discoverer of the Calumet conglomerate lode during his residence here and that the opening of the lode six years ago was the outcome of following maps and plans furnished by Mr. Hulbert from his Italian home in Rome. The same lode is opened by pits on adjoining properties. It is the plan of the Oneco to put down its shaft to a depth of 100 feet or more, according to the conditions which are discovered and then explore the lode by drifts.

* * *

Allouez's rock yielded less than twenty pounds of fine copper to the ton during the month of August, making by far the poorest showing sinces stamping began. The falling off in the yield resulted from the development of poor ground in both the north and south openings in the lower levels of the mine, where drift stopes are being run. The ground is especially rich in the vicinity of the shaft, but for some reason poor rock came in as they advanced. Since the beginning of the

(Continued on page 12, 2nd sec., 4th col.)

THE LAKE SUPERIOR IRON RANGES

Iron River-Stambaugh Field of Menominee Range Developing Into Most Important of All Michigan Districts—Biggest Ore Body Discovered Is at Caspian Mine.

Iron Mountain, Mich., Sept. 29—(Special to The Herald.)—Largely because of the work of the diamond drill, which has located ore deposits underneath heavy overburden of sand and similar treacherous material through which it is not possible or feasible to sink exploratory shafts, the Iron River-Stambaugh field of the Menominee range is developing into one of the most important of all Michigan districts. Already there are six mines on the shipping list:—the Caspian, Baltic, Dober, Beta, Hiawatha and Youngs—and active exploratory or development work is under way at the James, Barras, Ross, Minkler, Buchholtz, Waldron, St. Clair, Selden, Sheridan, Tully, Baker, McDonald, Brown, Carlson, Olson, Hamilton, Hammer, Swanson, Morgan, Fogarty, Blair and other properties, the operations having attained a scope hardly dreamed of half a decade ago. A panoramic view from the top of Stambaugh hill presents a scene of thirty or more smokestacks belching out smoke from fuel burning under the many boilers which are generating the steam for the operation of the various classes of machinery in commission, yet the district is as yet in its infancy and it doubtless will be many years before its limits are definitely defined. Ore is not being found in every drill hole or test pit put down, nor is all the mineral tapped of a first-class grade, but the discoveries already made give assurance that the field has a great future before it. The activity would be still greater were sufficient labor available. In the neighborhood of 1,300 men are at work now, and it is estimated that there are places open for half a thousand more.

The biggest ore body yet discovered in the district is that which Pickands, Mather & Co., are developing at the Caspian mine, in Section 1, 42-35. Enough is known concerning this deposit to say that it runs well into the millions of tons, and there are prospects that it may prove quite as large as that at the great Chapin mine itself. The deposit is also very large at the same company's Baltic property, in Section 7, 42-33, which already has produced 600,000 tons, although it has only one small shaft as yet, and this down not much more than 400 feet. Both the Caspian and Baltic ore runs about 57 per cent metallic iron. The Dober mine of the Steel corporation is showing up more ore as it is opened, and is now considered one of the best mines in the district. The ore runs from 56 to 58 per cent, and is unusually hard. A large 21-foot upright boiler, received some months ago, has been installed, giving the mine a battery of three, aggregating 400 horsepower. The Beta mine of the Mineral Mining company produces a red hematite ore assaying in metallic iron from 50 to 58 per cent. The deposit is substantial and continuous, and apparently is good for many years to come. The deepest points penetrated, about 400 feet down, look as well as any of the workings, and there is an abundance of ore in sight available for production. A shaft is sinking. The Hiawatha is in the hands of the Buffalo & Susquehanna Steel interests, having been unwatered some months ago, and is being explored and developed with a view to ultimate purchase should the new ground opened prove as expected. The Section 12, or Youngs mine, which some months ago was sold to Eastern furnace interests, also presents a fine appearance, giving evidence of developing into a considerably larger proposition than was anticipated. It is planned to put down a new and larger shaft at a point about forty rods northwest of the present opening. This work will be done during the winter, in readiness for the coming season, and in the meantime a new level will be opened from the present shaft. The work of erecting a new engine house, 40x50 feet in dimensions, is under way, and it is probable that a dozen more dwelling houses will be built this fall. The Youngs adjoins the Baltic and Fogarty, and was opened by the G. W. Youngs Mining company, which still retains a small interest.

Pickands, Mather & Co., which recently took options on the Hammer tract and a portion of the Minckler property, is sinking an exploratory shaft at the old Hamilton, across the line from where ore was shown up on the De Grasse property, which latter is also in the hands of this big Cleveland concerns. It will be necessary at the Hamilton to sink to a depth of upwards of 200 feet, most of this distance through a sand overburden, before the ledge is encountered, and before drifting to the ore is started, an

(Continued on page 12, 2nd sec., 3rd col.)

THE CAUSE OF WARREN'S RISE

Ore Struck in Large Quantities and Rumor That the Calumet & Arizona Will Take Control of the Property.

Bisbee, Ariz., Sept. 29.—The advance in the price of Warren stock is due to two causes—the report of ore being struck in large quantities on the line between the Warren and the American properties, on the former's ground, and a rumor that the contract of Warren is to go into the hands of the Calumet & Arizona. What truth there is in the latter story cannot be stated definitely, but it is undoubtedly true that there is some deal pending, which means much to the Warren stockholders, as a consequence of which those on the inside have been buying up the stock rapidly at the advance.

* * *

Everything is progressing smoothly at the properties of the Calumet & Arizona and the Superior & Pittsburg. Ore is being steadily shipped to the smelter, and the output for the month will be about the same as in August.

* * *

The Shattuck is now a regular shipper to the Copper Queen smelter, at Douglas, and as the ore is running very high grade, the company is reaping handsome returns. The work of development still proceeds at the mine, and it is expected that there will soon be an appreciable increase in the shipments. Everything indicates that the Shattuck is one of the big mines of the district, and will soon be in the dividend paying class. It is generally believed here that in the near future the company will build a smelter of its own, where its owners and those of its sister company, the Denn-Arizona, can be handled.

* * *

Reports from the Globe district tell of continued rich strikes in the Old Dominion mine, which is becoming a large producer. The development work on the Globe Consolidated is being finished rapidly, and some handsome blocks of ore have been shown up, which leads those in charge to believe that a large body of high grade copper will be developed. Everyone in the district has confidence that the Globe will become one of the best paying mines in Arizona.

* * *

Drifting in the ore at the 300 level in the Cochise is rapidly progressing and it is believed now by the management that the contact will be reached upon the completion of from 75 to 100 feet more work.

Managing Director Jones was down in the mine a few days ago and stated later that while conditions were about the same as last week, there had been no change for the worse and the sheet of ore being followed was holding its own. It is about seven inches in width and of very high grade.

Between five and six feet a day is being made in the drift and Mr. Jones says the contact should be reached within the next fifteen or twenty days.

The management is figuring that the streak of ore being followed will lead to a body of the same when the contact is reached and have great hopes that such is the case.

The water in the drift, while not increasing, is keeping up a steady flow, which is considered a good indication that the work is being done on a true fissure. Mr. Jones regards the outlook as being excellent.

* * *

The strike in the shaft on the Pittsburg-Jerome is one of the best, the most substantial and looks more like a big commercial proposition than any strike that has been made in the district outside of the U. V. and Copper Chief, says the Jerome News. At a depth of 250 feet the ore body was five feet in width and dipped southwest into the hill. The shaft has been sunk sixteen feet deeper with the ore body in evidence for that distance and wider and of higher grade at the bottom. As depth is attained the strike increases in interest, and developments are being watched with utmost eagerness by the whole district. The Pittsburg-Jerome property is located about three miles southwest of the United Verde, and is on what is supposed to be the west side of the Jerome-Verde copper belt.

* * *

If the present indications are any criterion, the Huachuca Mountain mining district will soon be in the class of great producers. Heretofore, that district has not been looked upon very favorably on account of the unreliability of some companies which have operated there. At the present time there are a number of responsible companies operating in that district, and good results have been obtained already. The Butte & Arizona company opened up a rich sulphide ore body last week. A sample of this ore has been brought to the city and assays very nearly 27 per cent copper. Eight feet of this quality of ground have been gone through, and the end of the ore body has not been reached as yet. It looks very much as if an ore body of extensive dimensions had been encountered. As soon as the ore body is cut through, a crosscut will be driven, to prospect the site of the sulphide body. As soon as the main ore body is located, a shaft will be sunk at the most convenient point. This ore body compares very favorably with the richest ore found in the Warren district. About two months and a half ago the Butte & Arizona company, composed of men who were prominent in the Amalgamated Copper company of Butte, purchased the property which they are now operating in the Huachucas.

CANADA'S BIG SILVER CAMP

Mines Put in Shape for Steady Winter Production ---New and Larger Machinery Being Installed in Many Cases.

Cobalt, Ont., Sept. 29.—The going camps are rapidly getting into shape for the winter campaign. In many cases new and larger machinery is being installed and additional camp houses are being completed. The camp as a whole was never in such excellent conditions as it is today. The development and discoveries of the last two months, which are by far the most important ever made in the district, have placed Cobalt fairly in line as an important silver camp. There is today sacked for shipment at the leading properties fully twenty carloads of high grade ore which will run from 1,500 to 3,000 ounces a ton.

The latest discovery on the Nipissing property was made last Monday, about 250 feet south of the new bonanza vein at ledge 49. This find is ten inches in width on the surface, has been uncovered for a distance of fifty feet and shows an assay value of fully 50 per cent silver. It is highly probable that this vein will prove to be a continuation of ledge 49, and if so the ore body finds fair to be a most valuable discovery. It is estimated that if ledge 49 continues in width and value to a depth of only fifty feet from the surface, this single ledge contains silver ore to the value of fully $4,000,000.

The McKinley - Darragh - Savage Mines company has just struck a new vein in the 75-foot crosscut at No. 1 shaft. The vein is from six to eight inches in width and shows excellent values in plate and leaf silver. No. 3 vein on this property is showing better values than it did at the surface. Stripping of No. 2 vein has now progressed for over 400 feet. Assays from this vein running up to 3,000 ounces a ton have been made.

Last month the Kerr Lake Mining company's shipments totalled over sixty tons of ore, valued approximtely at $90,000. This company is now working seven veins on its property and the ore shows an average value of from $1,200 to $1,600 a ton.

Heavy frosts have been frequent during the last week and another month will probably see the snow here for the winter. At the leading mines the coming of cold weather has been anticipated and there will be no interference whatever with the work of taking ore from the various ledges.

THE PINE TREE PROPERTY

Adjoining the Famous Baxter Lead and Zinc Mine in the Cuba District Acquired by Marquette County, Mich., Men.

Marquette, Mich., Sept. 29.—(Special to The Herald.)—Marquette county men have taken over the Pine Tree property, which adjoins the famous Baxter lead and zinc mine in the Cuba City, Wis., district, and immediate steps will be taken to properly equip it for conducting mining operations on a much larger scale than have been carried on there since the interests formerly in control started exploratory and development work a few months ago. The Pine Tree Mining company has been organized, and will be incorporated under the laws of Wisconsin. The capital stock will be $50,000, all of which has been subscribed for. The officers are: president, F. E. Keese, Ishpeming; vice president, George J. Maus, Negaunee; secretary, G. F. Ruez, Ishpeming; treasurer, A. B. Miner, Ishpeming; directors, Mayor J. H. Winter of Negaunee; O. D. McClure and James Clancey of Ishpeming; J. C. Kirkpatrick of Escanaba, Frederick Volland of Marquette, and the four above named officers.

The tract contains eighty acres, a portion of which has already been proved up. Three drill holes have been bored, each to a depth of seventy-five feet, and an ore body from eight to fourteen feet in thickness has been located. A shaft is down fifty-three feet, water having been encountered at this depth. At the bottom a drift was driven fifty feet, passing through a ten foot vein of ore. The breast of this drift is twenty feet from a drill hole which shows an ore vein fourteen feet thick. From the work already done, and according to the opinion of mining men who have become interested in the company and who have examined mines in the immediate vicinity, the Pine Tree people are satisfied that they have a continuation of the deposit at the Baxter, which is valued at upwards of a million dollars. The drilling results at the Pine Tree show that the vein is practically fifty feet in width, with an average depth of nearly fourteen, and it is not expected to take long to put the property on the producing list.

A pumping plant is to be installed at once, and with this in commission the shaft will be sunk to the seventy-five foot point, whence a second level will be started toward the ore body. The erection of a mill is also to be undertaken immediately, and it is believed it will be available for operation within six months. A competent mining man will be sent from the Marquette iron range to direct the work. The company is a close corporation, the men interested having ample means to put the property on a producing basis.

INTENTIONAL DUPLICATE EXPOSURE

DEFECTIVE PAGE

CONCERNING WOMEN

Mr. and Mrs. L. W. Powell were the guests of honor at several charming affairs during the week. Upon Thursday Mrs. G. H. Mance entertained in Mrs. Powell's honor at luncheon at the Country club. The table decorations were in pink roses and tulle, and covers were laid for the following guests:

Mesdames—
J. B. Adams, F. E. House,
W. Pressentin, W. J. Olcott,
W. W. Walker, T. F. Cole,
W. C. Brown, John Panton,
C. A. Luster, S. Gamble of Saginaw,
P. M. Shaw, R. H. Draper.
F. Nester,
Miss Hoatson.

* * *

Mrs. James D. Ray has arrived from the East, where she passed the summer, and is the guest of Mrs. G. G. Barnum.

* * *

Mrs. Copeland, Francis W. Sullivan and son, left Thursday for a visit at Towanda, Pa.

* * *

Mrs. J. A. Watterworth and Miss Kathleen Watterworth left today for a two-months' visit at Montreal and Ottawa.

* * *

Mr. and Mrs. W. W. Walker were hosts at dinner Wednesday evening at the Kitchi Gammi club in honor of Mr. and Mrs. L. W. Powell. Thursday evening Mr. and Mrs. C. A. Luster entertained at dinner at the Country club in honor of the same out-of-town guests. Mr. and Mrs. Powell will be guests of honor at a bridge reception this evening, at which Mr. and Mrs. John Panton will receive.

* * *

Mrs. George C. Howe entertained informally at bridge Tuesday in honor of her guest, Mrs. William G. Howe of Fargo. The game was played at two tables. Upon Wednesday afternoon Mrs. R. M. Sellwood entertained at tea, and Wednesday evening Mr. and Mrs J. T. Hale were hosts at dinner in Mrs. Howe's honor.

* * *

Mrs. E. F. Burg was hostess at bridge Thursday and Friday afternoons of this week at her home, 213 West Third street. The house was prettily decorated in scarlet geraniums and golden glow and mountain ash berries. Thursday the game was played at nine tables, and the favors were won by Mrs. W. C. Winton, Mrs. A. D. Goodman and Mrs. C. E. Judd. Yesterday the favors were won by Mrs. F. G. Bradbury, Miss Letteau and Mrs. James Redy.

* * *

Mr. and Mrs. T. W. Hoopes have as their guest, Mrs. A. M. Heath of Chicago. Yesterday afternoon Mrs. D. W. Stocking entertained at an informal afternoon at bridge in Mrs. Heath's honor. The game was played at three tables and the favors were won by Mrs. J. H. Dight and Mrs. Howard Abbott.

* * *

Mrs. Clara Hoke left during the week for Chicago where she will make her future home.

* * *

Mrs. Coleman F. Naughton entertained at an informal card party Thursday evening. At the chop suey luncheon which followed, covers were laid for twelve guests.

* * *

Miss Gertrude Jacobson is visiting friends at Eau Claire, Wis.

* * *

Miss Nellie Glover of West Duluth is visiting friends at West Duluth.

* * *

Mrs. E. D. Baker of 706 East Fourth street is entertaining her brother, Dr. H. M. Gillespie of New York.

* * *

Miss Jean Enger of Park Point is visiting friends in Wisconsin.

* * *

Mrs. M. Fox entertained at a linen shower Thursday afternoon in honor of Miss Lillian King who will be one of the October brides. Those present were:

Mesdames—
G. C. O'Brien, T. Clark,
J. S. Homewood, Saurmann,
M. Gaspard, J. J. Sullivan,
P. McCormack, J. Powell,
W. Daugherty, J. Burns,
M. Burns, H. Longdon,
John Brotherton, J. D. Burns,
T. O'Brien, J. Daugherty,
T. G. Lee, J. Burke,
Thomas Galway.

Misses—
Alma Brotherton, Alva Galway,
Beyer, Lillian Lee,

* * *

Mr. and Mrs. Otto E. Runke were the guests of honor at a pleasant surprise party Thursday evening, which was given at the home of Mr. and Mrs. Edward Ott of 708 East Fifth street. Mr. and Mrs. Runke will leave soon to make their home at Missoula, Mont. Those present were:

Messrs. and Mesdames—
O. J. Wendtlandt, Gudeck,
Stock, Koepler.

Mesdames—
Herzberg, Meyer,
J. Wendtlandt, Taufman,
Wiscus, H. Bartholdl,
Sommers, Neuman,
S. W. Glanville, Apple,
Bagley, A. Oestriech,
Dwello, Krause,
Boerner, Gornga.
H. Wendlandt,

Misses—
Ida Wendlandt, Bertha Wendlandt,
Apple, Neuman.

Messrs.—
Eugene Ahl, W. Apple.
W. Doede,

* * *

Mrs. Walter Butchart of 209 Sixty-first avenue west left today for a ten days' visit at Hibbing

* * *

Miss Gertrude Wright will leave Monday for a several months' visit at Butte, Mont.

* * *

A pretty home wedding took place Wednesday evening at the home of Mr. and Mrs. Frank Schweiger of 429 East Eighth street, when Miss Edith Bristow became the bride of William G. Hammond. The room s were prettily decorated in ground pine and pink and white asters and the wedding service was read at 7:30 o'clock by Rev. Alexander Milne. The bride was attended by Miss Ida Frotz and the groomsman was Welington C. Vince. The bride wore a dainty gown of white silk trimmed with chiffon and she carried white asters. The bridesmaid also wore white and carried pink asters. Mr. and Mrs. Hammond left for a short wedding trip and later they will be at home with the bride's parents, Mr. and Mrs. Joseph Bristow.

* * *

Miss Angot Johnson is visiting her sister at Wadena, Minn.

* * *

Miss Marie Longton of Cloquet, Minn. is the guest of her sister, Mrs. J. P. Thompson of the West end.

* * *

Mrs. Ethel Gray and daughter who have been the guests of friends at the West end for the past two weeks left during the week for their home at Grand Marais.

* * *

Mrs. John Noir of the West end has as her guest, her brother, James Walker of Chicago. He will leave soon for Spokane, Wash.

* * *

Miss Stultze of West Duluth who has been the guest of friends in southern Minnesota for several weeks returned during the week.

* * *

The annual teachers' reception at the Young Women's Christian association took place last evening and was a most pleasing affair. The rooms were decorated in mountain ash berries and scarlet geraniums making a most attractive setting for the delightful evening. A program was given Miss Yeaw giving several readings and Mrs. Clara Falk Murphy sang. A large numoer of guests were present.

* * *

Miss May Wheaton of 505 West First street entertained at cards last evening in honor of Miss Laura Bailey of Elk River, Minn., who is visiting in the city.

* * *

Mrs. William L. Windom will be hostess at two affairs next week at her home, 1414 East Superior street. Tuesday afternoon the guests will be entertained at bridge and Wednesday afternoon an art party will be the entertainment.

* * *

Mr. and Mrs. G. A. Johnson left today for a few days' visit with friends at Deer Park, Wis.

* * *

Mr. and Mrs. D. P. McDonald and daughter of 226 Second avenue east have returned from an outing at Bay Lake.

* * *

Mrs. Oliver Tredo and son of 1029 Garfield avenue left the first of the week for Tacoma, Wash., where she will be the guest of her brother, A. F. Caisese for several months.

* * *

Mr. and Mrs. Werner Pressentin were hosts at a theater party Tuesday evening to see the "Merry Wives of Windsor." The guests of honor were Mr. and Mrs. L. W. Powell of Arizona. The after-theater supper was served at the Kitchi Gammi club. The guests were:

Messrs. and Mesdames—
G. H. Mance, W. W. Walker,
P. M. Shaw, John Panton.
W. C. Brown,
Mrs. Frank Nester.
Messrs.—
Lewis of Bay City, C. A. Luster.

* * *

Mr. and Mrs. J. B. Cotton had as their guest during the week G. A. Lyon, Jr., of Washington.

* * *

Mr. and Mrs. George C. Howe have as their guest Mrs. William J. Howe of Fargo.

* * *

Mr. and Mrs. C. C. Cokefair have as their guests their nephews, Charles F. and Edward B. Schriven of Newark, N. J. The former will attend the Galahad school at Hudson, Wis., and Master Edward will be a student at the university school in this city.

* * *

Mrs. F. G. Bradbury returned the first of the week from a visit at Butte, Mont.

* * *

Mr. and Mrs. L. W. Powell have been the guests of Mr. and Mrs. G. H. Mance during the week.

* * *

Mr. and Mrs. A. C. Weiss returned the first of the week from a week's trip to New York.

* * *

Mr. and Mrs. Norton Edwards returned Tuesday from a week's outing at the Bradley cottage at Deerwood.

* * *

Miss Mildred Hobbs was at Ashland this week to attend the wedding there of a friend.

* * *

Mrs. F. G. Callan returned during the week from a visit in Southern Minnesota and the East.

* * *

One of the prettiest affairs of the week was the wedding of Miss Grace Jane McLean, daughter of Mr. and Mrs. Charles McLean, and Archibald James McLennan, which took place Wednesday evening at the home of the bride's parents at 1228 East Second street. The rooms were prettily decorated in the flowers and leaves of fall. In the living room pink and white asters were used, and the dining room was especially effective in decorations of autumn leaves and red carnations. The service was read at 8:30 o'clock by Rev. T. H. Cleland of the First Presbyterian church. The matron of honor was the bride's sister, Mrs. Fred M. Kettenring of Vancouver, and the flower girl was little Elizabeth Kettenring. The best man was James H. McNiven.

The bride wore a gown of white crepe de chene, with a long tulle veil, and she carried a bouquet of bride's roses. Her only ornament was a diamond and pearl brooch, the gift of the groom. The matron of honor's gown was of white over pink, and she carried pink asters. The little flower girl was also gowned in white, and she carried a basket of pink sweet peas.

At the informal reception which followed the ceremony, Mrs. Charles Shannan and Miss Grace Sheridan presided in the dining room. Mr. and Mrs. McLennan will be at home after Oct. 1 at 1614 East Third street.

* * *

Rev. and Mrs. H. B. Sutherland were hosts at a delightful reception Tuesday evening at their home at Lakeside when the members of the Lakeside Presbyterian church were the guests. The rooms were prettily decorated in brilliant mountain ash berries and leaves and golden glow. In the dining room, Mrs. N. R. Miller, Mrs. R. S. Manley, Mrs. D. A. Reed, Mrs. A. D. Sibbald and Mrs. J. B. Stevens assisted and during the evening a large number of guests called.

* * *

Mrs. H. L. Paddock and Miss Mabel Paddock of 18 West Third street returned during the week from a visit at Boston, Mass.

* * *

Mrs. George O. Smith of 1606 East Fifth street has returned from a week's visit at Chippewa Falls and Eau Claire, Wis.

* * *

Mr. and Mrs. O. L. Lorenger left Thursday for a visit at Denver, Colo.

* * *

Mr. and Mrs. C. M. Whiting of the St. Elmo have as their guest, C. H. Latimer of Ashland.

* * *

Mrs. V. S. Gilbert and son returned during the week from a year's absence in the West.

* * *

The wedding of Miss Elizabeth M. Egan and Fred H. Hendricks both of Superior took place Monday afternoon at the study of the First Methodist church. The service was read by Rev. M. S. Rice and the attendants were Miss Nora M. Hendrickson and Daniel S. McKenzie. Mr. and Mrs. Hendrickson left for a short wedding trip and will later be at home in Superior.

* * *

Mr. and Mrs. J. J. Schaller entertained informally Tuesday evening at their home, 121 North Twenty-eighth avenue west, at which time the engagement of their daughter, Miss Edna Schaller and Reuben Johnson was announced. The wedding will take place in October.

* * *

Miss Kate Lunt was pleasantly surprised Wednesday evening at her home, 1295 West Second street. The evening was passed with games and music and the following guests were present:

Messrs. and Mesdames—
Middleton, Burton.
Mesdames—
Cole, Kelley.
Leonard,
Misses—
Jessie Smith, Cora Lunt,
Catherine Campbell, Helen Leidy,
Alice Middleton of Superior, Bertha Wagen,
Ruth Glover, Mary Johnson,
Ida Hefferman, Anna Owens.
Messrs.—
Howard Ehrhart, Walter Grimes,
W. Adams, Albert Salvoy,
F. Glover, C. Rydquist,
Walter Peterson, A. Melin,

* * *

The wedding of Miss Lillian Godmare and Frank Ansted took place at the parsonage of St. James' church at West Duluth Wednesday evening of this week. The service was read by Father D. W. Lynch. Mr. and Mrs. Ansted left for a short wedding trip and later they will be at home in West Duluth.

* * *

Mrs. W. S. Robinson entertained Monday afternoon in honor of her guests, Misses May and Stella Robinson of Alpena, Mich., who are spending their vacation in this city. The guests were:

Mesdames—
William Rosendahl, E. J. Kennedy,
Richard Johnson, G. A. Desjardins,
J. E. Fox, Margaret Nordal,
Frank Wilson, Flora McDonald,
Helen Robinson.

* * *

A pretty wedding took place on Wednesday evening at the home of S. S. McDonald of 5 Fifty-seventh avenue west, when Miss Adelaide Rose became the bride of William Oscar Walling. Only the immediate friends were present at the service, which was read by Rev. H. B. Sutherland of the Lakeside Presbyterian church. Mr. and Mrs. Walling will be at home after Oct. 15, at 214 First avenue east.

* * *

Mrs. Mary Russell of West Duluth left Wednesday for a two weeks' vacation in the East.

* * *

Miss Inga Solbery of West Duluth left Thursday afternoon for a several weeks' visit at Washington, D. C.

* * *

Mr. and Mrs. Peter La Lanne of West Duluth left during the week for Seattle, where they will make their home.

* * *

Mrs. Clifford Keene of West Duluth left during the week for a visit with her sister, Mrs. W. G. Dundas at McKinley.

* * *

Misses Emma and Hilda Olsen of 6 North Thirteenth avenue west left Monday for a visit at Ely and Winton, Minn.

* * *

George Wirth left the first of the week for Chicago, where he will attend the Chicago College of Pharmacy.

* * *

Mrs. H. D. Final entertained at luncheon Monday at her home on Woodland avenue. The decorations were in red and white and covers were laid for:

Mesdames—
F. O. Harris, W. T. Carson,
David DeVore, F. E. Burrall,
J. J. Wall, A. A. McDonald.

* * *

Misses Behrens and Chell of the West end entertained at cards last Saturday evening. A delightful evening was enjoyed by the following guests.

Misses—
Christine Otterson, Anna Lawrence,
Elinor Forsberg, Louise Duclow,
Nelly Roice, Ebie Otterson.
Messrs.—
Joe Adrian, I. Wold,
Bert King, Adolph Moline,
Charles Coombs, Van Beckman,
E. Peterson, Bjorback,
Jens Gram, A. Erickson.

* * *

Mrs. W. O. Kinsman of 319 West Fourth street is visiting at St. Paul for a week.

* * *

Mrs. Neff and Miss Catherine Neff left the first of the week for Colorado Springs, Colo.

* * *

Mr. and Mrs. L. J. Johnson left Tuesday for Seattle, Wash.

* * *

Miss Grace Boyd returned Tuesday from a two months' visit in New York city.

* * *

Mr. and Mrs. John E. Smith and daughter returned during the week from an Eastern visit.

* * *

Mrs. A. E. McManus and daughter visited at Cleveland during the week.

* * *

Mrs. K. Spitz and daughter of West Duluth returned the first of the week from a several weeks' visit with friends at Minneapolis.

* * *

Mrs. J. W. Mason of Fergus Falls who was the guest of her sister, Mrs. W. H. Holmes of West Duluth left Monday evening for her home.

* * *

Mr. and Mrs. W. H. Sweet of West Duluth left the first of the week for a ten days' visit with friends at Milwaukee.

* * *

Mrs. E. Masse of West Duluth left Monday for Milwaukee to attend the convention of the Women's Catholic Order of Foresters.

* * *

Bernard Scott who was the guest of his grandparents, Mr. and Mrs. H. T. Williams of West Duluth, returned the first of the week to his home at Oshkosh.

* * *

Mrs. George Towner of St. Paul is the guest of friends at West Duluth.

* * *

Mrs. M. Wickstrom who was the guest of friends at West Duluth for a month left the first of the week for her home at Kelsey.

* * *

Mrs. W. E. Kern of West Duluth left Monday evening for a three weeks' visit at Chicago.

* * *

Mrs. O. DeVohn and daughter of West Duluth left during the week for Sweden where they will spend the winter.

* * *

Mr. and Mrs. A. J. Bouchard were pleasantly surprised Tuesday evening at their home, 323 East Eighth street, the affair being in honor of their seventh wedding anniversary. The guests were:

Messrs. and Mesdames—
Ernest Kethel, T. Timlin,
John Iverson, Block,
Henry Burbick, Pratt.
Mrs. Dawn of Minneapolis.
Misses—
Zupa, Olga Flack of Ishpeming.
Burbick,

* * *

Mrs. William Langslowe of West Duluth has as her guest, her brother Albert May of Missoula, Mont.

* * *

Mrs. Henry Ball arrived from Hibbing during the week and will make her home at West Duluth.

* * *

Mr. Johnson and daughter of Carlton who were the guests of Mr. and Mrs. Parsons of West Duluth have returned to their home.

* * *

Miss Lillian St. Clair left during the week to resume her art work at Chase Institute at New York. Miss Rachael St. Clair has also returned to Boston to the Emerson School of Oratory.

* * *

Mr. and Mrs. William Coleman of Duluth Heights enetrtained at cards last evening at he rhome. The rooms were prettily decorated in autumn leaves and cinch was played. The favors were won by Mrs. F. E. Adams and Mrs. H. Fawcett and Hugh Fawcett and Charles Howell. Those present were:

Messrs. and Mesdames—
William McEwen, J. Hogan,
Charles Howell, Gellerup.
F. E. Adams, Mrs. William Donaldson.
F. A. Lumbard,
H. Fawcett, Miss Boston.
G. H. M. Parker,

* * *

The guild of Trinity chapel will meet Monday afternoon at 2 o'clock with Mrs. Edwain Hobbs of 1516 East Fourth street.

* * *

Mrs. George C. Howe, who has been making her home on East Second street during the summer, will be at the Spalding after Monday.

* * *

Mr. and Mrs. William Rock entertained Thursday evening at their home, 704 West Second street in honor of their guests, Mrs. Peter Harrle of Marquette and Miss Bassett of Detroit. The rooms were prettily decorated in pink and green and cinch was played. The favors were won by Mrs. John Gelenceau and Miss Elizabeth Sullivan and Joseph Randall and Fred Mosher. A delightful program of music and reading was given by the guests. Those present were:

Messrs and Mesdames—
Joseph Randall, John B. Geleneau,
George Crotty, Joseph M. Rock,
C. H. Stanley, Fred Mosher.
Henry Dempsey,
Mesdames—
W. O'Brien of Superior, J. Sullivan,
A. Stewart, J. Gutman.
Misses—
Kate Ford of Superior, Sadie Patterson,
Elizabeth Sullivan, Ella Kenney,
Viola Eliot, Flora McPhe,
Mary Gutman, Etta O'Donnel,
J. Hayden, Pauline Sullivan.
Messrs—
Frank Harrle, T. Harle,
W. Rock, J. VanVick.

WILL SING IN GRAND OPERA

RENA VIVIENE (MISS RENA SMITH),
In Prima Donna Role of "Mme. Butterfly," Puccini's New Opera Which Henry W. Savage is to Produce in America.

The premiere of none of the Eastern theatrical productions will be watched by Duluthians with as much interest as the Savage production of the grand opera, "Madame Butterfly," by Giacomo Pucinni, for in this opera Rena Vivienne, known to Duluthians as Rena Smith, will make her American debut, after three years' foreign study.

Three artists of equal merit are necessary to make possible eight performonces a week of "Madame Butterfly," and Miss Smith was chosen after singing the "Butterfly" music before the most critical committee possible—Pucinni, the composer, and his publisher, Tito Ricordi, who also staged the opera at Covent garden.

The fact that she won their approval speaks volumes for the success which the Duluth young woman has already attanied.

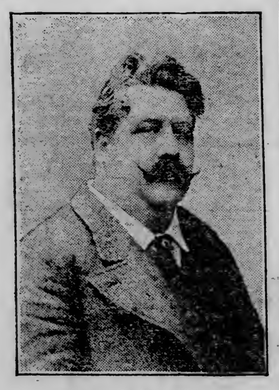
The above picture of Miss Vivienne was taken in the very costume worn by Mme. Storchio, who created the role of Madame Butterfly in the first production, two years ago. After singing the music for the composer and his manager, their unanimous endorsement of Miss Vivienne followed, and a special permit from the management of "La Scala" was secured, that allowed her to have photographs taken in the official costumes. The American production will this year be given for the first time at Washington on Oct. 15.

GREAT ITALIAN COMING SOON

Like Richard Wagner, Leoncavallo, the Italian composer, is his own librettist. The text of his great trilogy "Il Medici" reveals that he is at once a poet and a composer, and the dramatic force of "Pagliacci" proves that its author would have made a name for himself as a dramatist, even had the gift of musical composition been denied him.

In addition to his creative gifts, Leoncavallo is an interpreter of no mean qualities. In his younger days he was successful as a concert pianist, and his mastery of the great orchestra from La Scala in Milan, had demonstrated what a great gift he possesses as a musical director.

Leoncavallo's mental and artistic inheritance on both sides is distinguished. His father Cavaliere Vincenze Leoncavallo was an Italian Judiciary, and achieved celebrity as president of the



LEONCAVALLO.

High Court of Justice. His mother Viginie d'Aurlon was the daughter of a famous Neapolitan painter, many of whose canvases now hang in the royal palace in Leoncavallo's native city.

The composer's musical education began at eight years of age. Eight years later he received his diploma from the Naples conservatory when he studied composition under Serrao and de Piamcesi. Before leaving the conservatory, the boy had completed a cantata which gave abundant prophecy to the remarkable work he was yet to accomplish.

At sixteen, Leoncavallo entered the university of Bologna, "the mother of universities" and here he came under the formative influence of the great Italian poet Corducci. Here he received the degree of Doctor of Letters, and at twenty started out into the world, having laid substantial foundations for the literary and musical career that lay before him.

He will come to the Lyceum with a great orchestra and company of Italy's most illustrious singers, November 8.

DULUTH GIRL AT MINNESOTA "U"

MISS HELEN MOONEY.

Miss Helen Mooney, graduate of the Duluth Central high school in the class of '05 is a sophomore in the academic department of the Minnesota state university, and is very popular among her classmates and among the students of the university at large. She is a prominent member of the Y. W. C. A., and has taken a very active and important part in the different young ladies' movements. She also is a member of several executive and social committees of the Y.W. C. A. department, situated upon the campus.

Certainly Miss Mooney's popularity and good service is very gratifying to her many friends at large, and more so to the large circle of Duluth friends.

Clubs and Musical

The apparent ease with which things are accomplished by the members of the Women's Council has rather a source of wonder to the onlookers. And more than once during the past week remarks have been heard that if the Women's Council had been interested in the raising of $10,000 for the purchase of lake front property for a park and playground the matter would not have dwindled away through indifference. The establishment of a summer cooking school and of school gardens to those not acquainted with the energetic work that was done, seemed a mushroom-like performance, but it has been done and is permanent and lasting.

At one of the recent meetings of the council, an arts and crafts committee was appointed and during the weeks that have intervened the members have been quietly looking over the ground for work in the encouragement of all sorts of hand work in the city. Thursday of this week a meeting was held with the chairman of the committee, Mrs. H. C. Marshall, and plans are being made for a handicraft exhibit in November. There are in the city people of almost every walk of life, who have at some time been able to do some sort of hand work in a beautiful way, but through lack of interest and encouragement, and the press of other duties, these really beautiful and helpful crafts have been allowed to fall into disuse. It is to gather together such people, encourage them, help them to better design and color and progress in their work that this department of the council has been added.

A few of the branches of handicraft in the city which are being neglected through indifference upon the part of the workers and those who should appreciate such things is shown in the following list of capable workers who are at present doing nothing along these lines: Many of the Italian women can make beautiful Italian lace as desirable and exclusive as can be made or obtained anywhere. One man in the city is skilled in all sorts of leather work, and yet through lack of demand he is working in a harness shop. Another jeweler, who is doing the regular routine work of that trade, is skilled for work in designing in silver, but has done nothing at this for many months. It is to save the skilled work already in the town for which the council is working, and to develop an interest and appreciation of the resources at hand. For instance, the noted Duluth clay may be utilized for pottery and the northwest country is noted for the varieties of rushes and grasses which are available for the weaving of baskets.

Committees were appointed to investigate, to select and discover if possible the fine work that is being done in the city and at the exhibit in November such of the work as is approved by the committee of judges which will consist of Mrs. R. M. Seymour, Miss Carey and Miss Jean Poirier, will be shown.

It is hoped that the movement will radiate from Duluth as a center to the outlying districts and will be a means of bringing industrial development. Duluth is coming to be more and more a tourist center and the demand for hand made things is constantly increasing and the Arts and Crafts movement begun in a simple way may be the means of developing a characteristic product.

The members of the committee and the class of work to be hunted out by them are as follows: Mrs. Robert Morris Seymour, design and models; Miss Gertrude L. Carey, metal and leather work; Miss Everett, lace work; Miss Bainbridge and Miss Jean Poirier, wood craft; Miss Lydia Poirier, book binding and book plates; Miss Jessie Thompson, pottery; Miss Mary Shannon, weaving; Mrs. J. B. Weston, illuminating; Mrs. T. J. Davis, basketry.

Mrs. J. R. McGiffert and Mrs. R. N. Marble are also members of the committee and the articles for the exhibit will be brought to the home of the former at 15 East Third street and Mrs. McGiffert will also be interested in the general collection. The members of the committee will be glad to hear of any one in the city who does and can do any sort or kind of work in the line of arts and crafts.

* * *

The first meeting of the year of the Shakespeare class of the Twentieth Century club will be held Thursday morning of next week at the club room of the library. During the past two years this class had added to the study of Shakespeare, a discussion of one of the plays of the great French dramatists and the opening morning, this year, will be devoted to the French play. The members of the class feel deeply gratified that they have secured Wilson G. Crosby to present the play this year, and upon Thursday morning Mr. Crosby will read and discuss "The Barber of Seville" by Beaumarchais. A cordial invitation is extended the former members of the class with their friends to be present and any women strangers in the city, who are interested in the club work are invited to be present at this opening meeting of the year.

* * *

The first meeting of the year of the Bishop's club will be held Tuesday evening of next week at the club rooms. The course of study for the year will be chosen by the members and a short talk will be given by Bishop McGolrick.

* * *

A business meeting of the Ladies' Literaturo class was held Tuesday afternoon at the library. Mrs. F. A. Grawn was elected secretary and Mrs. W. M. Hubbard, treasurer, in place of Miss d'Autremont and Mrs. E. W. Matter, resigned.

* * *

The Oratorio society which is being organized by Horace W. Reynen is rapidly taking shape. The first rehearsal will be held on Monday, Oct. 8, in the M. E. church parlors, when "Hiawatha's Wedding Feast" will be taken in hand. A large number of invitations have been sent out, which call for an answer favorable or otherwise. As no person will be allowed in the rehearsal room without a chorus number until he has been interviewed by the conductor, therefore, to save time and inconvenience, those intending to join the society are asked to send their acceptances without delay. As it is impossible to reach all who are interested in choral work, it may be said that the society will welcome all who have fair voices and some knowledge of reading music, and Mr. Reyner will be pleased to receive further applications at 427 East Second street. It is asked that they be made at once, as in another week the society will be in active operation.

* * *

The first treat of the season will be offered to the music-lovers of Duluth on the evening of Oct. 9, when the celebrated Danish violinist, Skovgaard, is going to appear at Fhaten's auditorium. His numbers embrace among others the Bruch concerto and the Kreutzer sonata. He will be assisted by Miss Christine Wilson, a pianist of unusual merit. Besides these two artists, Prof. Otto Metzger of the Phaten conservatory will appear for the first time before a Duluth audience. Equipped with a baritone voice of fine compass and great sweetness and an excellent technique, he is sure to make a hit. His numbers are:

"Valentin's Prayer," from "Faust"..... .....Gounod
"Alten Basen Hieder"..... .....Schumann
"Der Vorschuss auf die Seeligkrit"..... .....Hollander
"Wohl auf Noch Getrimken"..Schumann
"Abendstern," from "Tannhauser,"..... .....Wagner

* * *

The opening reception and program of the Matinee Musicale will be given Monday afternoon at 3 o'clock at Steinway hall. An interesting program has been arranged and following this the officers of the society will receive and greet the guests. The former members of the club and those interested in its work are invited to be present. The program is as follows:

"Fantasie Im des Themes de Faust,"
....Sarasate
Oliver Colbertson.
Selections from song cycle....Caro Roma
Mrs. James McAuliffe.
"The Birth of the Opal"..Stanley Hawley
Words by Ella Wheeler Wilcox.
Reading, Miss Mae Wylie.
Musical setting, Miss N. Ethleen Fee.
"Si mes vers Avaient des Ailes"....Hahn
"Beloved, in Your Absence."....Lindlan
River Song"....Amy Woodforde Findon
Emily Ellis Woodward.

* * *

The regular business meeting of the Twentieth Century club was held Monday of this week to look over the programs and see if all were in readiness for the regular opening of the year's work. With the meeting of the Shakespeare class Thursday morning at 10 o'clock of next week the regular work of the club will begin.

* * *

The first regular business meeting of the Saturday club is being held this afternoon at the club room of the library.

* * *

The president's reception of the Twentieth Century club, at which Mrs. J. L. Washburn will also be a guest of honor, will be held Monday afternoon, Oct. 3.

Do you want the swellest hats? Do you want to save a dollar? Bring your old hat to be remodled. We know how. Pearson's, 1814 Piedmont avenue west.

Smart French Model Adaptable for New Frocks

Extremely chic is this Parisian costume which elaborates several of the new features of fall garments, notable among which are the shape of the coat, which is between the box and the pony styles, the effective braiding and the directorie stock. A great advantage in this style of coat lies in the fact that a woman possessing a long three-quarter garment of last season may have it cut over to meet the requirements of the incoming mode. The fronts of teh tight fitting coat may still be utilized as a vest to cut off at the waist line and be trimmed prettily with braid. The skirt of the old coat will cut the plain outside portions, the elaborate braiding covering any seams that may have to be made. A deep collar pointed in front and the broad cuffs of the short sleeves are also braided. A high military collar is attached to the vest portion, with it being worn a full directoire stock of linen, law or mousseline de soie. Braid is applied to the skirt, the front panel being line dout with large buttons. A black hat of the picture variety, accompanies the costume.

Orange a Distinct Note in New Fall Hat Trimmings

GRAY VELVET WITH ORANGE RIBBON RUCHING

GRAY BEAVER WITH ORANGE ROSES

DARK GREEN VELVET WITH TWIST OF ORANGE RIBBON

A touch of orange will be a noticeable feature on all fall and winter hats. It is shown in the trimming usually and may be a ruching of orange, a bunch of orange roses or perhaps a twist of orange velvet. It is, in fact, the saving grace of many of the new chapeaus by reason of the sombre colors to be worn.

The first hat is made of gray chiffon velvet, trimmed with long stiff feathers and a very full ruching of orange satin ribbon outlining the low crown. In the second hat of dark green chiffon velvet there are plumes of the same shade, the whole brightened by a tight twist of orange velvet ribbon about the crown. The large gray beaver in the third illustration is gorgeous with a bunch of burnt orange roses shading from light to very dark tones. The effect is most charming and to a brunette the coloring is very becoming.

Whoever turns his skill and patience to account in the creation of the material necessaries and luxuries of life finds a source of special enjoyment in the work, as well as a welcome addition to the family meals, says the Garden Home. To be sure, there are people who say that a kitchen garden is an expensive affair, but whether it shall be a gain or a loss depends entirely upon how it is managed—whether the owner tills the ground with his own hands or leaves it to a jobbing gardener to fork the soil over occasionally, and charge his own prices for seeds and plants that may be incapable of attaining a profitable perfection. By right management, on either a large or small scale, the kitchen garden is immensely profitable.

Inexpensive Recipes for Fruit and Spice Cake That Will Keep

By EMMA PADDOCK TELFORD.

My dear Mrs. Telford:—

Will you kindly send me or publish a recipe for a delicate spice and raisin cake; also one for an inexpesive fruit cake, one that I shall be able to keep for state occasions? I tried with success your recipe for white cake and it was delicious. Thanking you in advance. Mrs. S.

Delicate Spice Cake.

Put into a pan two-thirds cup melted butter, two-thirds cup sugar, two-thirds cup molasses, one cup milk and one tablespoonful mixed spices—cinnamon, cloves, mace, nutmeg, and add one well beaten egg. Sift together two and a half heaping cups flour, and two teaspoonfuls baking powder. Add to the other ingredients, together with one cup seeded raisins dredged with some of the flour. Lastly add a tablespoonful lemon juice. turn into buttered pans and bake in a moderate oven.

Dolly Warden Cake.

Beat to a cream two-thirds cup butter and two cups sugar. Add the yolk of thee eggs beaten until lemon colored and thick, then added to one cup sweet milk. Fold in (alternately) three cups flour sifted with two teaspoonfuls baking powder, and the whites of three egs beaten stiff. Do not stir, but fold in. Now divide this batter in two equal sections. Flavor one with lemon and bake in two layer cake tins. To the other portion add one tablespoonful molasses, one cup chopped raisins, and one teaspoonful each of cinnamon, cloves and nutmeg. Bake also in two tins and put together with jelly, having one of the light cakes at the bottom.

Sour Milk Spice Cake.

Beat to a cream one-half pound of butter and a pound of sugar. Add the yolks of five eggs beaten thick and smooth, one cup sour milk into which a teaspoonful soda has been stirred, a pinch salt, tablespoonful each of cloves and raisins, and a pound of flour. Lastly stir in one cup chopped raisins dredged with flour and bake in a moderate oven.

Plain Fruit Cake.

Stir a cup and a half butter with three cups brown sugar until light and creamy. Add half a grated nutmeg, a tablespoonful powdered cinnamon, one tablespoonful each cloves and mace. Dissolve a level teaspoonful of soda in a half cup sour cream, add to it half a cup molasses and stir until it stops "purring." Then add to the other ingredients, mix well, and put in six eggs beaten vigorously between each addition. Confectioners and French chefs knead all fruit cake with their hands for it is too stiff to beat properly after the fruit is put in. Stir in a wine glass of brandy. Sift four cups flour and add to the cake mixture little by little, kneading al the time. Have ready one pound seeded raisins, one pound washed and dried currants, quarter of a pound of shredded citron and an eighth of a pound each candied orange and lemon peels, chopped fine. Sprinkle this fruit with two tablespoonfuls flour, and mix well together before adding to the cake. Knead ten minutes after adding the fruit, then put into two brick-shaped tins lined with buttered paper. Place in a moderate oven and bake slowly for three hours. Cover with paper if the cake shows signs of browning too quickly on top and do not open the oven door for the first three-quarters of an hour after putting in to bake. In case you depend upon a gas stove for your baking, it is safer to steam this cake for two hours first, then bake an hour in a very slow oven. A good plan with any kind of fruit cake is to mix the butter one day, let it rest over night to "ripen," then bake the next day.

Coffee Fruit Cake.

Cream together half a cupful of butter and one cupful of brown sugar; dissolve a teaspoonful of baking powder in two tablespoonfuls of warm water and stir into a cupful New Orleans molasses. Add with a well beaten egg and sugar mixture, together with a well beaten egg and a teaspoonful each of allspice, cinnamon and nutmeg, sift three cupfuls pastry flour and take from it enough to thoroughly dredge a quarter pound shredded citron, three-quarters of a pound of cleaned currants and a pound seeded raisins. To the butter, sugar and egg mixture add one cupful strong coffee. Add the flour, knead thoroughly, and; lastly, incorporate the fruit. Bake in buttered and lined pans in a slow oven.

become frowsy or sallow, but the between type woman will not be perceptibly older as the years roll on.

EIGHTY-TWO WIDOWS.

Ask the old baggage master at the little village of Monroe, Ia., for what the town is remarkable and he will tell you:

"Nothing as I know of, unless it's widders."

The answer is potent, as Monroe is not only remarkable for widows, but the most remarkable town for them in the world.

There are 836 people in Monroe, says the Chicago Tribune, and 82 of them are widows. If the tax collector had not had to transfer three to another column for getting married again, and to take off three for death or moving away since last year, and if he had not also to admit reluctantly that three more are "widows by divorce," he could just as well give you 91 as 82.

In this connection Monroe is unique in the fact that its women remain widows. You will say that they never had a chance to remarry, but there is another thing about the Monroe widows:

They have outstripped the eligible women of all other towns in the United States in receiving proposals.

Last year this town was pointed out in a nearby paper as one of the remarkable discoveries of the census. Not only were the widows listed as widows, but those who paid taxes on property were pointed out.

The subject of looks was also obligingly dealt with. Exchanges copied, and the result was a shower of letters with proposals from all over the state, and from other states, in numbers that taxed the local postmaster.

These set Monroe in the most awful flutter that has ever been known in its history and left no one of whom it could be said that she hadn't remarried because she hadn't had a chance. Some of the young and pretty ones got as many as thirty proposals while the eldest widow, who is 90, got her share as well as the rest.

The deep disgrace of that episode will never quite fade away from the minds of the widows of Monroe. That these letters have been hidden or burned and that the day on which the article was written was considered an evil day, the scars of which these gentle souls will never get over, is part of the strangeness of the people and their ways, that makes Monroe the unique town that it is.

One of the prettiest of the young widows, when asked if she did not get her share of the letters, answered, with flashing eye and flaming cheeks:

"I did not get any and I would put them in the fire if I had."

Others say that she got any number and that putting them in the fire was exactly what she did. She has a pretty, dark, waving pompadour, with auburn lights in it, is slight and graceful, and is not altogether a fair sample of the spirit of the town, because her husband has been dead only a year.

It was stated recently at a public hearing in Australia, says the Kansas City Journal, that £1,000,000 worth of rabbits were shipped to England every year; that the rabbit, as a commercial commodity was "only in its infancy;" and that the trade would probably grow to £5,000,000 a year.

New Coronet Style of Hair Dressing Pretty for Young Girl

COIFURE BY HEPNER
Photo by Joel Feder

For a young girl there is nothing quainter or prettier than the Roman braid or coronet style of hair dressing. With the hair parted in the middle and waved luxuriantly on either side, the back hair is brought up to the crown of the head, braided, the braid twisted about low over the forehead. The result is the effect of a crown and obviates the necessity for dressy occasions of any hair ornament whatever.

Colors Brunettes Should Wear

By ELIZABETH LEE.

It is a mistake to imagine that what is becoming to one of the brunette type is becoming to all, for there are almost as many different types of brunettes as blondes.

What might be termed the genuine brunette, she with the dark eyes and hair to match, her skin echoing these tones in a lesser degree, a rich deep flush on the cheeks, and lips of ripe cherry color, is one of the easiest types to dress successfully. She can wear cream, old ivory, yellow, pale and sunset shades, orange, all shades of red, as flamingo, cardinal and crimson, pale and navy blue, golden brown, tan, fawn, gray, pale coral and deep rose pink, amber and old rose. Indeed, with the exception of violets, mauves and pale green, this type may choose almost any color.

The sallow brunette, black haired and black eyed, requires the most careful dressing. As a rule, women with sallow skins usually have very beautiful eyes, so that by choosing colors, suggesting warmth and depth, very often the effect of the sallow skin may be entirely overcome. Strong golden tans, rich, deep cardinal and crimson reds are hers, also the red, rich shades of brown and red tan, navy blue, touched with deep cardinal velvet, and relieved about the face with cream lace or linen collar and cuffs, will become a woman of this type, while for evening, a pale orange or flamingo red may be safely chosen.

The olive skin, first cousin to the sallow skin, may add to those colors already enumerated milky white, maize, coffee color, deep apricot and deep rose red. An other type is the creamy brunette, with blue, blue-gray or violet eyes, clear, colorless skin and generally very red lips. She can wear both pure and cream whites, pale lemon, pale blue, pale pink, black, navy blue, deep red, blue gray, Indian red, golden brown and old rose; greens, mauves and deep pinks should be avoided.

Then the fair brunette, with delicate skin, and blue or violet eyes, a faint pinky tint creeping into the cheeks, the hair black or brown, will look lovely in an evening frock of cream white or pale lemon. Pale blue will also suit her, in fact, she may wear almost all shades of blue with success; gray, too, will bring out and deepen the faint flush of the cheeks, dove color being particularly kind. She can also wear tan, golden brown, maize and the pale shades of coral and salmon pink.

The woman of the between type is not unlike the fair brunette as regards eye and skin, the color of her hair, however, differs from the brunette in that it is neither dark nor fair, but may range in shade from mouse or dust to light brown.

Supposing the complexion is clear and the coloring good, then this class may wear almost every shade of green and mauve with success, though if the skin is sallow these very colors should be avoided. Blue, too, will be becoming, whether the eyes are blue, blue-gray, gray or brown, but if the slightest tinge of green is seen in the eyes, then pale blue should not be worn. Blush pink will become this type, and so will wine red.

The pink and white type may also wear black, white, green (pale and dark), heliotrope, deep gray, browns in not too deep tones, golden shades being preferred to seal, but all such shades as mode, castor, fawn, pale tan and putty colors will not be effective, being too much on the shade of the hair to insure a good contrast. Pastel shades are always becoming to this type of women, and wile she may be disappointed that she cannot possess the vivid coloring of the dashing brunette, or present such a stunning appearance as the tall, plump blonde, she should take comfort in the thought that it is her special type that holds its youth and freshness the longest. The blonde will surely fade, and the brunette

Wings and Breasts Used Largely on New Hats

FROM THE EUROPEAN EDITION OF THE NEW YORK HERALD.

Three smart hats from Paris workshops show modifications of the tip-tilted styles worn early in the season and also emphasize the use of wings, breasts and plumes. Not a hat is seen among the fall openings that is not heavily laden with these trophies from the feathered tribe. While birds—bodies, wings and all—are to be worn, and, it is said, will form the most important feature of new fall millinery.

REVIVAL OF THE BLOUSE STYLE

EVOLUTION OF THE PONY JACKET

GEORGE - BAKER

POPLINS ARE HIGHLY MODISH

TAILORED ROSELLE TIES IN SILK & VELVET

SUGGESTING THE MANNISH MODE

Modes *of* the Demi-saison That Are Prophetic-*The* Tailored Type Prevails-Velvets *and* Silks Combine-Poplins in High Favor-Elaboration in Trimmings-Some Novelties and Some Conspicuous Revivals.

The entire world feminine looks to Paris for its fashions, if not for its opinions. Not that the Parisienne herself is ever and always such a conspicuously modish little person in her clothes, but rather because Paris is the gathering place for every nation under the sun, for the moneyed aristocrat and plebiscite alike, and Paris with republican fervor greets them all with open arms and asks of them merely that they be interesting, spend money freely and even lavishly, and—above and beyond all—that they like and appreciate Paris. There's the secret of the supremacy of Paris. She draws the devotees of all the arts to her center, and she gives them, one and all, the opportunity of their lives to gratify their tastes, their wishes, their ambitions. She caters first, last and all the time to the stranger within her gates.

For the world feminine there are opportunities upon every hand to gratify the most luxurious of tastes, the most fastidious ideas as to dress and appearances. It may be accomplished at a vast expenditure; or, again—if the woman be alive to her opportunities—it may be achieved with the minimum of expense. It all lies with the woman herself; for Paris can gratify every taste and every purse.

It will take a long purse, however, to follow the latest styles in all of their Parisian perfection; or if the purse be lacking, then it will require an unusual degree of ingenuity in the woman of slender resources to present a really modish appearance in the coming winter styles. Materials are more lavishly used and cut into; trimmings are of the most ornate and elaborate order, and the mode itself is of the ultra character that demands first a goodly degree of taste to select and a next goodly degree of it to carry off well.

A comprehensive grouping of models that have been ushered in on this side of the Atlantic with the aegis of famous names to cover their trying points afforded a chance to sum up the most prominent features of the mode for the late autumn and early winter seasons.

For one thing, there are far more combinations of materials and far fewer combinations of color than in the immediate past. Quite a fad it is to have a three-piece costume in which one-color idea is carried out, but each piece—the coat, the skirt and the little blouse, all made up in different materials.

A charming model by Perdoux delightfully illustrates this tendency. The little coat with its conspicuously shortwaisted back is in a brown chiffon velvet. The skirt is of a tortoise-shell brown sedo silk, while the little blouse is in a harmonious tint of brown chiffon relieved with white lace and mousseline de sole.

There is a duel a l'outrance between the plain and severe and the more frivolous and fussy modes, both of which are expected to be concocted by the tailor, rather than by the dressmaker. Just at this writing the native Parisienne prefers the latter type; but those French who prefer to follow foreign ideas, to emulate the English and the Americans in their love and following of "le sport," to such the more masculine type of dress appeals as being better in keeping with their own tendencies in the way of pursuits and amusements.

The color scheme for the winter promises to be an interesting one. Trying to an extreme will materials prove, unless selected with due taste and skill. There are deep and dense shades of gray—the lighter tints seem to have been retired with the summer toilettes—that are bound to bring out every yellow tinge and every sallow tendency in the skin. Woody-looking fawns, soft crushed fruit tones that tinge on reds, browns of the polished and the golden copper hues; greens that take on metallic lights, and some hues that are vividly brilliant. Those are what the best makers are displaying, and in the more expensive materials. Variations of those colors, in less extreme tones, are selected in the less costly and, perhaps, more staple materials. For example, one sees all of the tints mentioned in the velveteens that are slated for a succession of their last season's vogue; but in those the brilliancy is toned down quite a little, and the result is far more acceptable than if the more intense hue be presented.

In broadcloths there is absolutely no hint of a waning modishness; and here there are most delightful halftones and tints andnuances that it takes a trained eye to appreciate. There are some exquisite yellows that will trim with the popular combination of heavy lace and furs to perfection; and provided that the fur is permitted to intervene between the cloth and the complexion, the costume cannot fail of a due success on either blonde or brunette. There is a popular tradition that a blonde cannot carry yellow successfully; but a 20-minute session at any good dress goods counter will quickly convince even the ashen blonde—the blonde cendree of the French—that there are possibilities for her in this color that have been hitherto unsuspected.

After the broadcloths it is cloths of the sheitna type that will find a popular acceptance. This may best be described as a woolen taffeta, since the weave is exactly in wool what taffeta is in silk. Those take all the modish shades beautifully, and even a slight attempt at elaboration or trimming effect shows up wonderfully well upon the smooth and lustrous surface.

The French tailor deems every class of dress goods his own domain, differing markedly from his American cousin in this respect. The entire range of cloths is, of course, conceded him; but, in addition, he reaches out and makes his own of velvets and velveteens, silks of many kinds and characters, sheer voiles and tissues, and does not hesitate to use lace in quantity, and to combine braids and chiffon, furs and mousseline all in the same trimming scheme. A master of combinations is this French tailor, and while the mere mention of the conjunction of such wearing materials may sound crude and inappropriate, just one glance at the made-up model that conveys them is enough to convince the most skeptical that the result so gained is harmonious and artistic as well.

Poplins have sprung into a sudden favor, after a long period of probation at the hands of exclusive and fastidious leaders of the mode. Queen Alexandra and the ladies of her court and their many friends and relatives among the haute noblesse of both France and England have long favored the most elaborate costumes in Irish poplin decorated with Irish crochet of the finest variety. The genuine poplin that hails from Ireland is hand woven upon the oldtime loom, and its wearing qualities are proverbial ou the other side of the ocean.

The short-waisted effects that are characteristic of the season are cleverly contrasted with the return of the bloused modes. The little blouse coat with a poplum or basquine added over the hips is back once more, and its effects in the latter mode are flattering alike to the tall and short, to the slender and the more developed figure.

Flutterings in Fashion Land.

Little Things That Mean Much To the Woman *of* Fashion.

Embroidered Gloves

are growing more elaborate with each and every importation that is opened up in the shops. White gloves have so receded in favor that the specialty houses are offering them at reduced prices, and the fashionwise are purchasing heavily of them and having them dyed to the exact tint of the costume with which they are to be worn.

Colored Footwear.

has always been favored by the Parisienne, and she orders lavishly of her bootmaker so that every costume has its appropriate shoe, usually a color match. The more economical American, while following the fashions fully as eagerly and as enthusiastically, nevertheless hesitates to lay out a large part of her dress allowance in cleaner's bills, for which she has absolutely nothing whatever to show at the season's end. The American shoemaker overcomes this state of affairs delightfully in making the vamp of the shoe in either a dull or a brilliant black kid, and then the upper is of contrasting tone and material, the silken hose matching this in tint. In this way the shoe does not become soiled after a few wearings, the demands of fashion are satisfied and a measure of economy effected.

Satin Striped Velvets.

and velveteens are among the latest presentations. They are peculiarly effective in the mouse-grays, the myrtle-greens and the subergine (eggplant) shades that are to rule the fashionable section this coming season. Moire silks are often selected for their trimmings, and handwork in the way of embroideries and appliques is quite the correct accompaniment.

Empire Combs.

are very much to the front just now. These are the large combs with a narrow top—that is, .. seems narrow in proportion to the size of the comb—the top being made the medium of artist work in gold and inlay.

Stiff Turn-over Linen Collars.

have the turnover part of exquisite hand embroideries. They have all the stiff shape and appearance of the masculine linen collar and are, in fact, made after the most approved masculine models. The little touch of embroidery on ie turnover part, however, serves to soften them; but none the less they are bound to prove somewhat trying to the average wearer. There is a certain amount of incongruity between the stiff collar and an embroidered surface; nor is this altogether removed in the addition of the lingerie bow, a frilly and fluffy little butterfly affair that is attached at the collar, fastening with a little elastic loop.

Tassels of Several Kinds.

are among the trimming showings that hold possibilities for the clever designer. The button has been so overdone as a trimming effect that the little tassel will be welcomed in its place. Just at present, though, there is usually a button top or effect that seems to hold the pendant tassel in place, and this is embroidered, beaded, or painted, so that it presents the richest effect.

The Notion Counter.

is a place of inspiration to the home or the amateur dressmaker at the moment. Countless little helps and hints for her use are there displayed, and a clever eye and a retentive memory will make use of such to excellent advantage. There are the new shoulder forms which, slipped in as an interlining in a coat, make for just exactly the correct line at the shoulder, and aid wonderfully in the setting of the sleeve. There are specialties in collar supports, in featherbone skirt stiffenings and cordings, in covered piplings, in skirt measurers that mark exactly the correct hang of the skirt when it is being tried on the wearer, silk-covered hooks and eyes that add muchly to the appearance of the finished gown; skirt bindings in braid and velvet that are shaped to the exact curve of the skirt—and countless other things that are, as the auctioneer's catalogues ar- wont to proclaim—too numerous to mention. A half-hour spent at the notion counter is sure to result in a host of good ideas and helpful hints for the home-sewer.

Auctions in Japan are quietly conducted. The bidding is secret and silent, each person writing his bid on a slip of paper and dropping it into a box. When it appears that all bids are in, the box is opened and the highest bidder is named.

Parisian Tailored Possibilities.

The Parisian tailor, somewhat unlike his American congener, claims the whole realm of fabrics for his own. But especially does she lean to silks and velvets, and this season more than ever. Somehow or other the mention of the one usually calls up vision of the other, and from time immemorial silk and velvet have been associated for costume and trimming effects.

One of the prettiest designs that has found its way from Parisian ateliers to this side of the ocean is that illustrated wherein a velvet jacket tops a skirt of dull finished sedo silk. This latter is a novel weave, somewhat approaching a faille francaise in appearance, but softer in handling and of excellent wearing qualities. The color scheme of the illustration shows the soft silk skirt in a pretty shade of brown, one of the novel tortoise-shell tints, while the short-waisted little coat is in chiffon velvet of a deeper tint. This little coat, incidentally, presents some novel ideas for the dressmaker. Deeply pleated in the shoulder seams—which are broadened out with a featherbone sewed into the seam — the fronts are disposed after a blouse pattern, while the pack is shortened, and a triple box pleat, with fan ends applied separately, finished with pendant passementerie ornaments. The sleeve is in three-quarter length, with a well-stiffened cuff trimmed with braid, like the collar, and garnished with Irish crochet.

The skirt of the brown sedo silk is cut in the extreme of the circular mode, the excess fulness being deftly pleated and stitched down over the hips, to be released once the curve of the hip is passed. The correct line at the foot is maintained in the trimming, which consists of an entre-doux of closely pleated silk, edged either side with a bias band, in the stitching of which featherbone cords are introduced with excellent results. Those cords are just barely stiff enough to keep the skirt from sagging, but so flexible are they that they do not assert their stiffness by any means in a hoop skirt fashion or intimation.

Poplins Are Highly Modish.

For quite a considerable period the haute noblesse of Great Britain and of France have been wearing costumes made from the hand-woven Irish poplin, whose use Queen Alexandra of England has strenuously advocated. At first their extreme cost made them prohibitive to all but the wealthy, but with their increased vogue and the strong demand for them that has arisen, less expensive methods of production have been adopted, so that now a woman of average means may possess a costume of this charming colleen poplin.

A design from Agnes, of Paris, well illustrates the possibilities of this delightful and durable silk. The color is one of those indeterminate green-browns that fashion favors so mightily for autumn and winter wear. A conventional design in reticella lace—a recent arrival in fashionable circles—is dyed to match the colleen poplin, and this forms a shallow yoke and sleeve trimming. The bodice is fashioned upon blouse and peplum lines, the skirt carried up in its central panel over the celture, and little basquine tabs added below the belt with a delightfully chic result.

The skirt lines are particularly good, the graduated panel down the center front making for an effect of slenderness, and the apron effect in which the side panels are treated proving a welcome novelty.

Suggesting the Mannish Model.

Even in the dressier types of tailor-made there is a struggle between the very fussy styles that suggest feminine frivolities and the plain and severe style, that strongly hints at the mannish ideas that are the foundation of the plain and severe type of tailored costumes.

One of the best applications of the military mode is seen to advantage in a design by Perdoux, of Paris, one of those French tailors who are capable of the cleverest sort of compromises in conflicting modes. The coat is in a deep shade of sapphire-blue broadcloth—the satin-faced kind—while the skirt shows the same shade, plaided with green, brown and a black satin overstripe. The coat follows the form known as "Continental military." The collar is of the stock variety, close and tight around the throat, the vest of braided white broadcloth being built up to meet and to match this collar. The fronts are rolled back, the better to display the fancy waistcoat. A broad silk braid trims the coat, and the buttons are embroidered with an Empire laurel wreath, to add to their beauty. The skirt is rather a novel cut, the front and back showing a bias seam at the center and unbroken from belt to hem. The sides are circular in cut, the fulness increased by the addition of a circular flounce, applied with a piping of black satin. The sleeve accords with the severe military style, being of an easy fulness at the top and finished with a braid and velvet trimmed cuff at the wrist.

Evolution of the Pony Jacket.

That fetching little pony jacket which, in its original presentations, was intended solely for luformal costumes, has reached such a pinnacle of favor that one sees it in all classes of material and elaborated to a degree that the original designer scarce even dreamed of. Perhaps its most effective appearance is in the guise of a tailormade, the skirt sharing largely in the extent of elaboration that is lavished upon the coat. Several fetching little hints are expressed in the one that forms the subject of illustration. The material is one of those indeterminate cloth mixtures that presents lines of brown, green and a deep moleskin gray, the latter color predominating. The little pony jacket is so cleverly cut that, while as loose as well may be, the fetching lines of the waist are clearly defined. This is managed in a series of panels of irregular outlines that meet, with self-covered buttons at the waist, and so emphasize that line. The sleeve is a loose top, tapering prettily below the elbow into a full-length cuff at the wrist. The skirt is likewise paneled, and each alternate panel is strapped in either perpendicular or horizontal lines, so that there is no effect of monotony in the design. The correct length for the coming season's skirts is displayed, and the necessity for the old-time velveteen binding as a finish is once more present.

HOW PAPER IS MANUFACTURED FROM PULPWOOD

Supply of Spruce Pulp is Rapidly Being Exhausted.

The paper you hold in your hand as you read this is made of wood. It is the product of a ground-up or macerated tree, and if you look very closely you can see the wood fibers, like small splinters, all through the paper, but more discernible in the margins where the printing does not cover the surface. And not only are all newspapers made of wood-pulp, but so are almost all other cheap papers. Book papers are generally made from wood; so are wall-papers, cheap writing papers, wrapping papers and a variety of others. But the main use of wood-pulp paper is for printing. A clever statistician has calculated how many acres of forest go into a "best-seller," by Winston Churchill, and the resultant figures are appalling, especially when one realizes that the wood used is practically all of one kind, spruce, found chiefly in the Northeastern United States and in Canada.

Paper always has been made from vegetable fiber. Material for receiving printed or written characters have not always been of paper; the Assyrians used clay tablets, mediaeval Europe used parchment made from sheepskin. But paper, by its very derivation from the Egyptian "papyrus," the plant from which the oldest known paper was made, is of vegetable origin, and is now made principally rages, wood straw and like substances, the rags themselves being generally of cotton or flax.

The demand for paper has made the

PULP LOGS ON SKIDWAY.

PENNSYLVANIA PULP MILL AND ITS SUPPLY.

A FEW PULP LOGS—NOTE SIZE OF MEN.

supply problem one that has grown, and is growing rapidly. Taste has never been an era like the present for cheap printed matter. This is the day of the newspaper; the newspaper uses wood-pulp paper. The drain upon the spruce forests is so great that there has been a constant search for paper material. Egypt has an ideal plant for its own uses in the papyrus. Its paper was not made by reducing the plant to a mass, and then spreading it out into sheets by pressure. The stem was split, the outer layers were peeled off and their edges glued together to form long sheets. The papyrus stems also furnished material for sails, mats, cloth and cords; the pith was used for food; sandals were made of a material provided by papyrus, and the seams of ships were calked with a tow made from it.

As the word "paper" comes from the name of a paper-making plant, so the word "library" has a similar derivation from the bark (liber) of trees, because books were once made on sheets of bark, just as our American Indians have put records on the paper-thin bark of the birch. "Book" comes from Anglo-Saxon "boc," or beech, since early Teutonic tribes used the bark of that tree for writing material.

The Eastern nations have used paper for a long time, the Chinese and Japanese have made paper from cotton, from straw and wood fibers, including bamboo and many grasses; the Polynesian islands make use of tapa cloth and paper, made from the paper mulberry.

When the Arabs captured the wonderful city of Samarkand, 704 A. D., they found a people skilled in the manufacture of paper from cotton, and they in turn disseminated the art throughout their empire. Their product became known as "charta," which has given name to "card" and to "charter." The making of paper from cotton was common throughout Europe; later linen rags and flax were used. Still the demand grew, and it became necessary to search new fields and new materials. Esparto, a Spanish grass, was finally decided on as the proper material, and for many years it was used, and still is used. About 200,000 tons are annually imported into Great Britain for paper-making purposes, though there is no present tendency to increase the importation. Palm leaves, cane, hop-stalks, nettles, thistles, ramie, peat and a great many other things have been tried, with indifferent success. Bamboo fiber has been used, but paper made from it is not good for printing, because of hard particles that quickly destroy type.

In 1845 the first important steps were taken in the manufacture of paper from wood. In that year Keller of Saxony took out a patent for making paper from pulp-wood. His success led others to investigate, until two methods of obtaining paper-making material from wood were devised, the mechanical and the chemical processes.

Both are used in the United States. The mechanical process is a simple one, and consists merely of grinding the wood with water until it is reduced to a pulpy mass. The pulp mills are situated near to the place where the wood grows, and generally on a good water-power site. The product of the mechanical pulp mills is not held to be as high grade as the chemical pulp, which is produced by a quite different process, giving a longer and tougher fiber. For most cheap papers, the mechanical pulp is used as a basis, with about one-third of chemical pulp added to give strength and toughness.

The chemical processes are two. One of them uses caustic soda and the other sulphurous acid, to separate the useless matter from the fiber. The caustic soda process, which gives its name to soda pulp, is used mainly for poplar.

The plant of a typical sulphite pulp mill, situated near its source of supply, consists of a saw for cutting the logs into a size easily handled, a wood-preparing, or rossing, room, in which the bark is stripped off, and a chipper to reduce the wood to small pieces for the acid in the digester. The digester plant has a tower in which sulphur is burned at the base, and the fumes pass up through cooling pipes, to meet water which percolates through limestone from the top. This forms sulphurous acid, which is drawn off into the digester filled with chips. Steam is turned on under pressure, and the whole mass is cooked until sufficiently digested, when the cooked pulp is blown out and washed with water. Other processes follow, in which the fiber is formed into sheets, and is squeezed through power presses to remove the water. The pulp may be then shipped to the paper mill, where it is bleached and otherwise prepared for special use, or to factories, which make use of the material in the manufacture of pails, dishes, boxes, picture frames, mattings, car wheels, steam and water pipes, telegraph poles, electric conduits, insulators, coffins, shoe heels, horse shoes, spools, tool handles, buttons, pulleys, paving blocks, surgeons' splints, astronomical observatory domes and hundreds of other things.

Four hundred or more raw materials are used in the manufacture of paper pulp, but wood furnishes by far the greater quantity. Many American woods have been tried, including spruce, popular, basswood, balsam, pine, beech, willow, cedar, hemlock, maple, birch and aspen. Of these spruce is most used. Balsam is also good. Both are valuable for their special quality of fiber and for their lack of color, being nearly white and therefore not difficult or expensive to bleach.

To arrive at definite conclusions as to the various pulpwoods and how to treat them, the Forest Service has established, at 696 East First street, Boston, Mass., a laboratory for the purpose of making investigations and experiments in the manufacture of sulphite wood-pulp.

Even with the seemingly exhaustless spruce forests of Canada in addition to those of the United States, it does not need an expert statistician to foresee the day, not far in the future, when the spruce pulp supply will be exhausted, or at least so depleted that the cost of wood will be prohibitive. Therefore a principal object of the Forest Service laboratory is to experiment on the pulp making possibilities of other woods, with reference to obtaining: First, a pulp that will approximate spruce pulp to supplement it; second, other fibers that may have qualities peculiarly adapted to special kinds of paper making, third, a pulp of marketable value as a by-product from the waste material of lumbering and milling operations.

So far there seems to be more possibilities in balsam, to supplement spruce, than in any other wood. Yet the most interesting possibilities of the Forest Service investigations lie in the line of discovering other fibers that may have properties peculiarly adapted to special kinds of paper making. Here the realm of conjecture is as bewildering as it is broad, for few countries can present a greater variety of woods to work with than can be found in the United States and its possessions. Special woods may be discovered which will supply the basis for special papers, until there may indeed be brought about a "Paper Age," as a German scientist has predicted, wherein all vegetable fibers will find place in making boards, bricks, moldings, and nearly all structural materials. Here, too, there is opportunity for utilizing wood waste, sawdust, slabs, and edgings—all to be made into pulp, and thence into finished paper products.

The Forest Service experiment station is conducted in connection with a model plant fully equipped. The samples of wood used will be collected by members of the Forest Service in order that there may be no question as to their identification, and then treated in every way as if in a regular pulp mill. Sulphite pulp will thus be made from a great variety of American woods. The fibers will be studied microscopically, and good-sized mi- of the pulp will be distributed among paper manufacturers, so they may judge of their usefulness for general or specific purposes.

More than 1,500,000 cords of wood are used annually in the production of sulphite pulp, and of this nearly four-fifths is spruce. With such an enormous demand there is a rapid diminution of the supply of standing spruce and a consequent marked increase in its cost. Moreover, since small sizes are not only available for pulp, but even preferable, it follows that the lumberman, in cutting for pulp, is likely to work on the theory that "all is fish which comes to his net." Notwithstanding this, the principles of forestry are being applied by many lumbermen to cutting pulpwood and provision is being made for the future. This is quite practicable, since spruce is a fairly rapid grower and in comparatively few years attains marketable pulpwood size. Yet under the most favorable conditions spruce will have to be supplemented by some other material, because the use of paper, especially for cheap printing stock, is increasing out of all proportion to the supply of raw material now in sight.

This is only one of the many ways in which the Forest Service is helping toward a proper utilization of the forest products of the country. Pulpwood is recognized as a valuable forest crop

—Reproduced by permission of Forest Service, U. S., Department of Agriculture.
SPRUCE IN MAINE TO BE CUT FOR PULPWOOD.

What the Forest Service is Doing to Supplement Spruce.

to be gathered in quantity and from the greatest number of sources. Care should be taken: to secure future crops by cuttings that will not destroy the growth counted on for a later supply; to so economically handle the product that waste will be minimized both in the lumbering and milling; and to give adequate protection from forest fires.

Yet, in spite of the present effort to find a paper pulp substitute, for several years to come, when you pick up your newspaper you will be holding a pliable sheet of wood or wood fiber.

AURORA

(Continued from page 15, 2nd sec.)

grocery store into the Anderson building, the Virginia Brewing company having purchased the building now occupied by them with the intention of opening a saloon therein.

Mrs. W. H. Guinn returned home Tuesday from a visit with her parents in Kansas. She says the corn and fruit crops were never better.

While on a pay day jamboree last Saturday evening, an aged Finlander named Maki was relieved of two checks drawn in his favor by the Oliver Iron Mining company, one for $50 and the other for $58. Ed and Matt Sarkala, brothers, one of whom was in the employ of G. J. Rop and the other of the R. J. McGhee company, were arrested Monday charged with the theft and forgery of Maki's name. They cashed the checks in local saloons and had blown in the proceeds in riotous living. They had a hearing before Justice Roop. Ed Sarkala waived examination and was bound over to the grand jury. As there was no evidence to connect Matt with either the theft or forgery, he was liberated. Assistant County Attorney Peirier of Virginia conducted the examination.

Mrs. A. Abramson received a visit this week from her sister, Mrs. A. Kenner of Duluth.

H. J. Nathanson of Virginia was here Wednesday looking after his property interests.

Mesdames S. Milavitz and Ben Lippman of Virginia visited Mrs. A. Abramson on Monday.

Mr. and Mrs. B. Christianson drove the teachers over to Biwabik Sunday to view the different mining properties.

D. Weiner was over to Eveleth Wednesday.

Frank Kovach was in Biwabik on business Wednesdy

Chas. R. Hill made a business trip to Duluth Wednesday

John West, Jr., and F. V. Anderson drove over to Biwabik Sunday.

Mrs. B Christianson went to Eveleth Wednesday to visit Mrs. Saari.

The citizens of Aurora are anxiously awaiting the time when Corrigan, McKinney & Co. will begin development of the Longyear mining property located between the village and the Meadow. About three weeks ago a crew of engineers were there for the purpose of locating a site for a shaft and buildings. They completed their work and left. Since then nothing has been heard concerning the matter. It is probable that the work of sinking a shaft will not be started until the ground freezes up as the land is swampy and the work can be prosecuted much more economically in winter. Those who know something about the explorations on this property claim that it will be one of the largest mines on the range. It is stated that in one hole the drill cut 617 feet of ore before the bottom was reached. Its development will mean a great deal to the business interests of Aurora. The ore being covered with a heavy overburden of earth, it will be necessary to do all the mining underground and this will mean the employment of hundreds of miners.

Biwabik

Biwabik, Sept. 29.—(Special to The Herald)—Supt. and Mrs. J. S. Lutes, accompanied by Miss Clara Olstad and Mr. and Mrs. J. D. Lamont of Virginia, made a trip to Vermilion range last Sunday in the private car of Superintendent Thos. Owens of the Duluth & Iron Range road. They went up to look over the Pine Island property recently leased under option to the Biwabik Mining company.

S. E. Moren returned Wednesday from Duluth, where he was serving on the petit jury.

Miss Lilly Eyer is expected home today from a protracted visit in the twin cities and Carlton county.

Dr. Bray expects to move into his new hospital building within the week. Hugh Glass has purchased the property in which the hospital has been located since the fire and will make extensive improvements thereto.

Fred Hasslof, aged 22, who died of pneumonia, was buried Saturday in the Biwabik cemetery.

Mr. and Mrs. Sam Files have arrived from Duluth to re-open their logging camp in the vicinity of Squagama lake.

The council chamber in the village hall has been fitted up as a recitation room by the school board and Miss Augusta Ferran of Anoka installed as teacher.

The district court at Duluth has granted a divorce to C. M. McKenzie, superintendent of the Williams mine, from his wife, Florence, on the ground of desertion. Mrs. McKenzie first filed a suit in Chicago but Mr. McKenzie filed a cross bill and the suit was transferred to Duluth. Mrs. McKenzie is a daughter of Louis G. Jenks, superintendent of the Franklin group of mines at Virginia.

A row among drunken Italians in an Austrian saloon, during which knives and clubs were used, resulted in the arrest of Dominic Ferro on a charge of assault in the first degree preferred by Nick Crefero. The charge was changed to simple assault and Ferro was fined $50 and costs by Justice Salmon.

Miss Hannah Neilmark and August Takkunen were united in marriage last Saturday evening at the Finnish Temperance hall, Rev. A. Anals performing the rite. Afterward a reception and dance was given.

As soon as the material arives work will be commenced on the new Odd Fellows hall, and it is exepected to have it completed by January 1. It will be michael has the contract. It will be located on Canton avenue opposite the new hospital. The building will be 40 x60 and two stories high. The lower floor will be used as an opera house and dance hall while the upper story will be fitted up for a lodge room.

Sidney Cameron is ill with rheumatism.

Mr. and Mrs. Ed. Krompasky of McKinley visited relatives here yesterday.

Mrs. Fred Lerch entertained the Ladies' Card club Wednesday afternoon. Mrs. Myers won the first favor and Miss Maybell Carmichael the guest's prize.

Mrs. Frank Dane visited in Eveleth Monday.

J. E. Riley and F. B. Myers went to St. Paul this week on school board business.

The Aid society will meet with Mrs. Ames next Wednesday.

Mrs. W. L. Robbins, one of the pioneer residents of Biwabik, visited here this week. Her home is at Osseo, Minn. Her daughter is married and resides at Osseo. Mr. Robbins is in California for the benefit of his health.

M. Rabinowitz went to Aurora to visit friends today.

Frank Faber, Jr., who recently returned from St. John's university because he was homesick, will probably return to that institution next week.

Oscar Moberg attended the Druids lodge in Virginia Wednesday.

Malcum Anderson went to Duluth on business Wednesday.

N. B. Shank received a telegram Wednesday morning announcing the death of his father at his home in Michigan and left immediately to attend the funeral.

Joseph Papic made a visit to Aurora Sunday.

F. S. Colvin went to Duluth on business Thursday.

The game of baseball played here last Sunday for $100 a side between the Eveleth and Biwabik mines was won by the Evelethis with a score of 5 to 1. It was a good, clean, fast game and attended by about 600 spectators. The Eveleth crowd was treated so well here that some of them were ashamed of the treatment that had been accorded the Biwabik boys in a previous game at Eveleth and are anxious to have the Biwabiks go to Eveleth to play another game in order that amends may be made.

Tower

Tower, Sept. 29.—(Special to The Herald.)—Charles Schaeffer of Duluth spent Sunday with his family here.

John Fuller of Holmes spent a few days the first of the week in this city.

The Tower high school will have a strong football team this fall. The squad has been out practicing the last three weeks on the campus just west of the school. Among those who have been out are Don Brunt, captain; Ed Fay, center; Don Bruno, right halfback; Roy Jeffery, right guard; William Campaigne, fullback Walter Elkrem, substitute and tackle; Bery; McLaughlin, left guard; Fred Bystrom, left end; William Johnson, tackle and substitute quarter; Albin Fogelberg, right end, and Clark Clendenning, substitute. E. A. Mooney and Hugh McLaughlin are coaching the team. The team is a little light, averaging between 125 and 130 pounds per man, but the new rules are believed to favor this kind of a team. A game was played at the Indian reservation school Saturday, resulting in a score of 25 to 5 for the high school.

Two basket ball teams have been organized at the high school with Delia Murphy captain of one and Winnifred Pfeifer, captain of the other. A new outfit has been ordered and as soon as it arrives games will be played regularly every evening.

Dave Morganson returned to his home in Superior Monday morning, after a short visit with his brother, J. Morganson, at this place.

A son was born to Mr. and Mrs. Joseph Paridee Friday morning.

William Coss, who for the past month ans been looking after mining interests in Goldfield, Colo., returned home Sunday.

J. D. Murphy transacted business in Ely between trains Monday.

Mrs. M. Campaigne and daughter, Miss Winnifred, were in Duluth between trains Monday.

J. H. Hickey, Jr., spent a few days the first of the week in Duluth.

Mrs. R. Lawrence, Mrs. W. H. Congdon, Jr., and Mrs. J. Fogelberg returned home Tuesday, after a short visit with friends in Nashwauk.

Mrs. Cyr and grandson, Oscar, arrived in the city Thursday tor an extended visit at the home of O. Cyr.

Gene Cyr returned home Thursday, after a short visit in Duluth.

Dan Kennedy, a former resident of this place, arrived in the city Wednesday from Birmingham, Ala., and expects to remain here in the future.

S. Bennett of Duluth has accepted a position as cigar maker in J. H. Hickey, Jr's., cigar shop for a few weeks, as Mr. Hickey expects to leave next week for a vacation.

Miss Mabel Murray, who for the past month has been visiting with her sister, Mrs. Charles Anderson of Duluth, arrived home Wednesday evening.

Gunder Peterson of Virginia visited his family over Wednesday.

A delightful surprise was given the many friends of Miss Julia Johnson Saturday, when the announcement of her marriage to Carl Fossum of Duluth was made. The ceremony took place Friday at the groom's home. Both are well known, the bride having resided here since childhood. Mr. Fossum was formerly a druggist at N. J. Benson's drug store.

Miss Edna Keith returned home Wednesday, after a month's visit with friends in Duluth.

Frank Heikela transacted business in Mesaba the first of the week.

MRS. J. R. JAMES.

To Succeed Her Late Husband as Postmaster of Virginia.

Vrginia, Minn., Sept. 29.—(Special to The Herald.)—Mrs. John R. James will in all probability be Virginia's next postmistress. While the official announcement of her appointment has not as yet been made, it will be within a few days. Congressman J. Adam Bede was seen by a prominent Virginia business man in Duluth this week, and he made the statement that he intended appointing Mrs. James. The appointment of Mrs James to succeed her husband, the late Col. John R. James, will afford much pleasure to the citizens of Virginia, as they recognize in her a lady competent in every way to give an efficient administration.

Clerk of Court J. P. Johnson, on Tuesday, tendered the office of deputy clerk, formerly held by Col. James, to D. E. Cuppernull of the Virginian. The tender was accepted.

"BLACK HAND" OUTRAGE.

New York, Sept. 29.—A bomb was thrown last night, presumably from a tenement house at First avenue and Sixty-third street, upon the skylight over the living room in the small grocery store of Salvatore Campisi, adjoining the tenement, while Campisi, his brother, his wife and two children were seated under the skylight at dinner. The bomb exploded tearing the inside of the living room to pieces, burying the Campisis under the wreckage and shaking the tenement house so that the terrified inmates rushed into the street.

The grocer's family were extricated from the debris dazed, but not seriously hurt.

Campisi showed the police three "Black Hand" letters he had received and it is supposed that organization was responsible for the outrage.

MANICURING A FEATURE

Will be Essential to Football Under the New Rules.

Coaches Are Getting Anxious to Try the Men Out.

Boston, Mass., Sept. 29.—An unusual amount of interest is being displayed by coaches to learn what styles of game other coaches are thinking of employing under the new rules. It is safe to say that because of the radical changes there will be more new plays and formations sprung this fall than in the entire previous history of the game. The new rules will make it absolutely necessary for the coaches to use their inventive ability, and a good many of them have been laboring over new plays for a good part of their summer vacations. Naturally a good many of the new plays will have to be discarded as useless, for their availability cannot be properly tested except in a real game.

The Yale coaches seem to have taken the most advanced steps in solving the new plays which can and should be used this fall. The Elis held an unusually long and thorough practice last spring and the players mastered a good many points about the new style of football. The presence of Walter Camp, the editor of the new rules, enabled the Yale men to understand a good many points in advance of the other teams. Just what the Elis propose to spring this fall no one knows to a certainty. But information has leaked out of one peculiar formation there were ten men on the line of scrimmage, the only one behind it being the quarter back. It can be seen at a glance that this play is intended as a trick and is capable of more variations than the famous wing shift used to such good advantage by the Carlisle Indians. The play is capable of a great many tricks, criss-crosses and cross bucks. It should be noted, however, that this formation was just as feasible under the old rules as under the new. Under the old rules coaches apparently did not think it necessary to use their ingenuity. Now they are applying all their ability to the new rules and as a result there ought to be much real progress made in the matter of new and original plays.

What is to be one of the features of football under the new rules is the great emphasis which coaches everywhere have decided to place on kicking. A long and consistent punter promises to be about the most valuable man on the team, and a man who can outkick all his rivals is virtually sure of his place on the team, even if he is inferior in other respects. To make certain that this sort of game would be properly developed, the leading institutions last spring held special punting contests for their players, and many of the men were instructed to take footballs home with them on their summer vacations and there to practice punting and drop kicking.

The real reason for emphasizing the kicking game is not that good kicking is to be rewarded any more than it ever was. It is merely because the new rule requiring the ball to be advanced ten yards in three down will so frequently put a team in such a plight that it will be required to kick much oftener, and long punting will mean more than it ever did. And under such circumstances it is to be regretted that there are few first-class punters in any of the Eastern colleges. In fact, the East has not been able to boast of any good kicker since the day of John Dewitt, the old Princeton captain.

But the poor supply of kickers is not due to the fact that good kickers could not be developed. It is rather due to lack of attention paid to this department of the game. Now that there is a premium placed on good kicking we may expect to see a host of good kickers turned out in all the Eastern colleges. Furthermore, the rise in the standard of punting will be followed by a similar rise in the standard of drop kicking. Both of these changes will be most welcome to a follower of the game.

Manicures will be as essential to the new football as bone setters were to the old, for no match may now be entered into by any youth who has projecting finger nails. If it should happen that he findshimself on the gridiron without having complied with this provision he has just two minutes in which to avail himself of the services of a manicure.

Some of the candidates for gridiron honors this fall say they could not possibly submit to being forced to sit at a little table on the side lines with one hand in rose water and the other under an orange wood stick.

It will be maddening, they aver, when the scrimmage is at its height to have to say something polite to a fair young thing with yellow hair, who will inquire, "Pleasant day, isn't it? I have just an awful cold, haven't I? Do I hurt you? Where do you usually get your manicuring done? What do you think of George Cohan? Lovely weather, isn't it? Are you in a hurry?

It stands none the less written. No, 1, section E, is as follows:

"No player having projecting nails on his person will be permitted to play in a match. Penalty, suspension unless the fault is corrected in two minutes."

No football player who is particular about how his finger nails look could have them properly manicured in two minutes, it is feared, but the length of the appendages is left to the discretion of the umpire.

Several of the youths are deeply concerned, for the prevailing style of football player is likely to insist upon having his nails long and tapering.

When men are left unconscious on the field, waiting identification it sounds better in the newspaper dispatches to say, "Their hands were carefully manicured and showed them to be persons of culture and refinement and evidently quite unaccustomed to manual labor."

SEALED PROPOSALS

For the construction of waterworks for the village of Bovey, Minn., will be received by the village recorder until 7:30 p. m., Oct. 1, 1906. Plans and specifications may be seen at the office of the village recorder, Bovey, Minn., and at the office of the Duluth Engineering company, 613 Palladio building, Duluth, Minn.

FRANK PROVINSKI,
Village President.

AT THE LYCEUM

Robert Loraine in "Man and Superman," Monday; "The College Widow," Tuesday and Wednesday, and "In The Bishop's Carriage," Friday and Saturday.

Patrons of the Lyceum theater are to have the opportunity for the first time of seeing for themselves and passing judgment thereon of Bernard Shaw's laaest play "Man and Superman," which has brought forth so much discussion since it was brought out in New York the first of last season at the Hudson Theater where it remained on view continuously for more than six months. At the Lyceum Monday evening, Charles Dillingham will present Robert Loraine in this highly praised comedy. Mr. Loraine, has, at one leap, as it were, bounded to the rank of stelar dignitaries in the stage world. He has acquitted himself with marked distinction and is recognized throughout the United States as the most prominent as well as the most promising, of the younger gentlemen who have risen to position in dramtic affairs. Mr. Loraine wil be assisted in Duluth in the presentation of "Man and Superman" by the following well known players: Miss Sarah Truax, Miss Nellie Thorne, Miss Sallie Williams Miss Winnifred Harris, Miss Lois Frances Clark, Louis Massen, Alfred Hickman, Frank Craven, Donald McLean, and J. D. Beveridge.

Plays written by Bernard Shaw always attract attention. There are many reasons for this. In the first place, Mr. Shaw is one the most brilliant, forceful and entertaining writers of the present period. That he is a genius there is no doubt. That he is original everybody admits. His plays are unlike those of any other author. Mr. Shaw stands quite to himself in the world of literature. In "Man and Superman" it seems to be the consensus of opinion that Mr. Shaw has written the most orginal comedy that he nas ever constructed. "Man and Superman" in the Shaw style of dramatic architecture has reversed conditions, in a matrimonial seeking sense. For ages it has been the convention that men sought women in marriage. Mr. Shaw thinks otherwise, particularly as it is set down in "Man and Superman." He starts his comedy in England and ends it after an automobile tour across the channel through the continent down to Spain, where the heroine overtakes the hero, she pursuing him all the while, and in the wind-up they become husband and wife. Mr. Shaw has so created his hero, that he is made the victim, so to speak, of a lady who has made up her mind that he is the man she is going to marry. The hero has no such thoughts. He resorts to every possible subterfuge to escape her, but without avail.

The brilliancy of the author is set forth in the unusual witticisms of the dialogue. In this respect "Man and Superman" is reputed to fairly sparkle with hundreds of as bright sayings as ever emanated from any author. Those who are familiar with Mr. Shaw's books are well informed as to the brilliancy of his mind.

Mr. Loraine in presenting "Man and Superman" in Duluth will employ the entire New York production of scenic equipment, identical as it was used in New York.

"THE COLLEGE WIDOW."

Henry W. Savage's Company In George Ade's Sparkling Comedy.

There was a reciprocal feeling between Henry W. Savage and the Western states, unmistakably manifest as the seasons come and go. Ever since Mr. Savage became a potent factor in the stage world, he has been sending to the West his best, and the West has shown its appreciation by according the Savage attractions more liberal patronage than those of any other producer. Consequently, there are bonds of cordiality between our people and Mr. Savage that time only solidifies and strengthens.

The climax of Mr. Savage's Western success was reached last season in the tour coastward and return of "The College Widow," which was generally conceded the palm as the jolliest, the most exhilarating and wholesome evening's amusement which the year afforded. Inherently delightful, this comedy de luxe of George Ade's was given all the accentuation that proper presentation can afford. Now the second tour brings this play to Duluth for three performances on Tuesday and Wednesday, and as Mr. Savage's promises have been made thoroughly good in the past, it is safe to count upon a production that will slight nothing which the judgment of the critical might covet.

"The College Widow," as its title suggests, is founded upon life in a small college town, with students and village types interminglied in charmingly humorous transcripts from familiar campus scenes and incidents. It is primarily a satire, but is also an excellently constructed play, telling its simple story without verbiage or immateriality. From its opening speech, there is scarcely a line that is not relevant to the theme upon which Mr. Ade has built. The dialogue teems with smart repartee, rude but good natural philosophy and straight from the shoulder Americanisms. It is a thing of joy to the college man, yet appeals to the risibilities of all.

The company which Mr. Savage sends this season includes Louise Rutter, Estella Dale, Bessie Toner, Patty Allison, Frances Chase, Rosalind Allin, Elizabeth Van Sell, Helen Torrey, Robert Kelly, J. Beresford Hollis, Otis Turner, Alan Brooks, Frank Wunderlee, Wilson Deal, George S. Trimble, George C. Odell, John Fenton, Allen Bennett ,and Ernest Anderson.

'IN THE BISHOP'S CARRIAGE'

Delightful Play With Fine Cast Coming to Lyceum Next Week.

Miss Miriam Michelson in her novel, "In the Bishop's Carriage," in which Jessie Busley will be seen at the Lyceum next Friday and Saturday evening and Saturday afternoon, has given an autobiographical account of certain adventures in the life of Nance Olden, a London girl thief, of the Leah Kleschna type, but young, fascinating and with a good heart in her breast when once its chords have been touched, and in the right way. The story is not adapted for a drama. The result has been that Mr. Pollock, in making his dramatization, has been compelled to write nearly an entirely new story, introducing in it the characters of the novel and several of the episodes.

Nance is the heroine of the play, as she is of the novel, and her character is practically the same in both works. The play opens just after she has robbed Edward Ramsay, the tipsy Wall street broker, at the Grand Central station, and has made good her escape in Bishop Van Wegenen's carriage. The good bishop, in his solicitude for the girl, whose brain he believes to be affected, and who has won his kindly old heart by pretending to mistake him for her father, takes her to the Pelham home of his friend, Mrs. Ramsay.

Nance goes willingly enough, little suspecting that she is being taken directly to the house of the man she has just robbed, or that she will find there her friend, Tom Dorgan, playing the role of a waiter, and keeping his eyes and pockets open for any little stray articles of value that may be left lying about.

The only one of the party at the Ramsays' who sees through Nance's and Tom's little game is Mr. Latimer, an up-to-date man of the world with plenty of money and too much leisure, which he devotes chiefly to the study of criminology. Interested as he is in this subject, he is peculiarly attracted by Nance. He compels Nance and Dorgan to disgorge their thefts, and thereby gains the hatred of the man, but he also permits them to depart unmolested, and thereby gains the gratitude of the girl.

Miss Jessie Busley appears in the leading part, and is said to give a remarkably fine impersonation. Among the members of the cast are: Byron Douglas, James Kearne, Samuel Reed, Frank C. Bangs, Kate Jepson, Rose Eytinge and Lavinia Shannon.

"THE LION AND THE MOUSE."

Charles Klein's play of American politics and business, "The Lion and the Mouse" will be the attraction at the Lyceum, Oct. 9 and 10. The play will be produced under the direction of Henry B. Harris, who has gathered together an exceptionally fine cast for the interpretation of the Klein piece. The success of "The Lion and the Mouse" is well-known to everyone throughout the country and is a proof that the money devil who outside of his own hemisphere has hitherto chiefly occupied the lecture platform, the pulpit and the press, has at last found his place upon the stage. The "lion" in Mr. Klein's play is a billionaire treading all things under his golden heel. The "mouse" is a clever girl who outwits and defeats him. The play abounds in human feeling, in vital interest drawn from real and current life, painted in local color.

SHEPARD'S MOVING PICTURES.

A bill of unusual excellence will be offered Sunday at the Lyceum by this high class form of entertainment. A variety of fine subjects embracing the best of comedy, scenes of travel, and the most powerful in drama, will be shown.

The comedy list includes "The Strenuous Life," "Boys Will Be Boys," "Chased by a Dog," "Casey's Nightmare," and "How the Office Boy Saw the Ball Game." One of the feature surprises of more than ordinary merit is "The Voyage to the Arctic," a beautifully colored film, giving in complete detail the most hazardous and beautiful trip through the "Land of the Midnight Sun." Another interesting picture will be "Scenes From Corsican Life," a subject both entertaining as well as instructive.

MISS JESSIE BUSLEY.
Charming Actress Who Plays Nance Olden in "In the Bishop's Carriage"—Coming to Lyceum Next Week.

THE LYCEUM BOOKINGS.

Some of the Fine Things Theatergoers Will Soon See.

"The Umpire," is the first real musical comedy which will appear at the Lyceum this year, the date being Oct. 8. It had the longest run of any musical play in the history of Chicago. The piece was purchased by Harry Askin, a splendid cast and production given to it and it is now touring in the high class houses with tremendous success. For the past few years, excepting this year, the Lyceum opening attractions have been chiefly of the musical order, but after a run of so many dramatic attractions, a first-class musical comedy like "The Umpire," will no doubt be well received.

"The Lion and the Mouse" is coming to the Lyceum, Oct. 9 and 10, with a splendid cast. This company is playing the leading theaters of the country.

Blaney's "Young Buffalo," a popular priced sensational play with a Wild West flavor, is coming to the Lyceum, Oct. 12 and 13.

Maude Fealey, who has never played Duluth since she has become a star, will present her new play, "The Illusion of Beatrice," at the Duluth Lyceum, Oct. 16 and 17.

Klaw & Erlanger's big company in the new John Philip Sousa opera "Free Lance," is the Lyceum attraction for Oct. 19 and 20.

James O'Neill in "The Count of Monte Cristo," will return to Duluth for one night at the Lyceum theater, Oct. 18.

Florence Gale and Harry Beresford, two growing stars, will present their newest plays at the Lyceum the last of October.

Robert Edeson in "Strongheart," is the Lyceum bill for Oct. 30 and 31.

The seat sale for Leoncavallo has been quite large at the Lyceum. The attraction does not come to Duluth until Nov. 8, but owing to the large number of requests from out of town, seats have already been placed on sale at the Lyceum box office, so that patrons may make their arrangements well in advance for this big musical event.

Florence Roberts in "The Strength of the Weak," a star and play that were received so favorably in New York last spring, will fill two days of the Lyceum time, Nov 2 and 3.

The management of the Lyceum is distributing to those of their patrons who desire it, a diagram showing the seating arrangement and exits on each floor of the theater.

THE METROPOLITAN

Dreamland Burlesquers Presenting Two-Act, Music Play, "Roseland," and Vaudeville Specialties --- Will Play Next Week.

The Dreamland Burlesquers, headed by Dave Marion, will be the attraction at the Metropolitan all next week, beginning with a matinee tomorrow afternoon. This company is said to be one of the largest in the "Western Wheel," and presents as its principal offering an elaborately staged music play in two acts, called "Roseland."

Dave Marion, the principal comedian of the company, wrote the book, lyrics and music of "Roseland," and it is said to be the best thing he ever did. He is known from one country to another for his songs and has long been a favorite on the vaudeville stage of this country and England.

Considerable money has been expended on costumes and scenic effects and they are said to greatly enhance the value of the performance. Besides Mr. Marion, the company contains many well known names. Among them is that of Agnes Behler, one of the prettiest women on the burlesque stage and also the possessor of a pleasing voice.

Others who appear are Harry Foxm, George S. Betts, Lou Shien, Fred J. Barnes, George Dorsey, Harry Watgen, Adelaide L. Fell, the Meluotte Sisters, Nance Reynolds and a chorus of twenty female voices.

The song hits written by Dave Marion for this production include "Everything Bristles on Broadway," "The Broadway Police," "Jew and Gentile," "Joseph Jacob Cohen," "I Want to Be in Grand Opera," "Hannah," "Good Old Uncle Sam," "Roseland," "Good Bye, Broadway," and "Smile Again."

There will be plenty of specialties.

Matinees will be given tomorrow, Tuesday, Thursday (ladies' day), and Saturday.

"GOOD-BYE, FATHER."
Scene from "The College Widow." Characters—Estella Dale, Louise Rutter, Robert Kelly, Alan Bennett, Donald Black. Coming to Lyceum Next Week.

AT THE BIJOU

Moving Pictures Next Will Show in Graphic Form Scenes at Coronation of King Haaker in Norway---Vaudeville Bill.

The moving pictures at the Bijou next week will show the coronation of King Haakon of Norway. There are several different scenes and besides their majesties of Norway, there are shown the Prince of Wales, Prince Henry of Germany and many other notable people who were guests during the coronation services. There will also be seen the new comedy film, entiled "The Serenade." It is a new series of chase pictures.

The vaudeville attractions for the week are likely to surpass anything seen for some time as many well known acts will be seen.

Heading the list are Joe Whitehead and the celebrated Grierson Sisters of musical comedy fame. Mr. Whitehead is said to have one of the best singing talking and dancing acts now in vaudeville.

Sanford and Darlington two well known stars will present a novelty entitled "Twenty Minutes in Vaudeville,' which is said to be fine. J. Gaffney

(Continued on next Page, first Column).

GOSSIP OF THE RIALTO

William H. Crane and Ellis Jeffreys to Star in "She Stoops to Conquer"---"Abyssinia" in the Hands of a Receiver.

New York, Sept. 29.—William H. Crane, having discovered that "hTe Price of Money" is too high for his dramatic use, and Ellis Jeffreys, the English actress, being handicapped by her vehicle, "The Dear Unfair Sex," have been formed into a combination by Managers Frohman and Tyler, and will become co-stars for the remainder of the season in a revival of "She Stoops to Conquer." Crane made a personal success years ago with his late partner, Stuart Robson, in the Goldsmith comedy, and Miss Jeffreys has frequently played Kate Hardcastle in London revivals of the play. They begin rehearsals immediately and will start their tour about the 15th of the month.

• • •

Williams and Walker and their Afro-American play, "Abyssinia," are now in the hands of a receiver. James D. Barton, who prints lithographic show bills, being named by the New York courts to look after their tangled affairs growing out of the row with Manager M. B. Raymond. The returns show that the production has been too costly to make ends meet in the theaters the negroes have played, and that only in New York city, where they played a week, did they make any money. Receiver Barton has authority to continue the business or wind it up, as he deems advisable.

• • •

Eugenia Blair has taken up the Clyde Fitch play, "The Woman in the Case," since Blanche Walsh laid it aside, and reports from the territory work she has been playing are to the effect that she has hit upon a winner.

• • •

Work on David Belasco's new theater, the Stuyvesant, in New York city, has progressed so satisfactorily that it is now assured that the theater will be ready for opened early in the fal lof 1907. It is said that the plans already submitted have shown that Belasco will bring to the building of this theater the same wonderful knowledge that has made him the master of stage craft in America, and that when completed it will be in every sense a model playhouse, combining comfort and artistic appreciation of what the public wants.

• • •

A new version of "In the Bishop's Carriage" has been made, and in it Jessie Busley as Nance Olden is meeting with decided success.

• • •

Joseph Murphy has partially shifted his mantle to an aspiring young Irishman named Allan Doone, and is starring the latter in the two old plays, "Kerry Gow" and "Shan Rhue," in which the veteran Mr. Murphy amassed a fortune that leaves him today generally regarded as the richest actor on the American stage.

• • •

Otis Skinner will continue this season in the celebrated French play, "The Duel," in which he and Fay Davis created a stir in New York last season. Mr. Skinner will have for his leading lady Miss Keith Wakemann, an American actress who has won her earliest triumphs in London and has just returned to this country. Manager Frohman has a new play for Mr. Skinner which he will bring out late in the present season after his tour in "The Duel" closes.

• • •

Sam Bernard began his season in Atlantic City last week in the new Smith Englander musical comedy, "The Rich Mr. Hoggenheimer." In this the star is seen again as "Piggy" Hoggenheimer, the character he played so successfully in "The Girl From Kay's." It shows Piggy 20 years older and interested in saving his son from making a bad match with a shop girl. Further than this the semblance to the former character is not carried, and the plot is worked out in a series of legitimately funny situations which, according to the Atlantic City verdict, are about the best things Bernard has done in years. The piece is said to be a decided success.

• • •

Ben Greet and company have postponed their departure for America in order to play a brief engagement in "A Midsummer Night's Dream" at the Crystal palace, London, with Ben Greet as Bottom. The company sails for New York Oct. 6, and will present "Everyman" throughout the South during the autumn months. The old morality play may also be seen again in New York before the end of the season.

Mr. Greet spent his vacation in a non-Elizabethan motor car, touring Germany, Switzerland and France, with Baireuth and Oberammergau as the chief stopping places.

• • •

Miss Rose Stahl contemplates playing "The Chorus Lady" in Paris next season, provided the French rights are not given to Mme. Rejane.

• • •

R. E. Johnston announces that Mme. Nordica will give a recital at Carnegie hall on Monday evening, Nov. 12, and that she has not given a recital in New York City in seven years. A brilliant program, selected from her immense repertoire, will be rendered.

• • •

Hall Caine's dramatization of his novel, "The Bondman," was produced in London the latter part of last week, and, according to the early cable dispatches from there, was favorably reviewed by the critics as a successful and high-class melodrama. Mrs. Patrick Campbell is playing the leading feminine role.

• • •

It is said that Mrs. Langtry, who is to play a seven weeks' engagement in Proctor & Keith's New York theater, is to draw $2,500 a week. She will make her first appearance about Oct. 1, having sailed from England last week.

• • •

Miss Marie Tempest and Miss Billee Bourke are to make their first appearance in vaudeville; in fact, Miss Tempest made the venture this week. She is drawing $1,500 a week, according to reports.

• • •

Lillian Russell has not made the surest of successes in her first effort as a comedienne. The chief trouble, according to the Chicago critics, seems to lie in the handicap Miss Russell has undertaken in the play, "Barbara's Millions." It is said to be an adaptation of a French play with all the Frenchiness taken out, and left a rather sorry affair on this account.

• • •

Oswald Stoll, the biggest vaudeville manager in England, is a visiteor to this country, and expects to look the field over for a few days before returning to London. Mr. Stoll is the directing head of the Moss Circuit of Music Halls in England, which covers about 35 of the principal houses of the country as well as including the Hippodrome and the Coliseum in London. He says he is here for the purpose of making an advantageous alliance with American vaudeville managers if he finds it will be to his interests. Mr. Stoll will also likely have a conference with the New York Hippodrome people, as it is known that a scheme is now on foot to bring the London, New York and the prospective house in Chicago into a closer alliance and minimize the cost of productions for the spectacles that are put into these houses.

• • •

The initial production of the new play, "The Measure of Man," in which Robert Drouet, E. M. Holland and Mary Hall ar featured, is to be seen at the Savoy Theater in Atlantic City next Thursday night. After a short trial there the play is to be presented in the Garrick theater, Philadelphia, for an engagement that will depend upon its ultimate success to name the length of the run. If successful as the rehearsals indicate, the play will be sent into New York and Philadelphia for a long stay there.

• • •

The South is now the scene of circus activity, and from this time forward the shows that step out later will be hovering as close to the territory around and below the mythical M. and D. line as they can crowd into. Incidentally, the South will have an opportunity of seeing a lot of good, bad and indifferent shows and to run into a belated consideration of what the country further north has been up against since early in the spring. It has been an off season for almost all of the circuses, and it is a question if the South can make up the losses that have been encountered elsewhere. Under the big tops a merry war has been started in Texas. The Hagenbeck show, which has been booked independent this season of the controlling circus interests, is rammed in between the powerful Ringling show, the Forepaugh-Sells and a lot of smaller affairs, and as has been the case from the outset, it has not been a primrose path for this new circus enterprise. The management says, however, that there is room for them and they will stick. Rain, hard luck and a lot of things have all worked against the circus business, and few, if any, have made anything like good circus profits on this season.

• • •

William Crane, of the trio familiarly known to vaudeville as "The Mudtown Minstrels," died at his summer home near any trouble for some time and had recently. He had been suffering from pulmonary trouble for sometime and had retired there in the hope of finding relief. The unique act which the Crane brothers introduced to vaudeville is immediately recalled. The deceased was the one whose humorous "special announcement" in that funny burlesque was one of the drollest things in the act.

• • •

Eugene Presbrey has been spendinb his summer vacation in Canada, but incidentally has been engaged in dramatizing touches upon his dramatization of "The Right of Way," which novel is to be seen in stage form this season unless something new bobs up to prevent its early production.

• • •

N. C. Goodwin has secured a contract for the services of Edna Goodrich whereby that beautiful young actress will remain the principal support of the auburnhaired comedy star for a term of five years or more, provided Nathaniel can keep going that long.

• • •

The famous Harlem Opera House, which used to be a one week's stand for the big stars when they were hovering about the edge of New York, or rather the theatrical part of it, now technically referred to as Broadway, has been converted by Klaw & Erlanger and turned over by them to Keith & Proctor, who will make it a vaudeville house for the edification of raw Harlemites.

• • •

Yvette Guilbert and Albert Chevalier sailed this week from France and England, respectively, for this country to prepare for their joint starring tour of America, soon to be inaugurated in the East.

• • •

A writer who should know what he is talking about is authority for the statement that George M. Cohan cleaned up the tidy sum of $5,000 in royalties on his successful plays and musical comedies last week. Keeping that record up for the season, Mr. Cohan would be pretty well fixed for one season's work.

• • •

Lottie Williams is in melodrama again under the Blaney banner, and if anyone is skeptical on that score, that somebody is respectfully referred to the following regarding the little lady, which must be true, because her press agent wrote it: "She is a dainty bit of feminity whose emotions rest at her fingers tips, where as on a stringed aeolian harp the winds of her soul play at will. From the realm of song and music she trips with these to the halls of Terpsichore, and she can simulate in turn and in quick succession the smiles and tears of life in a realistic manner and in the same sweet breath. She is a woman who can play Shakespeare with the same ease and perfect art that she would a modern farce of Hoyt's; one whom the role of Juliet might follow that of the heroine of a melodrama of today and increase the admiration due her sweeping genius."

• • •

Julius Cahn is now acknowledged one of the country's foremost theatrical magnates. From an humble beginning in Cincinnati, Mr. Cahn has become a powerful factor in the amusement fold. His chain of theaters, now numbering 18, extends from and into Canada, through the entire New England states, New York, Pennsylvania, New Jersey, Delaware, Maryland, Ohio and bids fair to reach to the Pacific coast. Besides these theaters, Mr. Cahn has ten to twelve companies touring.

• • •

Louise Le Baron, who was contralto of the Fritzi Scheff opera company for the past two seasons, has returend to New York and is considering some offers to appear in productions which open later in the season.

• • •

Blanche Weston Jewett, formerly a member of the "Nancy Brown" company, has been married to Baron August Franz Eugene von Waldeck Sofield. The ceremony took place at the Church of Transfiguration, New York city.

• • •

Cohan and Harris have contracted with Edwin Milton Royle for a new drama of American life, to be called "The Gamblers."

• • •

Robert T. Haines will make his first appearance as a star in New York in November, [illegible]ring under the direction of the Will J. Block Amusement company, in a new comedy drama by George Broadhurst. No name has yet been selected for the new play, though several are under consideration. The new piece is a modern drama of American life, and Mr. Haines is said to be well fitted with a congenial role.

• • •

Sylvia Linden, who has been selected to follow Maxine Elliott in Clyde Fitch's "Her Own Way," is one of the few women on the stage who have graduated from Vassar college. She has been identified with a number of the Pinero plays which Charles Frohman produced, and sent a clever character comedy sketch, entitled "A Scandalous Affair." Jack O'Toole will sing "I Never Can Forget You Dear," new song hit illustrated with beautiful colored views.

Matinees are given daily at 2:45; evening performances at 8:00 and 9:30. School children's matinee every Saturday afternoon. Regular performances are given on Sunday afternoon and night.

Matinee Daily, 2:45—10c any seat. Evenings at 8 and 9:30—10c, 15c and 20c. Order Seats. Both Phones.

SCHOOL CHILDREN'S MATINEE SATURDAY AFTERNOON.

Regular performances Sunday Matinee and Night.

POETRY AND THE STAGE

"A Midsummer Night's Dream" in the Old Manner and the New---Shakespeare's Plastic Stagecraft vs. Modern Mechanical Triumph.

New York, Sept. 29.—If Shakespeare were living now, Sir Henry Irving once remarked, he would be the first to take advantage of the mechanical and pictorial resources of the modern stage. But would he? In al lthe mazes of erudition and theory with regard to our ancient drama no problem has been more discussed than that of the practical aesthetics of the Elizabethan theater—except, perhaps, that matter of Hamlet's madness. Now, as it happens, new light has lately been shed on the subject and the production of "AMidsummer Night's Dream" at the new Astor theater affords the best object lesson in recent memory.

In the popular mind the present performances, in which Miss Annie Russell appears as Puck, is associated with the performance in which Nat Goodwin appeared—and failed—as Bottom. But in reality it was inspired in the main by a more recent and notably successful production—that of last year at the Neues theater, Berlin. The German production had two signal features. First, it gave the entire text in the order in which Shakespeare meant it to be given, and, by avoiding waits between the acts, in approximately the same time is was required on the Elizabethan boards; and, secondly, the woodland fairy atmosphere of the dream comedy was realized scenically with consummate craft. For the first time, as a Berlin critic wrote, one saw the work of Shakespeare without the hacking and contorting of a nameless collaborator, whose impossible task it had always been to abbreviate and rearrange the scenes so as to make them possible on the ordinary modern stage, and for the first time one saw Shakespeare's land of fairy transmuted into scenery that was in harmony with its poetic charm of suggestion.

The means of presenting the full text rapidly and in proper order was what the Germans call the Dreh-buhne, or pivot stage. Behind the footlights was a turntable, on which it was possible to set three or four scenes at once and swing each before the footlights the moment it was required. It was the original intention of Messrs. Wagenhals and Kemper to construct the stage of the Astor on this plan; but the local fire laws which in spite o feverything threatened to turn "A Midsummer Night's Dream" into an All Winter's Pipe Dream— prevented this—the pivot stage could not be constructed without putting the system of patent sprinklers out of business and further reducing the already minute rill from the stage pump. Thus in the present production the customary delays between scenes—the tedious waits that have dragged out so many of Shakespeare's brisk and varied stage narratives to boredom—were inevitable. And some of the atmospheric charm of the Berlin production was also lost.

Yet what cannot be or is not done in England and America can be done in progressive modern nations, as, for example, Japan, where the pivot stage has already been installed, and actually is done in Germany. For the sake of our discussion let us assume that in the present instance Shakespeare had to choose between the pivot stage—amplest resources of modern stagecraft—and his theater on the Bankside. No play in the entire range of Elizabethan drama is more favorable to the champions of the modern mise en scene, for none lends itself more fully to scientific suggestion and none has fewer scenes or fewer changes of scene. Many of the plays, and the greatest of them, as "Romeo and Juliet," "Hamlet," "Lear," and "Othello," though easily and effectively run off in their entirety on the Elizabethan stage, present obstacles difficult and perhaps insuperable even to the pivot stage.

The features of the Globe theater which figure in "A Midsummer Night's Dream" were: First, the main stage, which, though a single platform breast high in the pit I have divided for convenience of illustration into the part beneath the loft, the under surface of which was called the "shadow," or the "heavens," and the apron which surrounded it on three sides; and, second, an alcove behind the main stage and framed by what was in effect a proscenium arch. There is abundant evidence that the main stage had no curtain, and indeed its position in the center of an ampitheater made it impossible that it should have any. But there are innumerable stage directions that mention the arras or "curtaines" that concealed or disclosed the alcove stage at will. Two other features the stage possessed which do not figure in the present play: First, a gallery over the alcove used to figure a wall, that of Capulet's garden, Macbeth's castle or the city of Harfleur, and, second, windows in the upper tier of boxes—Juliet's window, Jessica's window or the window from whcih the king looks down in "Henry VIII." Instead of the three or four scenes of the pivot stage it was thus possible to present in immediate succession five or six different places, though as a matter of fact a vast majority of scenes took place, for reasons which will develop, on the main stage.

The opening scene of "A Midsummer Night's Dream" is in the court of Theseus at Athens. To indicate the locality there were probably chairs of state within the alcove and backed by a second curtain.

The ducal train came in at one door and presently Egeus and his following at the other. When the audience was over both parties filed out as they had come in, the front curtains of the alcove were drawn to and the chairs of state removed behind it.

Next enter Quince, Bottom and their crew of artist artisans and broach the comedy business of their play. It is the modern practice to place their conference in Quince's cottage, with elaborate scenic detail. But here again the locality contributes nothing to the effect. With the scene which is to follow, however, the case is different. That takes place in the wood near Athens and introduces the fairies, and with them the atmosphere of imagination, of enchantment. Here Shakespeare will need all the resources of the stage, and once set the scene must remain as long as it is needed, which is through by far the larger portion of the play. This comedy business—Bottom was played by that arch low comedian Will Kempe—was here, as in many another play, relegated to the outskirts of the stage, which, in modern parlance, is called the apron, and while it is in progress the main stage beneath the heavens was being set with woodland scenery, brought on, no doubt, through the alcove curtain. During this process the artisans entered at one door, made the circuit of the apron while talking and went out at the other. In all respects save one the scene corresponded with the first scene of modern practice, namely, that it was not possible to screen the shifting of stage properties.

To us the practice seems crude enough. In point of realism the pivot stage has an undoubted advantage. But it is to be remembered that on the Spanish stage the practice was precisely similar to that of the Elizabethan stage, and even on the Greek stage under Aeschylus and Aristophanes. In the poetic drama there is small place for the pedantries of modern realism; and when, as now universally happens on the English speaking stage, they are achieved by cutting and disordering the text and dragging out the narrative, they are madness.

Beyond reasonable doubt the alcove, cleared of the ducal throne of the first scene, now represents with considerable scenic solidity the sylvan court of the Fairy Queen. The stage direction reads, "Enter the Queen of Fairies with her train." But her words, "Sing me now to sleep," and the stage direction, "She sleeps," clearly indicate that she is lying down. In point of fact 'enter' was frequently used of actors appearing in the alcove where we should say "is disclosed." The folio of "Othello" reads: "Enter bed." Beds were usually within the alcove and were made to "enter" by drawing back the curtains. Juliet "falls asleep on her bed within the curtaines," and after she is found there and left for dead "they all go forth casting rosemary on her and shutting the curtens." What happens in "Othello" is that the Moor enters by the door, and, drawing back the alcove curtains, discloses Desdemano in her bed, Titania's bower likewise was doubtless within the alcove. There may even have been a dance of fairies about it, for the alcove was only nine or ten feet narrower than the general run of modern stages. At the end of the act it is probable that the alcove curtains were drawn to; but if so they were opened during the next act, for early in line 135, when the Fairy Queen awakes she sees Bottom, who is on the main stage.

For in act III, Lysander and Hermia having gone off, the woodland setting is used, as we have seen, for the artisans to rehearse their play. It may be remarked in passing that this very scene is the most perfect evidence of Shakespeare's abhorrence of the attempt, even other means of presenting moonlight and scenic realism. The artisans know no other means of presenting moonlight and a wall than by a lantern and rough cast. If Shakespeare neglected such devices it was because he understood the suggestive power of beautiful words. When the fairies lead Bottom, with his ass's head, into the bower, the curtain is drawn, and the woodland scene on the main stage is thus cleared for Oberon's entrance. The act ends with the four lovers asleep in full view. The stage director says that they "sleep all the act." The precise significance of this is not beyond question, but "act" apparently means an entricate filled in by music. After so much unremitting action it was probably found that the audience enjoyed and were refreshed by an intermission, as the most musical Germans have in each opera a grosse pause for conversation, beer and sausages.

With the opening of Act IV, at any rate, the sleepers still hold the stage. The directions call for the entrance of the Queen and her suite, which again connotes the simulation of such phenomena as thunderbolts and earthquakes. In 1692 the first attempt in England to mimic an earthquake was made at Southwalk.

Members of Henry W. Savage's Eastern "College Widow" company had a novel experience one Monday night. They were entertained in a box party at the Harlem opera house to witness the opening performance of the Western "College Widow" company. Several of them had been playing in the George Ade comedy ever since its premiere two years ago with never a chance to see what the show looks like to the audience.

• • •

Fred F. Schrader, who has been connected with the Washington Post for twelve years, the last five years of that term as dramatic critic, has retired from the staff of that journal and will settle in New York, where he will continue dramatic and literary work. Mrs. Schrader, whose work has also been a feature of the Post, will soon join her husband in that city. Mr. Schrader's critical work has been of a high class, and it is to be hoped that he will find a congenial vocation in New York.

• • •

Lew Fields announces that after this season, he will not play any more burlesque or dialect parts, and confine himself to straight comedy roles.

• • •

Olga Nethersole will sail for New York early in November, beginning her tour in Pittsburg on Nov. 19.

• • •

It is said that arrangements are being made for Maude Adams to appear in London in a new Barrie comedy, when her American tour in Peter Pan has ended.

• • •

The company organized by the Will J. Block Amusement company to support Miss Alice Fischer in the new play "Honor Bright," by Grace Livingston Furniss, is nearly complete, and rehearsals will begin within a few days. According to present plans the premier will be given about Nov. 1.

• • •

The title of the play being written for Robert T. Haines by George H. Broadhurst, to be produced by the Will J. Block Amusement company this season, will be chosen soon. It is regarded by Mr. Block as the best comedy structure ever built by Mr. Broadhurst.

• • •

Wherever Joseph M. Gates has presented S. Miller Kent in "Raffles, the Amateur Cracksman," the critics and public have been united in saying that the young actor plays the part with more dash and virility than did Kyrle Bellew. It is his youth and good looks that have helped this sterling romantic actor make this his latest and greatest success.

• • •

Cheridah Simpson, who is starring in the "Red Feather," has written the words and music of a new song that Mary Marble has interpolated in "Wonderland," the glittering spectacle launched by Julian Mitchell that is at present touring the South with Little Chip as the principal jokesmith.

• • •

The latest one to steal Rolla, the mechanical horse in Julian Mitchell's beautiful spectacle, "Wonderland," which, under the management of Joseph M. Gates, is making a highly successful trip through the Southern cities, is the author of "About Town," the piece that Lew Fields is doing at the Herald Square theater, New York. He uses Rolla as a cab horse.

• • •

Nellie Stewart, the Australian player, has been engaged by Klaw & Erlanger to head their stock company which will open in Philadelphia about Jan. 1, thus setting at rest all reports of Miss Stewart's engagement elsewhere.

It is persistently rumored on the Chicago Rialto that "The District Leader" is to be revised and revived for a road tour to open within the next six weeks, featuring Jos Howard, the composer, and Winsome Mabel Barrison, who will become identified with "The District Leader" production at the conclusion of a brief season in vaudeville.

• • •

Richard Carle's most popular comic opera, "The Mayor of Tokio," has started out on its second season with John L. Kearney as the impecunious impresario, Orlando Daly, with colors flying. It made money for a week at Louisville, and you can't beat that!

• • •

"The Maid and the Mummy" is the first musical piece from the East to make San Francisco this season.

• • •

Don. W. Stuart, manager of Arthur Pryor and his band, has just signed contracts whereby he will open the Jamestown exposition next spring. This action of the exposition authorites stamps this band as being considered the best in the country.

• • •

The San Francisco earthquake brought forth several plays and productions for which a claim of originality and mechanical effects have been made. Some of the old-time theatergoers have recalled that Bartley Campbell had a realistic earthquake effect in Clio, while a few years later, Wilson and Barrett used the same idea in Claudian. The press agent for Wood's has dug even deeper than that and says: "The sensation was first introduced four centuries ago by the Italians, in 1480. They had intricate machinery for the simulation of such phenomena as thunderbolts and earthquakes. In 1692 the first attempt in England to mimic an earthquake was made at Southwalk.

MANY FROM NORMAL GO

Large Delegation Attends Meeting of Kindergarten Association.

Meeting of Duluth-Superior Branch Held—Normal Notes.

President Bohannon, Dr. Kline, Miss Ely, Miss Quillard and the senior kindergarten training class of the normal school attended the meeting of the Duluth-Superior branch of the International Kindergarten association Wednesday afternoon, at the Madison school. The meeting was largely attended and R. E. Denfeld, Supt. Mattocks of the Superior schools, and Miss Cronan of the Superior normal, spoke on kindergarten work. The visitors from this normal enjoyed the meeting, as they are interested in the wonderful work of the kindergarten. Miss Quillard is a member of the association.

• • •

Miss M. Velna Yeaw, the physical director of the Y. W. C. A., spoke to the normal school students Monday with regard to the gymnasium work that the Y. W. C. A. offers this year.

Miss Yeaw spoke to the high school girls last week and they are enthusiastic about organizing basket ball teams among the different classes. She is anxious that the normal girls form a team, and that the high school and normal teams play against each other. The many advantages of the gymnasium were discussed both by Miss Yeaw and Mr. Bohannon. The gymnasium of the Y. W. C. A. has been enlarged this year.

• • •

Tuesday, warm lunch was served at Washburn hall to outside students and the faculty. At the hall, last week, they moved from the temporary dining room on the second floor down to the dining room proper on the first floor. The interior of the hall is about completed.

• • •

During this, the fourth, week of school, the following students have been enrolled: Emma H. Timmerman, Elsie A. Daeda, Mabel E. Strandmark, Gladys T. Olsen, Margegart L. Young. Latin course, first years Ethel A. Swartwart of Detroit, advanced graduate, junior year. Miss Young is living at Washburn hall.

• • •

Miss Ilene Tang of China, who has studied in this country for eight years in order to fit herself to be a training teacher for kindergarten schools, was a normal visitor last week. Miss Tang was greatly interested in the kindergarten work here, spending considerable time in the kindergarten and in Miss Ely's room.

• • •

Miss Eaton, after a week's illness came back on Monday. The hall finishing work will require so much of Miss Eaton's overseeing, that the Domestic Science classes will be somewhat delayed.

• • •

The Freshman class held a meeting Tuesday and a second meeting Friday. Miss Contu, their former president has joined the third-year class, and Miss Laudra Mitchell was elected president in her place. Dues, colors and time of meetings were decided upon.

• • •

Miss Emma Bartholdi, one of last year's students, leaves in two weeks to take a position at a new school at Floodwood, Minn.

• • •

The Glee club held its second regular meeting Friday. Miss Mitchell, the accompanist was absent and the members did not sing, but planned a party for the future. They also planned to take a long cross-country walk, within two weeks, and have a picnic at the end of the tramp. New members added to the club are Winnifred Corell, Sarah Cohen, Sadie Pennington, Clara Hanson, Catherine McIntyre and Gertrude Knapp.

Miss Mason, Ella Talboys and Elbrose Taylor expect to join the choral society to practice for the "oratorio," under direction of Prof. Reyner, at the First Methodist church.

YOUNG HERO AT BEMIDJI.

Charles Vaaler Saved a Four-Year-Old Boy From Drowning.

Bemidji, Minn., Sept. 29.—(Special to The Herald.)—Charles Vaaler, the 12-year-old son of Mr. and Mrs. O. E. Vaaler, should be enrolled on the list of young heroes and awarded a Carnegie medal, as his prompt and energetic action undoubtedly saved the life of the 4-year-old son of Mr. and Mrs. J. J. Opsahl, Thursday.

Mr. and Mrs. Opsahl live at Lavine, on the north shore of Lake Bemidji, and their boy walked out on the small dock on the lake while his parents were not looking. He made a misstep and fell into the lake. Charles Vaaler was roving a boat towards the dock at the time and, seeing the little fellow tall in the water, hastened to the spot, and without any hesitancy dove headforemost into the lake, grabbed the boy and swam to the shore with him, catching him as he was about to sink under the waves for the third time. The boy was quickly revived and taken to his home, and has suffered no ill effects from his involuntary bath.

Sometimes it may be as important to one man to find a quick purchaser for a second-hand desk as it is for another man to find a purchaser for a carload of perishable freight. In either case it usually happens that a Herald want ad. is "the best broker."

GREATEST BIG MAN'S SON-IN-LAW AND OTHERS

Those Who Marry the Daughters of the Eminent Are Rarely More Than of Commonplace Grade ---Some Exceptions---Joseph Chamberlain, Who Married Miss Endicott, an American Girl, Leads His Class Easily.

By DEXTER MARSHALL.

(Copyright, 1906, by Dexter Marshall).

From the American point of view the greatest big man's son-in-law is still Joseph Chamberlain, who married Miss Endicott, daughter of Cleveland's secretary of war, some eighteen years ago. The most recently exploited great man's son-in-law, Nicholas Longworth—well known as such in Europe as well as in America—has not yet had a chance to show whether he naturally belongs to Chamberlain's class, or is bound to sink to the commonplace level which the sons-in-law of the eminent generally reach.

In the entire history of the country, only one son-in-law of a man who reached the presidency has made a big stir in the world. He was Jefferson Davis—not the governor of Arkansas, but the president of the Confederacy. He married the daughter of "Old Rough and Ready" Zachary Taylor. Taylor wasn't president at the time of the marriage, being only a colonel in the regular army, without brilliant political prospects or apparent political ambition; and the match between his daughter and Davis, then recently resigned as an army lieutenant, was made against Taylor's bitter opposition.

The marriage of a president's daughter during her father's term of service has taken place only twice since the founding of the republic. All the world knows that the first of these marriages, which gave to President Grant for a son-in-law the commonplace Englishman, Algernon Sartoris, was a great disappointment to the father of the bride as well as the nation.

McKee, the son-in-law of President Harrison, married Miss Harrison before her father's rise to the first place. Though a good average business man, McKee has never been prominent on his own account, and the same is true of Stanley Brown, who married Mollie Garfield after her father's assassination.

Jefferson Davis's Romatic Marriage.

Jefferson Davis married Sallie Knox Taylor in 1835, as the story goes, after a sensational elopement, which involved the temporary appropriation to the service of Cupid of four saddle horses from the army post at Prairie du Chien, Wis., where Col. Taylor was then stationed.

According to this story, the eloping couple were accompanied by two friends, who rode the extra pair of horses, and returned all four to the post after the runaways had been safely married. Davis himself denied that there was any elopement in a brief autobiographical sketch, printed a few years before his death, though he admitted that Taylor opposed the match.

But there was plenty of romance in the love story of Davis and Miss Taylor without the elopement. They became acquainted when she was a girl in her teens, and he was a cadet at West Point, spending the summer vacation at Lexington, Ky. He went out riding one day, and just as a heavy thunderstorm was about to break, noticed a girl on horseback in a secluded bridle path. At the first crash of thunder her mount bolted, and the girl rider might have been seriously hurt but for young Davis' nerve and address. Spurring his horse, he rode quickly to her side, seized the bit of the runaway animal, and rescued the girl in the most dramatic style imaginable.

That the young couple should fall in love after that was the most natural thing in the world, especially as the father objected to their acquaintance. His constant placing of obstacles in the way of their meeting was partially neutralized by the assignment of Davis to Col. Taylor's post in Wisconsin, but his opposition to the match increased rather than otherwise, and finally became so bitter that Davis resigned from the army. The marriage followed soon afterward, and was solemnized at the home of the bride's aunt, with several of her relatives present who approved of the proceedings.

The bride of that marriage died soon after it took place. Taylor's feeling toward his son-in-law was not abated until sixteen years had rolled away, and the Mexican war was in full swing. Both Taylor and Davis were active in that contest, Taylor having risen, meanwhile, to a general's rank, while Davis was colonel of a volunteer regiment attached to Taylor's command.

The reconciliation between the two gallant soldiers—for Davis as well as Taylor was a brave man, whatever his errors in connection with the Confederacy—came just after the battle of Buena Vista, won by the Americans, as were all the battles in that war. There had been a time in the course of the fight, however, when victory inclined toward the Mexicans. At the most critical moment Davis and his men were able to turn the tide by a sharp bit of clever, brilliant work, in the course of which Davis was painfully wounded. When it was all over, Gen. Taylor grasped the colonel's right hand in both of his and made full amends for the past.

"You have saved the day with your glorious rifles," cried the general. "Now let bygones be bygones. Sally knew your mettle far better than I."

The renewed cordiality in the relations of "Old Rough and Ready" and Davis continued until the death of Taylor, and, in one of the last pieces of writing he ever did—the autobiographical sketch already alluded to—Davis showed that he had completely forgiven his father-in-law by explaining and defending the latter's course in the Mexican war.

Students of American history may remember that after winning a certain Mexican victory Taylor, the victor, did not exact an unconditional surrender, but allowed the Mexicans to withdraw. The Washington authorities did not like that, and ordered Taylor to turn over the bulk of his command to Gen. Winfield Scott. Later there was a reaction in favor of Taylor, and it was this reaction undoubtedly that led to his nomination and election as president.

Sons-in-Law as Diplomatists.

Of the able men now serving the United States as ambassadors two are sons-in-law of unusually prominent men. Whitelaw Reid stationed at the Court of St. James, and the editor of the New York Tribune, married the daughter of D. O. Mills, the multi-millionaire; while R. S. McCormick, himself a multi-millionaire, married a daughter of the late Joseph Medill, journalist and founder of the Chicago Tribune.

Mr. Reid's career has been long and distinguished; it was preceded by years of newspaper work which began in Civil war days. Mr. McCormick, much younger, has been of signal service to his government in several posts, but is best known to the public from his stand regarding dress when stationed at St. Petersburg. His present post is the third in which he has served as ambassador, Vienna being the first. He began in the consular service, and was attached to the American legation in London when Robert T. Lincoln was United States minister there.

At Vienna Mr. McCormick conformed to the American diplomatic traditions of the previous half century regarding dress, but at St. Petersburg, in 1903, he followed the example set by Charlemagne Tower, his predecessor, and arrayed himself in court garb. His outfit was modest enough, being made of blue material trimmed with gilt braid, but while no great excitement had been manifested by the public when Mr. Tower abandoned the customary black, McCormick's course roused all sorts of comment.

Until the beginning of the discussion which raged in the newspapers for several weeks at the time it had been the general impression for years that there was a United States law prohibiting our diplomatic representatives from wearing anything except black, and that this law was the result of the desire of "the fathers" that simplicity should be the rule in all our intercourse with foreign nations.

But the fact is that until after Monroe's time American diplomatists rejoiced in the most gorgeous and elaborate court apparel that they could possibly procure. In Pierce's time, however, it was decided fitting that they should dress with the utmost severity, a costume consisting of black swallow-tail coat, low-cut waistcoat, broad white shirt front and trousers—practically the evening dress of the present—was adopted.

James Buchanan, later president, but then minister to England, and the original August Belmont, then minister to Holland, were the first to adopt it. Buchanan wore it when making a visit to the House of Commons and was refused admittance to the strangers' gallery. Belmont had no trouble at the Dutch court, and Buchanan finally was allowed to appear at court and all official functions clad in the simple dress prescribed by President Pierce.

From that time the black evening suit was the recognized garb of all American diplomatists, at day time as well as evening functions for many years. Some of them got around the difficulty, however, by being appointed militia officers before going abroad and wearing their uniforms.

Some Musical Sons-in-Law.

The most eminent son-in-law in history was Richard Wagner, who married the daughter of Frank Liszt, whose relative fame in the musical world was undoubtedly somewhat dimmed by the extremely high rank as a composer which Wagner attained.

There was something almost pathetic in the way the older man of those two was ultimately outrivalled by the younger. It was Liszt's dearest ambition to found a lasting school of music, to write great operas, in short to do exactly what his son-in-law afterward did. But while Liszt's genius has made his name immortal, the genius of his son-in-law was much more brilliant and his originality and force more compelling. Liszt believed in Wagner and his ideas from the first, and this was undoubtedly of great benefit to him in his formative years.

Walter Damrosch, the son-in-law of the late James G. Blaine, became known to many thousands in 1888, through the fact that he was a member of the famous party which went coaching through England and Scotland as the guests of Andrew Carnegie, Mr. Blaine and his family making up the remainder of its personnel.

Carnegie had then just given nine-tenths of the money required to build Carnegie Hall in New York, where Damrosch has since reigned musically supreme. This had greatly increased the interest felt by the public in Carnegie; and nothing was needed to create an interest in the Blaines, for Blaine was then at the height of his popularity in spite of his defeat for the presidency four years earlier. It was quite natural then that the newspapers in England, as well as in this country, should give daily reports of the coaching party's progress and the sayings and doings of its members.

Thus it fell out that all the world was made aware of the romance in which young Damrosch and Harriet Blaine were the chief characters, and the interest in their marriage, which took place two years later in the old New York home of W. H. Seward, Lincoln's secretary of state, was much enhanced by this circumstance.

Since then Walter Damrosch has proved his right to the good opinion of the public by his solid work as a musical composer and conductor, and the fact that he married an eminent man's daughter has been pretty well forgotten.

He is now as thorough an American as the next man, no doubt, but he was born in Germany. As a child in that musical land he used to present the opera of Rheingold with dolls for the actors and his child friends for the audience. He was 9 years old when his father, Dr. Leopold Damrosch, came to this country bringing the boy with him. At 19, Walter, who studied music under his father, was director of a choral society, and at 22, he presented German opera at the Metropolitan Opera House in New York.

Peter Cooper's Son-in-Law.

Abram S. Hewitt, for many years one of the foremost citizens of New York and the father of Cooper Hewitt, inventor of the green-rayed mercury light, was the son-in-law of Peter Cooper.

Hewitt's most plentiful lack, when young, was money, and he had to work his way through college. This he did through terrible exertion and close economies. After winning his degree he became a school teacher, following that calling until he had saved $1,000. With this money he made a European tour, and as it chanced his traveling companion was Peter Cooper's son, Edward.

Nothing out of the ordinary happened during their stay in Europe, but on the homeward voyage their ship was wrecked. Cooper and Hewitt were nearly lost, but managed to escape from the sinking vessel in the longboat, with a number of sailors and others. The craft floated about on the waves for a long time, but finally was spied by a passing vessel and the survivors were rescued.

When taken out of the boat Hewitt was clad in a suit borrowed from a sailor, his own clothes having been lost. His total cash possessions consisted of three silver dollars. Of course, young Cooper took his friend home with him, and there the latter met Miss Cooper. His courtship of her at the famous old New Jersey place, Ringwood, now a part of the Hewitt estate, was followed by their marriage and it by a business alliance between the Coopers and the young bridegroom which resulted in greatly enhancing the Cooper fortunes and built up the Hewitt wealth.

Mr. Hewitt derived great advantage from his marriage, no doubt, but he would have made his mark in any event. His public career was a distinguished one, and his political achievements included the defeat of Theodore Roosevelt for mayor of New York in 1888.

Two Astor sons-in-laws, each of whom married a daughter of William Astor, were appointed to diplomatic stations by Grover Cleveland. One of them, James Roosevelt Roosevelt, is a distant cousin of Theodore Roosevelt. He was awarded a minor post attached to the United States legation in Vienna during Cleveland's first term, and appointed secretary of legation at London during his second one, displacing Henry White, now ambassador to Italy and even then a veteran.

"Rosey" Roosevelt as his intimates know him, had not been well known in politics prior to his second appointment, but he speedily became so because of the objections to his preferment raised by the Democrats of Poughkeepsie, to which up-the-Hudson town he was accredited. He had been long known as an enthusiastic coaching man, however, and his name had been prominent in the columns devoted to the sports of the rich. For a while it was often seen in the general news columns after his appointment, but not of late years. His father was that James Roosevelt who made a fortune in the manufacture of cabinet organs.

James J. Van Alen, the other Astor son-in-law in question, was appointed by Cleveland to be minister to Italy soon after his second election, but did not serve. He has been described as "a man of millions, at one time social arbiter of Newport, dilletante-politician and globe trotter." The reception by the public that he had been appointed minister to Italy, together with a few other things, put him out of sorts with the country to some extent, and at one time Wakehurst, his place in Newport, was offered for sale. He was then reported to have declared that America was "not a fit place for a gentleman to live in," and during the Boer war he fitted out at an expense of $50,000 a complete field hospital, which he took to South Africa, accompanying it to the front with Gen. Buller's ill-fated army.

For this evidence of devotion to the British cause he was decorated by the British government. Afterward he bought Rushton Hall, in Northamptonshire, a stately English country residence, for $500,000, and declared his intention to become a naturalized British subject. It has always been a source of pride to him that he resembles the present king of England in face and person. Both Mrs. James Roosevelt and Mrs. James J. Van Alen have been dead some years.

The Vanderbilt sons-in-law have reached rather higher levels than the

Astor sons-in-law. The late Elliot F. Shepard stood well enough as a lawyer to win the presidency of the New York State Bar association, and his venture as owner of an evening newspaper in New York turned out creditably, though the innovation of publishing a bible verse at the head of the editorial columns was given up after his death. H. McK. Twombly's estate in New Jersey and his horses have made him famous; besides he is really a man of consequence in the financial world.

Dr. W. Seward Webb was a great figure in the sleeping car world for years, and he now has the distinction of owning the finest "gentleman's" farm in the country. W. D. Sloane has made rather less of an impress upon the public, perhaps, than any of the foregoing. All four married daughters of William H. Vanderbilt. The only Vanderbilt son-in-law of the generation now under 40 is Harry Payne Whitney.

The rich men of the United States have hundreds of sons-in-law in the old world, including princes, dukes, marquises, barons and men of every conceivable title, some of whom, like the Count von Waldersee, have played highly important parts in the drama of human events.

Perhaps the most interesting of them all is Joseph Chamberlain, who was born a commoner, who won a vast fortune by utilizing an American patent for a screw cutting machine, and who is likely to die without title, despite the high places he has held for many years in British public affairs.

Possibly the English would smile at the notion that Chamberlain owes any of his prominence to his marriage with an American woman, but it was that marriage which gave him the distinction of being better known to Americans and better liked on this side of the water than any other Englishman.

He first met Marie Endicott, daughter of W. C. Endicott of Massachusetts, secretary of war, during Cleveland's first term, almost twenty years ago. Chamberlain came to America in 1887 to negotiate a fisheries treaty between Great Britain and the United States. He didn't succeed in getting the treaty through, but he did make himself popular socially and there is a possibility that his popularity was enhanced by the fact that he was a widower.

His first meeting with Miss Endicott appears to have been entirely unpremeditated on either side. One day during his stay in Washington he made a call upon a lady who had extended many social courtesies to him. She was embarrassed by the circumstances that she was entertaining a party of young girls at luncheon, and could not well leave them to give attention to her English guest. After a few moments of perplexity she explained the situation to Mr. Chamberlain, adding, however, that one of her guests had failed her, and that in consequence there was a vacancy at the table.

"If you will not be embarrassed as the only man in the party," she said, "I shall be pleased to have you join my guests."

Chamberlain is a man of nerve, as he has shown many times, and he accepted the invitation. One of the guests was Marie Endicott. She sat next to him and they became very well acquainted, indeed, before the luncheon was finished. The acquaintance begun that day had ample time to develop into a courtship long before Chamberlain sailed for home, since his stay lasted some months. The marriage took place before the close of the following year.

Like many other American wives of prominent Englishmen, Mrs. Chamberlain has been credited with being of great political assistance to her husband. She was a highly important feature of his memorable trip of conciliation to South Africa, made as secretary of state for the colonies, after the Boer war had been won by the British and the need of putting the conquered people somewhat at their ease was felt. She accompanied him throughout the trip, which extended over months, and on his return to England, she as well as he, was cheered by the big and enthusiastic crowds which greeted the pair.

His famous speech in favor of an alliance between the United States and Great Britain was delivered in 1898. In it he said:

"What is our next duty? It is to establish and to maintain bonds of permanent amity with our kinsmen across the Atlantic. * * * At the present time these two great nations understand each other better than they have ever done since, more than a century ago, they were separated by a blunder of the British government."

No doubt he had a good deal to do with the friendliness shown to the United States while the war with Spain was on and which was of real value to this country, and he is now the head and front of the movement to change the present free trade system of Great Britain to a protective system based upon the present system of the United States.

Chamberlain is now 69, much older than his wife, and beginning to show his age somewhat, though still appearing younger than he really is. Next to Lord Rosebery he is the youngest looking man for his age in England. His apparent youthfulness has always been one of his most noteworthy characteristics. His son, Austen Chamberlain, himself a man of consequence in British affairs, used often to be taken for him on the continent.

Joseph Chamberlain is a very rich man, his income being from $150,000 to $200,000. The Endicotts have been well to do for generations—though not multimillionaires—and of the best social position. The usual conditions of British-American matches were reversed in the Chamberlain-Endicott marriage, the lineage in this case being furnished by the wife and the wealth by the husband.

The Duke of Argyll and the Duke of Fife, sons-in-law respectively of the late Queen Victoria and the reigning King Edward, contrast effectively with Chamberlain, being as commonplace and ineffective as he is interesting and forceful.

DICK SCHELL'S FAST MOTOR BOAT

NORTH BUTTE, RICHARD SCHELL'S CHAMPION MOTOR BOAT.

Within a week or two the Duluth-Superior harbor can boast the possession of one of the fastest racing motor boats in the country. Richard Schell will bring his new forty-horse power boat to this city from Oshkosh, Wis., during the early part of October.

The North Butte, as Mr. Schell has named his craft, comes to this city with a most enviable record. She won the handicap Interlake yachting championship at the Oshkosh regatta in August, over a field of eight entries, making the best time of any of the contestants, over a course of twelve nautical miles, with five turns. The North Butte covered the distance in forty-one minutes and forty seconds, an average speed of seventeen nautical miles per hour.

While at Oshkosh she also won a scratch race for a stake of $500 from Dr. Fielding's Fantana, over a twenty-four-mile triangular course, necessitating ten turns, the North Butte finishing in one hour, twenty-three minutes and fifty-six seconds, and the Fantana nearly three minutes later. This gives an average speed of seventeen miles an hour, sustained over the entire course of twenty-four miles, and probably indicates a speed of over twenty nautical miles on the long stretches.

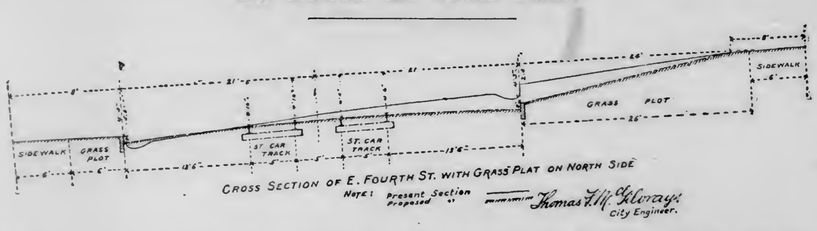
The North Butte was built by Joseph Dingle, the famous St. Paul boat builder. She is thirty-eight feet long and five feet beam. Her engine is six cylinder, four cycle, and develops forty actual horse power at full speed. It was built by the H. C. Doman company of Oshkosh.

The contest between the North Butte and the Fantana was especially interesting, from the fact that the North Butte was entirely a Western product, while the Fantana was built entirely in the East, and was warranted to make twenty-two miles an hour. Mr. Schell thinks his Doman engine is about as fine as any turned out anywhere, and certainly has an enviable record to substantiate his claims for it.

The Interlake yachting championship entitled the winning boat to a pennant, which Mr. Schell brought home with him.

THE EAST FOURTH STREET IMPROVEMENT

New Plan for Grading the Street Worked Out by City Engineer McGilvray—Generally Believed That a Pavement Will be Asked for Next Year.



CROSS SECTION OF E. FOURTH ST. WITH GRASS PLAT ON NORTH SIDE
Note: Present Section ——— Proposed " ——— Thomas W. Gilcray, City Engineer.

After numerous surveys, an exhaustive examination of the topography and the conditions surrounding the present grade of Fourth street through Portland, or from Sixth avenue east to Fifteenth avenue east, City Engineer McGilvray has worked out a new plan for grading the street, should a street improvement be contemplated next year. This plan will, it is claimed, fill every need so far as the roadway is concerned. It will not detract from the physical features of the property so as to cause that along the upper side of the street to deteriorate in value.

Under City Engineer McGilvray's plan the building and sidewalk elevations on either side of Fourth street will not be disturbed in the least. A level roadway, forty-two feet wide can be established and paved that will admit of the car tracks and team traffic and the street be made much more attractive as a residence district than it is now.

East Fourth street, from Sixth to Thirteenth avenues is eighty-six feet wide, or something over twenty-four feet wider than the same street outside Portland division. One of the problems has been to make some provision for this extra width of street Mr. McGivray's plan, generally speaking, contemplates a cutting down of the grade three feet on the upper side of the street, with a sloping twenty-four feet grass plot from the sidewalk to the curb. Another narrower grass plot will be between the sidewalk and curb on the lower side of the street.

By dropping the grade three feet on the upper side, it is claimed that a level roadway will be had, something that the city engineer says is positively necessary if any permanent improvement is ever made.

He says this twenty-four foot slope which would drop only five feet in the twenty-four feet, means a grade of about 20 per cent, which is all right for park purposes.

Mr. McGilvray proposes turning the twenty-four foot strip over to the park board to make such improvements as the commissioners might determine. A of th eplan is made of the desirability of the plan because of the nice park that might be made of the slope from the sidewalk to the curb all the way from Sixth avenue to Twelfth avenue east. Suggestions have been made that another walk might be put at the foot of the slope along the curb, plant trees, shrubbery and flowers, etc, on the slope.

It is said that this idea of having the park board take over the twenty-four foot strip is far better than the abandonment of the extra width of street by the city. Within the limits mentioned there are several store properties and it is pretty certain that the owners would oppose any abandonment for the reason that they would be injured rather than benefitted by having the property in front of their place revert to them. The building elevations along the street have been established and there is said to be a feeling against any change. Stores twenty toward the walk and the water would not be good properties, in fact their value as business propreties would be destroyed.

According to the plan proposed there has been only one objection raised and that is that the lower side of the roadway, or its grade, being a little above the sidewalk, the grass plot would slope toward the walk an dthe water would run off in that direction. This can be remedied, it is explained, by simply dropping the grade of the lower side of the roadway about a foot, making the grass plot on the lower side of the street on the level.

This slight change in grade, the engineers claim, would not be appreciable. To illustrate this they call attention to the fact that the lower side of First street is a foot below the grade on the upper side, yet very few people, even those who reside on the street were ever aware of it.

When the old paving blocks were removed on Tenth avenue east to admit of the new tar macadam pavement, the grade of Tenth avenue at the intersection with Fourth street was raised a little with a view of having the cross section on a level when Fourth street is improved.

This change of grade was made by the engineering department with an eye to the future for it is generally believed that the East Fourth street property owners will get in line and petition for a pavement the coming year.

PROF. CUSTANCE TALKS OF MUSIC WORK OF THE YEAR

High School Instructor Tells Freshmen of Plans for Term.

Other News of the Week From the Big School.

After the chapel exercises Tuesday morning, Mr. Smith announced that all the upper classmen who wished to register for music could do so at the beginning of the sixth period. He also requested the freshmen to remain in their seats, and after the other classes had passed out Mr. Custance explained to them about the music work of the school.

This work is not compulsory. No pupil is required to take it. However, the parents of many of the students are anxious to have their children receive some training in the development of their voices and at the same time not have it interfere with the rest of their school work. The music class offers an excellent opportunity for this very thing.

The sixth period of every day except Tuesday is devoted to the teaching of music by Prof. Custance. Any pupil can register for one, two, three, or four days music a week, according to his desires. All those who can are requested to register for all four days. If anyone desirious of taking music, but has the sixth period filled by some recitation, the program may be changed in such a way that it will not interfere with the music.

Mr. Custance said Tuesday that he looks to the freshmen every year for new material, for recruits for the choir and other musical work.

Mr. Custance also spoke about the musical society. The first meeting of this organization will be held Tuesday afternoon at the close of school in the Assembly hall. A membership fee of 25 cents is charged to pay for the music which is used and for other incidental expenses of the association.

Two concerts are given each year and the members of the organization receive free tickets for themselves and their friends. Mr. Custance expects to have large classes this year.

THE AGASSIZ CLUB.

First Meeting of the Term to be Held Soon.

The first meeting of the Agassiz club will probably he held next week, although it is not certain. This society has been in existence for many years and has always met with great success. Prof. Ulrich, who teaches botany and zoology, continues at the head of the organization.

The work is extremely interesting to all who are scientifically inclined. The pupils who belong often take long trips into the woods in connection with their scientific work.

The society holds a meeting every other week during the school year, at which papers are read and reports made on any of the subjects in which the club is interested.

It is fully expected that a large a number will join the society this year and that the work will be taken up with great enthusiasm.

TALKS TO SENIORS.

Principal Smith Tells Haughty Ones What is Expected of Them.

At the beginning of the fifth period on Monday, the senior class met in room 206 in accordance with the request of Principal Smith.

Mr. Smith explained that it was his custom to call a meeting of the Senior class at the beginning of each school year in order to speak to the students about the position which they are to hold in the life of the school, and the example which they, as the leaders, should set the lower classmen.

Mr. Smith said that he had generally found that as the Senior class is, so is the rest of the school. Mr. Smith also added that the senior year was the most important one in the school course in the development of the pupil, and expressed a hope that all the members of the class would pull together in upbuilding the welfare of the whole class, and the school.

STUDENTS HEAR HACKETT.

Shakesperian Actor Tells Them of Visit to Bard's Birthplace.

Tuesday morning, a very entertaining address was delivered to the high school pupils by Norman Hackett, the Shakespearian actor. The speech was not only entertaining and interesting, but was very instructive as it had a direct bearing on the English work at which some of the classes are now applying themselves. Mr. Hackett, who visited Shakespeare's birthplace this sumer, gave an account of his experiences in that quiet little town.

Mr. Hackett spoke of the value of his plays historically and otherwise and made a plea to the teachers and students to help preserve the beautiful English language, which he thinks is being corrupted and spoiled by so many radical changes.

"It rests with the students, the teachers and the actors of English to prevent this injury from spreading," said Mr. Hackett.

After his address, Mr. Hackett entertained the pupils with several clever impersonations and also delivered a few well known passages from Shakespeare.

FAIR ATHLETES ORGANIZE.

Girls of the High School Form an Athletical Club.

At the request of Miss Wells another meeting of the high school girls was held Wednesday afternoon for the purpose of deciding definitely about the proposed athletic club for the fair students. It was decided to organize.

As has been stated, all the girls who wish to take part will be required to join the Y. W. C. A. There are some who already belong and, with those who intend to join, there will probably be about seventy-five girls to take part. A black uniform was decided upon for the players. The material for these uniforms will be secured at the wholesale price and all the girls who can, will make their own suits. It is expected that the cost of the suits, including everything, will be about $3.50 apiece.

The girls of the different classes will be distinguished by their ties, as the members of each class will have ties of different colors.

With fifteen or twenty members from each class, at least two fairly good teams should be formed by each of the four classes. These two will play against each other for the class championship. Then the winning teams of the respective classes will decide the high school championship, and the winner will compete with any outside school with which a game can be secured.

It is expected that the girls will play against the Superior high schools and the Normal team.

High School Notes.

The candidates for the high school fotball team are working hard every night now and Coach Findlay is rapidly getting the boys into condition. Large squads have showed up for practice on the last few nights, and there have been plenty to make up two teams. The boys will soon be in a position to put up a pretty good article of football and should make a good fight against almost any high school team.

Treasurer Cole of the Athletic association has been collecting dues for the last few days, and reports about $20 received.

It is probable that a new organization will soon be formed by the students of German in the high school, which will be known as the German literary society. No definite plan has yet been formulated, but it is probable they will hold meetings much as the other high school organizations. No language will be tolerated except German. If members become careless and lapse into the German tongue, they will be fined. The fines will probably be turned into the treasury.

GIGANTIC SQUASH

That Was Raised on Cut-Over Land in Beltrami County.

Bemidji, Minn., Sept. 2.—(Special to The Herald.)—There is a gigantic squash on exhibition at the store of J. P. Young that undoubtedly surpasses anything of the kind ever grown in Beltrami county, in size and weight. The squash measures 5 feet 2 inches in circumference, and tips the scales at 67 pounds. It was grown by Joseph Nelson at his farm at Bootleg lake, in the town of Grant Valley, about ten miles southeast of Bemidji. Mr. Nelson has been very successful in raising farm and garden truck, and the vegetables grown on his place are the wonder of the neighborhood. He has an entire acre of squashes and pumpkins, and there is one squash in the lot which he has at his home that weighs 78 pounds.

Mr. Nelson is well pleased with the results he has obtained from farming on cut-over lands.

Rheumatism Cured in a Day.

Mystic Cure for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and mysterious. It removes at once the cause and the disease immediately disappears. The first dose greatly benefits. 75 cents and $1. Sold by all druggists.

THE METHODIST CONFERENCE

For Northern Minnesota Meets at Minneapolis Next Week.

Minneapolis, Sept. 29.—(Special to The Herald.)—The coming sessions of the Northern Minnesota conference of the Methodist Episcopal church will be held in the Hennepin Avenue church Minneapolis, of which the Rev. Fayette L. Thompson, D. D., is minister. Bishop Luther B. Wilson, of Chattanooga, will preside throughout the conference which will open on the morning of Oct. 3.

A platform meeting will be held on Tuesday evening at which the Hon. T. B. Walker of Minneapolis, will be chairman, and addresses will be given by Senator J. T. Wyman, Dr. J. B. Hingley and Bishop Wilson. A formal reception will the begiven to the ministers an dwives. The business session will open on Wednesday morning and continue until noon under the presidency of Bishop Wilson. In the afternoon Bishop Oldham, one of the best of missionary bishops of the Methodist churches, will give an address on India for the Women's Foreign Missionary society. Bishop Oldham is located in India and has a rich and varied fund of Indian lore and has a wonderful story to tell of that great country.

Rev. W. H. Easton will give a Bible lecture at 4 o'clock on the first and second chapter of Galatians. On Wednesday evening, Bishop Oldham will give the annual missionary address, which promises to be one of the best addresses ever heard in Minneapolis on this stirring subject.

On Wednesday afternoon at 2 o'clock Rev. Dr. Chrales M. Boswell, of Philadelphia, one of the assistant secretaries of the church extension society, will address the people on this important subject, which include the building of new churches and giving of financial help to the building of frontier churches. This society has a wonderful history and had done an extraordinary amount of good work for the Methodist church.

Rev. J. R. Davis will give the Bible lecture on the third and fourth chapter of Selections. Mr. Davis is a broad-broad minded and evangelical scholar. On Thursday evening, a great mass meeting will be held at which Rev. Dr. J. B. Hingley, general conference secretary, and the Rev. Dr. Robert Forbes, first corresponding secretary of the Board of Church Extension, will speak for the superannuated cause and the endowment fund. Dr. Hingeley was set apart at the last conference as corresponding secertary and field agent for a fund of $50,000 for an annuity fund for the superannuated preachers. This was changed to a $100,000 fund and Dr. Hingeley has been busy, sucessfully handling this vast enterprise. It is expected that Dr. Hingeley will report that about half the total amount has been secured. Dr. Forbes is well and favorably known to Minnesotans, he being a member of the Northern Minnesota conference, where he has a host of friends. Dr. Forbes is one of the greatest of Methodist orators before the public. This meeting will be of deep interest and of vital importance to the public and Methodism in Minnesota.

On Friday afternoon, the joint session of the two conferences will be held in the Central church at St. Paul and the members of the Northern Minnesota and Minnesota conference will be present, numbering about 600 preachers. Dr. J. F. Chaffee will preach the sermon. Dr. Chaffee is one of the oldest pioneer preachers with a rich style peculiarly his own, and his sermon is looked forward to with a great deal of interest by the church shrdlu shrd of interest by the preachers and laity.

At Minneapolis the annual meeting of the Women's Home Missionary society will be held with an address by Mrs. Anna Kent, of Orange, N. J., and Miss Nellie Snider, of Lena, Illinois. On Friday evening, a big rally and mass meeting will be held in the Hennepin Avenue church at which Bishop McCabe and Bishop Wilson will speak for the Ashbury hospital. Those two speeches will be the greatest feature of the conference, and will mark an epoch in the history of Ashbury hospital which is one of Methodism's richest gifts to the people.

On Saturday afternoon, the Sunday School Union address will be given by Rev. Dr. A. C. George, and at 4 o'clock the Bible lecture will be given by Rev. R. J. Taylor, of Eveleth.

Bishop Wilson will have something interesting to say on Saturday evening at a big temperance meeting, he being the national president of the Anti-Saloon league. The bishop has been an indefatigible worker in the temperance field, and has a store of facts and figures, combined with an enthusiasm for the cause of temperance scarcely second to any person in the United States.

Sunday services morning and evening in the conference church will be in charge of Rev. W. H. Anderson, of New York, secretary of the board of education, who is a most gifted clergyman.

At 2 o'clock there will be the ordination of elders, and consecration of deaconess by the bishop, assisted by the presiding elders and other elders. In the Wesley church, Bishop Wilson will preach in the morning and ordain several deacons for the ministry.

It may be of special interest to know that when Bishop Wilson was consecroated as bishop he was presented to be consecrated by the Rev. J. F. Goucher, D. D. and Rev. M. F. B. Rice. D. D., and that the consecrators were Bishops Mallalieu and Fowler, the latter so well known in the Twin Cities and in Minnesota, where he is highly esteemed

Beer Carriers—17th Century

At that time the most famous breweries in Germany and England were in the possession of the Emperor and the King. Previously the brewing of beer had been one of the prized secrets of convents and monasteries, directed by the skilled hands of monks and assiduously cultivated as one of the important arts.

In our time the art of brewing is indicative of wonderful progress --showing a more refined taste, and also a greater purity and increased food value.

Fitger's Beer

has a wonderful taste and a most refreshing effect. It pleases the eye by its clearness and brilliancy of color and the palate by its delicacy of flavor, due to the finest imported Bohemian Hops. American citizenship entitles you to the best there is in all the world---**Fitger's.**

Fitger Brewing Co. DULUTH MINN.

SPORTS OF THE WEEK.

FOOTBALL SCHEDULE

Games Duluth Central High School Will Play This Year.

Loss of Spencer Will be Seriously Felt by the Team.

High School Football Schedule.
September 29—Two Harbors Y. M. C. A. at Two Harbors.
October 6—Ashland or Grand Rapids at Duluth.
October 13—Aitkin at Aitkin.
October 20 Ironwood at Duluth.
October 27—St. Paul Mechanic Arts at Duluth.
November 3 (probably)—Blaine, at place undecided.
November 10—St. Cloud.
November 17—Minneapolis Central at Minneapolis.

While all of the dates on the above schedule are not certain, Manager Hicken and Faculty Manager Phillips give it out as what is probably the list of teams which the local aggregation is booked to run up against.

The Blaine game is the most doubtful. Principal Lynch of Blaine had an appointment to meet Principal Smith of Duluth, in Duluth this afternoon, and if they can come to some satisfactory agreement in regard to the eligibility rules, which shall be in force between the two schools, the game will doubtless be arranged for the date set. It is thought that arrangements agreeable to both schools can be made without doubt, and in all probability Blaine will be on the schedule for Nov. 3.

Frantic efforts were made by the management to get Ashland over the 'phone yesterday afternoon, but the wire was out of order, so the games for next Saturday are still undecided. One of the two teams will be on the schedule for that date, however.

St. Cloud is one of the school's old rivals who has not been on the schedule for several years. She has put up some strong teams, and has the scalps of several Duluth teams, and as she is said to have an especially fast organization this year, this game will be looked forward to with interest.

Owing to the fact that the Minneapolis Central game is scheduled to be played on the morning of the big Carlisle Indian game at Minneapolis, a large number of Duluth people will probably go down, and the high school boys expect almost as enthusiastic rooting in their game with the school's oldest rival, as they would have were the game played on their home grounds. This game is cinched, all arrangements having been completed.

This afternoon the team is playing its first game with a mixed team at Two Harbors. No definite eleven has been selected as yet and a squad of sixteen men besides Coach Findlay and Manager Hicken are accompanying them in order that they may be tried out.

A severe loss which will be felt all through the season is that of Spencer, crack punter and fullback who has signified his intention of trying to pass the entrance examination for Annapolis and does not think he will have time to prepare for them and study the ethics of football at the same time. Just who will take the position is very uncertain, Spencer being regarded as the only possibility for the place, and no one else being in the field for it. McDevitt may be put back at full and Cummings brought back to half, but nothing certain is known as to what will be done and the final action will probably not be known until just before the game next Saturday. Spencer may be able to play today, but thinks it will be his last game.

The work this week at the Athletic park has been strenuous in the extreme, several of the alumni getting out with the second team and giving the regulars a taste of fast, offensive work. Nothing has been done in regard to working in the forward pass as yet, and the team will play the old style of game with Two Harbors this afternoon, with the exception that a ten yard gain will be necessary in every three downs. With the aggregation which Findlay has picked for the contest, however, this should prove easy, and the score will doubtless be high.

The lineup as definitely as could be announced before the squad left this morning was as follows :

Left end	Cummings
Left tackle	Olson or Paine
Left guard	Porter
Center	Coventry
Right guard	Crawford
Right tackle	Peterson
Right end	Bradley or Clausen
Quarter	Ryan or Caulkins
Right half	McKinley
Fullback	Spencer, Clausen or Pinkerton
Left half	McDevitt

DULUTH ELKS BEATEN.

Superior Aggregation Does Them Up to a Brown Turn.

The Duluth Elks are not specialists in baseball. They put up a great fight, game to the finish, and hard fought from beginning to end, yesterday, but the Superior swamp-jumping aggregation from the Wisconsin herd succeeded in putting it over them a second time by a score of 12 to 7.

Staples, the Duluth pitcher, proved easy for the Superior drove, and they lammed him steadily, only brilliant and heady work by the outfielders saving the Zenith City Elks from a more crushing defeat.

Diegle, who did the slab work for the Superior team, kept the Duluth nine's hits well distributed, though they succeeded in bunching twice, when their seven tallies were made.

Dr. Reinhart officiated behind the bat for Duluth and Donley did the backstop act for the Superior Elks.

"He who despises small things seldom grows rich;" and he who ignores the small ads. seldom even lives COMFORTABLY.

NOT MANY TURN OUT

Autoists Do Not Show Much Interest in the Parade.

Only Third of City's Machines Take Part In It.

Duluth's first automobile day was not a howling success. The motoring fraternity in Duluth is lacking in enthusiasm. When from a total of about eighty machines owned here only twenty-seven can be mustered together for a parade to show the people of the city what the Head of the Lakes has to offer in the way of automobiles, a large portion of the local chauffeurs and car owners must be lacking in the true love of the sport which is said to characterize its devotees.

Some of the finest cars in the city which have attracted the most attention heretofore, were conspcuous yesterday by their absence and while the twenty seven loyal autoists who did have the spirit to get out their machines and enter the procession made a showing whose quality made up for its lack of quantity, one could not help regretting that the other fifty odd machines were not on hand.

F. M. Crouch led the procession in his handsome electric machine while President McManus of the Duluth Automobile association, whose duties as field marshal required his presence at the starting point until nearly all the machines were on their way, was very nearly at the rear end of the procession. Only one business automobile was in evidence, the Mutual Electric company's machine which was the last car in the procession.

No attempt at decoration was made by any of the owners but the Duluth Automobile's Reo carried several members of Flaaten's band, who furnished the musical portion of the program, though an outfit of bag pipes in another machine, in the hands of one who had evidently learned his art in the "banks and braes o' bonnie Scotland' were much in evidence.

The only explanation which can be offered for the unusually poor showing made by the procession, is that its many postponements considerably dampened the ardor of the motorists. The affair was first planned on an elaborate scale for early in the summer, when the cars were to have been decorated handsomely, and the route was to have been much longer. Considerable interest was taken in this at this time but President McManus of the Autmobile club was necessarily absent on business and the affair had to be postponed.

A second time, with great difficulty, the interest of the machine owners was aroused and many of them arranged to come out for the parade, only to be disappointed again for the same reason.

One postponement is usually fatal in an affair of this kind, and two very nearly finished this one. The club is not discouraged however, and plans will soon be underway for a more elaborate celebration of Automobile Day next summer.

HE WILL MEET ALL COMERS

Hackenschmidt, Russian Lion Aims to be Heavy-Weight Pugilist.

London, Sept. 29.—Charles B. Cochran, Hackenschmidt's manager, is amused at the way the sporting writers of the United States are taking the announcement that Hackenschmidt is going in for pugilism.

Mr. Cochran, like an astute manager, religiously reads the American papers. He keeps many on file at his office in Leicester place, just off Leicester Square.

"I notice," he said. "that one paper thinks Hackenschmidt so like other wrestlers that, like them, he is bound to fail at the boxing game. One of them says that Joe Gans would have no difficulty in disposing of Hackenschmidt in a few rounds. Others say that Sam Berger or Jack O'Brien would eat him up. All this sort of thing is easy to write, but at the same time the writers have misjudged Hackenschmidt. He has a great deal more common sense than he is credited with. He is not going to adopt pugilism because he is the strong man or the champion wrestler, but because he has developed himself in boxing until he and experts on this side of the Atlantic figure that he can win the championship of the world. This result isn't one achieved mainly by talk and on paper, but by real hard work.

"Look at Jeffries. He was a 'strong' man at first. Look at the roast he got when he tried to tackle Armstrong and O'Donnell, the same night in the old ice palace on Lexington avenue, New York. But he kept on going and won out.

"If Joe Gans' manager thinks Hackenschmidt easy he can make a match, but he would perfer heavyweights, and the holder of the fistic championship is the man we are after. If Hackenschmidt is told to go get a reputation in the United States we will be willing to meet all comers. We would have been there this fall but for the Frisco disaster. We figure that any big fight would be pulled off there, and that we had better wait. But I see now that Nevada is in the ring, and that Eddie Graney is putting up the same old big purses, and that's what we want. If Graney or any other responsible man will offer a purse of $40,000 for the championship of the world, the match is made so far as Hackenschmidt is concerned.

"Hackenschmidt has had the fighting bug in his head for some time and for the last year and a half has been working steadily at it. He has had as instructors the best boxers of Great Britan and with him it isn't, as I have already said, merely the question of the strong man. He is as quick as a cat, as scientific as the best of them and as good a fighter as he is a wrestler. Hackenschmidt's idea is to make a big wad of money in the next two or three years and then retire and become a country gentleman and a farmer. The boxing game is too small over here and so must look to the United States. So far as England is concerned, Hackenschmidt has defeated in secret the heavyweight champion of England. Gunner J. Moir, who is also the champion of the British army. It was a good scrap, but the wrestling champion put it all over the Britisher and won as he pleased.

"Englishmen well up in the game and who have seen all the big fights of the last decade or so declare that Hackenschmidt is better in every way than Jeffries ever was. The style of the two men is very similar, in crouch and other methods. Hackenschmidt has been tried out with every boxer of note in England, middle and heavy, and now the private match with Moir has proven to us that he is all he claims. I cannot give the exact date when Hackenschmidt will go to the United States. That depends on when they are ready for a championship fight. I have been busy booking dates for him at variety houses here and on the continent for the next few months, but as soon as we are assured that the game is ready, we will sail for New York. On Hackenschmidt's behalf I hereby issue a challenge to Jeffries and to all comers for a fight for the championship of the world, details to be hereafter arranged."

AFTER SEMI-PROFESSIONAL CHAMPIONSHIP

DULUTH UNIVERSAL MILLERS BASEBALL TEAM, WHICH WILL PLAY HOOLIGANS FOR HEAD OF THE LAKES CHAMPIONSHIP.

TOP ROW—Bouska, second base; Olson, shortstop; Foubister, manager; Lavick, mascot; Witt, sub-pitcher; Coughlin, first base; Olson, sub; Carey, fielder.

FRONT ROW—Robinson, catcher; Larson, pitcher; Coombs, left fielder; Heideman, center fielder; Salvoy, third base.

EFFORT MADE

To Down Danny Maher In England Was Not Successful.

London, Sept. 29.—That a determined effort is being made to drive Danny Maher, the great American jockey, from the English turf is certain. That it will be unsuccessful seems to be equally certain. Maher's skill, his perfect honesty and fair riding have made him immensely popular with the racegoing public, and have made him powerful friends who are able to protect him against his enemies, who are numbered principally among that small class, which is steadily losing influence, who are jealous of all things American. At the present meeting at York, Maher accidentally bumped the favorite in the race and put him out of the running. Danny was reprimanded by the stewards of the meeting. His enemies seized the opportunity and insisted on more drastic punishment at the hands of the Jockey club. A further investigation was held and Maher was exonerated. The decision of the Jockey club gave very general satisfaction.

SULLY'S TITLE.

Puzzling What to Call James E., Who Got Decoration.

New York, Sept. 29.—The many friends of James E. Sullivan, secretary of the A. A. U. are puzzled what to call him since he was decorated by the king of Greece for the fine work he did in connection with the Olympian games at Athens. Mr. Sullivan has been decorated with the Golden Cross of the Royal Order of the Saviour, which makes him a chevalier or its Greek equivalent. It would perhaps be proper to address him either as Sir James or Chevalier Sullivan. One thing is sure, plain American Jim Sullivan is a royal good fellow, who knows athletics from the ground up, and King George showed unusually good judgment in getting him into his royal order.

Hyland Got Decision.

San Francisco, Sept. 29.—Dick Hyland was given the decision over Eddie Hanlon at the end of the thirteenth round here last night.

Tipping is Winner.

New York, Sept. 29.—Tipping, at 40 to 1, won the Sea Breeze selling stakes, one mile and a sixteenth, the feature at Gravesend yesterday.

INVEST your time—it is better than to merely SPEND it. A little of it INVESTED every few days in answering Herald want ads. will often lead to dividends for life.

CURLING IN HIGH FAVOR

Increasing Popularity of the Game at Head of Lakes.

Plans for Big Bonspiel in January Are Already Making.

The curlers are beginning to sit up and take notice. It is nearly two months before there is the slightest prospect of good ice but plans for the coming season are already under way. Secretary A. H. Smith of the Duluth Curling club says that he had an unusually large number of inquiries from new comers to the city, and old followers of the Scotch game who have taken an interest in it before, regarding memberships in the club, and there is every prospect that the list of over 250 who are already enrolled will be considerably swelled before the opening of the season.

The fact that the big bonspiel is to be held here in January may account for the increased interest in the sport to some degree, but Mr. Smith attributes more of it to the increasing popularity of the game at the Head of the Lakes. Plans for rinks for the bonspiel are already under way in many of the towns which are scheduled to compete and the Twin Cities are especially active, the rivalry between the various clubs in Minneapolis and St. Paul being very sharp.

A great increase in membership of the Duluth Curling club will soon necessitate improvements and enlargements on the Third avenue east rink, but nothing will be known about this until the first meeting of the directors of the association.

The West Duluth curlers are also making plans for the winter. They enjoyed a most prosperous year last year, their skating rink going a long ways toward paying the total of the club's expenses. About sixty members are expected to open the season at the first good ice.

A number of improvements have been talked of, such as removing the poles in the skating section, enlarging the whole building, etc., but one of the directors said yesterday that he did not think that the club would attempt any extensive changes this year, and that they would not remove the poles in the skating ice until they enlarged the whole building. It is thought that the two rinks for curling which are now ready for use as soon as the ice will form will be sufficient for all the members this winter. An enlargement of the wating and locker rooms has of the waiting and locker rooms has erede and may be introduced.

The first meeting of the directors of the Western Curling club will be held during the first part of October.

SPORTING COMMENT

Chicago appears to have completely forgotten to feel grateful to the Bostonians who gave her such a boost towards the top while the Tigers were taking it out of New York.

• • •

A telegram stated that those enthusiastic Cleveland fans built bonfires all over the stands to help the Naps see the ball and defeat the Highlanders. What kind of stands do they have in Cleveland? Imagine some exicted Duluth boosters building fires on the grand stand at Athletic park.

• • •

By putting up over $1,000 that Nelson's charges as to his unfairness in the Goldfield fight are untrue, Referee Siler has given the Dane the opportunity to "put up or shut up," and if "Battling" ever expects to regain his standing with the sports, it is up to him to make good.

• • •

Why don't the Northern league fans get up as much enthusiasm as those American leaguers. Houghton and Calumet's finish was every bit as spectacular as the Chicago-New York fight though it didn't last so long.

• • •

To beat Blaine and Minneapolis Central is the highest ambition of the Duluth high school eleven this year. If they don't do it this season, it will be a long time before they accomplish the feat, but chances certainly look rosy now.

• • •

The need of a gymnasium for high school students is emphasized by the measures the girls of the school have been forced to take in order to play basket ball. They are going to join the Y. W. C. A. and as this costs $5, and the uniforms at least $5, the total is absolutely prohibitive of a large number.

• • •

A. J. Lyle is enthusiastic over the prospects of soccer football in Duluth. It is a fast and strenuous game, and in the words of the Immortal Rip, "may it live long and prosper," at the Head of the Lakes.

• • •

Duluth boys are showing up strong in university athletics this fall. Graham, the 198 "moose" who held down the central position on the local high school eleven two years ago, is playing on the second team under "Doc" Williams' tutelage, and Orren Safford also one of Duluth's old center rushes, is playing the same position on the first. Lucius Whipple is also out for football honors.

TEMPLE ROLLER RINK.
Second avenue east and Superior street. Open every afternoon and evening, except Sundays. Matinees, Wednesday and Saturday. La Brosse's band. Children's day, every Saturday, from 10 to 12.

OLD SORES CURED
ALLEN'S ULCERINE SALVE.
Cures Chronic Ulcers, Bone Ulcers, Varicose Ulcers, Scrofulous Ulcers, Mercurial Ulcers, Fever Sores, Gangrene, Blood Poisoning, White Swelling, Milk Leg, Poisoned Wounds, All Sores of long standing. Positively never fails. Draws out all poison. Saves expense and suffering. Cures permanent. For sale by druggists. Mail 50c and $1. J. F. ALLEN MEDICINE CO., St. Paul, Minn.

THEY LOVE DETROIT

Michigan Town Can Get Anything It Asks at Chicago.

Put New York Out of Running for American Pennant.

While the greatest interest in the pennant scrap in the American league has now dropped from the contest for first to that for second position, the three leaders are all close enough together to give any one of them a chance to come out in the lead. New York's series with Cleveland is attracting almost as much attention as did the series with Chicago, and the fans in the lake town are nearly wild over the way things are going.

Thursday Cleveland took the first of a double header, and with the score tied in the second, the game was called by the umpire on account of darkness. Though the last part of the seven innings was played by moonlight, aided by the many bonfires built by enthusiastic fans all over the stands, the umpire was warmly reviled for calling the contest with the result still a tie.

Yesterday's even break only makes things more tensely exciting, and the Cleveland fans are turning out attendances to rival Chicago.

The pennant fight got warm enough to attract general interest about the first of September. The first day of the month saw Chicago six games ahead, New York second, with Cleveland in fourth place, and the Philadelphia Athletics the nearest rivals of the Highlanders. A bad losing streak for the White Sox considerably diminished their lead, and on Sept. 4, Chicago losing two games to Cleveland, and New York winning a double header from the Athletics, a general change took place. Cleveland took third place, and New York jumped to the lead, one game to the good. Chicago again got the lead on the 17th of the month, but on the 22nd commenced that awful heart-rending series for the Windy City fans, in which a double header, won by the Highlanders on the first day, put them in the lead, and in which they took three out of four games from the White Sox, giving them a clear lead of one game.

And then the league leaders, triumphant and over confident over their victories from the Chicago bunch, met Detroit. The carnage was awful. Three straight games did those Detroit Tigers put it all over the New Yorkers, the first tying the percentage between the Highlanders and the Sox; the second, thanks to Chicago's easy victories from Boston, putting the Windy City team one to the good, and the third, a complete shut out for the Highlanders, still further diminishing their chances for the pennant.

The Chicago fans did not fail to appreciate the good work. They sang anthems in praise of the Tigers, and numerous were the celebrations in their honor. How thoroughly the appreciated them may be judged from the following effusion in their honor by W. S. Phelan in the Chicago Journal:

"If you have never seen Detroit, you should take a trip there without delay. It is a well-built city, with fine streets, beautiful homes, and a ball park. It is inhabited by good fellows, merchant princes, and ball players. It is populated by generous and noble souls, who always like to do others good. That remark goes two ways from the jack, and takes in the lookout. If it hadn't been for Detroit the Sox wouldn't be on top of the parade today.

"In 1763 Pontiac, a ferocisu Injun chief, tried to destroy Detroit. Holy mackerel, what if he had succeeded! There wouldn't have been any Detroit, there wouldn't have been any Tiger ball club, and the Sox would still be among the also-rans. Let us all give thanks that Pontiac foozled his approach. If he rhad won out they would have played lacrosse yesterday, and the Sox wouldn't have acquired the lead.

"The Detroiters are a tactful and thoughtful race. Especially their ball players. Particularly Bill Coughlin. With two out in the ninth inning and the proud New Yorks a run to the good, the Tigers managed to populate the sacks. Two strikes on Coughlin. Bing: Ball down by the clubhouse, sacks unpoulated, New York in the scuppers.

"But what if Pontiac had fried the town in 1763?"

At this juncture prose became to inexpressive for Mr. Phelon's thoughts and he burst into rhyme thus:

"Oh, Detroit, accept our gratitude!
This is not an idle platitude—
Please believe our present attitude
Is sincerely on the level!
Yesterday we labored hard,
Down in Commy's big back yard;
Just one thing our pleasure marred—
Hurt us like the very devil!
As we pulled in one game more,
On the board, the fleeting score
Had New York 5, Tigers 4—
Such an awful blueness!
Then we heard how Coughlin's bat
Knocked the hopes of Griffith flat,
And we wore a size 9 hat
At the gorgeous rudeness!
Say, you Tigers, if you'll stray
Any time along this way,
We will make the livelong day
One of gladsome greeting!
We will buy you half the earth—
Any price—that's what it's worth—
Just to give you jovial mirth
For that noble beating!"

Nor does the Chicago fans, gratitude confine itself to empty wind, for rumor, strangely unconfirmed but none the less strangely persistent has it that a bunch of Windy City sports has offered a purse of $250 to every pitcher who succeeds in ousting the Highlanders, and it is said that the three Detroit slab artists who succeeded in vanquishing the New Yorkers actually received this amount. The identity of the party or parties giving this bonus it has not been ascertained, but it is said to be a syndicate of Chicago sporting men who have wagered thousands of dollars on the White Sox winning the race. Another story is that the Chicago club, through an unknown agent, is offering the big inducements.

Impartial fans everywhere are rooting for the White Sox with a view to furthering the prospects of a post-season championship series, between the two Chicago teams, the Reds, who represent the Windy City in the National race, having the pennant absolutely cinched, with a lead of nearly twenty games. A series at Chicago would draw fully as large a crowd as did the post-season series at New York last fall.

The Cleveland papers keep reminding the fans that the "Naps" are a long way from out of the race yet and their prospects for second place certainly look good, and they have a fighting chance for the pennant.

CHICAGO CLUB WINNERS IN NATIONAL BASEBALL LEAGUE

In the top row are five twirlers of the Chicago National League team, the pennant winners of 1906. In the bottom row are Manager Frank Chance, whose heady work on the field was largely responsible for the success of the Spuds; Harry Steinfeldt, leading batter of the team, and Jack Pfiester, another of the Spuds' winning pitchers.

Boston	136	46	90	.338

NEW YORK WINS AND LOSES.

Cleveland, Sept. 29.—Cleveland and New York broke even yesterday, New York winning the first, 2 to 0, while Cleveland took the second, 2 to 1. Scores:

First game— R.H.E.
Cleveland .....000000000—0 3 1
New York .....00010100 0—2 7 0
Batteries—Tess and Bemis; Clarkson and Thomas. Umpires, Connolly and Hurst.

Second game— R.H.E.
Cleveland .....00100001x—2 10 0
New York 00000010-1 4 2
Batteries—Ross and Clarke; Hogg and Themas. Umpires Hurst and Connolly.

PHILADELPHIA WINS IN THE EIGHTH.

Detroit, Sept. 29.—Detroit knocked Coombs out of the box in the seventh, tying the score. But Donohue again weakened in the eighth and the Athletics made the score 7 to 4 on four singles. Score:

R.H.E.
Detroit .....0001003 00—4 8 2
Philadelphia .....0040000 30—7 14 0
Batteries — Donohue and Schmidt; Coombs, Dygert and Berry. Umpire, Evans.

RAIN AT ST. LOUIS.

St. Louis, Sept. 29.—Yesterday's game between St. Louis and Boston was postponed on account of rain.

National League.

CHICAGO, 7; PHILADELPHIA, 3.

Philadelphia, Sept. 29.—Chicago yesterday defeated Philadelphia through good work. Score: R. H. E.
Chicago .....2400000 01—7 14 2
Philadelphia .....1010100 00—3 7 3
Batteries—Ruelbach and Kling; Lush and Dooin. Umpire—O'Day.

EVEN BREAK AT BROOKLYN.

Brooklyn, Sept. 29.—The Brooklyn and Pittsburg teams broke even in yesterday's double-header. Scores:

First game— R. H. E.
Pittsburg .....0010030 00—4 9 0
Brooklyn .....0000022 01—5 15 2
Batteries—Brady, Leever and Peitz; Scanlon and Bergen. Umpires—Johnstone and Emslie.

Second game— R. H. E.
Pittsburg .....0010000—1 5 0
Brooklyn .....0000000—0 3 1
Batteries—Camnitz and Peitz; McIntyre and Ritter. Umpires—Emslie and Johnstone.

TWELVE INNINGS AT BOSTON.

Boston, Sept. 29.—With a hit over the left field fence, Schiel won yesterday's game from Cincinnati in the twelfth inning, scoring nimself and Smoot. Score: R. H. E.
Cincinnati .....0000000000002—2 8 1
Boston .....0000000000000—1 10 2
Batteries—Ewing and Schiel; Dorner and Browne. Umpires—Conway and Supple.

NEW YORK, 8; ST. LOUIS, 2.

New York, Sept. 29.—Beebe was batted hard. New York beat St. Louis 8 to 2. Score: R. H. E.
St. Louis .....0000001 01—2 5 3
New York .....1010006 0x—8 9 3
Batteries — Beebe and Noonan; C. Mathewson and Bresnahan. Umpire—Rigler.

MUNROE HEARD FROM.

Gives Opinions of Fighters and Purses of the Day.

Montreal, Sept. 29.—Like a voice from the dead, Jack Munroe is making himself heard once more. In a letter to a friend in this city, Munroe says:

"Speaking of champions, it is to laugh. Look at the bunch of them—Tommy Burns, Jack O'Brien, Marvin Hart, Gus Ruhlin, Mike Schreck, Sam Berger and others. I wonder if any one believes any of those fellows are in the championship class? Why, any of those fellows, with the possible exception of two, would fight for a meal ticket, and the best men in the game will not fight for such compensation.

"The really good men can make more money in other occupations. That is retrograding.

"Champions who were champions, such as Sullivan, Corbett and the great Jeff, spent more money in a day than any of the present crop of 'champions' could make in five years. It is impossible to get the best men for the cheap purses offered these days."

HIS MERITS RECOGNIZED

Boston Herald: About a year ago there came to Lewiston, Me., a man with a large family, who was employed as a gardner by a prominent minister. All went well until the minister discovered that his gardner was appropriating many things which belonged to his household. He tried to show the gardner the error of his ways, but to no avail, and finally discharged him.

The gardner tried to get employment elsewhere, but was informed that a reference from the last man he worked for was needed. He returned to the minister and asked for a reference. The minister, pitying the man's family, and not wanting to certify to an untruth, wrote the following:

"This certifies that Mr. B. is a very good worker, and that he got more out of my garden than any one I ever saw."

The gardner got the position.

A RUNAWAY RACE HURT

Boston, Sept. 29.—Another runaway race in the National league.

Finding New York and Pittsburg weakened and tender the Chicago Cubs tore through the old organization like a bird dog through a light brush. For the last month the Chicago comers have floated along on the top wave, as happy and contented as a lot of jolly sailors homeward bound, eager and confident as to the outcome of the post series. Nothing less than explicit confidence could have landed this team where they are today, for it was no mean contract last spring to set out after New York and Pittsburg, clubs that were handled by men willing to pay the price and ever on the alert to find the best on the market. The most remarkable thing about Chicago's success is the winning of games with a very ordinary string of pitchers, showing the superiority of a fine all-round ball team not depending on box men. The success of the pitchers came about as the result of extra fine support of each department, outfielding, infielding and backstopping.

No other team in the business can show as fine all-round form and the only chance any other team has of beating the Cubs for honors must come through a better string of pitchers, and this will be a difficult problem in a short series, where Chance can use the pick of his box men. The Cubs are not invincible, but it will take some fine work to land them.

A runaway race means big financial losses after September sets in, and for this reason the National league will have made little money this season outside of New York, Chicago and perhaps Pittsburg. For in the latter city the attendance has fallen off materially as soon as it was certain that the Dreyfuss boys were out of the race. I heard one of the Cincinnati players say that his club played to less than 3,500 people there on Saturday, Sept. 15. Rather small crowd for a Saturday. Had Pittsburg been in the race the crowd would have been 10,000. It will be several seasons before the three league leaders will be troubled, as the other five clubs have no earthly show to make one of those positions. In time Cincinnati will come to the front as the result of a management willing to hustle for the talent and with plenty of money. There are just two men in the major league business who can land pennants without any great outlay of money for ball players—Connie Mack and Charley Comiskey. And at that they will go out and pay for the right men, but must get talent for players received.

The American League was lucky to have four teams in the race. This means big money for the organization where, outside of Detroit, business has been great this season. Even Boston did nearly as well as when in the race. A fact that has been noticed and favorably commented upon all over the country.

There was good reason for the loyalty of the Boston public to the American club. It was a high-priced aggregation and there was nothing left to do but give the boys a chance—boys who had landed the money before and were considered capable of turning the trick once more, until sickness, accidents and other troubles that the club owners could not prevent in time. Boston loves a winner and always respects a management willing to pay the price for the best men in the market.

Detroit has soured on the present baseball club. And there must be some good reason, for baseball is a favorite sport in that city and the press is fair and encouraging. I notice when a player signs a Detroit contract he finds a clause giving the club the right to transfer him with the franchise to any other city they may change to. This is a tip that the club owners are not fully satisfied with conditions and may some day ask to have the franchise transferred to some other city.

The game is so popular from one end of the country to the other that it seems a National or American League franchise would pay in any old city, if only to have a look at the great players of the national game. Detroit was led to believe that the team had a look-in for the pennant this spring, and the team failing to keep in the hunt, soured the fans. The members of the team were never serious enough and were never handled by men capable of steering a team into first place; the result was a disappointment all around and a public that will be hard to bring around once more. The country is full of large cities willing to take a major league franchise and it pays now and then to pass up some large burg that has soured on the sport because they cannot land the big prize.

President Harry Pulliam tells me that he will go abroad right after the world's series and be gone until two days before the annual meeting of the National League in New York in December. Harry will hit the Azores on the way over, do the Mediterranean ports, dash through Paris, take a fall out of dear old London and take a dreamy float about the Lakes of Killarney before returning to his native land. It will be as a gentleman from old Kentucky that Harry will swing around the circle and keep a note book to show his friends later.

Robert Unglaub has managed to keep before the baseball public this season, although with the Pennsylvania outlaws.

As far as the national agreement goes Unglaub is still the property of the Boston Americans and no one has been given a right to do business with that player. Some time ago Sir Robert wrote to the Boston management saying if his terms were not acceded to inside of two weeks he would sign with the New York Giants. Wasn't that good? Sign with a National League club! Just as if any but the Boston club could do business with him. I see that some Cincinnati writer claims that Unglaub was a part of the deal where Boston secured Jack Hayden. There is no truth in that story. The Boston club purchased Hayden's release from the Cleveland club. As Cleveland won the man from Baltimore by draft and not by purchase or trade Boston has a clear title to both Hayden and Unglaub. As Boston is looking for a third baseman and not a first baseman Unglaub would not help out to any great extent, although he covered third base last fall for the Boston Americans when they won fourteen of the last sixteen games played. Jimmie Collins couldn't see Unglaub this spring and allowed him to go to the outlaws. I feel sure that a little more attention to business would have landed Unglaub in a walk.

I was in the country of the outlaw last week, and must say the public out that way are fond of baseball, when their teams are in the race. Things went to the dogs at Harrisburg, where they dropped over $5,000, and now they are raising money to pay up and start over again, accepting from 10 cents up, to help along the cause. I wonder where that bunch of millionaires that Billy Hamilton had in line have vanished to. The swell boys tire very soon when they have to dig to pay for a loser. Good losers among the millionaires are like white whales—hard to find—but juicy picking when found and worth nursing to the limit.

The Boston Americans should have an up-to-date outfield next season with Hoey, Stahl, Hayden, Sullivan and Barrett to select from. Jimmie Barrett has been for nearly three months with Rochester, of the Eastern league, improving in speed, until the last month he displayed his old-time form and was secured by the Boston Americans, with several major league clubs on his trail, but too late.

T. H. MURNANE.

"Don't take a musket to kill a fly." A very small ad. is for a very small service.

DUCHESS AND SERVANTS.

The Duchess of Devonshire has a great belief in the duties of a mistress toward her domestic servants and considers it to be one of them to keep in touch with them socially, says the Kansas City Journal. She often reads aloud to them in the servants' hall and plays chess with them and she does not hesitate to ask her guests to aid her sometimes by the exercise of their musical talents.

COACH FINDLAY AND THE MATERIAL OUT OF WHICH HE HOPES TO MAKE A WINNING TEAM.

THIS BUG IS INCURABLE

Once Man Gets Motor Racing Fever He is a Maniac.

Oldfield, Kiser, Jay, Bald and Others Are Examples.

Barney Oldfield and the other speed maniacs who have visited San Francisco have failed to send shivers down the spinal columns of the spectators there who have witnessed their feats; the explanation of the flyers was that there was no ideal speed track there where they might let themselves out without courting certain death.

On perfected Easternn tracks and on the carefully prepared courses of Europe they have performed feats in racing with death that have given the spectators the full gamut of nervous tremors.

This speed mania is the one disease for which there is no cure.

Once a man becomes inoculated with the germ of fast flight, he never slows up.

The careers of Oldfield, Bald, Kiser, Cooper and Webb Jay prove this. They were bicycle riders till something faster came along in the form of the auto. If modern skill produced something that could go more rapidly still they would promptly adopt that.

These men have figured in harrowing accidents. Their machines have killed others and seriously injured themselves. In the revolt that followed these tragedies they have sworn to give up auto racing, but the fascination has always been too strong, and they were soon back again. In fact, it is safe to say that none will retire till he meets the inevitable death or disabling injury that must come to the professional chauffeur who makes his living by match racing over circular tracks.

Kiser and Webb Jay have already received the summons that took them out of the game.

It was at Kenilworth park, Buffalo, Aug. 18, 1905, that Jay swerved from the track while speeding in his machine, plunged down an embankment, broke his right arm, left thigh, seven ribs and sustained a concussion of the brain.

This accident followed hard upon one that had put Earl Kiser out of business. This happened in Cleveland, six days before the Jay accident.

Kiser was going at the rate of a mile a minute in view of 5,000 persons on the Glenville track, when his machine skidded, and he lost control. The auto swerved toward the fence, then jumped about four feet into the air and came down into the fence with a crash, pulling down a section of the boards thirty feet in length. The machine came down upon Kiser. An instant later it caught fire, and only fast work in getting Kiser out kept him from being burned in addition to all his other injuries.

His leg was lacerated to a pulp, and had to be removed at the thigh.

It might have been supposed that these horrible accidents coming so closely together would have had the effect of scaring the other speed kings but only death will ever take Oldfield, Cooper, Bald and a constantly increasing host of others out of the game.

Oldfield is probably the most reckless man who ever competed in any trial of speed. His thory of winning races is always to increase the speed at the points where it is so dangerous that most other drivers ease up a bit. On the most dangerous turns Oldfield takes a delight in shooting faster to the mingled wonder and horror of his fellows.

He has been in more accidents, caused more fatalities and broken more records than any auto driver in the business, and he makes no secret that he expects to get his death while engaging in his favorite sport.

"One of these days," is his favorite speech, "there will be a little flaw in a piece of steel, and after it is all over—and it won't take longer than the tick of a watch—people will say, "Well Oldfield was going some."

Probably his nearest approach to death was at League park, St. Louis, when he was racing A. C. Webb. The dust raised by his competitor's machine temporarily obscured Oldfield's view of the track, and his machine slipped just a trifle. He lost control of it on the unbanked curve of the back stretch, and it slashed into the fence, throwing the dense crowd of men and women who had been watching the race on all sides like so many jackstraws. John Scott and Nathan Montgomery, two spectators, were instantly killed, and when Oldfield was picked up it was thought he had no chance to survive. Four of his ribs were broken, his leg was hattered, brain contused, and the shock left him a nervous wreck for a time.

Oldfield recovered, and when he did his first remark was that he was done with auto racing.

"I do not care about myself," he said, "but the thought of those two innocent onlookers killed haunts me night and day, and I shall never touch a wheel again."

But much as he meant it, he couldn't keep out. From the time that he left Indiana as a youngster, the one consuming aim of his life had been speed. As a bicycle rider he had won the reputation of being especially daring, though his future automobile rivals, Cooper and Bald, were both far fleeter on the bicycle than Barney.

From riding a wheel he became a fireman of the fastest locomotives, but this was too slow traveling for the speed demon. Then along came the auto that satisfied all his cravings, and now Oldfield can go as fast as he wants.

Two years before the St. Louis accident Oldfield had a notch on the wheel of his machine. The tragedy occurred at the Grosse Point track, in Detroit, when the tire on his front wheel burned through and exploded, throwing his machine into the fence, and so injuring a man named Frank Shearer that he died on the way to the hospital.

His next narrow escape came at the Ormond-Daytona beach in Florida. The crank shaft broke while his machine was wheeling off miles in forty seconds. The car spun around, and headed for the ocean, but Oldfield succeeded in stopping it before it overturned. He was badly shaken up, but was out again and racing the next day.

THE CRIPPLE CREEK DISTRICT

Likely to Increase Its Production Rate This Month ---Minnehaha Claim of Jennie Sample Company Makes Rich Strike.

Colorado Springs, Sept. 29.—The Minnehaha claim of the Jennie Sample Gold Mining company on Raven Hill, Cripple Creek, is in a five-foot vein of ore, with an extraordinary rich streak of sylvanite ore in the center. The strike was made in a cross-cut vein forty feet west of the shaft, concerning which there is a controversy with the Ophir company. The Jennie Sample is plaintiff and the Ophir defendant in a $200,000 damage suit for alleged wrongful extraction of ore. There is a large ore body underlying the two properties.

Negotiations are pending for the purchase of the Rocky Mountain Gold Mining company's estate on Beacon Hill, Cripple Creek. The area comprises nine acres and includes the Rocky Mountain and North Star claims.

The September production at Cripple Creek may exceed that for August, although restricted by lack of mill capacity. The Leadville output will show an increase.

James A. and Elmer Bishop of Chicago, members of the board of trade, have purchased the Sunburst, Astral and Sceptre groups of mines in Upper Clear Creek district, near Georgetown, Colo., for $280,000. The purchasers will operate as a close corporation under the old name, the Red Oak Mining & Milling company, with $385,000 capitalization.

A New York and London syndicate has been testing the North American placer on Swan river by drills, with a view to purchase and extensive development.

Idaho Springs capitalists have taken a lease on a block of ground in the Trentina vein in the Newhouse tunnel and will seek the ore shoot that pinched off after yielding much wealth. The Newhouse company bought the Trentina lode for $1,500 just after it had been cut by the tunnel. Within three weeks two men extracted 20,540 pounds of ore, which yielded $1,-399.99 net to thee company. Since then liberal returns have been received from other shipments. The vein is one of the most promising yet opened by the tunnel.

The plans of the management of the Clear Creek and Gilpin Mining Drainage & Transportation Tunnel company of Dumont, Colo., call for the erection of a new power house 500 feet below the site of the present mill. Bids have already been called for the construction of a pipe line 48 inches in diameter and 3,750 feet long to supply the water power for the turbines and dynamos. The new plant will provide necessary power for drills, transportation and fans for the tunnel, besides a surplus which will be sold to other mines of the district. The company owns in fee ninety-two properties, covering about 500 acres, besides forty-five acres along the bed of Clear creek, extremely valuable for mill site and waterpower facilities, a reservoir site of 100 acres near Empire and 1,500 inches of the waters of Clear creek for a distance of four miles.

The American Smelting & Refining company has contracted with the Huntington-Heberline Furnace Manufacturing company of New York for supplanting roasters now in use in its extensive Colorado plants with mechanical furnaces adapted to economic treatment of low grade mill as well as bonanza ores. The present equipment is not successful in handling sulphide ores, which prevail in the lowest workings generally throughout the state. Mechanical furnaces similar to those in successful operation in Montana copper smelters will treat these and other ores. The expenditure will approximate $1,000,000. The improvement will materially increase Colorado's mineral product.

Henry B. Clifford and associates of New York, who are interested in Colorado and Nevada mining properties, propose to erect a mill of 1,000 tons daily capacity, at $1,-000,000 cost, to treat ores of Clear Creek and Gilpin counties, particularly the sulphide ores of the Great Gem mine, in which the Cliffords are interested. The straight stamp mill system has obtained in this field for thirty-five years. In the company's present mill, of 300 tons capacity, experiments to ascertain the best treatment process have been made on all ores uncovered. The company believes it can install a plant that will treat $1 a ton ore with profit.

NO COPPER RESERVE STOCK

(Continued from Page 1, Second Section).

face of the opening is nearing a point 700 feet from the station.

* * *

According to Amasa P. Peake, work has been resumed on the Black Rock mine, owned by the Butte & Superior Copper company. Mr. Peake left for the East Wednesday night and before starting said that the company was cutting a station at a depth of 500 feet in the shaft and would begin sinking as soon as the work was finished. As to the depth that would be sunk, he said he did not know anything, but considerable of a hole would be made. Mr. Peake stated further that the company had practically sold all of its stock.

* * *

The Parrot company is leaching copper from the old dump at its smelter and is extracting 2,200,000 pounds of the metal per annum. This dump contains about 300,000 tons of the material that carries 1 per cent copper, or twenty pounds to the ton, and it is estimated that the company should secure at least 6,000,000 pounds of the red metal from the lot. It is making a fine saving, having adopted up-to-date arrangements for precipitation. Before the company took hold of the work, lessees operated the plant and made a lot of money out of it.

The old Parrot smelter had a capacity of about 600 tons a day and was operated many years on ore from its own mines and ore bought in the market. All of the copper-silver ores were run through the concentrator, with the result that 1 per cent of the copper was lost in the tailings. These tailings, however, were impounded with a view of retreatment at some time when a more perfect method of concentration was discovered, and the company is now deriving the benefit of its foresight in preventing the mineral laden stuff from flowing down the creek.

* * *

The East Butte company owns some land on which some of the tailings are deposited and is also precipitating, having erected a plant recently.

Of all the precipitating plants in Butte, and there are many, the Boston & Montana has the largest, although there are several in which a good saving is made. The plant of the Boston & Montana was established at a cost of about $20,-000 and into it flows all of the water from the workings of its mines.

* * *

Important improvements are in progress at the property of the LaFrance Copper company, formerly the Lexington. The company has been and is now hauling away its ore production in wagons, which is not only expensive, but slow, especially in bad weather, and with a view of remedying this and facilitating the handling of the output it is building a tramway from the shaft to the top of the hill east, at which point there is a branch of the hill line of railroad. An ore bin will be built on top of the hill and the railroad cars will be loaded from it. The ore cars from the mine will be run up the tramway by means of a hoisting engine stationed at the east side of the road, opposite the shaft. The larger part of the tramway is finished, and the engine is in place.

* * *

Articles of incorporation for the Butte-Curtis & Majors Copper Mining company have been filed in the office of the county clerk and a copy sent to Helena to be filed in the office of the secretary of state. The company will operate in the Curtis & Majors addition, in the southeastern part of the city, in which successful mining has been carried on for several years. The addition is just south of the Belmont mine, owned by the Anaconda company, and adjoins the Farrell company's ground on the east and west. The Greene Copper and the Butte Central ground is also on the west, both of which have been developed into producers.

* * *

The Butte-Milwaukee company made its first shipment of ore last week, sending out a carload of silver-gold product from the Pollock mine. The ore came from the 250-foot level and runs fairly good in silver, but does not carry a great deal of gold. The ore was loaded at the Alice switch. It is the intention of the company to arrange for hauling to a 300-ton chute to be built near one of the hill branches below the mine which will make it much easier for horses and the men engaged and also facilitate the handling of the output. The present condition of the workings is such that a carload a day can be extracted and could be shipped if cars could be obtained, but there si a scarcity of cars. The company is now crosscutting for the two north veins and expects to cut the nearest one in about twenty feet from the face of the opening, which is about forty-seven feet fro mthe shaft.

* * *

No. 1 shaft of the East Butte Mining company has reached a depth of 500 feet and No. 12, the four compartment shaft being sunk at the southern end of the company's ground and to be connected with No. 1, has reached a depth of 210 feet. Some cross cutting has been done on the 400-foot level, and several veins have been opened, but no drifting will be done until the shaft is 1,000 feet deep. The East Butte lessees are mining about 150 tons of ore daily at present.

About ten acres of mineral ground lying east and west of the East Butte company's ground, which was in litigation between the Amalgamated and F. A. Heinze, has been equally divided between the Boston & Montana company and the Red Metal company by the Heinze settlement, and each company will mine its part of the ground. There are several rich copper veins in the ground, which have been opened by the East Butte company.

Since the developments made by the East Butte company the Butte & Boston has determined to reopen its Silver Bow No. 3 mines, which lies just northeast of and adjoins the East Butte. It had been the intention of the company to dismantle No. 3 and work that property through No. 1, but the work of dismantling has been stopped.

* * *

During the first six months of the present year the Washoe smelter of the Amalgamated company produced 94,241,-911 pounds of copper, 31,811,735 fine ounces of silver and 22,567 fine ounces of gold. The smelter of the Boston & Montana company at Great Falls (Amalgamated) produced during the same period about a third as much as the Washoe.

At present the Washoe smelter is producing copper at the rate of 11½ per cent of the total in the United States. The Washoe production last year was one-tenth of the world's production. Last year the smelter produced 165,965,144 pounds of copper, 7,046,485 fine ounces of silver and 49,655 fine ounces of gold.

An important by-product of the Washoe smelter is arsenic, which is extracted from the flue dust. In 1904, when the arsenic plant was started, 2,597 tons of flue dust were treated. The following year there were 3,169 tons and during the first six months of the present year 2,291 tons were treated, a total for the entire period of operation of 7,997 tons. Up to the first of July of the present year, 1,107,178 pounds of arsenic had been recovered, of which 903,375 pounds have been shipped, the remainder being still in hand.

HIGH-GRADE SHIPPING ORE

(Continued from Page 1, Second Section).

developing in a manner that is convincing to experts that the district is going to contain a large number of producing mines. The Hazen cutoff from the Southern Pacific is now practically completed to Fallon, and this will make it much easier to get ore to market from bulk ever made from the district.

The Keane Wonder gold property in the Funeral range has been sold for cash to Homer Wilson and others of San Francisco. This is the property upon which Capt. J. R. DeLamar held an option and which he surrendered after doing about $25,000 worth of work. It is stated that the ground has exposed several times the price of the Wilson purchase.

Reports from Beatty are to th ceffect that construction trains on the Clark road from Las Vegas are now working within six miles of that town, while the graders are getting everything ready for the laying of ties and rails between Beatty and Rhyolite.

New discoveries have been reported southeast of the old camp of Revelle during the week and a number of prospectors and a couple of auto parties have pulled out for that region. Gold quartz that pans well was brought in from there, and the prospectors claiming to have made the discoveries stoutly maintained that the ledges were large and the values well distributed. It is thirty miles to the claims from Revelle.

Ore shipments over the Tonopah railroad, for the past week, as reported through the Western Ore Purchasing company, aggregated 5,005 tons. Of this total the Tonopah mines contributed 2,985 tons and Goldfield 2,020 tons.

THE LAKE SUPERIOR IRON

(Continued from Page 1, Second Section).

aditional depth of 100 feet will be attained. The ore vein proved up at the De Grasse tract is thought to extend diagonally across the Hamilton. The G. W. Youngs Mining company is exploring the McFarlane property, the fee to which is owned by Iron River and Crystal Falls men. Two pits are going down, one of which is below the ledge, which was struck at a depth of 30 feet. Considerable water has been tapped, and pumps will be put in to handle it. M. T. Sullivan of Iron River and associates have an option on the Oberg property, in the Brule country, and will test it with a diamond drill. Outcroppings of ore have been found in this vicinity, and it might be that a new district will be opened up in this part of the county.

The Few Iron Mining company, composed of officers of the Wisconsin & Michigan railway, has started the work of developing the lands, which it controls in Section 6-39-29, west of Norway. A plant of machinery for shaft sinking is being installed. A shaft 6 by 12 feet, inside of timbers, will be put down in the hanging wall to depth of 100 feet or more, when the ore formation will be crosscut. Upwards of a score of test pits were sunk across the formation, and merchantable ore is said to have been encountered in most all of them, indicating a deposit something like 275 feet in width. The company has 200 acres under lease. Operations are in charge of Capt. Harry Sincock. The big hollow tile smokestack, 6 feet inside diameter and 135 feet tall, exclusive of the foundation, to be erected at the new boiler plant of the great "C. Ludington" shaft of the Steel corporation's Chapin mine at Iron Mountain, will be built by the Adolphus Custodis company of New York, and will be the nineteenth of the kind constructed for the mining company by the same concern. The foundation, of concrete, 18 by 18 feet and 10 feet in depth, is about ready. A similar stack was recently completed for the Steel corporation at its Section 16 mine, near Ishpeming, Marquette range.

The Steel corporation's big new machine shop, erected at Ishpeming to serve the company's various mines on the Marquette range, has gone into commission this week. The work of construction, started over a year ago, was completed some weeks since, subsequent to which a large force of mechanics has been engaged in installing the new engine, machinery and shafting, and latterly in removing from the old to the new the apparatus in use at the former structure. The new shop has twice the floor space of the old one, but with the additional machinery it possesses there is no spare room. The south side of the building is provided with a railroad track, while above it is a large moving crane of sufficient capacity to pick up a locomotive or steam shovel. The shop is of sufficient length to handle two steam shovels at a time. The old building is to be converted into a carpenter shop, and the present carpenter shop will be fitted up as a warehouse. However, it doubtless will be nearly a year before these changes are possible, as much work in the way of remodelling is to be done. The present warehouse has been inadequate for some time, and is crowded from floor to ceiling. All the company's mines at both Ishpeming and Negaunee receive their supplies from this building. The corporation's new boilerhouse at the Section 16 mine will will be completed about the middle of next month, but it will be three weeks after that time before the new boilers go into commission.

The shaft at the Jones & Laughlin Steel company's new rolling mill mine at Negaunee, has attained a depth of 650 feet, and a plat is being cut at 620 feet. Ore has been cut, and drifts will be run to develop the deposit. The ore is a soft hematite, very dark in color, and of a greasy, sticky nature, just the thing for mixture with the fine-graded, dry ores of the company's Mesaba range mines. There has been some delay in the receipt of lumber and other material needed for the shafthouse, but the new plant of machinery is in readiness and it is expected that the mine will enter the producing list before the close of the season of navigation.

AT THE LAKE COPPER MINES

(Continued from Page 1, Second Section).

present month conditions have chaged decidedly for the better and the prospect is that the yield will soon be back to the former high average. The company has about $180,000 surplus in cash and copper and is earing about $15,000 net monthly after meeting all expenses. There is reason for the belief that the company will be able to finance its remaining development work and construction account from operating profits, and that stockholders will not be called upon to pay another assessmet.

* * *

The Atlantic's activity in its preparatory steps for the development of section 16, and the small fraction if section 23, adjoining, is being advanced rapidly to forestall any interruption by the severity of winter.

The railroad grade from the line of the old Baltic branch of the Atlantic & Lake Superior railroad has been extended to the shaft location on section 23, just south of the section 16 boundary. This extension is less than half a mile in length. The foundations for the boiler, compressor and hoisting engine will very soon be completed. The actual mining operations consist of sinking a drop shaft through the overburden to the bed rock. Slightly less than a year ago a pit was sunk to the rock, and its depth was determined to be fifty-six feet. The pit was small and unprotected, and therefore did not offer a sufficiently stable opening for the support of a permanet shaft. The drop shaft now sinking is established in the pit and it is going down successfully. As soon as it is firmly bottomed upon the rock a permanent inclined shaft will be sunk to deevlop the Baltic lode, which has been satisfactorily identified by means of cross-cuts driven from a drift running northward from the sixth level of the Baltic No. 5 shaft. These workings have a depth on the Atlantic property of a little over 400 feet, the decline of the surface northward from the Baltic to the Atlantic's new location being nearly 200 feet. Hoisting from the drop shaft is done by means of a derrick and a dinkey engine and boiler. These will serve the purpose satisfactorily until the more powerful plant, by means of which exploration at depth will be conducted, is installed.

* * *

The developmentof No. 8 shaft, which commands the north end of the Quincy workings and which is connected with the old mine by drifts that extend below the Franklin's corner, has been steady for two even years or more. No. 8 shaft is now approaching quite close to its permanent maximum output, the daily shipments at present being nearly 900 tons of copper rock. It will ultimately run probably close to 1,000 tons. The surface equipment at No. 2 shaft is designed for great economy, both mechanically and in labor. The rockhouse is of structural steel.

* * *

The Pewabic vein, recently by a crosscut extended west from the Franklin Junior conglomerate workings, marks the original seat of operation on the Junior property by the Franklin. Two shafts were opened to considerable depth on the Pewabic lode and a modern mill erected to treat its output. But the yield of copper per ton was not sufficient to even pay operating expenses, to say nothing of dividends, in consequence of which the proposition was abandoned and its equipment moved to the shafts on the conglomerate vein. The hope is entertained that the Pewabic vein will show better values at greater depth, hence the crosscut extension to this formation at a depth below the abandoned workings. The fourth level crosscut from the conglomerate working, started nearly a year ago, is understood to have intercepted the Kearsarge vein, which was located last summer by means of drill work when a slight trace of copper was in evidence. The depth of overburden on the Kearsarge vein is something over eighty feet.

* * *

The Atlantic is sinking a drop shaft to the ledge, preparatory to starting upon the Baltic lode on section 16. The railroad grade to the location is completed and the foundations are going in for the power plant.

* * *

All the Ahmeek machinery is delivered, and that portion of it which has been tried out is working satisfactorily. Electricity is being used extensively and will probably mark the extensive electrification of the Bigelow properties. It is likely that each mine will have an individual plant instead of a central plant large enough for the requirements of all the properties.

* * *

The Arcadian is driving a crosscut at the 200-foot level to reach the lode lying 275 feet east of the shaft which bears a marked resemblance to the Baltic lode.

IS WORK OF HIS OWN HANDS

S. W. Jones His Own Architect, Contractor and Builder ---Handsome Ten-Room Home in East End is Rapidly Nearing Completion.

A new and novel method of home building was adopted by one industrious Duluth citizen when he decided to provide himself and family with a new residence and he is now in possession of a handsome house on Third street, between Twenty-fourth and Twenty-fifth avenues east, which he has built with his own hands and skill and which would be a credit to the best architect in the city.

S. W. Jones is the name of this home builder and it was early last spring that he first conceived the scheme of erecting his own dwelling and about the first of May when he actually began the foundation of the house. Jones is a bricklayer by trade, but has become so familiar with every branch of construction work that it was an easy thing for him to draw the plans for his house and form estimates on the amount of material that would be required. Then, after acting as his own architect, Mr. Jones commenced laying the foundation for the house, doing the actual work with his own hands.

Slowly, but surely, the walls of the building began to rise from the foundation, brick on brick each being placed in position by Jones himself. The walls are heavy and substantial ones and are backed up by concrete blocks of the latest and improved design. All of the brick and concrete work was done personally by Mr. Jones and it was not until the house was ready for a roof that a number of carpenters were called in to assist in this work. Mr. Jones stated that he would have been able to do this part of the work as well but that it was getting pretty well along in the season and he wanted the house completed before winter sets in.

The brick work is practically all completed and the roof in place so that the remainder of the work can be rushed to a finish during the next two months. Mr. Jones intends to do all of the docorating and painting himself, so that when the house is completed it will be a monument to his own labor and skill.

The house, when completed, will be a pretentious affair and one in keeping with the other fine residences, which are going up on Third street in that vicinity. Built of handsome light colored brick and prettily decorated, the house will stand out as one of the most sightly in that locality. There will be about ten spacious rooms besides several alcoves and bay windows.

During the period while he has been building his house, Mr. Jones and his family have been living in a little cottage on the same lot and at the rear of the new residence. In this way Mr. Jones has been able to be on the immediate scene of his labors, which enables him to do a great amount of work at odd hours when others are resting.

Mr. Jones estimates that he will save a considerable sum by doing the actual work on his house himself and says that he will at least realize the usual contractor's profit and know also that the work is well done.

1,801 MOUSE TRAPS.

Washington Cor. New York World: The one thousand eight hundred and first mouse trap has just been patented. Robert L. Strongfellow of White Bluff, Tenn., is the man who believes that he has invented the best mouse trap in the world. But as New York has used all the other 1,800 traps and is still as much afflicted with mice as is the rest of the country, Mr. Strongfellow's trap must possess some wonderful attributes to make it appear infallible to Manhattanites.

Mouse traps have been one of the most frequently patented things the office here has had to deal with. Jay Gould laid the foundation of his colossal fortune with a mouse trap, which is still in use. There are traps that kill, traps that don't kill, and all sorts of traps. But the increase of mice still goes on and it is estimated that there is now many million times larger in numbers than it was when the first mouse trap was put on the market.

Few people realize the importance of cleaning out the mice. Few know of the vast amount of harm they do every year and of the enormous sums in money represented by the property they devour.

Government experts have been for years employed in an effort to wipe out the country's supply of mice, and cats are supported in mints, sub-treasuries and other public buildings to destroy the pests; but the mice, so far, laugh at every effort to exterminate them. Will the new trap do it?

ORDER TO EXAMINE ACCOUNTS.
State of Minnesota, County of St. Louis, ss.—
In Probate Court, Special Term September 22, 1906.
In the Matter of the Estate of Joseph Polzin, deceased:
On reading and filing the petition of Peter Polzin, administrator of the estate of Joseph Polzin, deceased, representing, among other things, that he has fully administered said estate, and praying that a time and place be fixed for examining, settling and allowing the final account of his administration, and for the assignment of the residue of said estate to the parties entitled thereto by law, and for the discharge of the administrator and the sureties on his bond,

It is Ordered, That said account be examined, and petition heard by this Court on Monday, the 15th day of October, A. D 1906, at ten o'clock, A. M., at the Probate Office in the Court House in the City of Duluth in said County.

And it is Further Ordered, That notice thereof be given to all persons interested, by publishing a copy of this order once in each week for three successive weeks prior to said day of hearing, in the Duluth Evening Herald, a daily newspaper printed and published at Duluth in said County.

Dated at Duluth, Minn., the 22nd day of September, A. D. 1906.

By the Court,
J. B. MIDDLECOFF,
Judge of Probate.

(Seal Probate Court, St. Louis Co., Minn.)
Duluth Evening Herald, Sept. 22-29, Oct. 6, 1906.

NOTICE OF SALE OF BONDS—

Notice is hereby given that the Town Board of the Town of Grand Marais, Cook County, Minnesota, will receive sealed bids up to and including October 15th, at 10 o'clock of said day for the sale of the bonds of said town and issued for the following purposes, and in the following sums: Three Thousand Five Hundred Dollars ($3,500.00) for the purpose of refunding the floating indebtedness of said town, bearing interest at the rate of six (6) per cent per annum, payable semi-annually, seven (7) in number payable ten (10) years from date thereof, and One Thousand Dollars ($1,000.00) for the purpose of erecting a public building in said town for town purposes, bearing interest at the rate of Six (6) per cent per annum, two (2) in number, payable ten (10) years from date thereof.

All bids shall be addressed to the undersigned, town clerk, Grand Marais, Minnesota. The said Board reserves the right to reject any and all bids.

Dated September 20th, 1906.

OLE J. ALLEN,
Chairman Board of Supervisors.
CLAUS C. MONKER,
Town Clerk.

Duluth Evening Herald, Duluth, Minn., Sept. 22-29, Oct. 6, 1906.

STATE OF MINNESOTA, COUNTY OF ST. LOUIS—SS.

In Probate Court, Special Term, September 14, 1906.

In the Matter of the Estate of Willys B. Peck, Deceased:

On reading and filing the petition of Harriet L. Peck of the County of St. Louis, representing, among other things, that Willys B. Peck, late of the County of St. Louis, in the State of Minnesota, on the 15th day of August, A. D. 1906, at the County of Douglas, Wisconsin, died intestate, and being an inhabitant of this County at the time of his death, leaving goods chattels and estate within this County, and that the said petitioner is the widow of said deceased, and praying that administration of said estate be to George A. Gray granted;

IT IS ORDERED, That said petition be heard before said Court on Monday, the 8th day of October, A. D. 1906, at ten o'clock A. M., at the Probate office, in the Court House, in the City of Duluth, in said County.

ORDERED FURTHER, That notice hereof be given to the heirs of said deceased and to all persons interested, by publishing this order once in each week for three successive weeks prior to said day of hearing, in The Duluth Evening Herald, a daily newspaper printed and published at Duluth, in said County, and that a copy of this order be served upon the County Treasurer of St. Louis County not less than ten days prior to said day of hearing.

Dated at Duluth, Minnesota, this 14th day of September, A. D. 1906.

By the Court,
J. B. MIDDLECOFF,
Judge of Probate.

(Seal, Probate Court, St. Louis Co., Minn.)
Duluth Evening Herald—Sept. 15-22-29, '06.

ORDER TO SHOW CAUSE ON FILING PETITION TO SELL LAND—

State of Minnesota, County of St. Louis —ss.

In Probate Court, Special Term, Sept. 22, 1906.

In the Matter of the Estate of Eureka Bornemann, Deceased:

On reading and filing the petition of Charles F. Bornemann, setting forth the amount of personal estate that has come into his hands, the disposition thereof, and how much remains undisposed of; the amount of debts outstanding against said deceased, as far as the same can be ascertained; the legacies unpaid, and a description of all the real estate, excepting the homestead, of which said deceased died seized, and the condition and value of the respective portions or lots thereof; the persons interested in said estate, with their residences; and praying that license be to him granted to sell the E. ½ of Lot 15, Block 4, Gay's Division of Duluth, St. Louis Co., Minn. And it appearing, by said petition, that it will be for the best interests of said estate and of all persons interested therein, to sell all of said real estate;

It Is Therefore Ordered, That all persons interested in said estate, appear before this Court on Monday, the 15th day of October, 1906, at 10 o'clock a. m., at the Court House in Duluth in said County, then and there to show cause (if any there be) why license should not be granted to said Charles F. Bornemann to sell all of said real estate of said deceased at private sale.

And It Is Further Ordered, That this Order shall be published once in each week for three successive weeks prior to said day of hearing, in the Duluth Evening Herald, a daily newspaper printed and published at Duluth, in said County.

Dated at Duluth, Minn., the 22nd day of Sept., A. D. 1906.

By the Court,
J. B. MIDDLECOFF,
Judge of Probate.

(Seal Probate Court, St. Louis Co., Minn.)

THE LAXATIVE OF KNOWN QUALITY

There are two classes of remedies; those of known quality and which are permanently beneficial in effect, acting gently, in harmony with nature, when nature needs assistance; and another class, composed of preparations of unknown, uncertain and inferior character, acting temporarily, but injuriously, as a result of forcing the natural functions unnecessarily. One of the most exceptional of the remedies of known quality and excellence is the ever pleasant Syrup of Figs, manufactured by the California Fig Syrup Co., which represents the active principles of plants, known to act most beneficially, in a pleasant syrup, in which the wholesome Californian blue figs are used to contribute their rich, yet delicate, fruity flavor. It is the remedy of all remedies to sweeten and refresh and cleanse the system gently and naturally, and to assist one in overcoming constipation and the many ills resulting therefrom. Its active principles and quality are known to physicians generally, and the remedy has therefore met with their approval, as well as with the favor of many millions of well informed persons who know of their own personal knowledge and from actual experience that it is a most excellent laxative remedy. We do not claim that it will cure all manner of ills, but recommend it for what it really represents, a laxative remedy of known quality and excellence, containing nothing of an objectionable or injurious character.

There are two classes of purchasers; those who are informed as to the quality of what they buy and the reasons for the excellence of articles of exceptional merit, and who do not lack courage to go elsewhere when a dealer offers an imitation of any well known article; but, unfortunately, there are some people who do not know, and who allow themselves to be imposed upon. They cannot expect its beneficial effects if they do not get the genuine remedy.

To the credit of the druggists of the United States be it said that nearly all of them value their reputation for professional integrity and the good will of their customers too highly to offer imitations of the

Genuine—Syrup of Figs

manufactured by the California Fig Syrup Co., and in order to buy the genuine article and to get its beneficial effects, one has only to note, when purchasing, the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package. Price, 50c. per bottle. One size only.

LATEST NEWS OF THE NEIGHBORING TOWNS

Negaunee

Negaunee, Sept. 29.—(Special to The Herald.)—Mrs. William Vodden, accompanied by her daughter, Mrs. William Chapman, left here Friday afternoon for Detroit, where they will make their home.

Miss Florence Wells has returned to take up her second year's work at school in Simmon college, Boston.

Miss Margery Lewis, who spent the summer visiting here with her friend, Miss Rena Maitland, left for her home in Stratford, Conn., Thursday night.

Matthew Gabrielson and family have removed from this city to Minneapolis, where they will make their future home.

C. E. Murphy, relief agent for the American Express company, has taken C. Houle's place in the office here, during Mr. Houle's vacation.

Mr. and Mrs. Michael Hawley were here from Little Lake Friday.

Mrs. S. P. Kline and daughter, Grace, left Thursday night for a visit to relatives at Milwaukee.

Leslie Maitland left Thursday evening to resume his studies in Harvard college.

Rev. S. M. Gilchriese, formerly pastor of the Mitchell M. E. church, now of Cheboygan, Mich., called on friends here Friday.

Fred Nightingale is here from the Sault, packing up his household furniture for removal to that place.

Mrs. Phil Abbott and daughter left Thursday night for Chisholm, Minn., where they will join Mr. Abbott, who has a position in one of the mines of that place.

Christian Jensen, who has been laid up with rheumatism nearly all summer, is again able to be out.

William Neelye has purchased the Hawley residence on Main street and will occupy it with his family as soon as some repairs have been made.

Cards have been received by friends and relatives announcing the marriage of Walter J. Ethier, who left here a few years ago to take a position in the offices of the Stevenson mine on the Mesaba range, to Miss Ida Eugenia Audlip of Eveleth, the event having taken place at the home of the bride in that place, Sept. 19.

Ed Jacka, who is operating a diamond drill for the Cleveland-Cliffs company near Helena station on the Northwestern road, was here Saturday and Sunday for a visit to his folks.

John Vaughn, shift boss in the Princeton mine, visited here with his folks Saturday and Sunday.

John and Sidney Northey are here on a visit to their folks from Detroit. They both hold good positions in the Queen automobile factory in that city.

Dr. R. Kirkwood returned Saturday night from a two weeks' visit to his summer camp.

Peter Trudell, Sr., has returned from a month's visit to his old home and other places in which he spent his early days in Canada.

Captains Rough and Anderson of the Cleveland-Cliffs Iron company left Sunday morning for a visit to the lead and zinc district about Platteville, Wis.

Stephen Ladigan returned Sunday morning from a visit to his old home in Finland and a tour of France and Russia. He started work Monday at his former position as pharmacist in O'Donoghue's drug store.

Jack Sims found a petrified frog in a barrel of apples which he opened Saturday. It is perfect in every respect only that it has a whitish appearance as if the process had been brought about by lime water trickling over it.

Frank Roberts and brothers are now busy thrashing the grain garnered from the farm lands of the Cleveland-Cliffs Iron company about Bellevue farm. It is expected that about 3,000 bushels will be realized, which will be a big increase over the yield of last year.

Arthur Kelley, a miner employed at the Hartford, fell a distance of forty feet down the shaft while at work Friday night and sustained injuries which will keep him confined to his bed for a long time, if he ever fully recovers from them. He was at work on a staging in the shaft when the accident occurred and in some manner missed his footing and fell to the bottom. His back was badly wrenched and he sustained an ugly scalp wound.

The heavy timbers for use in building the new shaft house at the Rolling Mill mine have nearly all been framed and will be in position so that hoisting can be done in about two weeks more, although it will take some weeks longer before the new shaft house will be fully completed.

Miss Mary Dushane left Monday night on a visit to friends in Duluth.

Judge William Verran got home Monday morning from a three weeks' visit to points of interest in the East.

Mr. and Mrs. Ed Faull have gone up to Camp Tridell, near Michigamme, to spend a few days.

Mrs. William Watson left Monday for Bovey, Minn., where her husband is employed in the office of the Oliver Iron Mining company.

Rev. Isaac Wilcox and Rev. Frederick Strong, who both now hold pastorates in Lower Michigan, and who were at different periods in charge of the Mitchell M. E. church congregation in this city, visited friends here Thursday.

Mrs. S. Morse, who visited here for the summer with her daughter, Mrs. S. S. Mitchell, left for Syracuse, N. Y., Thursday afternoon.

At the regular meeting of Jackson lodge, No. 111, of the Daughters of Rebekah, held Wednesday evening, two new candidates were admitted to membership, and following the initiation, refreshments were served and a few hours spent in social enjoyment.

Marshal Patrick Manning of Crystal Falls was in town Wednesday, and returned to his home Thursday afternoon.

Cyrille Houle, local agent for the American Express company, and his son Louis, left Thursday afternoon for Detroit. After a short stay in Detroit, Louis will enter the university at Ann Arbor, and Mr. Houle will continue on to Chicago, where he will spend a few days before returning home.

Work is progressing favorably on the new dry house being constructed for the use of the employes of the Maas mine. The work will not be completed for some time yet, but the building is now under cover and the work of laying the cement floor was started Monday. The dry house is to be a model of its kind. It will be steam-heated, electric-lighted, etc., and the company will do everything possible for the comfort and convenience of the men.

Miss Mary A. Piccianno left Tuesday noon to enter the school for the deaf at Flint, Mich.

Mrs. W. R. Yonker departed Wednesday morning on a visit to relatives and friends in Kalamazoo.

Mrs. O. E. Montes, who spent the last three weeks in Negaunee, the guest of Mr. and Mrs. J. M. Edgerton, left Wednesday morning for Appleton, Wis., where she will pay a short visit before returning to her home in Chicago.

C. G. Griffey, former editor of the Iron Herald, is here on a short visit from Rochester, N. Y.

William Donnythorne is here from South Dakota on a visit to his parents.

William Eyers arrived home Wednesday morning from Mexico, where he has been superintending diamond drill operations for the Descubridora Mining company, for the past four months.

An electric bell system for signal purposes is being put in at the Rolling Mill mine. For a time only the shaft and engine house will be connected.

F. W. Dunbar, district agent for the Standard Oil company, was here from Menominee Tuesday.

L. Verne Seass is suffering from an attack of blood poisoning, resulting from a slight abrasion of the flesh near the tip of one of his fingers.

A start was made on Rock street Tuesday, and it will take about two weeks to complete the repairs and grading to be done to it.

West Miller was here from Lathrop Tuesday.

A rare musical treat was given at the Presbyterian church Friday night by Prof. Richard W. Pellow of Marinette, assisted by Miss Tekla Farm, who since her last appearance here has stepped further upward on the ladder to fame and is now listed among the professional sopranos, for whose service there is a growing demand. Prof. Pellow is an artistic organist and is credited by the press in the cities where he has played with being particularly happy in his choice of selections.

William J. McCarthy is here from Duluth, looking after the removal of some diamond drill machinery which he recently purchased, to that place.

Mrs. John Best and daughter, Mrs. Harry Trenarrow, left Wednesday for a month's visit to friends in Ripley, Ont.

E. H. Gribble and family have moved back from Iron Belt on the Gogebic range to again take up their residence in this city. Mr. Gribble has engaged with the Cleveland Cliffs Iron company to take charge of the diamond drill work which the company is doing in and about the city.

Claude Mackenzie came from Duluth Wednesday morning on a visit to his mother, who will soon leave on a visit through the West, and returned again on the night train.

John Sheahan, an old resident of Negaunee, passed away Wednesday at the age of 78. Rheumatism, from which the deceased had suffered for thirteen years, was the cause of death. For the last two years Mr. Sheahan had been bedridden. The deceased is survived by a wife and five children. The sons are Thomas of Iron Mountain, James of Duluth and Larry of Chicago. The daughters, Mrs. Frank E. Hopkins of Spokane, Wash., and Mrs. E. G. Hornbrook of Kansas City.

Arthur Willman left Tuesday night for Tennessee, where he will do steam shovel work on a new extension of the Southern Pacific railroad, under contract for the C. N. Dolan company of Chicago.

Capt. J. L. Rough and Capt. Anderson returned home Wednesday morning from a four days' trip to Milwaukee and vicinity.

Beaudette

Beaudette, Sept. 29.—(Special to The Herald.)—The lid is still on at Beaudette, with no prospect of removal.

East Beaudette is booming.

Work on the planing mill at East Beaudette is progressing nicely.

Merchant Ingalls of Ackley is erecting a large department store at East Beaudette.

The Security Bank building is nearing completion and will soon be ready for occupancy.

J. C. Cummings & Co., contractors, are excavating for sewers at East Beaudette. Several carloads of sewers have been received from Red Wing and will be laid in all business portions of the townsite.

James A. Mathews, vice president of the Shevlin-Mathews Lumber company, is in Minneapolis this week.

C. L. Istad has just completed a $4,000 residence on Arthur avenue at East Beaudette.

Supt. J. T. Millen and family have just moved into their new residence on Millen avenue.

The Shevlin-Mathews Lumber company is erecting a row of tenement houses for their employes.

President J. P. Hedberg of the Security bank spent Thursday in town, the guest of Hon Albert Berg.

Attorney George E. Ericson was at Warroad on professional business last Saturday.

Trains have been running twelve hours late this week, caused by a wreck about thirty miles west of Port Arthur.

Rev. J. G. Johnson held Episcopal service here last Sunday evening. He preached to a large audience.

William Young, Jr., and family spent Sunday out at J. Kyler's cottage.

Misses Belle Young and Margaret Williams and Tom Williams were out enjoying themselves last Sunday at Tom Williams' cottage.

Emil Hedberg, the teller at the Security bank, left for Warroad Saturday evening to enjoy a duck hunt on the Lake of the Woods.

H. P. Rock, the agent of the Canadian Northern, has been on the sick list this week.

A. M. Eklund, Jr., of Williams was seen on our streets Monday last.

J. E. Dyer, representing the Bell Telephone Company, Limited, of Winnipeg, was here Monday contracting for cedar poles for his company.

Mr. McInarim of McInarim & Grimshaw of Rainy River, and one of his wedding dinner was served to over 200 guests. The afternoon and evening were spent out on the beautiful lawn and a trip up the Rapid river. The bride is an accomplished and esteemed young lady. She has been one of the successful teachers in our county. The groom is an industrious and bright young man. The happy couple left for Grand Forks on a wedding tour.

T. H. Howard held services here last Sunday.

I. R. Severtson and S. B. McNamara are building new residences on the bay front.

A. M. Lawdby of Warroad was in town last week.

Sever Selrog was prospecting in our town last week. He is from Warroad.

Hans Mitgaard left for his old home in Warren, after spending the summer here.

Miss Clara Johnson of Rapid River was in town last week preparing for final proof.

Deputy Surveyor E. J. Bourgeois of Bemidji has been for a week surveying around the town.

Dr. Stuart performed an operation on Knutsons' little girl last week. The little one is doing nicely.

Aitkin

Aitkin, Sept. 29.—(Special to The Herald.)—Mrs. Anna Seavey of Elk River was in town last week looking after her real estate.

Mrs. Jones of Marquette, Mich, was the guest of her brother, W. P. Hammond, and family last week.

A. L. Hamilton departed last Saturday on a two-weeks' visit in Pennsylvania. Mrs. Hamilton will accompany him home.

The first meeting of the Choral Union was held in the high school room Sunday afternoon. The following officers were elected for the year: President, F. E. Krech; vice president, G. W. Knox; secretary, Miss Hawkins; treasurer, Louis Hallum. Prof. Rollinson was re-elected director and Miss Mabel Rogers accompanist. The club will meet Thursday evenings.

A son was born Monday to Rev. and Mrs. C. S. Kathan.

Mrs. J. D. Farrell received an electric shock on Thursday evening at her home while lying on a couch under the telephone during a thunder storm. She was completely paralyzed for a few hours but has fully recovered.

C. H. Warner came up from St. Paul Thursday.

A cement sidewalk is being laid around the Aitkin County State bank.

H. B. Cline of Virginia has been an owner of property in this county for several years, has moved here with his family.

Leonard Carrigan, the 7-year-old son of Mrs. Carrigan, broke his leg Wednesday afternoon while playing with another boy.

Miss Bracket of the postoffice force and her mother, Mrs. Brackett, of Mora, went to Duluth last week to spend a few days.

James Todd, an old settler in this locality, died Sunday night at the county farm.

Mr. and Mrs. Stirratt have returned from a visit in Ellsworth, Wis.

Mrs. Fisher of Chicago is the guest of her aunt, Mrs. Steven Stearns.

The little 3-year-old daughter of Mrs. Sloan, living near the Stearn boat landing, received a severe scalp wound last week while playing near a lumber pile.

The Assembly club gave the first of the season's dancing parties at the opera house last Friday night.

Miss Susie Eamer and William W. Sanford were married Wednesday afternoon at the home of Mr. and Mrs. D. W. Eamer. Rev. C. W. Lawson performed the ceremony in the presence of immediate friends. Mr. and Mrs. Sanford left on the afternoon train for a wedding trip and will be at home after Nov. 15.

Renewed interest is being taken in the iron prospects in this vicinity. Another drill has been brought in and taken out toward Rice river. A diamond drill is at work on the Woolley farm near town and the results are carefully guarded. Interest is shown all along the twenty-five mile range running north of Kasquanganah and some good tests have been verified from surface finds in that locality.

The promised electric power service for Aitkin now seems a certainty. Last week Judge McClenahan issued a decree to the Aitkin Light & Power company, giving them absolute ownership of the right of way through the Wilson farm property for the ditch to carry the water between Spirit lake and Diamond lake. This canal is to develop the Mud river water power. C. S. Kathan, who is at the head of the enterprise, states that some work will be done on the ditch this fall.

The pupils of Prof. Rollinson gave a recital in the opera house last Saturday afternoon that was enjoyed by a large audience.

Hancock

Hancock, Sept. 29.—(Special to The Herald.)—A message announcing the death of Daniel Sullivan at Rockland, Wednesday was received here that evening. Deceased was 39 years old and previous to going to Rockland about three weeks ago, he lived with his relatives at the Franklin location. Death was due to heart disease, occurred at about noon Wednesday, while the young man was sitting in a chair at his boarding house. He was employed at the Michigan mine and his sudden death not only came as a great surprise to the people there, but also to his relatives and friends here. Besides his father, he is survived by his brother and four sisters.

Arthur Saam, son of Mr. and Mrs. Henry Saam, was taken home in an unconscious condition Friday night last week. The young man had been at the theater and was about to leave for home after the performance was over when he dropped to the walk in front of the building. Just as he fell he yelled to a companion and when the latter reached his side he was unconscious. The force at work in the theater was summoned and an effort was made to bring him to, but without success. A physician was then summoned and he worked over the young man for some time. Mr. Saam, the boy's father, was telephoned for and the young man was taken home. A little improvement in his condition was reported.

Miss Elsie Goodsole left Saturday afternoon for Ann Arbor to enter the University of Michigan. Miss Goodsole will begin a literary course and will also take a course in the conservatory of music. Miss Goodsole enters the university with an advanced standing which will permit her to graduate from this splendid institution of learning in three years.

Frank Bohrer has left his position with A. Kauth & Son. Mr. Bohrer has been in the employ of this firm for eight years.

Charles J. Hodge of Chicago is spending a few days in the city.

The striking trammers of the Franklin Junior mine, who went out last Saturday night, demanding an increase of $5 per month in their wages, have not yet returned to work and there is but little prospect that their demands will be granted. Supt. Edwards said this morning that he will not grant the increase of wages or recognize the existence of a strike. If the men desire to return to work, they will be allowed to do so, and if not, others will be employed to take their places. The miners are not with the trammers in their contention, as they are employed mostly on contract work and paid according to the amount of rock they mine. None of them went down yesterday or last night, fearing molestation from the striking trammers, but this morning they descended under the protection of Sheriff Beck, Under Sheriff Vivian and a posse of deputies. A careful watch was maintained today by the officials and there were no demonstrations of any kind. Although the miners are working, there is no rock being hoisted today, on account of there being no one to tram the rock. There are about a hundred workmen involved in the present strike, and they ask an increase of from $55 a month to $60 per month, which the company refuses to grant. In consequence of the decision of the officials, many of the trammers are asking for their time, and are quitting the location. A considerable number were paid off today and will seek work elsewhere.

A young man named Hanley, son of Mr. and Mrs. Jacob Hanley of the Highway, had his left hand pretty badly injured underground at the Rhode Island mine Monday. He was employed by a contractor working for the company, and was standing on a platform a few feet above the ground when he suddenly lost his balance. He grabbed hold of a rope to save himself and his hand came in contact with a shieve. He yelled, and the engineer, who was standing with his hand on the valve, shut off the power. Young Hanley was taken to Laurium, where Dr. Kerr dressed the wounded hand. It was found that the bone at the first finger was broken and it may be necessary to amputate the finger later on. The other fingers were badly bruised, but it will not be necessary to amputate any of them. The accident will lay the young man up for several weeks.

Miss Lucy Hodge of this city and John Beaton of Bisbee, Ariz., were married at Lake Linden recently. The wedding was a quiet one and the news of the marriage only became known Monday. The ceremony was performed by the pastor of the Lake Linden Congregational church. The bride was attended by her sister and the groom by Edgar Richards. Mr. Beaton is employed on the new school building being erected at L'Anse. When he gets through there, he will take his bride West.

Mrs. James R. Cooper announces the engagement of her daughter, Virginia Alice, to David Hartwell Ladd.

W. H. Wing, former secretary of the Y. M. C. A., has taken up his residence in this city. He is engaged in the insurance business and will make his home in the Stringer building on Hancock street.

Rev. Matt Luttinen of New Castle, Pa., arrived in Hancock Tuesday. He was united in marriage to Miss Selma Jaanen of Calumet.

Announcement has been made that John H. Lewis of Marquette, proprietor of the Marquette hotel, would take over the Scott hotel in this city. Mr. Lewis has paid several visits to Hancock during the past two weeks and was here again a few days ago in connection with the negotiations for acquiring the lease. According to reports, the Scott will be managed under the personal supervision of Mr. Lewis and he will divide his time between the Marquette hotel and the Scott in Hancock. C. W. Delvey, it is stated, will resign his place as manager, which will be taken by William Deegan. Mr. Lewis returned to his home at Marquette after making the arrangements.

The announcement of the approaching marriage of Jesse A. Pruner, formerly of Hancock, to Miss Evaline H. Farlinger of Cornwall, Ont., has been received in this city. The wedding will take place at high noon on Monday, Oct. 1, and Mr. Pruner and his bride will come here on their wedding trip. Mr. Pruner is the son of Mr. and Mrs. N. A. Pruner of Hancock, and left here for Canada about a year ago.

Miss Virginia Groose was agreeably surprised by a number of her young friends last Saturday evening, when they tendered her a party at her home on Holland street. The evening was pleasantly passed with music and games, after which refreshments were served and the occasion was a most delightful one.

The retail cigar business established last spring in the Emery building at the corner of Montezuma and Quincy streets by N. B. Ongie & Co., has been purchased by M. A. Bab, the fruit and confectionery dealer, the transfer having taken place Monday morning.

Frazee

Frazee, Minn., Sept. 29.—(Special to The Herald.)—Victor Larson contemplates going West for a few weeks to look over the country.

Mrs. Cooper has been seriously ill for some time, but is now recovering and able to be about the house.

Mrs. I. J. Collins, who has been ill, is much better.

Mr. Botts, who has been sick for several months, shows no hopes of improvement.

The Ladies' Aid will serve a chicken supper this evening in the Kranz building on First street.

Frances Gummer has been ill this week with a cold, but is somewhat better.

F. E. Billings, bookkeeper for the Nichols-Chisholm Lumber company's office, is going into the pineries for the company as bookkeeper. Mr. Stilling's health has been poor and he hopes for good results in the woods.

The enrollment at school still continues and the attendance is above the last week's average. A reading circle has been formed by the students of the upper classes in the high school.

Janitor Clark is again at his work at the public schools after a severe illness.

The local W. C. T. U. gave a reception to the public school teachers on Thursday at the residence of Mrs. S. S. Jones. Mrs. Brabner Smith gave a concise report of her visit to the state W. C. T. U. as delegate of the local union. There was a large attendance of members and friends.

T. A. Falls of Luce, is still very ill and in bed.

A very interesting program and exercises were given in the Baptist church on Sunday evening by the Sunday school scholars who graduated to higher classes. The exercises were in charge of Mrs. George Warner. There was a good attendance an dthe audience greatly enjoyed the whole proceedings.

The case against W. F. Weldner, charged with practicing medicine without a license, was dismissed by motion of County Attorney Schroeder before Justice D. L. Durkin.

James Graham, son of Mr. and Mrs. John Graham of Graham Lake, met with an accident in which he lost the most part of his right hand, including three fingers. Mr. Graham was in charge of a threshing engine in North Dakota, and in oiling the gearing his hand was caught in the wheels and crushed. He was attended to by a surgeon in Dakota and returned home in a very weak condition.

Mrs. Allce Graham is teaching school at Plumb, Minn., for several months.

Mrs. Brabner Smith returned from a visit to St. Paul as a delegate to the state W. C. T. U. convention, and reports a good time. She was on the telegram and greeting committees and had charge of one of the devotional meetings.

Mrs. David Graham returned from the state W. C. T. U. convention after an enjoyable session. Mrs. Graham is the district president and was on the executive committee at St. Paul.

Mrs. A. P. Antonson was a visitor in town this week on business.

The gates at the Northern Pacific crossing are not working and this most dangerous crossing is without effective protection. Several narrow escapes from injury have occurred. The new double track comes almost to the depot at the northwest part and a large number of cars containing the railway crews have been sidetracked here this week. Several hundred men are working within this division on the new double grade and gravel is being used for ballasting the new lines already laid. Passengers are having some strange incidents in alighting from the trains, there being no real platform or any absolutely safe place to get off the train upon. It is expected that this deficiency will soon be rectified and the double track laid past the front of the depot and a new depot platform laid for the safety of the passengers.

Mrs. S. S. Jones is entertaining her father and mother at her residence on Front street.

Miss Margaret Graham will teach school in North Dakota this fall and left on Friday for her school.

Miss Minnie Johnson will teach a term of school in Silver Leaf, beginning next Monday. Minnie is an expert teacher.

The Epworth League social at Mrs. William Chilton's was a success. Arthur Schiehr and Cecil Jones acted as measuring judges. A very fine program was provided and refreshments served of a good quality.

Mesaba

Mesaba, Sept. 29.—(Special to The Herald.)—Fabien Gibeau has gone to the Syndicate to accept a position with George St. Clair.

L. Gagne drove out to the Mallman on business Saturday.

Mr. Burquist, who had moved his family out to the Mallman, came back to town last Saturday.

O. L. Pederson of Virginia, was in town on business last week.

August Jacobson of Virginia came here to look over his property this week.

Emil Dean, who was employed at the Adriatic for the past few months, has left for his home in Marinette, Wis.

A. P. McRae accompanied his daughter, Miss Mattie, to Allen Junction Monday morning. Miss Mattie will reside with Mrs. Beatty for several months and also attend school there.

Mr. Jackson went to Virginia to visit his family Sunday.

Erick Sparr left the Syndicate for Aurora this week.

William Mudge of the Adriatic spent Sunday here.

John Wallace, Jr., is on the sick list.

Mr. and Mrs. L. Gagne and Mr. and Mrs. J. M. Frink made a trip out in the woods Sunday. Mrs. Gagne, who is skilled in shooting, made several remarkable shots.

Ed Johnson of the Syndicate was in town this week.

Grand Rapids

Grand Rapids, Sept. 29.—The primary election returns are practically all in and the total vote of Itasca county is as follows, those not designated being on the Republican ticket:

For judge, Fifteenth judicial district—W. S. McClenahan, 1,038.

For congressman, Eighth district—J. Adam Bede, 813; E. L. Millar, 768; George F. Peterson, public ownership, 54.

For senator, Fifty-second district—Daniel M. Gunn, 1,178; O. N. Mausten, 73; Stevens Swanson, 338; Carl E. Taylor, 88; Walter W. Keaan, Democrat, 106; John LeFevre, public ownership, 57.

For representative, Fifty-second district—Daniel L. Case, 657; C. P. DeLattre, 182; T. M. Ferguson, 456; G. W. Knox, 737; Charles B. Mabon, 832; Leopold Peters, public ownership, 51.

For county auditor—M. A. Spang, Democrat, 1,223.

For county treasurer—A. A. Kremer, 1,223.

For sheriff—August Johnson, 913; Ole M. Olson, 509; William Hoolihan, Democrat, 161.

For register of deeds—E. J. McGowan, 1,224.

For judge of probate—Eugene A. Arnold, 646; H. S. Hudson, 622.

For county attorney—Alfred L. Thwing, 1,201; Cyrus M. King, Democrat, 119.

Miss Ina Anderson is a guest at the D. C. Anderson home in Carlton this week.

Paul Trautner, who has been working in the pulp mill the last few months, departed for his home in Cloquet last Sunday night.

Mr. and Mrs. T. A. McHugh were Duluth callers the first of the week.

Ben Levy is spending a few days with his family in Minneapolis while the boys are busy with business at Levy's Enterprise store.

Miss Charlott Gardener of Bass Lake, was visiting relatives and friends a few days the latter part of last week.

A half grown black bear, which is marked "for sale," proves very interesting to the children.

Two very good exhibits of Belgian hares were put on display Wednesday morning as were several large gray and red squirrels. The mounted bird exhibit is an excellent one, those put on display by Munn of Hancock, being specimens of American eagles, hawks, ducks, geese and game bords in this collection. The hog exhibit this year is larger and better than it ever was before and the specimens shown are in an exceedingly fine condition. The same can be said of nearly all of the live stock exhibits and of the dogs, Riley, the wolf killer, an extremely ugly and vicious looking bull dog, being especially noticeable in the latter exhibit.

The vegetable and grain displays are large and excellent, and show that the agricultural importance of this section of counties is yearly growing greater. All of the attractions at the fair are more than giving good satisfaction and are affording unlimited amusement and entertainment to the big crowds of visitors.

Rev. Walter R. Fruit, pastor of the Grace Methodist Episcopal church, returned last evening from Ishpeming, where he attended the annual session of the Detroit conference. Mr. Fruit was returned to the Houghton pastorate, while Rev. Henry Rogers was returned to the Hurontown M. E. church. The local district of the M. E. church will hereafter be known as the Houghton district, with Rev. James Pascoe, recently presiding elder of the Soo district, in charge, with headquarters at Hancock.

Mrs. Mortimer Davis and Mrs. Hunter entertained Friday afternoon.

Mrs. Hamala and daughters spent Sunday in Duluth.

Richard Cochrane left for Minot, N. D., Tuesday, called there by the illness of Mrs. Cochrane, who is on their claim.

C. E. Wyman of Alberta, Texas, was a Cloquet visitor Wednesday.

The Presbyterian auxiliary meet next Thursday as the guests of Mrs. De Poe.

Rev. Govdell will leave Tuesday to attend the Methodist conference to be held in Minneapolis.

A. Villeneau has sold out his business on the island.

Born to Mr. and Mrs. Ernest White, a daughetr, on Wednesday.

Bernard Smith, proprietor of a cafe, run in connection with McCullough's saloon, is very low with fever at the Star hotel.

Miss Violet Robinson entertained her sister, Miss Gertrude Robinson, of Duluth over Sunday.

A plate glass window in Elm & McNab's store was completely demolished by a discharge of dynamite used in blasting for the sewer.

Mrs. W. G. Dolan was in Duluth Wednesday.

Mr. and Mrs. Frank Yell left for California Monday, where they will spend the winter.

Mrs. Hugh McMillan returned Tuesday after being absent all summer, having spent the greater part of that time at Sioux Falls, S. D.

Miss Hattie Johnson of Duluth spent Saturday and Sunday with Mrs. Frank Heasley.

Frank Skemp, who has been confined to his home with fever, is again well and left yesterday to resume his studies at the State Medical university, Minneapolis.

Mr. Nutting of Duluth spent the week here.

The Ladies' Aid gave a supper last Saturday night and results were very satisfactory.

John Alstad and family departed Tuesday for Spokane, Wash., where they will make their future home.

The Ladies' Missionary society met with Mrs. Charles Cayfield Friday afternoon. Mrs. R. M. Weyerhauser read a very interesting article on China.

A class of fourteen were initiated into the secrets of the Odd Fellows Saturday evening.

Mr. and Mrs. William Jolliffe and children left Wednesday for Oregon for Mrs. Jolliffe's health, and if the climate proves beneficial they will make their future home there.

The Ladies' Charitable organization met with Mrs. C. O. Swanson this afternoon.

Mrs. R. M. Weyerhauser returned from a short visit to St. Paul.

Mrs. La Bounty of Chippewa Falls is visiting her daughters, Mesdames Z. B. Hoyt and F. B. Morehouse.

Miss Bena Bonnier spent a few days with her parents the first of the week.

Rev. C. W. Lowrie has received an invitation to accept the pastorate of the First Presbyterian church of Redwood Falls, Minn.

A daughter was born to Mr. and Mrs. August Nordquist Tuesday.

Mrs. J. McNair left for Chicago and the Twin Cities Wednesday. He will be gone a week.

Houghton

Houghton, Sept. 29.—(Special to The Herald.)—The Ludahy Bros. company has incorporated papers of incorporation with County Clerk Louis H. Richardson of Houghton county, at the county courthouse, in Houghton.

The second shoot between the Calumet and Houghton militia companies will be held in October, probably during the second week of that month. Some time ago the announcement was made that the shoot would be held during the latter part of this month, but it was later announced that the date has been set farther ahead. The Houghton company had not picked out the team for its team as yet, but the full complement of eight sharp-shooters will be picked out in the near future. Six men have already qualified for the team.

Copper country friends of Edwin J. Collins will be pleased to learn that he has been appointed to the position of general manager for the Southwestern Nevada Mines company at Tonopah, Nev. Mr. Collins is a graduate of the Michigan College of Mines.

Napoleon Lacasse of Milwaukee, and friend, Joseph Litzow of New York, are visiting at the home of George Lacasse of this city.

Mr. and Mrs. J. H. Lyons have gone to Detroit, where Mr. Lyons has been appointed traffic manager of the Michigan State Telephone company.

J. A. Campbell of Duluth was in the city Saturday.

James P. Morgan and John Jones of Ontonagon, were in Houghton Saturday.

About the first of the month E. H. Wollstein of Calumet, who conducts a grocery and meat business in Laurium, will open a store in the Strobel block on Sheldon street, where the store of Ed Haas & Co., is now located.

Wednesday night a couple were married at the Amphidrome as is the usual custom during the great Copper country fair. This year the happy couple was from Calumet, Attilo Castiglanno and Miss Hattie Chlotte being the contracting parties. The marriage was performed by Judge Casper Brand, one of Houghton's most upright and straightforward interpreters of the law, guardian of the peace and a justice of the peace for many moons. The couple marched out on the stage in the main hall in the Amphidrome and took the solemn vows of wedlock before the assembled thousands. The bride was very prettily dressed in a white gown and carried a beautiful bouquet. The couple received the congratulations of scores of friends and hundreds of the spectators, and were the recipients of many valuable and pretty presents of furniture and household furnishings from the various merchants who have exhibits at the fair. The Houghton County Agricultural society presented the couple with $25. Mrs. Borreson of Hancock, furnished the wedding cake.

Wednesday, in spite of the heavy winds and the general inclemency of the weather, great crowds attended the fair. It is estimated that fully 5,000 took in the great exhibition, but Thursday's attendance exceeded this number. From the present outlook the attendance this year will far exceed that of last, which was nearly 25,000, and which was also the largest fair Houghton county has ever had. Thousands of people came in Wednesday night from Hancock, Lake Linden and Calumet, the range towns and the other villages of Houghton county, as well as from the other counties of Keweenaw, Ontonagon and Baraga. The field and stream and forestry exhibit seems to be drawing the most attention, the live fish and animals being especially attractive. A half grown black bear, which is marked "for sale," proves very interesting to the children.

Two very good exhibits of Belgian hares were put on display Wednesday morning as were several large gray and red squirrels. The mounted bird exhibit is an excellent one, those put on display by Munn of Hancock, being specimens of American eagles, hawks, ducks, geese and game bords in this collection. The hog exhibit this year is larger and better than it ever was before and the specimens shown are in an exceedingly fine condition. The same can be said of nearly all of the live stock exhibits and of the dogs, Riley, the wolf killer, an extremely ugly and vicious looking bull dog, being especially noticeable in the latter exhibit.

The vegetable and grain displays are large and excellent, and show that the agricultural importance of this section of counties is yearly growing greater. All of the attractions at the fair are more than giving good satisfaction and are affording unlimited amusement and entertainment to the big crowds of visitors.

Rev. Walter R. Fruit, pastor of the Grace Methodist Episcopal church, returned last evening from Ishpeming, where he attended the annual session of the Detroit conference. Mr. Fruit was returned to the Houghton pastorate, while Rev. Henry Rogers was returned to the Hurontown M. E. church. The local district of the M. E. church will hereafter be known as the Houghton district, with Rev. James Pascoe, recently presiding elder of the Soo district, in charge, with headquarters at Hancock.

Mrs. Mortimer Davis and Mrs. Hunter entertained Friday afternoon.

Mrs. Hamala and daughters spent Sunday in Duluth.

Richard Cochrane left for Minot, N. D., Tuesday, called there by the illness of Mrs. Cochrane, who is on their claim.

C. E. Wyman of Alberta, Texas, was a Cloquet visitor Wednesday.

The Presbyterian auxiliary meet next Thursday as the guests of Mrs. De Poe.

Rev. Govdell will leave Tuesday to attend the Methodist conference to be held in Minneapolis.

A. Villeneau has sold out his business on the island.

Born to Mr. and Mrs. Ernest White, a daughetr, on Wednesday.

Bernard Smith, proprietor of a cafe, run in connection with McCullough's saloon, is very low with fever at the Star hotel.

Cloquet

Cloquet, Sept. 29.—(Special to The Herald.)—Madge Bertrand of Duluth visited here over Sunday.

Hughie Toland and family, who were visiting relatives for the past two weeks departed Tuesday for their home in Fond du Lac, Wis.

Mrs. Phelon is having the Phelon block on the corner of Arch street and Avenue A raised and a new foundation put in.

Carl Tof left Wednesday for Princeton, Minn., where he will probably locate.

J. W. Morgan, the Indian farmer, has moved his family in Dick Rice's residence on Seventh street.

Mrs. John Long is in Milwaukee as delegate from the Catholic Order of Lady Foresters to a convention being held in that city. She will be gone two weeks.

Harry Campbell returned Thursday from a Western trip. He has been absent about five weeks.

Rev. Lowrie had as his guest his brother, Rev. H. J. Lowrie of Duluth. He returned Thursday.

Mrs. C. J. Eckstrand leaves Monday for Demidji.

Mrs. Mortimer Davis and Mrs. Hunter entertained Friday afternoon.

Mrs. Hamala and daughters spent Sunday in Duluth.

Richard Cochrane left for Minot, N. D., Tuesday, called there by the illness of Mrs. Cochrane, who is on their claim.

C. E. Wyman of Alberta, Texas, was a Cloquet visitor Wednesday.

The Presbyterian auxiliary meet next Thursday as the guests of Mrs. De Poe.

Rev. Govdell will leave Tuesday to attend the Methodist conference to be held in Minneapolis.

A. Villeneau has sold out his business on the island.

Born to Mr. and Mrs. Ernest White, a daughetr, on Wednesday.

Bernard Smith, proprietor of a cafe, run in connection with McCullough's saloon, is very low with fever at the Star hotel.

Two Harbors

Two Harbors, Sept. 29.—(Special to The Herald.)—Mrs. J. M. Turwick was a Duluth visitor on Monday.

There was a great rush here of late for second citizenship papers before the new federal law took effect, over 100 receiving them. Judge Ensign at his recent visit issued papers to fifty-eight.

Mrs. Eliza Symons visited Duluth friends Monday.

The last quarterly conference was held at the First M. E. church Wednesday evening, Rev. E. C. Clemans presiding.

Superintendent Thomas Owens of the Duluth & Iron Range railway gave his annual birthday party last evening to his office employes and a number of old friends. A delightful repast was served. Stories were told, smoking indulged in and a delightful evening had. Among those present were: A. D. Holliday, John Shea, F. E. Evans, George J. O'Connor, H. J. Laner, P. J. Welch, R. B. Elliott, B. M. Bergerson, C. D. Pegelow, W. W. Scott, E. M. Owens, Evan Owens, Sr., C. H. Wise, H. Ydestie, F. E. Helm, F. T. McIlroy, James Sullivan, Clarence Miller, John Miller, James Strom and C. Bender.

Miss Kate Sparth has been in Chicago the past week purchasing her stock of fall millinery.

Miss Stella Upton has taken the position of teacher at Castle Danger, vice Miss Laura Stark, resigned.

A party residing on Eighth avenue was arrested last week on complaint of the health authorities and fined $10 and costs, amounting to $13.90, for dumping some garbage on

LATEST NEWS of THE NEIGHBORING TOWNS

played at the Norden hall Monday evening.

The annual fair given by the ladies of the Norwegian Lutheran church, Thursday, Friday and Saturday evenings, was an unusually pleasant and successful event, and a good sum was netted.

Mrs. A. W. Dodge was a Duluth visitor on Monday.

Walter Wright has resigned his place as night cook at the Saratoga restaurant, and accepted a position at the ore docks.

The Ladies' Aid society of the Swedish M. E. church gave a very successful social at their church Saturday evening.

The long expected, since the lid was put on strong here last spring, happened this week, when a number of saloonkeepers were arrested for violation of the Sunday closing law, and the proceedings against them have been of much interest. The present city regime on taking office last March, made it known that violation of the Sunday closing and other liquor laws would not be tolerated. There were no prosecutions, however, and the liquor dealers had become somewhat careless. The first of the week they were much surprised when a number were arrested on evidence secured by some members of the council and brought before Judge Andrews for trial. Fines aggregating more than $200 were paid by three, and others will stand trial.

L. H. Bryan has purchased the Bryan residence on Cedar street and Eighth avenue.

Mr. and Mrs. E. E. Adams of Minneapolis, visited with friends here over Sunday.

J. Ryan has left his position as operator at Endion.

Governor John A. Johnson will speak at the Norden hall next Wednesday evening, Oct. 3, and preparations are being made to give him a rousing reception.

Col. Greene and party of the Greene Consolidated Copper company passed through here Tuesday afternoon on a tour of the ranges.

No matters of especial interest were transacted at the council meeting Monday evening, the work being mostly routine. Mr. Crowley of the Crowley Electric company and Mr. Bradley of the Allis-Chalmers company were present, and the former presented an order authorizing the payment of $1,724 to the Allis-Chalmers company for the generator, and the American Engine company $1,350 for the engine to be furnished the village on the Crowley contract for new machinery for the city power station. The Crowley company also furnished bond for $4,000 with the American Bonding company for the performance of contract. Petition for water mains on Eleventh avenue was laid over one week. A lease from the Duluth & Iron Range of its land along the lake front was received and accepted, and the street commissioner was instructed to take down the present fences and construct new fences along the south side of Second avenue and the north line of Third avenue to the lake front, thus enclosing the land as a part of the present city park. The Duluth & Iron Range leases the land with the understanding that it is to be exempt from taxes while so used by the village. The bill from Contractor Essen for $130 for the grading of an alley in block 29 was laid over until the report of the inspector was received. Manager Brickley of the Duluth & Iron Range Telephone company was granted six weeks' time to remove a telephone pole blocking the entrance to lot 3, block 13, as complained of by the owner. Upon a communication from Julius Goldzier of Chicago, chairman of the National Association of Postal Savings banks, a resolution was adopted as follows:

"Resolved, that we favor the establishment of postal savings banks in the United States, and urge upon congress the speedy enactment of the necessary laws for that purpose."

Louis Anderson, who had previously made complaint against allowing other parties in the village to keep more than two cows on their premises, as he had been forced by the health department to dispose of a number of his cows by the board of health on account of the law, was presented, but the board of health failed to have one of their members present, as was requested by the council. The city attorney was directed to draw up an ordinance covering the keeping of cattle in the village limits, to be presented to the council at next meeting. Bills amounting to $857.55 were allowed and $500 semi-annual interest on village water and light bonds was ordered paid the First National Bank of Chicago. The recorder was instructed to correspond with the Duluth & Iron Range to see if screenings could be secured for the city power plant as soon as the new dock was in operation.

Saturday evening at the Swedish M. E. parsonage Miss Hilma Sundquist and Mr. B. V. Wahlberg were married. Rev. A. F. Peterson performing the ceremony. The contracting parties are well known and popular and have the best wishes of their many friends. They will go to housekeeping on South avenue.

The first football game of the season will be played today on the shop grounds between the Duluth Central High School team and the local Y. M. C. A. junior team.

Rev. W. E. J. Gratz of the First M. E. church will leave the first of the week for Minneapolis to attend the M. E. annual conference.

Jas. Croke has left his position with the Duluth & Iron Range and taken a place as clerk for Schusener Bros. and Monetom in their main store.

Will Tracey left the first of the week for Ann Arbor, Mich., to resume his law studies at the Michigan University.

Miss Monilaws was up from Duluth over Sunday for a visit with her mother.

Frank Fueton and Rev. J. A. McGaughey went to Ely, Tuesday where they spoke in the interest of Mr. Fueton on the Prohibition ticket.

County Attorney Fowler attended to legal matters down the north shore a few days this week.

By a peculiar accident Monday morning a large number of ties were cut up on the Duluth & Iron Range road between Highland and Mile post 29 and the track damaged so as to delaw traffic for a short time. The damage was caused by a broken brake hanger on one of the loaded ore cars in a train in charge of Conductor Hart, above Highland. Just south of Highland the brake hanger caught in a frog and derailed one pair of wheels of the car which was hauled along over the ties until Mile post 39 was reached, where another frog was struck throwing the wheels on the track again. When the train stopped at Holmes Block station the brake hanger was noticed and upon examination the damage was found. About a dozen kegs of bolts were required to replace those cut off.

A special train was run ao Duluth last evening to take down local members to attend the session of the Northern Railway club.

Secretary Mr. Benning of the Y. M. C. A., left last week for a boat trip to Cleveland and return.

Rev. and Mrs. J. A. McGaughey very pleasantly entertained the members of their congregation, and friends at an informal party Wednesday evening.

Among the accidents reported this week are a dislocated elbow by Clark Wetherly Tuesday evening while exercising at the Y. M. C. A., gymnasium, and a broken arm by Teddy, the son of M. Sulivan caused by a fall the same day.

The steamer Page is reported due for a cargo of lumber from the Tower mills.

Mrs. Maria Engstrom, mother of Mrs. Emil Anderson, died Tuesday morning at the home of her daughter after a short illness with paralysis. The funeral was held Thursday from the Swedish M. E. church, Rev. A. F. Peterson conducting the services.

Thomas Trevena, an old resident, has purchased a residence here and will locate here permanently. His daughters, Mrs. James Symons and Miss Nellie Trevena, who is employed at the central telephone office, also reside here.

Mr. and Mrs. Ben Jones are the happy parents of a baby boy, born Monday, the 24th inst.

Agent R. S. Cameron of Highland was in town Friday on business.

The postmaster general has asked for bids on new contracts for carrying mails between here and Drummond and between here and Little Marais, the new service to be six times per week instead of three times as now. The contracts are to be received up to Dec. 4 next and are for four years. The Drummond contract is for a distance of thirteen miles and returning. The present contract price is $611 and a bond of $1,000 is required. The Little Marais is a distance of 100 miles and return, the carrying to be from Dec. 1 until May 1, and a bond of $10,000 is required. The present contract price for tri-weekly service is $2,470.

The derailment of seven loaded steel ore cars to the Diamonds Wednesday morning caused considerable delay to traffic and necessitated bringing several ore trains from Waldo to Two Harbors via the north bound track.

John Domas of Oconto, Wis., contemplates opening a candy kitchen here in the near future.

F. J. Welch transacted business at Duluth on Thursday.

Dr. Roy of Fond du Lac, Wis., is here this week assisting the doctors attending his sister-in-law, Miss Eva Pronovost, who has been very ill with peritonitis.

The ladies of the Presbyterian church are arranging to give another rummage sale at the Baldwin block some time next month.

M. Kline of Chicago has taken a position at the dock office.

A. A. Scott will speak at the men's meeting at the Y. M. C. A. tomorrow afternoon.

Yernberg & Christenson have decided to put a stage, etc., in their new auditorium and the plans are being modified accordingly.

Eveleth

Eveleth, Sept. 29.—(Special to The Herald.)—Miss Lillie Johnson has been spending the week with relatives in Ashland, Wis.

Mr. and Mrs. Ray Webb of Beaver Dam, Wis., are new arrivals in the city, Mr. Webb being in the employ of one of the mines. At present they are living with H. T. Lindsay.

Mrs. L. H. Johnson has been entertaining her brother, Rev. Peterson of Ashland, during the week.

Mrs. T. C. Grierson and son of Hibbing are visiting Mr. and Mrs. Richard Rossiter.

Mrs. Sam Andrews and Mrs. Thomas Clemens, who have been visiting in Michigan, have returned to the city.

Mrs. Josephine Sibbitt, who has been in the millinery business here, has moved to Duluth, where she will have charge of the millinery department at Gilding's. Miss King, her former trimmer, has purchased the stock and will run the store hereafter.

A number of Sisters of Charity from Duluth have been canvassing the city in the interests of the St. James' Orphan home. We understand they have had very good success.

Mrs. Daisy Loulan, one of our local dressmakers, has gone to Chicago to attend the fall openings of the dressmaking establishments.

Rev. G. S. Turner of Willow River, who was substitute pastor at the Presbyterian church for a time last spring, was in the city a short time this week.

The confectionery and cigar store owned by Gust Johnson, which has been undergoing repairs for some time, will again be ready for occupancy in a few days.

Mrs. N. A. Mattice of Superior has been spending the week with her daughter, Mrs. E. K. Medler.

The exterior woodwork and trimmings of the Eveleth high school building have been repainted, adding greatly to the appearance of the edifice.

An amusing incident occurred in an alley near Peterson's warehouse last Friday night. A group of Finlanders were quarreling, one fellow in particular just spoiling for a fight and making loud and unqualified boasts, when a woman suddenly appeared, and dashing into the center of the melee, grabbed the bully by the shoulder and ignominiously marched him into the nearby saloon, made him wash his hands, and piloted him home, to the great amusement of a large crowd of bystanders.

The Bigelow property at the corner of Grant avenue and Monroe street has been sold to Frank W. Miller for $12,000 cash. The new owner has leased the building to the Blatz Brewing company, and the saloon on the ground floor will hereafter be operated by Frank Winchester.

Logging will soon be commenced at the Bailey camps near St. Mary's lake. The work will be in charge of Victor Lind, and it is expected to employ about 100 men and twenty-five teams when operations are once commenced. This is the second year for these camps.

Alex Trezona, brother of Supt. R. R. Trezona of the Fayal mine, has departed for Cambourne, Eng., after a two years' residence in Eveleth.

A large number of people from this city attended the annual session of the Catholics of the range held at Virginia last Sunday.

That "troubles never come singly" has been illustrated in the family of Otto Halstrom during the past two months. This home has been under continuous quarantine on account of scarlet fever since July 23, the mother and three children having been afflicted. As the father has had to give up work in order to take care of his stricken family, the household is now suffering for the necessaries of life.

A very pleasant dancing party was given last evening by the Eveleth club at the Vail opera house. Over fifty couples enjoyed the occasion, La Brosse's orchestra of Duluth furnishing the music.

Mr. and Mrs. Miles McAlpine of Duluth have returned to their home after a visit in the city.

Miss Sarah Mark of Superior is visiting Mrs. S. Siegle.

Mr. and Mrs. W. J. Ethier have moved to Stephenson, where they will make their home in the future.

Manuel Shapiro left for Chicago Wednesday, where he will take up a course at Rush Medical institute.

A large number from here took advantage of the Duluth, Missabe & Northern excursion to Hibbing Thursday. The excursion was run on account of the theatrical attraction, "Sam Houston," given in that city Thursday night.

The members of the Epworth league gave a very pleasant social at the home of Robert Powell Friday evening.

Mrs. Thomas Richards died Monday evening after an illness of several weeks, the immediate cause of death being neuralgia of the heart. Although she had been ailing for some time, she was not considered seriously ill, and her death came as an unexpected shock to her family. The deceased was a native of Cornwall, and had been in this country three years. She was 36 years old, and leaves a husband and three children to mourn her loss. The funeral was held Wednesday afternoon from the Methodist Episcopal church, of which she was an active member.

The Eveleth Electric company after Jan. 1 will be under the management of H. W. Irwin, formerly of Schenectady, N. Y., who will take the position now held by S. S. Hough. Mr. Hough has several propositions in view and is undecided as to what he will do in the future, but thinks strongly of going to Porterville, Cal. Mr. and Mrs. Irwin are in the city, and will remain until he assumes the duties of his new position.

William Cornwell of Turtle Lake, Wis., is a new resident of the city, in the employ of the Fayal mine.

The first regular meeting of the Crescent Literary Society of the Eveleth high school will be held the third week in October, and the program committee has announced the program for that meeting, which promises to be full of interest. Abe Feldman is president of the society and Cora Williams is secretary.

The ball game between the Eveleth and Biwabik teams played at Biwabik last Sunday resulted in a victory for Eveleth, score 5 to 1. The game was played for a purse of $200 and attracted a large crowd from this city.

Mr. and Mrs. Henry Perry of Middleboro, Mass., arrived in the city today. Mr. Perry has accepted a position as engineer at the Adams Spruce mine and at present is living with H. T. Lindsay, who is an old college chum of his.

It was only by the merest chance that a serious accident was averted at the Adams mine Wednesday night. An engine was pushing some loaded cars over a temporary track, when the ground suddenly caved, letting the cars down about fifteen feet, while the engine with its crew escaped a like fate only by the narrow margin of two feet.

The girls of the high school basket ball team were given a hard work out by Coach Lyons Thursday evening. The team is rapidly rounding into shape and is now ready to meet any like teams in the nearby towns.

Miss Julia Skjel entertained a number of her friends at cards Wednesday evening at the home of C. S. Dawson. Fantan was the game played, Dr. E. K. Medler and Miss Alice Bowers winning the high prizes. Those in addition to the persons mentioned who enjoyed the delightful occasion were: Misses Sarah Bowers, Corrie Barrett, Irene McKeehan, Messrs. C. V. Green, Ed Hatch, W. R. Van Slyke, Mason Burt, Mr. and Mrs. G. O. Greening, James Rockwell of Duluth and Mrs. N. A. Mattice of Superior.

Marjorie, the 9-year-old daughter of S. S. Hough, who has been ailing for several weeks, was taken to More's hospital last Saturday and is at present in a very serious condition. Her malady has baffled the physicians here, and last week a specialist was called from Minneapolis, who pronounced her a sufferer from a peculiar form of rheumatism, and advised that she be removed to the hospital.

Miss Corrie Barrett entertained a number of the young people Monday evening at the home of Michael Samuelson. "Cinch" was the game of the evening, and a very pleasant time was enjoyed by those present.

At the meeting of the city council held Tuesday night it was decided not to annex the territory known as Eveleth Central Division No. 2, the reason for such decision being that the locality was too little improved to make its annexation advisable. It was also decided to build a new walk on the main street, as the present walk is a disgrace to the city and a menace to public safety.

New Duluth

New Duluth, Sept. 29.—(Special to The Herald.)—Miss Maggie Fischer and Miss Mary Fischer of Duluth spent Tuesday with their mother, Mrs. Frances Fischer.

A. E. Grochan of Duluth was a business caller in New Duluth Tuesday.

W. H. Rieckhoff is having machinery put in the box factory for making pasteboard boxes. Hereafter he will manufacture those and wooden boxes, also.

Mrs. John Bernt entertained at tea Wednesday afternoon. Delicious luncheon was served and a very enjoyable afternoon was spent. Those present were Mrs. Charles Gustafsen, Mrs. Gust Jacobson, Miss Marie Carlson, Miss Florence Jacobson, Miss Mamie Gustafson, Miss Hazel Jacobson.

Verndale

Verndale, Sept. 29.—(Special to The Herald.)—Mrs. William Wilson arrived here Friday from Seattle, Wash., on a visit to relatives.

Miss Pheoney Thompson, who went to Towner, N. D., to teach school, returned home Friday. Her schoolhouse had not been completed.

Mrs. F. C. Lee of Duluth, who has been spending the past week here, left Thursday for Lake Park to join her husband.

Miss Alice Pierce of Duluth is visiting her sister, Mrs. Empey, for a few weeks.

Christ Clark and Guy Miller arrived here Friday from Charles City, Iowa, and Denver, Colo., on a visit to relatives.

The Messrs. and Mesdames Pettit, Proctor, Empey, Lenerville and Henderson and Alice Pierce attended a card party at Wadena Saturday night, given by the Messrs. and Mesdames Gehr and Buttruff of that place.

Mrs. H. E. Thompson arrived here Tuesday from Harvey, N. D., on a visit to her parents, Mr. and Mrs. C. Murphy.

L. A. Blekford arrived home Tuesday from the southern part of the state, where he has been traveling. He expects to spend the winter at home.

Mr. and Mrs. William Corran of Sumnor, Wash., visited among old friends here this week. They had been to Duluth, where they attended the wedding of their son Roy.

Mr. Vermilyit, who has been visiting his brother here for the past month, returned to his home in California Sunday.

Mrs. McGrath is expected home from La Crosse, Wis., Saturday, where she has been visiting relatives.

Mrs. A. A. Lelone entertained a number of her friends at tea Wednesday evening, in honor of Mr. and Mrs. William Cowan.

Messrs. C. Clark and Guy Miller and Mesdames Cecil Closterman and Mert Clark visited Wadena relatives Thursday.

Chisholm

Chisholm, Sept. 29.—(Special to The Herald.)—The village council meet Wednesday evening and decided to extend the sewer from Lake street up First avenue as far as the Catholic church. The contract is to be let next Wednesday.

W. G. Shane went to Duluth Wednesday with Mrs. Bradford, Mrs. Shane's mother, to see her off for her home in Michigan.

Dr. E. C. Clemans of Duluth preached in the M. E. church Friday evening and held the fourth quarterly conference.

Mrs. James A. Geer returned from her visit to Canada Saturday evening, accompanied by Mrs. M. Geer, sister of the pastor of the M. E. church.

Mr. Bergerson is having the foundation excavated for the new Catholic parsonage and the foundation will be built next week.

Friday and Saturday of this week Karon Bros. had the main street of the town blockaded with the long warehouse building which they are placing next to Lundall & Ryder's store. The building had to be moved down the street crosswise.

Last Monday evening Miss Chase entertained the rest of the school teachers at the home of Mrs. G. L. Train. The report is that the schoolmams had a great time.

Mr. Ring, bookkeeper for the Leonard Iron Mining company, went home to New Richmond, Wis., the first of the week and found that his mother was seriously ill.

Dr. W. R. Schmidt was unexpectedly called to Minneapolis Wednesday morning and is expected back the last of this week. One of the Hibbing doctors from the Adams hospital takes his place.

Matt Roberts, a young man formerly employed in the Clark mine office, has been a cripple for over one year. His trouble is rheumatism and the doctors here say that the case is beyond their skill and have advised him to go to the Hot Springs. C. R. Woods started a subscription to pay his way to the Hot Springs for treatment. This is an extremely deserving case and the people appear to be in sympathy with the young man, who has suffered so much and for so long.

Mrs. C. E. Hendricks of Buhl, accompanied by her children, spent Thursday visiting at the homes of Rev. James A. Geer and Leon Taylor.

Thursday evening of this week Capt. James Lanyon, Capt. John Crellin and William Richter, trustees of the M. E. church, met in the new parsonage to accept the contract which has been performed by Henry Furere. The board was highly pleased with the house and with the cheerful and generous way in which the people have responded to their appeal for money. The house is costing about $1,600, which provides all modern conveniences and Georgia pine finish down stairs and hard wood floors, and $700 of the $1,600 has been raised so that the church will need but $700 of a loan to pay off all its obligations. The loan has been provided by the Miners' State bank of Chisholm, through President Kirby of Hibbing.

Miss Ada Eaton of Virginia spent Sunday with Mrs. W. G. Shane.

Max Manson has moved his household effects to Buhl, where he is going to take charge of the Lewis Bros.' store.

FARM LANDS
NEAR DULUTH.
Now is the time to buy. We are selling good lands around Duluth that will grow the best crops in the state, and with Duluth, Superior and the Iron Ranges for a market for all farm produce, at $5 to $10 per acre, on easy terms. Your money in these lands is as safe as it would be in government bonds, and it will secure you a better profit than any other investment you can make.
We have some lands on which the timber is worth all that is asked for the land. Also have lands on rivers and lakes, suitable for summer camps or homes at $2 to $5 per acre. Lands in St. Louis county, on which timber is reserved, at $2 per acre, no taxes.

LATEST NEWS OF THE NEIGHBORING TOWNS

Drummond's farm, near this city, has been purchased by an experienced truck gardner from Iowa, who will immediately begin work on the same.

Andrew Swenson has been confined to his home this week with an attack of rheumatism.

C. J. Heindal of Duluth is making some improvements on his homestead near this city.

A son was born to Mr. and Mrs. Fred Lore last Friday, Sept. 21.

Clara Swenson is visiting friends in Duluth.

Recently field mice destroyed a purse containing $3 in silver and $52 in currency, belonging to John Smith, a homesteader living at Pine Lake. When found, all that was left of the bills were strips of ragged paper which were sent to the treasury department by Postmaster Hall for redemption. It is probable that about $15 or $16 of the amount will be redeemed.

Mrs. John Thompson, who has been suffering for some time with a large carbuncle on her back, had it removed last week by Doctors Stewart and Paterson. She stood the operation well and is now on the road to recovery.

Percy W. Gibson of Kaukanna, Wis., spent Wednesday in this city, with his parents, Rev. and Mrs. John Gibson.

The heavy rain Tuesday afternoon caused a washout between Iron River and Superior on the Northern Pacific road. Northern Pacific trains passed over the South Shore tracks until the washout was repaired.

Ely

Ely, Sept. 29.—(Special to the Herald)—James Bale and party were registered at the Exchange hotel Wednesday.

W. H. McQuade of Tower was an Ely visitor between trains last Wednesday.

A. M. Wessinger of Duluth was an Ely visitor several days this week.

John Renner is taking a three weeks vacation, going from Duluth to Port Arthur by boat then to Winnipeg by rail, where he will spend about ten days.

Richard Whitesides, a former resident of Ely, spent a few days here this week visiting friends and relatives.

Polydore Aubin, Sr., left last Monoday for a two weeks' business trip to Port Arthur.

G. C. Kane of Highland spent Sunday and Monday with friends and relatives in this city.

A. F. Adamson of Aurora is visiting this week in Ely.

Homer Bedford who has been on a five months' cruising trip through parts of northern Minnesota, Wisconsin, Michigan and Canada, returned last Tuesday and will remain here a few weeks visiting with friends and relatives.

Frank Fulton and John Alen McGoughley, of Two Harbors were registered at the Exchange hotel last Tuesday.

John Gouze has refitted his place of business throughout, putting in new bar fixtures, and also a water pressure pump.

William Barney, formerly of this city, returned last Wednesday after an extended absence throughout the western country. He has accepted a position with Ed. Crossman and will make this his future home.

Ed. Drummond, who has been laid up for the last eight months, has resumed his old position with the St. Croix Lumber Co.

William Hodson, an old time resident of Ely, left Tuesday for Sidnaw, Mich., where he will reside in the future.

Patrick Carroll, who has been spending the last two weeks at Wolf Lake, returned Friday bringing in the largest pike ever caught in this vicinity, it weighing a trifle over seven pounds.

The city hall and the residence property of Thomas Jury have been improved in magnificent shape by putting in cement walks and walls which make about the finest appearing corner and adjacent lots in the city.

The central and high schools are attractive in appearance, with their new steel ceilings and electric light fixtures, the latter being of the finest quality oxidized copper.

The freshmen and eighth grades are now getting some good practice in foot ball, Joseph Jordan of the manual training department has charge of the practice work.

Contractor George Holmes has about completed his work at the high school. The cement walks and stone fence around the grounds add much to the beauty of what is already considered one of the finest school buildings in Minnesota.

Gymnasium work is now carried on under the direction of Miss Kennedy and Miss White in the Auditorium. The classes have taken up work with dumb bells and Indian clubs.

A fine new alberene stone top is being placed on the chemical table.

The students enrolled in the sewing classes are very enthusiastic over their work. Miss Mary Clark has charge of the sewing and cooking, the latter work having not yet begun, on account of delay in getting the equipment.

Mr. and Mrs. C. L. Newberry entertained the citizens and teachers in the high school auditorium last evening. The entertainment consisted of music, reading, and dancing. About two hundred invitations were issued.

Brookston

Brookston, Sept. 29.—(Special to The Herald.)—Joe Blair and family are visiting with Duluth friends.

Blanch Stein was visiting at Arlberg the first of the week.

The Ladies' Aid will meet with Mrs. W. A. Epperson next Thursday afternoon.

Hibbing

Hibbing, Sept. 29.—(Special to The Herald.)—Dr. D. C. Rood and wife spent a portion of the week in the Twin Cities.

Victor L. Power transacted business in Duluth the first of the week.

Forest Webster visited his father in Eveleth during the week.

J. F. Twitchell, president of the Hibbing Speedway association, left Thursday morning for Bemidji, where he will attend the races that are being held there this week and advertise the St. Louis county fair at all intervening points.

J. H. Carlson, of the Carlson Mercantile company, returned Thursday from an extended trip through the Eastern markets.

Miss Rose McElroy returned Tuesday from Eau Claire and Chippewa Falls, Wis., where she has been spending a two weeks' vacation.

Rev. Rupert Swinnerton, pastor of the Methodist church of Hibbing, has announced that he will not accept an appointment to preside at the coming conference year, but will engage in work of a different description. The renewed church building has been dedicated free of debt and the parsonage practically so, while the church membership has been growing steadily. Mr. Swinnerton has been a very successful worker and will be greatly missed by the parish.

O. E. Sundlie has resigned his position with the Oliver Mining company to take a position in the postoffice at Eveleth. Mr. Sundlie has been in Hibbing for several years, during which time he has made a great many friends, who regret his departure.

Mrs. Paul Clarkson arrived in Hibbing last week from Duluth to join her husband in a cosy little cottage at the Pendobscot location. Mr. Clarkson is employed as foreman at the Hull-Rust mine.

Mrs. Sarah Billeu, who has been employed as stenographer for A. P. Silliman for several years, will leave next week to take up her home in the South.

A. W. Joerns, secretary of the Bulletin Publishing company, transacted business in the city during the week.

Kitz and Mrs. William Kitz are now occupying their new home at the corner of Pine street and Fourth avenue. The building, which was recently completed is of cement blocks, built by the Northwestern Cement company, and consists of two eight-room modern flats.

Dr. Saylor has been called to Langdon, N. D., by the serious illness of his mother.

Mrs. H. R. Wierick returned home Tuesday evening after spending several months in Minneapolis.

Al Powers and William Hill left Wednesday morning for Alberta and other points in the Canadian Northwest, where they will look over timber lands. Mr. Powers will return in a few days while Mr. Hill will remain a few weeks.

The first gun of the state campaign will be fired at Hibbing next Tuesday evening at the Power theater by Governor Johnson. Although there were only two Democratic votes cast at the primaries Sept. 15th, it is safe to say that he will be greeted by more than those two Democrats, in fact, additional seats are being placed in the Power theater to accommodate the crowd which will be there to hear the governor.

One of the best baseball games of the season will be played on the local grounds by teams made up of the Hibbing players, who played with the champions during the last two seasons. The teams have been evenly matched and a very close game is looked for. Freeman and Bradenhagen, and Creamer and Kleffman for batteries. This will be the last game of the season.

William Head returned to Hibbing Tuesday from Eau Claire and Chippewa Falls, where he has been holding down the second sack for that team in the Wisconsin State league. Mr. Head has been playing exceptionally fine ball all this season, being among the top notchers in batting and fielding. He will take a position as clerk at the Miles hotel.

J. M. Shoemaker, secretary of the civil service commission for the Eighth congressional district, has been in Hibbing for the past week investigating conditions at the postoffice. The growth of the business of the office has been so rapid that the following improvements will have to be made in order to have good service. One additional town carrier, one rural delivery carrier, for the mining locations, one additional clerk and additional floor space. It is the intention of the commission to rent the building immediately off the postoffice and install the money order and registered letter department, and also to give additional box service. Examinations for clerks and carriers will be held in Hibbing in the near future.

The Royal Neighbors will give a card party in the Knights of Pythias hall next Friday evening. A general invitation is extended to all.

Proctor

Proctor, Sept. 29.—Special to the Herald.—The Ladies' Aid Society held an election of officers at their regular meeting on Thursday afternoon at the home of Mrs. C. B. Gilbert. The following officers were elected: Mrs. C. B. Gilbert, President; Mrs. Fred D. Knight, Vice President; Mrs. Ellerson, Secretary; Mrs. Fred Carlson, Treasurer. After the election a delicious lunch was served. This society has now over forty members.

Mrs. M. L. Rappold is confined to her room on account of extereme nervousness.

Mr. Huber, a conductor, was thrown from the cupalo of a caboose to the floor and sustained a broken hand.

Mrs. Mark Lewis is ill.

C. W. Ramshan has returned from a visit to Chicago. His father, who was seriously ill, is recovering.

Mrs. Shunk leaves today to visit her old home near Saginaw, Mich.

Ground has been broken for Mr. A. Quackenbush's new store at the corner of 2nd ave. and 1st st., east.

Mrs. Sugg, who has been dangerously ill, is entirely well again.

Miss Millie, daughter of Mr. and Mrs. Robert Brayden is ill with typhoid fever.

James Brophy, has returned bringing with him a blushing bride. The boys gave them an ovation.

Prof. Hagne, a hypnotist, will give a performance at the Village Hall Friday and Saturday nights.

Virginia

Virginia, Minn., Sept. 29.—(Special to The Herald.)—Miss Marie Chambers, a teacher in the Bradbury School of Music in Duluth, is a guest this week of Miss Eva Metcalfe.

James Geary, for the past month an employe in the machine shops of the Duluth, Rainy Lake & Winnipeg railway, left Tuesday morning for Hancock, Mich., called there by the illness of his wife.

Miss Gertrude de Roble was a Duluth visitor last Saturday.

E. J. O'Rourke and Jacob Stein attended to business matters in Duluth last Saturday.

Attorney F. L. Barnon of Eveleth was in the city on legal business Tuesday.

P. S. De Marais, who recently arrived here from Duluth to commence the work of compiling a range directory to be published by the Hibbing Tribune, received word Tuesdaymorning that his father had been killed in a railroad collision that occurred at New Prague, Minn., Monday noon. Harper also departed on the noon train Tuesday for his home in Minneapolis to attend the funeral.

An infant son of Mr. and Mrs. Joe Boubnama died Tuesday night after a brief illness, aged 4 months.

Herbert Toll, a brakeman on the Rainy Lake road, had a narrow escape Tuesday. While the crew was engaged in switching some cars loaded with logs, Toll was riding on one of the bumpers. He was jerked off but fortunately caught hold and hung on with one hand while his body was dragged along under the cars for considerable distance. His right thumb was badly lacerated, but otherwise he was uninjured.

Miss Minnie Michan returned Monday evening from Chicago, where she has been studying the latest styles in dressmaking the past two months.

Nelson Shields, the electrician, was in Duluth on business the latter part of last week.

Edward Finch is back from a visit in Duluth.

Richard Baille has gone to Portland, Or., on a business trip.

Dr. F. E. Detling of Duluth was in the city the first of the week on professional business.

H. A. Sodergren of Minneapolis looked after his business interests here during the week.

"Bob" Garvey went to Ashland Saturday to spend Sunday with his family and also witness the racing meet held there the first part of the week.

Capt. James Trezona returned Saturday evening from a visit in Duluth.

Mrs. J. S. Lutes of Biwabik visited with Virginia friends Tuesday.

J. W. Nelson of Taylor Falls was at the Fay Tuesday. Mr. Nelson did considerable lumbering in this district two years ago.

One hundred and eight children and a number of adults were confirmed in Our Lady of Lourdes church last Sunday morning by Bishop James McGolrick of Duluth. Father M. Sengir said high mass before the ceremony and the choir sang "Farmer's Mass." The bishop spoke in his usual forceful manner after the mass. In the afternoon, the congregation assembled at the church at 3 o'clock, where Father M. Bilban pronounced the benediction, after which they proceeded to march to the Virginia cemetery, there being over 600 people in line. At the cemetery, the bishop delivered a sermon, and Rev. Bilban of Eveleth, and Rev. A. Sengir of Virginia delivered short addresses. No services were held in the evening.

Rev. Henry A. Logan, pastor of the Methodist church, will leave Monday for Duluth to attend the Methodist conference of the Duluth district which convenes there on Monday evening. From there he will go to Minneapolis to attend the annual conference. Rev. Logan will in all probability return to Virginia for another year at least, as the members of the church are well pleased with his services and have expressed themselves in favor of his returning.

The Ladies' Aid society of the Methodist church will meet next Wednesday afternoon at the home of Mrs. Joseph Roskilly. Election of officers occurred at the meeting held at the home of Mrs. Redcliffe last Wednesday, as follows: President, Mrs. J. L. Kimball; vice president, Mrs. C. C. Butler; treasurer, Mrs. Shea; secretary, Mrs. O. P. Johnson.

A season of mission work will be inaugurated next Sunday morning at the Church of Our Lady of Lourdes. The mission will open at 10:30 mass. The missionary priests are of the Dominican order, who have devoted their lives to this work.

J. H. Horrigan returned Wednesday evening from a business trip to St. Paul.

Alderman J. L. Kimball was a Duluth visitor Tuesday.

Mr. and Mrs. C. Nelson were Duluth visitors Tuesday and Wednesday.

W. H. Bell, travelling representative, and Walter Buehler, consulting engineer of the Kettle River Quarries company, arrived in the city Thursday morning to inspect the progress of the paving. Considering the difficulties experienced with the elements and the injunction suit, the gentlemen think that good progress has been made.

Alderman Matt Prijanovich will depart today for Waukegan, Ill., to attend the national convention of the St. Joseph society as a delegate from the Virginia lodge.

Mr. and Mrs. Matt Prijanovich and family visited on Wednesday with a sister of Mrs. Prijanovich at the Miller mine location, Aurora.

Milton Butler and Henry Sincock left Monday for Madison, Wis., to enter the university. Mr. Butler will enter upon his sophomore year and Mr. Sincock upon his freshman. The latter will take a course in civil engineering.

F. B. Rossom was in Duluth several days this week.

Miss Nellie Griggs arrived home Saturday evening from a visit of a week with Miss Rebecca Bailey at Duluth.

Miss Mabel Griggs, who has been attending Stanley Hall college the past two years, has gone to Northampton, Mass., to enter Smith college.

Mrs. J. L. Owens left yesterday to attend the Episcopal Sunday school convention held in Duluth last evening. Mrs. Owens represented St. Paul's Sunday school.

Mr. and Mrs. E. G. Bush spent Thursday in Hibbing.

Mrs. J. G. Watt has issued invitations for a large party to be given this afternoon in the Fay opera house. Miss Agnes T. Shiel of Chicago will be guest of honor.

While practicing with the Roosevelt high school football squad last Saturday, Eugene McCarthy had the misfortune to break his left arm. He had the ball, and in the tussle which followed the attempt of the opposition to get it, the injury was done. Eugene feels pretty bad over the accident, as he was substitute on the first team, and he will now be unable to play this season.

Cards have been received here announcing the marriage of Miss Elsie Fay Johnson to Harry B. Hickory. The wedding took place at Ishpeming, Mich., Wednesday, the 19th inst. Miss Johnson is a sister of City Engineer E. F. Johnson of this city, and has a large number of friends here who wish her much happiness.

Thomas E. Devaney of the Virginia Produce company will be united in marriage on Wednesday next to Miss Eva Thennis of Duluth. The ceremony will take place at the German Catholic church in that city, and after a brief wedding journey they will be at home in Virginia.

Mrs. L. L. Flandt entertained the Neighborhood Birthday club Thursday afternoon at a thimble bee. Much merriment was created at the amount of ingenuity displayed by some of the ladies in the line of ready-made garments. The laurels were finally carried away by Mrs. A. H. Bentz. Light refreshments were served. The members of the club presented the hostess with a very nice luncheon set of drawn work.

Frank Meehan, the local trombonist, has gone to Texas to begin a band engagement. He has come to the front in the musical world by his own efforts and has played in different parts of the country with considerable success.

The funeral of the 2-year-old daughter of Mr. and Mrs. Joseph Baruba, who died Tuesday, was held from the family residence yesterday afternoon.

A son was bor Tuesday night to Mr. and Mrs. John Peterson.

Contractor McDonnell is rushing the paving the past couple of days and if fine weather continues the work should be completed early in November. The block between Railroad and Mesaba avenues is ready for the creosote blocks to be laid, and men will doubtless be put to work on that part of the contract some time next week.

A new foundation is being laid under the Mitchell hotel. A heating plant will also be installed in the hotel as soon as the foundation is completed.

Walter L. Smith, the pianist and tenor, gave a musicale in the Fay Opera house last night. He was assisted by Miss Josephine Sterle as accompanist.

Mrs. Clara F. Hannaman from Franklin, Ind., arrived in the city Tuesday evening for a visit with her sister, Mrs. J. R. James.

R. Baker left Tuesday noon for Montana, where he expects to remain for several weeks in the hope of benefiting his health. William Bernard will have charge of "The Hub" during Mr. Baker's absence.

H. C. Nolan has returned from a trip to his gold mine in Wyoming. He reports everything moving along very satisfactory at the property.

Mrs. T. W. Lust and children returned Saturday evening from a visit with relatives in Duluth.

Mrs. R. W. Hyde has returned from a visit at Deerwood.

Owing to the wet condition of the local gridiron the game scheduled between Grand Rapids and Virginia to take place today will be played at Grand Rapids. The team and about thirty rooters left on the Great Northern tomorrow morning and will return in the evening. Capt. Meehan says that the material selected for this year's team is the best the school has ever produced and that he expects the season to close with a long list of victories for the Roosevelts. Following will be the line-up of the team in today's game: Hooper, center; Ellerston, left guard; Gill, right gu

OUR YOUNG FOLKS CORNER

Billy's Soliloquy.

'Tis the glorious time of all the year,
When plum and peach and grape and pear
Into big jelly jars will go,
And in the pantry in a row
Will make an appetizing show.

When bread in slices, broad and white,
Will be spread thick, quite out of sight,
With juicy jam and jelly sweet,
All nicely fixed for me to eat.
My, oh! But it will be a treat.

And now's the yellow pumpkin's day
When he will to the cellar stray;
Where Cook with carving knife will nie
And slice him up to make a pie
Which I will eat. Oh me, oh my!

And other goodies, too, are here,
That always come this time of year:
Goodies big and goodies small,
The names of which I cannot call;
But you may bet, I'll eat them all.

MAUD WALKER.

National Flowers.

The national flower of England is the rose; of France, the fleur-de-lis; of Germany, the cornflower; of Egypt, the lotus; of Greece, the violet; of Ireland, the shamrock; of Italy, the lily; of India, the lotus; of Japan, the chrysanthemum; of Mexico, the nopal cactus; of Scotland, the thistle; of Spain, the pomegranate.

Riddle, come riddle, come rye;
What is it can't see, though it has an eye?

(A needle).

How Speed "Got Even."

[By William Wallace, Jr.]

It was Speed's first day in the Beeville public school. Beeville was a town of but a few hundred inhabitants, therefore it boasted of only one small frame schoolhouse of two rooms with one teacher for each room. Speed was in the "advanced" room, fourth-reader grade. Not only was this Speed's first day in school, but his second day in the town, for his parents had just moved there from a farm many miles away. Their object in coming to Beeville was to give their son the advantages of an education.

Speed was a good, studious boy, loving his books and anxious to learn all that was to be gained at the little public school, and it was with real pride that he walked into the schoolhouse on the first Monday morning of the fall term with his hair brushed till it shone like a mirror, his face aglow from soap and water and his cheap, well-worn clothes as tidy and neat as could be; while under his arm were his new books, carefully covered with bright print—the thoughtful work of his fond mother.

As soon as the teacher looked at Speed she knew that he was no common boy, that he was a well-reared chap, with a certain refinement and grace of manner which bespoke a gentleman for a father and a lady for a mother, though indications pointed to the fact that they were not counted among the rich, or even the well-to-do.

The last bell had just rung and the straggling pupils were choosing their seats and seat mates amidst a confusion of whispers, shuffling feet and rattling slates and books. Speed, on entering the room, bowed respectfully to the teacher; then waited in the aisle till some seat should be left vacant for him. But there being more pupils than desks many of the seats held two children, and Speed was obliged to wait till the teacher should assign him to a place. At last he found himself seated beside a rough, slovenly dressed boy who looked as though his face was a stranger to water and his hair unacquainted with a comb. When Speed took his end of the seat he kindly smiled an introduction to his seatfellow, who glared back with a defiant air, as if saying: "How dare you, a stranger, intrude yourself upon me, sir?" But Speed did not pay any attention to the rude conduct of his rough companion, but began to place his books neatly in his end of the desk. The rough boy, seeing that he was to be ignored, decided to pick a fuss with Speed, and began by whispering in a loud voice during the singing: "Say, green-goose, where did you git such pretty covers for your books? Th - look like gurl-baby books. Gee! I'd hate to be a little Lizzie; an' that's what you are."

Still Speed ignored the boy, and drowned his voice by joining in the singing. This infuriated the boy who whispered more loudly, putting his mouth close to Speed's ear and forcing his words upon him: "Say, Lizzie, mamma's darlin' baby-boy, I can lick you at recess with my right hand tied. Do you hear, sissy?"

Speed, not wishing to be so annoyed, turned to the boy and said:

"If you don't like my looks please keep your eyes on either your books or some other point in the room. I'm not going to bother you, and I don't intend that you shall bother me. If you want to get another seat there's one down there on the aisle."

"Ya—yah—yah!" said the boy, sticking his mouth out at Speed and making a wry face. "I got this seat first an' I mean ter set here in it. But you'd better look out for me. I'm the strongest kid in this town an' I kin lick you with one han'. So don't dare to give me any of your country-made sass, Lizzie. Do you hear?"

The teacher was now beginning the examinations in order to arrange the classes, and Speed, with his seat-mate, was called to the blackboard to be tried in "figures," so he made no reply to the boy's taunts. As Speed passed for the fourth grade and the rough boy failed there was cause for more venom from the boy, and as soon as they had taken their seats he held his big geography up in front of his face so that the teacher might not see him and began: "Say, your pap and mam are so dirt pore that they can't squeel, ain't they? My pap says you're stuckup trash. Your mam tries to put on airs, don't she? Well, she can't come that dodge in this here town. We seen you when you moved in yesterday. Your mam, she's——"

"Henry Adams!" cried the teacher, "are you whispering?"

Speed's seat-mate, to whom the teacher spoke, put down his geography, looked directly into the teacher's face and said: "No'm, I'm studyin' my lessons. It's this feller here what's whisperin' all the time to me." And he jerked his head in Speed's direction as he said "this feller."

Speed's face grew crimson, and, rising in the aisle, he said, addressing the teacher: "Please, teacher, I have not whispered to this boy but once, and that was before our arithmetic examination. I asked him to attend to his books and let me alone."

The teacher, knowing Henry from last year's school, and having had some serious difficulty with him, knew that Speed was telling the truth, so she ordered Henry to take his books and move to a seat nearer her desk, where she might keep an eye on him. In one end of the seat to which she assigned him sat a dirty little cross-eyed urchin who was understood to be the outcast of the school. When Henry had to sit beside him a titter ran round the school which more fully roused his ire against Speed and made him vow to have revenge, or, in his own words, "to git even with that sissy."

When recreation time came Speed stayed in the schoolroom and became better acquainted with the teacher, who found him a high-minded boy of manly principle. He knew if he went out to play Henry, with others like himself, would make it unpleasant for him, so he decided to remain indoors till the rougher element should have become used to his presence in the school and would let him alone at recess time. But Speed had to pay for this act at noon, when he started home for his dinner. Hardly had he reached the edge of the school grounds when Henry, accompanied by two other rough, heavy-faced and unkempt-looking boys, ran up beside him.

"So you won't come out at recess and play with us fellers, eh?" exclaimed Henry, menacing Speed with his fists.

"No, I reckon you feel too fine, you dern Lizzie," spoke up one of Henry's confederates. "Well, we're a-goin' to give you the worst lickin' you ever had in your life, my baby boy."

"Say, boys," said Speed, turning round and facing the group, "I ain't a fighting boy; my mother taught me better than to be like an animal, but if you force it on me—why, I'll give as well as take. I'm willing to let you all alone if you'll do me the same favor. But I won't be run over."

"Oh, hear little Miss Lizzie bluff!" cried one of the boys. "Say, little baby, does your mamma know you're out?' And the three roughs laughed at their own wit.

"Let's try his muscle," said Henry, edging close to Speed and scowling in his face. "I'm for gittin' even with him for tellin' that about me to the teacher. I'm ready to lay him cold, I am." And he bristled up and shook his fists under Speed's nose.

"All right, you fix him, Hen," said one of the other boys. "Then if he wants to scrap any more Dan, here, an' me'll finish him up."

Speed looked out to see if any help was near, for he felt himself unequal to handle the three at once, and he knew they were dishonorable enough to all attack him at the same time, giving him no show. But to his disappointment he saw the school grounds deserted, all the children and the teacher having gone to their respective homes for dinner. And the town was cut off from the schoolhouse by a row of low, bushy trees, whose lower limbs mingled with the tall weeds and grass, thus cutting off all view of that part of the ground from the few villagers who might be walking about the streets.

"Take off your coat an' git ready for me," warned Henry, jerking off his own coat as he spoke. "I'll manage you without much trouble, an' give you the first blow. Here—ready!"

Speed threw off his coat, and before the astonished Henry—who really thought he would take to his heels—could realize what his antagonist was about he had struck him a blow in the face and a second under the jaw that sent him sprawling on the ground, blood oozing from his nose. Upon seeing their friend down, the other boys sprang toward Speed, Dan grabbing for his throat; but they miscalculated their foe. Like a flash Speed's long, strong right arm swung out and caught Dan under the chin, throwing him across Henry, who was beginning to struggle to his feet. Then Speed grappled with the third boy, and they exchanged blows fiercely for a minute, when Speed, by sheer force, threw him to the ground and sat astride his shoulders, cuffing him right liberally in the face. "Nough—'nough!" cried the whipped fellow, the blood spurting from his nostrils, for Speed had struck harder than he had meant to on the enemy's proboscis.

By this time Henry and Dan had got to their feet and came to pull Speed off their friend. "Don't touch me," said Speed, looking so determined at Henry that the latter drew a step backward, "for I know when to stop. I never strike after my fellow cries 'nough. But you fellows had not so much honor, for you all meant to jump on me at once and overpower me by your number. See what you got for it?' And Speed got off the shoulders of the whipped boy and stood bravely, fearlessly up before the cowardly pair who confronted him. "Now go, or I'll give you another round," he added, as the prostrate form slowly got to his feet.

"Well, are we to be friends?" asked Henry, addressing Speed as he put his coat on.

"Not enemies, I hope," answered Speed. "But your future conduct toward me will settle the question. Remember—never, never shall one of you call me names again, or I'll make this day's battle look worse than 30 cents. I'm off."

That afternoon Speed walked up to the teacher and made a confession, telling her all about the fight. "My mother said it was a case of 'have to,'" he ended up with.

"Your mother was right," said the teacher. "And I glory in your pluck, Speed. You are no coward."

"Well, Henry said he meant to get even with me," he laughed, "and I turned the tables by getting even with him."

FIND THE HINDOO'S FRIEND.

Conundrums

Why is it impossible to catch a thief who has stolen a complete set of harness?
Because there is not a trace left.

What is the difference between an engineer and a school teacher?
One minds the train and the other trains the mind.

Why should a man in crossing the Sahara Desert carry with him a watch?
Because it has a spring in it.

What is the difference between an artist and a cook?
One draws a fowl and the other cooks it.

Why are playing cards like great corporations?
Because they have knaves in them.

When are soldiers and carpenters alike?
When drilling.

Why is an icehouse like a kid doll?
Because both are stuffed with sawdust.

When are dressmakers like locomotives?
When making up trains.

When the Fairies Came Down the Rainbow.

By Helena Davis.

Grandpa Star had come to see the little Stars—Minnie, Tom and Mabel. Of course, grandpa intended visiting the mamma and papa of the three little Stars; but they were secondary, the small trio coming first with the dear old man. I may as well tell you that the little Stars' papa was dear old grandpa's son; but, as he had long ago grown up, grandpa now turned most of his attention to his three most interesting little ones when he came to pay an annual visit.

And grandpa was the very best story-teller in the world, so the three little Stars would tell you. Hardly an hour in the day went by—when the children were not in school—that grandpa was not kept busy telling "yarns," as he called it.

As grandpa arrived on Saturday morning, the children had the day to spend with him—a day unbroken by school. The whole forenoon they spent in assisting grandpa in unpacking and putting his wardrobe in the closet and bureau drawers. Then came luncheon, when they must share his company with their parents.

A grand time was planned for the afternoon, for they were to take grandpa to the park and spend the time roaming about in the woods or sitting beside the lake watching the boats that flecked the water like so many white-winged birds. But before luncheon was over clouds covered the sky and a heavy downpour was threatened. Tom, looking from the window, cried: "Oh, our afternoon is spoiled! It is going to rain; and, if I'm any judge, it's going to rain pitchforks."

"Why, isn't grandpa here?" exclaimed Minnie. "And how could any afternoon be spoiled when he is with us, I'd like to know?" and the little Miss looked her surprise at Tom's remark.

"That's what I say," put in Mabel, Tom's twin. "If we can't go out we can go into the big back porch—where no rain could ever get—and sit round grandpa and listen to a story."

Grandpa exchanged knowing smiles with mamma and papa Star. Then he bowed very low to first one little girl and then the other, saying:

"Very pretty of you, my dears, to say such nice things of an old chap like me; but I may not be able to dispel the gloom of the coming storm. However, I'm willing to try my best at entertaining three such fine stars as yourselves, I assure you."

Then the Star family adjourned to the library, papa Star going back to his office and mamma Star excusing herself to go and look after a coop full of little chickens which she had in the back yard, for she feared the storm might take them unawares.

Grandpa sat in the big window with the children about his knee, all looking out at the coming rainstorm.

"Wish we'd see a rainbow this minute!" exclaimed Tom. "Then we'd know that the rain was over and we could go to the park."

"Rainbow—rainbow," said grandpa. Then, his face lighting up, he quickly added: "Say, my little twinklers, come to the back porch and I'll tell you a rainbow story—a real fairy tale that I'm sure you have never heard before."

In a jiffy the happy children were grouped about grandpa in the deepest corner of the big porch, all attention and anticipation, for a story from him always meant something.

"Well, once upon a time," began the jolly old gentleman, "there lived a band of fairies in one of the European countries where fairies were not liked. A cruel king hated them for the reason that they were always foiling him in his wickedness and giving certain charms to his abused subjects that made them proof against his evil intentions, sometimes turning the tables on him and bringing to him sickness and heavy financial losses. So this mean king made overtures to certain wicked sprites that roamed the woods in company with a band of witches and wizards and made known to them his ugly intentions toward the good fairies. The sprites, hating the fairies as heartily as did the king, readily offered their assistance in ridding themselves and the monarch of the fairies. They hastened to an old witch who held certain powers over the fairies and who was wicked enough to use them if in return she could get the king to give her control over a part of his dominion. This the king gladly consented to do. So the persecutions of the good fairies began and the war waged mercilessly, many of the fairies getting caught in the old witch's traps and killed.

"One day, driven beyond their domain, the poor fairies, after vainly trying all their charms against their heartless and cruel foes, found themselves almost within the clutches of a band of witches and wizards, who outnumbered them by many hundreds. They were on a hillside exposed to the wizards' and witches' view, and were rapidly being overtaken by them.

"'We are lost,' said the queen of fairies. 'Our goodness cannot battle against the wickedness of witches, wizards, sprites and cruel king combined. Like the poor fawn that is pursued by huntsmen on horses, accompanied by fierce dogs, we must surrender and be exterminated.'

But just as the disconsolate queen spoke a heavy cloud gathered in the sky and settled down all about them. Lightning flashed, thunder roared, and rain such as had never been seen before fell in torrents. The witches, the wizards, the sprites and the king's hosts were swept down the hillside by the torrent and nearly all were drowned. But the cruel king and the wicked old witch managed to save their lives, and with all haste returned to the king's castle, swearing by all that was unholy to avenge themselves on the fairies whom they held responsible for the flood.

Now, strange to say, no heavy rain fell where the fairies were assembled. The clouds seemed to part over their heads, and the blue sky gleamed above them, while all about was as the darkness of night. As soon as the king and the old witch had taken flight toward shelter the clouds lifted and a beautiful rainbow stood across the land, one of its ends resting on the very hill on whose steep side the fairies still remained grouped. On beholding the rainbow—the most perfect one ever set on earth—the fairy queen hastened towards it, beckoning to her many followers to accompany her. To their happiness they found the rainbow quite firm enough to sustain fairies' weight, and they all climbed on top of it, walking and flying by turns till they had reached a very high part of the curve. Then the queen called all to a halt, and they held a council as to their further move. All agreed that it was useless to return to the place they had just escaped from, and decided to go to the other end of the rainbow.

So they set out to follow wherever it might lead them, knowing that their fate could not be worse than it would be here in the country of enemies.

For many days the fairies traveled and traveled, part of the time over land and a part of the time over seas, and all the time the rainbow served as a great, high bridge spanning many hundreds of miles. But as they journeyed along the rainbow would fade away and wholly disappear behind them, thus showing the fairies that they were safe from their enemies, who could not follow them, having no trace of their wandering. On the fifteenth day after starting on their trip the fairies came to the other end of the rainbow, and there they landed in the most beautiful forest they had ever seen, with rolling plains skirting it, and off in the distance a long, clear lake glistening in the sunshine.

"Our land," said the queen, waving her wand high above her head. "A new and a happy home for my fairies," she continued, smiling on her followers. And her words were prophetic, for from that day success, and security were theirs, and they dwelt in the place commonly called "Fairyland."

Grandpa paused at the end of the tale, and looked on the faces of the three little Stars, for they had been the most interesting listeners he had ever seen. Not one word had they spoken while the story was on his lips, and even now, that it was told, they sat as quiet as little mice, fearing to speak lest the story be erased from their minds. The rain was coming down pretty steadily, and the fall wind which had brought it with a dash was hardly still, though it was fast wearing itself out. As the old man and the little "twinklers" sat in silence the rain suddenly ceased, the clouds broke away, the sun smiled from his place in the western sky and across the northern hills there arched a great beautiful rainbow, so brilliant that all four pair of eyes were caught by it, and Tom, in an excited voice, cried: "There's the rainbow that the fairies came down, and I'll bet at the northern end is Fairyland. Gee, wish we could go there!"

"Oh, but no one but fairies can walk on the rainbow," declared Minnie. "It would let common people drop through, wouldn't it, gran'pa?"

And grandpa nodded his head, smiling as he said: "And now we may be off to the park, for the rainbow says the storm is over and the sun is coming out. We've still an hour to spare watching the boats on the lake."

"Yes, and I'm glad it rained," said Mabel, "for if it hadn't we'd not have the story of how the fairies came down the rainbow and found that strange place, 'Fairyland.'"

The rainbow seemed as a great high bridge spanning many hundreds of miles.

A Day With Busy Creatures in Wood and Water.

It was such a busy day in the wood and the water. Old Mrs. Elephant was putting her summer garments away in her trunk, while her baby was being entertained by Mrs. Snake's rattle to keep it quiet. Mr. Goat was blowing his horn to call his family in from the pasture, and Mrs. Woodchuck had flown to town to settle her bill. In the water the sword fishes were busy fencing, while the other fishes were engaged in weighing out water on their scales. Miss Hen Turkey was smoothing her feathers with her comb, and several little mermaids were making up the ocean's bed. Away in the depths of the forest a fugitive leopard was spotted by a giraffe, who used the rubber in his neck to good advantage.

Acrobats on the Top of a Skyscraper.

The skyscrapers of this country, such as the Park Row Building, in New York, consisting of 30 stories, afford ample scope for the display of steeplejack courage. The experts engaged on this work think nothing of standing upon or sitting astride the steel frames used in the construction of skyscrapers, with nothing between them and the ground but 400 feet of air. The flagpole painters of America think even less of the risk they run, for they will climb a 60-foot pole fixed to the top of these immense buildings, and even will indulge in acrobatic performances, to show the utter contempt they have for the dangers of their calling.

Alack! Alack!

A mean little spider
Wove him a web:
Oh, sad was the day!
Oh, sad was the day!
For a cute little flylet
All unawares
Came buzzing that way!
Came buzzing that way!

Into the meshes
Of old Spider's web
The little fly flew!
The little fly flew!

And from that sad day
That poor little fly
With this life was thru!
With this life was thru!

And that wicked old spider
Sat licking his chops
After breakfast was o'er!
After breakfast was o'er!
And said with a wink,
As he picked a fly wing,
"I still could eat more!
I still could eat more!"
